

sary of the birth of Washington was observed by the chaplain of the house when that body opened today. Mr. Williams, the minority leader, in accordance with the notice he gave Saturday, moved that the clerk read the farewell address of Washington, and that immediately thereafter the house adjourn.

A point of order made by Mr. Payne was sustained on the ground that the motion embraced two propositions.

Mr. Williams then moved that the house adjourn and pending that unanimous consent be given for the read-ing of Washington's farewell address, Having coupled a request with his mo-uon. Mr. Williams' motion again was held not to be in order, when he asked unanimous consent that, this being Washiagion's birthday, the farewell ddaress be read. Upon the demand of Mr. Payne for the regular order, Mr. Williams moved to adjourn. On roll call the motion was lost, 93

to 95. Three Republicans, McCreary, Patterson and Sibley, of Pennsylvania, voted with the minority for the motion. Otherwise there was a party alignment with the Republicans opposing adrnment.

The house then went into committee of the whole and resumed considera-

of the whole and appropriation bill. Mr. Rixey of Virginia, a member of the naval affairs committee, said he was surprised that the secretary of the may, in a recent address, should treat the support of the navy in a partisan way. He added that the secretary was reported to have said at a recent banquet in New York that he viewed with apprehension the observations recently made in the senate by the senator from Maryland, (Mr. Gorman). Mr. Rixey said it was difficult to understand why observations of the senator from Maryland, who, the secretary said, is easily the leader of his party, should cause the secretary such serious appre-hension. He said it could be accounted for only by the fact that the secretary remembers that the two political parties will meet in a few months to nomin-ate their candidate, and that with his prophetic eye he sees that this sen-ater will be selected and then at the general election, which follows, that this standard bearer will be successful and be transferred from the forum in which he is at present in a minority to n a posit

"What is the reason for the great ex-penditure of \$96,000,000?" asked Mr. Burton and answered by declaring that it meant that this country is but in-viting the nations of the earth to at-tack us, and that this country is going to enter a field opposite to that oc-cupied in the past and seek to control the polities of the world. He wanted to know what hobgobblin dis-turbed the dream of the gentleman who feared Germany would attack the United States.

"The nations of the earth respect us," he said. "They honor us, and so far as fear is salutary they fear us."

The tendency now was toward peace, continued Mr. Burton, and he appealed for the employment of diplomacy instead of guns in the promotion of peace. He questioned the minority as to why they had not opposed these expenditures. He scouted the idea that preparation for war insures peace and in conclusion said: "I am unable to vote for a bill which declares that the United States, which should be the leader in all works of peace, is going to double, treble and quadruple its naval establishment, all under the as-sertion that it is in the interest of peace. Mr. Hear then turned his attention to the canal treaty, announcing his inention to vote for it.

His former speech, he said, had been connected with a resolution asking for information such as was usually freely given. He had been surprised at the efforts to delay and hinder that reso-lution, but that he had no feeling against the president was, he said, abundantly shown by other expressions on his part, favorable to Mr. Roosevelt, some of which he quoted. He considered that he was doing the president a real favor in asking for the information, because of the criticisms of the unfriendly press, and he believed that all the foul and infamous charges would be fully met by supplying all the information to be had on the sub-

statement." Again expressing his conviction that later events had vindicated his course, Mr. Hoar expressed his confidence in the "wisdom and courage of the president," saying that he had no secrets from the people, and adding: "We ap-prove what he has done already and what he has promised to do." Massachusetts had, he also said, supported Mr. Roosevelt through one administration and expected to support him in another.

Passing to the more immediate con-sideration of the treaty, Mr. Hoar said that the independence of Panama was an accomplished fact, and all that the senate has to do is to deal with the treaty on its merits.

"Given a healthy body," says Dr. R. V. Pierce, the specialist in woman's dis-eases, of Buffalo, N. Y., "and a healthy mind, and every one can cultivate and enjoy happiness." Riches do not make happiness, nor does it do to worry about to-morrow. Do what you can now. Do the best you know how, then boldly face the after-a-while. In nine cases out of ten the person who worries, who can't sleep o'nights, and feels blue and at discord with all the world is the person whose stomach is not quite right.

digestion will cause heart palpitation. If the stomach is inflamed or dyspeptic, the blood does not get the food it requires. If the blood is wa-tery, if it has accumulated poisons, every other organ of the body will suffer-heart, liver, lungs and kidneys. Treat the stomach first. Dr. Pierce's Golden Medical Discovery maintains a per-son's nutrition by enabling one to eat, retain, digest and

assimilate the proper nutritious food. It overcomes the gastric irritability and symptoms of indigestion, and thus the person is saved from those symptoms of fever, night-sweats, headache, etc., which are so common. A tonic made up largely of alcohol will shrink the corpucies of the blood and make them weaker for resistance. Cod liver oil makes the stomach

groan because it is irritating. What is needed is an alterative extract like Dr. Pierce's Golden Medical Discovery, made of roots and herbs, without the use of alcohol, that will assist the stomach in assimilating or taking up from the food such elements as are required for the blood, also an alterative that will assist the liver into activity and cause it to throw off the poisons in the blood. When we have accomplished this we have put the system into a fortified condition so strong that it can repel the germs of disease which we find everywhere-in the street cars, the shops, the factories, the bedrooms, wherever many people congregate, or where sunlight

and good air do not penetrate. "It has been seven months since using Dr. Pierce's Golden Medical Discovery, and I only used three bottles of the medicine when it made me feel like a new man," writes S. A. Miller, Esq.
