Pure Charcoal Will Absorb One Hundred Times Its Volume In Poisonous Gases.

Charcoal was made famous by the old monks of Spain, who cured all manner of stomach, liver blood and bowel troubles by this simple remedy. One little nervous Frenchman held forth its virtues before a famous con-vention of European physicians and surgeons. Sccheyron was his name. He was odd, quaint and very determined. His brothers in medicine laughed at his claims. Thereupon he swallowed two grains of strychnine, enough to kill grains of strychnine, chough to Kill three men, and ale some charcoal. The doctors thought him mad, but he did not even have to go to bed. The char-coal killed the effects of the strychnine and Secheyron was famous. Ever since that day physicians have used it. special Correspondence Special Correspondence. Blackfoot, Ida., Nov. 5.—Last Satur-day. Oct. 31, a meeting of the sugar beet browers of Blackfoot was held in the Isis theater. General Manager Thomas R. Cutter of Salt Lake and Agricultural Superintendent Heber Austin of Idaho Falls were in attend. ance. The meeting was called to ascer-tain the feeling of the business men and farmers of Blackfoot and adjacent towns regarding the raising of sugar beets. Mr. Cutler explained that un-less a larger acreage was planted than there had been the last year or so it would be necessary for the sugar company to cease operating the factory, as the small crop of sugar beets raised here does not warrant the expense of operating two factories so close togeth-

fit. He was substantiated by J. F. Jen. sen and H. R. Whitmill of Basalt, who said that they have made a success of raising beets at the price paid by the Sugar company. A resolution was passed that it be the sense of the meeting that all present use their influence to increase the acreage, so that the factory could be kept in operation next
