SALT LAKE ROAD'S **NEW DISTINCTION**

Clark Line is Building Largest Bridge of Its Kind in The World.

WEIGHS ONE THOUSAND TONS

Yet One Man Will Be Able to Swing it Around to Various Positions.

The work of eliminating danger future floods along the line of the Sal Lake Route is still doing on. Materia Is reported on the ground for 10 bridge to be built between Las Vegas Callente. These bridges are intende to strengthen the Meadow valley wast country and will cost in the neighbol hood of \$300,000. Steel is being lab

along the Leamington cut-off. This i 75-pound steel, whereas the old was 10 pounds lighter. New steel will probably be laid along the Provo line, too.

When it comes to bridges the Salt Lake Route is building the largest of its kind in the world. This is the struc-Lake Route is building the interest of the kind in the world. This is the struc-ture being built over the old channel of the San Gabriel river at Long beach. One hundred and eighty feet will be the length of the single span, poised upon a pler of re-enforced concrete im-hedded 40 feet in the earth and rising 20 feet above the mean tide. The top-most portion of the bridge when lifted to permit the passage of a vessel into Long Beach harbor will be 200 feet above the water. In this bridge there will be 1,000 tons of steel, but so nicely poised and coun-terbalanced by hundreds of tons of con-crete, inclosed in a great box of steed, that one man, exerting his trength upon a steel rope, will be able to lower the structure into position.

the structure into position.

the structure into position. Taken as a whole, the bridge will represent the largest piece of steel construction in the west. Each of the two segmental girders—of half cir-cular shape—contain 75 tons of steel, while each of the track girders, which will span the 180 feet of water, will contain 65 tons, and will be the larg-est on the coast

contain 65 tons, and will be the larg-est on the coast. In the counter-weight box there will be 900 tons of concrete, which will nicely balance the hundreds of tons of steel and make light work for the two 30 horse-power motors to be installed between the segmental gir-ders and above the one-ping for the ders and above the opening for the passage of trains. Near by will be the operating house,

Near by will be the operating house, where the bridge engineer will be sta-tioned. At no time will it be neces-sary for the engineer to make an in-spection to see if the bridge, after being lowered, is in condition for the passage of trains, as he can tell by glancing at an automatic signal whether it is properly locked. More than a score of tons of rivets will be used, and of this amount about seven tons will be applied in the seg-mental girders, which are nine feet in height and 50 feet in length.

SHIPPERS VS EMPLOYES.

Latter Marmed at Cry of "Freight Increase or Wage Decrease."

Crease of wage Decrease. Chicago, Aug 7.—While shippers or-ganizations in all parts of the United States are fighting the railroads tooth and nail in an effort to secure reduc-tions in freight rates or to prevent the putting into effect of proposed increas-es, thousands of railway employes, learing that their wages may be re-duced unless the companies were per-mitted to increase their revenues, are planning a vast campaign in the inter-sits of their employers.

FROM POISONING DIES Gerald Maxfield, Youth of Butlerville Meets With Peculiar and

Fatal Accident. (Specia) to the "News.") Murray, Aug. 7 .- Gerald Maxfield, 17

years old, died at the Murray hospital last evening in great agony, the result of carbolic acid polsoning. The young man came in from Butlerville yesterday afternoon for a load of lumber. While in town he also nucchased a bot tle of carbolic acide and a quantity of meat. He placed the bottle of acid in

his hip pocket and the package of meat on the load of lumber and started for home. On the way the meat began to slide down from the lumber, and young Maxfield reached back to catch it. In so doing he broke the bottle of acid in his pocket, and the finid ran all down his side and leg. The acid pained him a great deal but he got into Cot-tonwood creek and wayded as much of the poisonous fluid off as possible. He drove on a little way, but became dizzy, and in trying to get off the wagon fell under the horses, were he was found in an unconsileous condition by an achis hip pocket and the package of under the horses, were he was found in an unconsicous condition by an ac-quaditance a short time afterward. The young man's father at Butlerville was at once notified by telephone, and he drove at once to Murray and took his son to the hospital. The young man died 15 minutes after ar-riving at the hospital. Young Maxfield was liked by all who knew him, and his death is a great shock to his parents, relatives and friends.

friends Funeral services will be held at But-ferville, with interment at South Cot-tonwood cemetery on Sunday.

CHARGED WITH BURGLARY.

John Martin was today charged with burglary in the first degree, in a complaint issued by the county attorney. It is alleged that Martin entered the premises of M. Levy, 258 south State street, on the night of Aug. 5, with the intent of burglary. A similar charge, for the same alleged offense, was made against Bert Woods.

NEW INCORPORATIONS

A copy of the articles of incorporation of the National Savings company of Arizona was filed today with Secy. of State Tingey, with a view of estab-lishing the principal place of busines here. It is a Phoenix concern, capital-ized for \$150,000, and the par value of

WEATHER OUTLOOK.

The clear weather continues, with of a breeze to minimize the August heat. The mercury did not rise higher than \$3 degrees yesterday, and he nights now are beginning to be cooler, so that one can steep. Moderate barometric depressions are central over the plateau, middle and north Atlantic the plateau, middle and north Atlantic states this morning, and high air pres-sure prevails over the north Pacific. Gulf and south Atlantic states, upper Mississippi and Missouri valleys and east Rocky mountain slope. These con-ditions have caused showers or thunder-storms over portions of California, Col-orado, Nebraska, Kanaas, Missouri, Ohio valley, lake region, Gulf and Atlantic states, with heavy rain at New Or-leans, Louisiana. The temperature changes are generally slight, except a rise of 14 degrees over portions of Idaho, and a fall of 10 degrees over portions of Colorado, Wyoming, Missouri, Penn-sylvania and Vermont, Generally fair weather is indicated for this locality owing to the absence of any well de-fined storms over this section.

CLERICAL FORCE IS COMING

Each of Six Districts in Charge of Assistant Forester, Who Will Report to Washington,

In order to expedite and render more effective and economical the work of administering the national forests, field headquarters are to be established by the forest service in the west, and the derical force needed to complete the organization will be mainly drawn from the force now employed in the Washington office. The change will take place not later than Jan. 1, 1909, and will probably begin by Oct. 1 of the present year.

At present the national forests are grouped under six districts with headquarters as follows: District 1, Missoula. Mont.; district 2, Denver, Colo.; district 3, Albuquerque, N. M.; district 4, Salt Lake City, Utah; district 5, San Francisco, Cal., and district 5, San Irancisco, Cal., and district 6, Port-land, Or. These headquarters will re-main unchanged under the new plan of administration. Each district will be in charge of an assistant forester who will deal directly with the supervisor of the forests of his district. Only questions of special importance will be submitted to the Washington office for action. In this way, the regular busiaction. In this way, the regular busi-ness of the forests will be much expe-dited, while the men who have charge of the business will be in almost conof the business will be in almost con-stant touch with the users of the for-ests. The men to take charge of the several districts have not as yet been selected, but they will be chosen from those in the regular service force who have had most experience in the work in the national forests.

STEADY GROWTH.

The growth of business on national forests, resulting from the use of their resources by the public, has been steady and rapid ever since the policy of wide use supplanted the policy of restricted use, at the time when the management of the national forests was placed under the forest service. One of the big problems of administra-tion has been to get into close touch with the users of the national forests. and this has already been partially solved by various expedients, such as delegating to local forest officers the authority to transact a large part of the national forest business. In this the national forest business. In this way the public and the service have been constantly brought closer to-gether. A second step in the same di-rection was the recent transfer of headquarters for supplies from Wash-ington D. C., to Ogden, Utah. A third step was the placing of a branch of the office of engineering, which has charge of permanent improvements on the for-ests, also at Ogden, which is centrally located. The contemplated change is, therefore, merely the completion of a plan which has already been partially worked out. BIG FORCE COMING. BIG FORCE COMING.

ests of their employers.

Definite ways and means have not vet been decided upon, but the general scope of the plan includes an extensive campaign of education to show that the interests of the public demand that the roads be allowed to increase their earn-ings. It is also proposed to present their side of the case before the inter-state commerce commission and before

their side of the case beford the inter-state commerce commission and before state raffroad commissions whenever an opportunity presents itself. The lead in the movement is be-ing taken by the recently organized Nebraska State Railway Employes Protective association and by the Am-rican Protective Association of Am-rica, with headquarters at Kansas 21ty, which is now being organized, and which already includes members from 13 western states. Members of the Chicago division of the Order of Railway Conductors have already tak-in active stops in the matter and rep-esentatives of the other railway broth-yrhoods are taking an interest in the schoods are taking an inferest in the movement, although it has not yet been officially taken up by any of the atter organizations.

latter organizations. The men point out that the expenses of the calinoids have been enormously mercased during late years, while treight rates have been gradually re-duced and that matters have now come to the point where an increase in rev-mue is imperative if the railroads are to continue to maintain their property in first class condition and make need-ed extensions and improvements while maintaining the present scale of wages.

SHORTAGE OR INCREASE?

Following close upon the heels of the report that coal mines are being workreport that coal mines are being work-' ed nowhere near capacity owing to car shortage, comes the report that idle tars are increasing. The increase was made up of 3,406 box cars. 1,466 coal and gondola cars and proportionate in-preases in the other varieties. These figures are for the entire country. Just why cars can't be provided for the handling of Rock Springs' coal produc-tion is yet unexplained.

W. H. BANCROFT BACK.

W. H. Bancroft, size president and general manager of the Oregon Short Line is back at his disk, after a three days' absence spent with E. H. Hard-man. Mr Bancroft met Mr. Hardman at Ogden and went west a short way with him.

ALL GATHERING DATA.

Officials of the Salt Lake Route are basisting federal and state officials in mathering data on the soft and water history of Lake Bonneville basin, the region which is believed to have been once under the waters of Great Salt lake, or Lake Bonneville, as it was called. The railroad is contemplating a folder on these subjects—subjects which thave given scientists and stu-ments of the water a wate folder to the stu-Sents of the west a wide field for study.

here. It is a Phoenix concern, capital-ized for \$150,000, and the par value of the shares is \$1. J. W. Hutchinson is president: B. Hutchinson, vice presi-dent: P. M. Ross, secretary and treas-urer. F. B. Scott is the local agent. The filing carried a fee of \$45.50. The Ogden Office Supply company filed articles of incorporation in the office of the secretary of state today, naming the following officers: Roscoe M. Breeden, president; Lamar Nelson, vice president; Frank C. Miller, secre-tary; Charles H. Eatinger, treasurer The corporation is capitalized for \$20, 000, divided into 2,000 shares, and will deal in all kinds of office supplies.

FOR UNLAWFUL FISHING.

Violators of Statute Receive Fine and Jail sentences.

Jeremiah Dennis, Justice of the peace of Marysvale, reports to State Fish and Game Warden Cromar that on June 18, William White of that place entered a plea of suffity to a complaint charging unbiwful fishing. A flue of 110 and costs was imposed, which was

paid. July 20, George Siddall was arraigned on a charge of using giant powder in a public stream, for the purpose of killing fish. In this case also a plea of guilty was entered, and Judge Den-nis fired the offender \$100. Siddall is serving foo days in the county jail. Other cases of the use of explosives is being investigated by Warden Cromar, and those found violating the law will be severely dealt with. Complaints charging unlawful fishing have been issued from the county at-torney's office, against Arnold Von Hake and Albert Johnson. "Bill" Bing-ley is the complaining witness and the men are accused of having thed in the Jordan river, Von Hake on Aug. 5, and Johnson, Aug. 6. July 20, George Siddall was arraigned
