RAILROAD NEWS.

CONGESTED YARDS.
Delayed Shipments Are Causing Some Grief to Merchants.

The general agents of the various railroads here are enjoying the most uncomfortable time of their lives right now in explaining to shippers why their shipments have not arrived. All day long the telephones are kept ringing and the railroadmen are endeavoring to placate irate merchants who are clamoring for their winter goods. As a general agent put it this morning, "I do not know what to do. If I stay in the office I get it over the phone and if I go out on the street I get it face to face."

Never before in the history of the Denver yards has freight business been so congested. As an illustration of the situation the traffic manager of one large concern here had business in Denver last week. He undertook to hunt up a carload of carpets from the east and found that the car had been in the Denver yards some hours. Then he got busy and the result was that the officials promised on their sacred honor that they would shoot the car right out for Salt Lake instantly. He left Denver on Tuesday and up until today the car has not been moved from Denver.

All roads west of Chicago have the same story to tell. For the last month it has been practically impossible to get any shipment through from the Missouri river to Salt Lake under 12 or 14 days.

The fact of the matter is that the railroads simply have not got the motive power to move the big business. At present grain, livestock, ore and coal movements are exceptionally heavy and merchandise has to take its chance with the rest.

BACK FROM TONOPAH.
General Freight Agent J. A. Reeves and District Freight and Passenger Agent D. R. Gray of the Oregon Short Line returned from a visit to Tonopah where they went to look over the new territory recently added to the jurisdiction of the Short Line. They traveled by daylight the entire distance, met all the principal shippers and otherwise made themselves acquainted with the situation.

ENGINEER'S \$1,000 LUNCH.
Pittsburg, Pa., Nov. 18.—Fred Pickett an old locomotive engineer of the Pennsylvania railroad, says he has received a letter from Andrew Carnegie enclosing a check for \$1,000 to pay for a luncheon years ago when he was riding

with the engineer. Mr. Carnegie, it appears, was ravenously hungry, and gladly dined on the contents of Pickett's dinner pail. He has now paid for that meal.

LOST ALL IN MINING.
In answer to a motion for temporary alimony filed by Catherine A. Hall in the district court Frank R. Hall has filed an affidavit in which he declares that his income from his cigar business does not exceed \$40 per month. He also declares that he has lost all in mining speculations. He says the liabilities now amount to \$1,795 and that he is unable to pay alimony.

Miss Rebecca Morris, daughter of Mr. Morris, it was learned, was operated at the L. D. S. hospital about two weeks ago for appendicitis. Her case was a stubborn one from the first and now her condition has been greatly aggravated by a fully developed attack of typhoid fever. The struggle before her is a terrific and uncertain one and will be watched with grave concern by family and friends.

Judge Le Grand Young, counsel for the Utah Light and Railway company, is in New York negotiating the sale of \$1,000,000 worth of the consolidated mortgage gold bonds of the company. They are due Jan. 2, 1906, secured by a consolidated mortgage on the property of the company now held by the Bowling Green Trust company of New York. The money thus raised will be spent in improving the plant of the company.

The house of Joseph Rasmussen at Second West and Fourteenth South streets burned down last night, as the result of a fire which started in the laundry room. The loss is \$1,000, insured for \$500. The Salt Lake Security & Trust company held a mortgage for this larger amount on the house, which the insurance company will pay.

The Nineteenth light battery brought with them their gun equipment from Fort Riley, as the guns, carriages and caissons are of the new model just adopted in the artillery service. The batteries are caissons are of steel, and look quite different from those in regular use in the past. The cannon left by the Twenty-second battery are of the old, and made of iron.

William Harcombe, one of the oldest traveling men on the road, stated this morning at the Kenyon, that all over the northwest the trade in his special line, men's wear, was better than ever before. But he finds that the manufacturing industries are not developing at the same pace as the increase in the population of the country. He figures that the population of the United States is growing at the rate of 1,500,000 annually, and a sample of the phenomenal growth in some places, is well illustrated in San Francisco, where the number of registered voters increased by 20,000 and the local population 100,000 in two years.
