Married Women

Every woman covets a shapely, pretty figure, and many of them deplore the loss of their girlish forms after marriage. The bearing of children is often destructive to the mother's shapeliness. All of this can be avoided, however, by the use of Mother's Friend before baby comes, as this great liniment always prepares the body for the strain upon it, and preserves the symmetry of her form. Mother's Friend overcomes all the danger of child-birth, and carries the expectant mother safely through this critical period without pain. It is woman's greatest blessing. Thousands gratefully tell of the benefit and relief derived from the use of this wonderful remedy. Sold by all druggists at \$1.00 per bottle. Our little book, telling all about this liniment, will be sent free.

With four per cent. compound interest and life insurance free in the meantime, is the record of this policy in The Mutual Life Insurance Company of New York.

(From Evening Journal, Wilmington, Del., April 1.)
"A policy just paid by The Mutual Life Insurance Company of New York at the death of the late Isaac H. Frank, of this city, shows a decided advantage over a savings bank account. In May, 1925, the company issued Mr. Frank, Policy No. 170,564 for \$2,000, on the ordinary life plan. The total accumulated by the company was \$2,425, which is \$425 more than would have been realized from a four per cent. account in a savings bank."

What a contract of this kind will cost you can be learned by addressing the Company that has paid policy-holders some 190 Million Dollars more than any other company in the world, it having paid out over

BOISE, IDAHO.

The State of Idaho Has More Snow Than Usual—Encouraging Crop Outlook.

Special Correspondence.

Boise, Ida., March 7.—Over the greater portion of the state the snow situation at the close of the month showed marked improvement over that prevailing at the close of January; heavy falls of snow occurred over most elevated districts. In many instances intermingled with showers of rain which tended to pack the snow, placing it in excellent condition to maintain a constant waterflow. In some localities the snowfall of the month is reported as the heaviest monthly fall experienced in years. Showers were of frequent occurrence, especially in the mountains of Blaine, Idaho and Boise counties.

It is believed that this will also continue to the constancy of the waterflow. In view of present conditions, it is believed that, with average conditions prevailing during the spring months, crops in Idaho will carry rather more than the average amount of water during the coming season.

The illustration shows the point at which most of the traffic from China into Korea enters the latter country. The great Chinese wall, fondly imagined a few centuries ago to be capable of resisting the attack of any army that might be brought against it, may also be seen. The illustration is, however, of particular value at this time as showing the rugged, almost impassable nature of the country over which the Russian and Japanese armies must fight during the next few months.
