PRESSURE OF LITTLE EFFECT.

A Bulge in New York Central Caused

Controlled Properties to be

Sought.

For a year and a half all energy was bent towards development; nothing being done toward are production un-til the closing week of 1965 when the mill was placed in commission again and shipments of crude ore resumed. At that time, the company faced the bonded indebiedness of \$209.000, be-sides an overdraft at the bank of \$22,-009, or a total of \$231,060. What the mine has been doing can therefore be readily appreciated.

Mr. Daly states that the operating Stock Braker, 216 D. F. Walker Block.

enced the sensation brought on by a genuine June snow storm. Fully 8 or 10 inches it was stated, by Supt. A. O.

Jacobson, inyesterday's storm. Mr. Jacobson says ore shipments are coming from the mine now at the rate of 50 tons a day, and that the mill is running with one shift work. Four new Wilfley concentrating tables, making a total of eight, have been install-ed, also one slimer have lately been added to the plant's equipment.

running on the south of the working shaft, and assure the permanency of their ore bodies, as well as greatly in-creasing the quantity of the ore in sight, of which Mr. Charles D. Kaeding estimates there are at least 6,000 ton available at the present time. What available at the present time. What its value will be he does not at this time care to say, having made no as-sayr on it, but that it will pay hand, somely to mill there is no doubt, and the quantity being opened up is en-couraging as well.

Walters and Howard seem to be able to come to the front most any old time with a bunch of high grade ore. Wed-nesday they broke into a new body that excels anything so far found. It was reached from a winze that is down 15 feet from the level started off from the shaft at the 35-foot mark. Some samples were brought up that are variously estimated from \$4 to \$50 per pound, and there seems to be a consid-crable quantity of it. In the winze there is about 50 inches that from appearances will run very much better than \$100 per ton for th ewhole of it. four inches o fihis is of a grade that does not require close examination to discover its value. Their neighbors are driving for the same ledge from which these values come, and will be

able to get moredepth. The Golden Gate Tunnel company has been organized to operate a consider-able block on that claim, and are push-New York, June 7 .- There were a number of sharp gains over last night at the opening of the stock market here today ing work on the Hart tunnel which is now into the hill about 150 feet, where while the general range was a small fraction higher. Illinois Central rose 2, most satisfactory showing is being Great Northern preferred, Denver & Rio a most satisfactory showing is being made. Several stringers of quartz have been cut, but it will require at least arother hundred feet before any values may be looked for. Two shifts are be-ing worked and the bore is going into the hill as rapidly as it is possible to send it. Grande and Locomotive about a point and Baltimore & Ohio, Chicago Union Traction preferred, Smelting and Consolidated Gas large fractions. send it. in the standard railroad stocks, particu-

# UTAH APEX PLANS.

An Expenditure of \$100,000 Would Place Mine of Dividend Basis.

Of the plans of the Utah Apex com-pany to issue \$500,000 worth of 5 per cent 10-year bonds, a Boston paper ERVE

"It is proposed to issue but \$100,000 of these bonds at the present time, the proceeds to pay for the building of a railroad spur to the mines, the build-ing of a tramway and the installation

Ing of a tramway and the installation of a compressor plant. "The directors are considering the erection of a smelter of 500 tons' ca-pacity, also a concentrating mill to handle the large amount of second-grade ores, which Engineer Pease says should receive early attention, but this is a matter for future rather than present consideration present consideration. "The directors of the Utah-Apex

ompany feel warranted by the conditions in pushing development work and not relying on the present slower plan of paying for development and improvements from the marketing of high-grade ore.

The Utah-Apex management is devoting a large share of its development work to the Parvenue tunnel, which should reach all the known ore bodies in the Utah-Apex group of mines, at depth. This tunnel still has about 1,000 feet to go to reach ore bodies. "It is believed that with \$100,000

judiciously expended the property can quickly be placed in a condition to pay small dividends, but the leading interests in the company believe that the I'tah Apex has greater possibilities than this and stockholders will be ask-

ed to authorize an issue of \$500,000 bonds so that the company will be in a position to issue these bonds at any time it is considered advisable for the company to build its own reduction works."

#### CONCENTRATES.

Supt. W. N. Rashing of the Fortuna mine at Bingham will be in from camp this evening. Winsdor V. Rice is expected to re-

turn from Nevada tomorrow. He has been looking after interests in the Fairview district. During the month of May the steam hovel working at the Cactus mine

THE SWIFT SPECIFIC CO., ATLANTA, GA.

OXNODADS have from \$23,000 to \$25,000 monthly; while Seev. Lambourne has been calling in bonds at the rate of \$45,000 per month. So " can be seen the earnings of the company have been no less than \$70,-000 every 20 days. The receipts of the first 20 days of each month have been applied to pay off bonds and the re-maining 10 days to meet other expenses. There is not the slightest doubt but that a much better record could have been made, but the man-agement has been making no effort to get out big tonnage. There has been no crowding anywhere. The crude ore sent direct to the furnaces was only that encountered in development, while the, mill, built originally to handle about 400 tons a day, has been fed only about 175 tons and is making a saving of values of better than 90 per cent, whereas under former conditions, it appeared to be a difficult matter to save 50 per cent.

Eesides making closer savings, the Daly Judge company has been fortunate in getting a much more favor-able contract from the smelters than was possible a few years ago, the ores being of a character greatly desired to mix with the silicious ores being brought in from Nevada. The operating costs have been materially reduced too, so all in all, the Daly Judge compuby is shaping up to make money fast,

MARKET IN BETTER TONE.

Daly Judge Stiffens Slightly-Columbus Con at \$8-Closing Quotations.

The market for mining stocks showed some improvement today. The asles were larger than the records showed them to be yesterday and there seemed to be a slight stiffening in Daly Judge moved up several otches, closing on an open board sale at \$11.621g. Columbus Consolidated reached the \$8 mark, but Beck Tunnel continued weak and uncertain. Little Bell went at \$12.35; but May Day refused to budge above 15 cents. Ohio Copper, offered at \$1.40, found a taker. while Yankee Con, went at 35 and Uncle Sam at 42 cents, closing quotations and sales

A. S. CAMPBELL.

James Wood Here to Post up on Modern Ore Dressing Methods.

James Wood, superintendent of the reduction plants of the Calumet & Arlzona Mining company at Douglas, Ariz., is a visitor in Salt Lake and was entertained last evening by George O. Bradley, chief engineer of the Utah opper company. Mr. Wood has been in Montana where he went to inspect the big plants of the Amalgamated and other copper companies and is now on his way home. At the Calumet & Arl-zona, Mr. Wood states, 1,000 tons of ore is being handled daily. Before leav-ing for the south it is the intention of the visitor to see some of the Sali Lake plants. The new Garfield smelters and the mill of the Utah Copper company, now under construction at Garfield, will be of particular interest to him.

### MINING CLAIME SOLD.

the plant is working to its full ca-

A mining deal was consummated last week whereby George T. Banovich be-came the owner of an undivided onethird interest in a group of mining claims consisting of the Little Frank, claims consisting of the Latter Frank, Hercules, Troy and Black Chief, says the Lode of DeLamar, Nev. This prop-erty is located about two miles south-east of DeLamar, Assays ranging high in values have been obtained. The group is under bord to New York par. ties. We understand the bond is for \$150,000, with a forfeit of \$15,000 if the bond is not taken up in three months.

#### CONSOLIDATION TALK REVIVED

The wires brought the information from Boston today of a stiffening in the price of both Utah Copper and Boston Con., and has revived consoli-dation talk for those two properties.

## PALMETTO ACTIVITY.

Recent Development Has Disclosed Much High Grade Ore.

The results of yesterday's work on the Burlington Hill were most encour-aging, says the Herald of the Palmetto, Niv., district. In the crosseut from the Evans and Fenn shaft, at a distance of 29 feet, a shoot of ore was out that pans as well, if not better, than environg found at that depth, wisewhere on the hill. For several days past it has not been particularly cound fired before going home the day versions was cleaned out and some sannings were made, it was soon found that something had even discovered worth looking after. The pannings erage value in excess of \$100 per ton, and are from a vein about two feet in width. As a consequence of this disovery the boys are feeling very much elated. Not to be outdone in any way, John-

ny Frank and Owen Devlin cut into a shoot of ore also, on the same shaft, that shows up a fine string of the yel-low stuff, this being from the 75-foot level, as was that of their neighbors. Both of these finds were from the ledge
