Nearly Every Nationality is Represented in Baseball-Several Indian Players of Ability.

An old-time fan, whose interest in the players is evidently of a keen and anaytic nature, sends in a query concerning the nationalities of the various big league players. The section of his question in regard to the ruces is as follows:

"Speaking of nationalities, was there ever a really great French player, aside from Lajole?

"Is the game so distinctly American that foreign-born citizens never become expert at 11?

"There are some fine Indian players, like Bender. Does this fact show that It appeals to that nationality? Who are some of the other big Indians in the game?

Several Frenchmen of great ability have figured in the game besides the wonderful Lajole. The first French-man to gain lasting fame was Ber-throng of the Washington Nationals, whose record for running the bases in 1868, still stands unbroken. Get Them Without Expense. Washington, Nov. 5.—The commis-sioner of the general land office has formulated a plan whereby partles having some interest in lands, patents for which were issued years ago but which have never been called for by the patentee, may, without incurring the expense of searching for lost du-plicate receipts or furnishing ab-stracts of title, have such patents sent directly to the proper county officer for record. It is believed that this method will be the means of placing many of these ancient instruments of record and of straightening out title without imposing expense upon inrecord and of straightening out title without imposing expense upon in-terested parties other than the fees of county officers. ## SHUTOUT RECORD IN BASEBALL BROKEN.

All major league records for shutouts were broken in the National league this year, with a total of 158. The innova-tion introduced by the old league this year of reducing the accoud half of a double-header to seven innings or leas was responsible for some of these rec-ord-breaking shut-outs, as 16 of them were of seven innings' duration or leas, and occurred in the last third of the genson, after the curtailed double-head-ers began.

senson, after the curtailed double-head-ers began.
Without that increment, however, the number of shut-outs would have been unusual in the National league, for in the season of 1966 there were only 104 of them, and in 1965 only 87.
Chicago won 31 out of 14 shut-out sames in which the club took pari, handing the Phillies the largest num-ber-seight—while the Phillies only got back at Chance's men twice.
The Phillies won 16 shut-out sames and lost 17.
