MINING, BUSINESS AND STOCKS.

THE ASSESSMENT AND ASSESSMENT ASS

THE WEEK ON THE EXCHANGE.

A Few Stocks are Stronger While Others Have Weakened.

NORTHERN LIGHT ACTIVE.

Mammoth Declining-May Day is Weaker-Dalton & Lark is Stronger -Yankee Stationary.

TODAY'S METALS:

SILVER 59 1-10 LEAD, \$4.571/2 CASTING COPPER 15

Although the week's business on the Exchange has not been large, it closes with a slight tendency to recovery on the part of some of the stocks.

Chloride Point sold as low as 10 but today it made a transfer at 14%. Da!ton & Lark is also a little stronger closing today at 7% bid. West Mountain Placer closes the week with 33 bld, a slight improvement over the quotations earlier in the week.

On the other hand, in spite of the strike of nice streaks of ore in the Yankee Consolidated, the stock remains flat at 12 after a brief spurt to

Mammoth is also a little weaker at 2.40%. Lower Mammoth is not materially changed from yesterday. It closes the week, however, considerably weaker than it entered it.

May Day is weakening still more after its inflation of last week. It sold today at 77%.

Northern Light is a little weaker today selling at 14%. Ben Butler is stationary around 2.

The week's business resulted in the sale of 89,500 shares for \$24,962.53. Closing quotations were posted as fol-

SHOWING IS IMPROVED.

Market Fluctuations Less Serious Today Than Heretofore.

Prices Come Up, but a Sag Follows-Live Stock and Produce Steady

New York, Jan. 13.-Moderate fractional gains were the feature at the start in spite of some irregularity at London. In the specialties there was activity, the metal shares showing some sharp gains. Sugar jumped 24 on an urgent demand from shorts. Realization and short sales of sugar wiped out most of the advance. Firmness prevailed elsewhere, and there were gradual improvements in actual trading, some of the less active specialties making jumps of 1 to 2 points. Sugar rose

to 1.20%. The bank statement brought realizing especially in sugar, and invited attack by the bears on the stock. Other specialties reacted a point or over. The railroads yielded a sharp fraction all around and New York Central lost 11/2. The continued pressure on sugar forced it down 4%. The covering by shorts caused a slight rally. The closing was dull and firm with only a few net changes of any importance.

MONEY AND BONDS.

Tintic Shipments. Special Correspondence.

WALL STREET MARKET.

New York, Jan. 13 .- The buying demand for stocks has fallen to a minimum and the speculative public is inclined to await light on the future course of events and the duration of the country's prosperity. The small buying demand has made the market

vulnerable to attack, and the Jemorali-zation in value of sugar cert.fi ales consequent upon the official intimations that a reduction or suspension of dividend was possible in order to carry on the trade war had a sympathetic influence on the whole market. The in-Selling from London accoun affected. early in the week depressed the internationals and railroad stocks, but they recovered somewhat when the selling ceased, with reduction in discount rates by the banks of England, France and

On Monday we will sell all kinds of our nut loaves at 25c lb. and butter scotch at 15c lb. from 2 to 6 p. m. Kolitz.

HIGH GRADE ORE IN SILVER COIN.

A 31/2-Foot Vein of Fine Galena Has Been Encountered.

THE PROSPECTS FOR COPPER

Not Likely that Production will Exceed Consumption for Some Time -Highland Boy Shipments.

A vein of high grade galena was encountered a couple of days ago in the Silver Coin property at Stockton. Manager J. J. Trenam and J. H. Marley returned from the property last night and in response to enquiries today stated that the vein of galena is about 31/2 feet wide and nearly all of that width is filled with high grade ore, which will run in values as high as 60 per cent lead and 25 ounces in silver. The strike was made in a drift along the vein of low grade ore recently encountered in the east drift from the tunnel, and at a depth of about 200 feet below the surface. The management is extracting and sorting the ore and a shipment will be made

A tunnel was started on the property last July, and after running about 400 feet into High Mountain in a southerly direction it was decided to cross-cut to the east. This was done and work had not proceeded very far when a large body of low grade ore was en-countered. A drift was then continued a short distance in a southerly direc-tion which resulted in the strike referred to above, which gives every indication of turning out a good thing.

THE WEEK IN BINGHAM.

Last Chance Will Soon be in Operation-Dewey Mill Repairs-A Quiet Week. At Old Jordan this week 103 men are

on the pay roll. A carload lot of ore was shipped from the Amazon Wednesday.

The Red Wing mill is grinding stead. ily and piling up another shipment of concentrates.

Parties working on Erie in Markham gulch are getting down a jag of ore from upper workings. This has been an unusually quiet week among the mines, largely due to

bad condition of roads.

The Silver Shield is shipping a twocarload lot this week; mine looking well Mixed and and ore improving in grade. A strike of two feet of very rich cop-

per ore is reported from the Illinois, neighbor of Congor and oFrtune. Among shippers this week were Niagara leasers, three cars; Red Wing, car concentrates; Petro, two cars; Dalton & Lark, four cars; Lead mine, three

cars; Amazon, one car.
There is talk that the Last Chance mine will soon be in operation, the work this winter to include a crosscut to go deep under the rich old stopes of Last Chance No. 2.

Dewey mill has been shut down three days, and meanwhile is being over-hauled and repaired. It will treat ashland and Petro dump ore as soon as roads are in condition for hauling. The snowstorm which set in yesterday afternoon and is liable to be on again before nightfall may put the roads in fine shape for hauling, in which case a

number of properties will be shipping

next week. Wednesday was pay day at the Highland Boy. It is stated the handout amounted to nearly \$8,000, but the late holiday festivities had a lien on it. The force now employed at the mine and on tramway is not far from 150 men. Joe Jennings and son were out from the city Tuesday looking after affairs

of Yampa Extension, adjusting December accounts, etc. Lower tunnel, run-ning on vein, is being pushed ahead and looks very encouraging. The breast is sprinkled throughout with ore, includ-

from Bailey gulch has now been driven over 1,000 feet, and is still in broken country rock. There are indications, however, that the vein is close at hand and may be encountered at any time.

UTAH ONYX TO THE FRONT. Pelican Point Onys Pronounced Equal If Not Superior to Any Other.

Prof. O. Cedarstrom, of Pelican Point, Utah, (Lehi, P. O.,) has received the following letter from the United States commission to the Paris Exposition of 1900, in reply to some samples of onyx which were sent East some time ago for the exhibit. The letter, which is dated from Boston, over the signature of Myron L. Fuller, reads as follows: have just received from you the set of onyxes mentioned in your letter. We are very much pleased with them and shall send all of them to Paris except the smallest piece which is too small and irregular in shape to appear at good advantage among the finer speci-mens of your own and other quarries. Some of your samples are equal if not superior to those sent by any other company.

After the exposition the display will be placed on permanent exhibit at the Massachusetts Institute of Technology and will be used in the courses of instruction given in building and ornathus be a perpetual advertisement of your quarries.

About \$4,500 has been spent in the development of the prop-erty from which Mr. Cedarstrom forwarded the samples. There are eight veins of onyx there, the largest of which is nine feet across and yields stone of excellent quality.

Eureka, Jan. 12.—The following ore shipments have been sent out from Tintic district during the past week:

Godiva 4 Centennial-Eureka 22 Showers New Imperial

shipped one carload of concentrates.

COPPER CONSUMPTION. Faiture of Some Mines Will Measurably

Offset Activity for Some Time to Come. In a review of the New York copper market for the past year the Engineering and Mining Journal says: For years past fears have been enter-

some day far exceed the demand, and this in spite of the fact that almost from year to year stocks have shown a decrease. This caused more conserva-tive people to become more watchful to avoid their being caught napping and finding themselves without sufficient

The year 1898 closed with a firm tendency and at practically the highest prices of that period, but it was not until early this year (1899) that infallible signs arose of consumption being practically larger than production and stocks, already very small, had to be drawn upon to such a degree that an upward movement in values was

no more than natural.

We have often pointed out before that an increase in the production of copper can only come about slowly and that existing large producing mines will not continue forever; and the truth of this has this year been very largely demonstrated. It is true the high level of prices has launched a number of enterprises which, while individually not producing a great deal, have aggregated considerable quantities. These have, however, been very largely offset by the short production of some of the larger producing mines, and the total increase for the year, in spite of the very tempting prices, is not more than the regular average during the last ten years.

On the other hand, manufacturers have been so busy, building, has been going on to such a large extent, the requirements for electrical purposes, for shipbuilding and railroad tion have been so large that the higher prices no longer proved a serious obstacle to consumption.

Sooner or later this will and must alter, and while at the end of the year a slight falling off in consumption is noticeable and has already told on the high prices established previously, consumption in general is still going on at so satisfactory a rate that it will take some time before a larger production will more than offset the consump tion and bring prices back to the level which we have been accustomed to.

LEITER'S GILSONITE DEALS. Reported that a Million or So Will be

Made Out of the Venture.

W. B. Andrew, a mining man who until a few years ago lived in Denver, has come from Salt Lake City, his present home, to settle business affairs, says the Denver Republican. He said last night that the gilsonite business in Utah is assuming large proportions, and that Joe Leiter and Bert Seaboldt have made a good thing out of the business and are on the road to make a far more profitable venture of it. Leiter has struck something profitable at last. Over in the Uintah country gilsonite can be secured in large quantities, and Leiter and Seaboldt have the inside track on the supply. They have been at work on this venture for months. From Castle Gate as a central point ship-ments are being made to St. Louis where it is said an excellent market exists. The poorer grades of gilsonite are used for paving, but the better grades command far better prices and are used as insulators. I have been told that Leiter and Seaboldt will make perhaps a million or so out of this

THE HIGHLAND BOY. Smelter Turns Out Three Cars of Copper Pigs in About a Week.

The Highland Boy smelter is still turning out a steady production of cop-per pigs. Two cars weighing about 120,000 pounds went out yesterday afternoon, which makes a total of three cars, or 180,000 pounds, of the red metal sey refinery during the past week. There can be no doubt regarding the profitable working of the smelter and mine, but the report that a profit of \$300,000 months comes as a surprise to the local saye that the annual statement has not yet been prepared.

Shipment of Cyanides.

The week's shipments of gold dust to the rooms of the Consolidated Kansas City Smeiter & Refinery company foot up to 1,150 pounds. The Mercur con-tributed a lot of 800 pounds, while the Dexter of Tuscarora reported with 100 pounds early in the week. West Dip closes the week with a consignment of 250 pounds.

MINING NOTES.

The Tesora of Tintic had a cor of ore on today's market. The Conklin sampler reported a car

of ore from Tintic today. A car of ore from the Mammoth of Tintic was on the market today.

The Centennial- Eureka of Tintic marketed nine cars of ore today. T. R. Jones was visiting the No-youdont property in Stockton yesterday.

A splendid showing of ore is reported in the Catherine property at Stockton. The use of the stock exchange has been rented to a pool club after the hour of 1 p. m. each day. R. G. Wilson left for Idaho today to

inspect some placer property near Palmer, in that State. The Stockton Gold Mining and Milling Company has paid something less than \$5,000 for the Jacobson group of claims

in the district. The gold exports reported from Western Aulstralia for the eleven months ending November, were 1,505,254 ounces.

valued at \$27,837,197. Harvey J. Jones of the Conklin sampler was at his desk this morning after a run out to Stockton, which he says

is putting on new life. A forty-horse power hoister and boiler with a big Cameron sinking pump has been ordered through a local machinery house for a mine at Sumpter, Oregon.

Monday's issue of the Mining Review will contain a descriptive article on the three electric power companies, with two illustrations of the Ogden compa-

The Lucille group of Bingham was yesterday conveyed to the Bank of Commerce by C. B. Markland of the Conklin Sampling Works. The price is stated to be \$6,500.

A typographical error made it appear yesterday that the Fire King in the St. Joe group, had at one time shipped are valued at \$1,000 a ton, instead of \$100 a ton as was intended.

J. P. Nelson who owns some claims at Dugway says there are dozens of claims in that section that would pay handsomely if transportation facilities were afforded.

Russia is the only important gold producer which showed a slight falling off during the past year, excepting of course the Transvaal, where production was abruptly stopped by the war. According to the London "Standard" the newly discovered gold fields in Kokkaido, Japan, cover an area of 650

square miles. The gold is almost ex-clusively found in small streams and rivers rising in the Hora Noboru hills. Sinking will be shortly started on the vein in the Brigham City Copper and Slate company's property. The management expect to derive enough money

will begin early in the spring. tained in some quarters that in consequence of the enormous increase in the production of copper, the supply would was in Elko Tuesday fixing up the pa-

pers in the final negotiations for the sale of his mining claims in Galena dis-trict. We understand he gets \$22,000 for the property, and the purchasers are Salt Lake parties.

Baker City Democrat: F. W. Crisnon and W. Hilton, of Salt Lake, were arrivals in the city yesterday. Mr. Crismon is associated with John C. Young in the ownership of the Gray Eagle group of mines at Cable Cove, as valuable a property as there is in the eastern Oregon gold fields.

BUSINESS NOTES.

There has been the usual first of the year sag in the price of some of the local commercial stocks. The decline nearly always follows the payment of the December dividends, and it doubtless has been accentuated by the feeling of uncertainty in the east over the war developments. Investors here watch the eastern money market very closely and the condition there re-flects on the market here, though, of course, to a greatly diminished extent. The year opens up prosperously with all dividend payers, and there is an advance in the rate of several concerns. The Deseret Savings bank has creased its regular dividends from 6 per cent to 8 per cent. Commercial Na-tional has advanced its figure to 6 per cent. The action of the Utah sugar board in paying an extra dividend on the last of the year in order to make the regular disbursement to stock holders 12 per cent instead of 10 per cent, is thought to indicate that the regular quarterly dividend will hereafter be 3 per cent instead of 21/2. Following are the latest quotations furnished by Broker Cutler:

Deseret National Bank.....\$240 00 Utah Sugar Co...... 14 75 Co-op Wagon & Machine Co..... 112 50 Provo Commercial & Sav. Bank.. 109 Lehi Commercial & Savings Bank 100 00 Thatcher Bros. B'nk'g Co., Logan 102 50 Rocky M't'n Bell Telephone Co... 102 50 The following institutions pay divi-

dends this month: State Bank, 2 per cent......\$ 5,000 00 Deseret Savings Bank, 2 per National Bank of Republic, 3 Provo Commercial & Savings 4.500 00 Commercial National Bank, 3 per cent Utah Commercial & Savings Bank, 11/2 per cent...... 3,000 00 Total\$47,400 00

Advices from Lehi state that the will come to an end next week, and that when the wheels come to a stop the figures of the output will stand very close to 13,500,000 pounds. The factory will have been in opera-

tion over four months and about 53,000 tons of beets will have been worked in that time. The company will now bend its endeavors towards pushing the improvements at the Lehi plant, which will increase its capacity three times by the time it is in readiness for next season's run. The location of a second auxilary plant will also be settled during next week and the present indica-tions are that the site will be in West Jordan district in this county.

The Co-op Wagon & Machine Co. has already begun the removal of portions of its stock to its new building, though the offices will remain where they are until April 1st. It is the intention of Manager Odell to have a grand ball some time during February, on one of the mammoth floors of the new build-ing as a fitting house warming of the company's new home. The Bank of Commerce stockholders have chosen the following directors for the ensuing year: W. W. Chisholm, J.

D. Kendall, Boyd Park, J. A. Cunning-ham, S. H. Fields, S. C. Park, E. E. Rich, of the 1,000 shares, 648 were represented. The directors chose as offi-cers: President, W. W. Chisholm; vice president, J. A. Cunningham; cashier, S. C. Park: assistant cashier, Max Smith. Broker Cutler states that the slight

falling off on the prices of local stocks has caused a large number of transfers during the week, showing that there is plenty of money still on the outlook for investment when favorable figures can be obtained. From \$30,000 to \$40,000 of stock and bonds have changed hands during the week, the largest deals hav-ing been in Church bonds, Streeet Railway bende, Utah Sugar stock, Z. C. M. I., and State Bank. The Home Fire board of directors at their recent meet-ing decided to invest \$10,000 in the stocks of State Bank and Z. C. M. I. at the going rates.

BARBED WIRE ADVANCE.

"The American Steel and Wire Company, with their head in Worcester Mass., with branches in Pittsburg and a half dozen other places in Pennsylvania, and other branch houses in Chicago, Cleveland, Jollet and other western towns, and which employs 30,-000 men, advanced the wages on the 1st of January 71/2 per cent. That is generous, but it must not be forgot-ten that the product which that comgenerous, but it must not be forgot-ten that the product which that com-pany turns out has, within twelve months, advanced in price 100 per cent."

Atchison p'fd

44 am Hale and Hearty Now,"

rites C. B. Hill, of Marshall, Mich. a living proof of the efficacy of A. Miles' Heart Cure, I have suf and 20 years from heart trouble ad became so bad I could not own to sleep. Physicians failed to ... Miles' Heart Cure, which benefite ne from the first. I continued using and now am in perfect health."

DR. MILES' Heart Cure

is sold by all druggists on guarantee first bottle benefits or money back. Book on heart and nerves sent free. Dr. Miles Medical Company, Elkhart, Ind.

The above article from today's Tribune considerably understates the case. The product of the American Steel and Wire Company has advanced in twelve months, not 100 per cent but 155 per cent. As this State is a large consumer of the wire, nails, etc., turned out by the company, a News representative spent some time this morning among local dealers, ascertaining what effect the enormous advance in the price of wire had had on the consumption in this State. The dealers were all very emphatic in their statements. A leading merchant said. "There is no ques-tion in my mind but that the enormous advance in the price of barbed wire is simply due to the arbitrary ac tion of the Trust in shoving up the price, not to the increase in the cost of raw material. Painted barbed wire in 1898 cost Salt Lake dealers some-where about \$2 per hundred. Today it is worth close upon \$5. Nails cost some thing like \$1.80 for a hundred pound keg; today they cost \$4.50. Is there anything marvelous in the face of an advance like this that the company is generous enough to make a 71/2 per cent advance in wages? As to the effect the advance is having

on Utah, I think it can be said without fear of successful contradiction that the price of barbed wire now is simply prohibitive, and generally it will be found that at the points remote from the railroads in Utah where wire has been used in the past, the farmers are now using poles, lumber and other cheap materials or else they are not fencing at all. Thus, if the wire Trust insist on maintaining the price. it must sooner or later defeat its own object, because farmers, with wheat at the present price, will simply stop buy

NEW YORK AND CHICAGO MARKETS. Letter and quotations furnished by B. H. Lawver & Co., Salt Lake City: New York, Jan. 13 .- Stocks opened

strong at fractional gains, except sugar, which was 1% over last night's closing prices. Trading was moderate. at slightly higher prices, the market showing some strength and advancing on shorts covering and some commis sion house buying. The foreign markets favored higher prices and the railroads made good gains. Sugar advanced to 120 3-6, almost 3 points rise. Tobacco made a 2 point gain, and Brooklyn sold above 70. The posting of the bank statement caused a selling splurge which sent sugar to 116, and the remainder of the market to about last night's level. The war situation was considered an excuse for selling out over the Sunday by some. Tennessee coal and iron and Federal steel closed at respective advances of 2 and

% points. Chicago, Ill., Jan. 13.-Wheat opened practically unchanged, corn unchanged, pork 5 cents lower. There was little trading, the market being confined to a range of % cent for wheat and % for corn. The dullness continued throughout the session, the close on wheat, corn and pork being steady at practically unchanged figures. SUMMARY OF PRICES.

THE MISSION

OF SAN CURO AND SAN CURO CA-THARTIC TABLETS is to prevent and cure Rheumatism. Kidney, Bladder and all Uric Acid diseases.

For years I was tortured with rheumatism For years I was tortured with rheumatim, I tried many remedies without getting relief. Some months ago I commenced taking what is known as California's Mission Remedies. I followed directions carefully, taking San Curo, applying Cala Cactus Liniment to my stiffened joints and using San Curo Cathartic Tablers to drain my system of impurities. At first I experienced little benefit but after giving the medicines a fair show I seem to be Permanentic cured. Judging from my own experience these remedies will do for others what they have done for me, if given a fair trial.
