MINING, BUSINESS AND STOCKS

PICTURE ORE IN SEVEN TROUGHS

Sensational Find is Reported by Ray D. Harris on Therien Ground.

STRIKE SETTLES A QUESTION.

Continuity of Mazuma Hills Lode Proved—Leasing Companies Busy.

A message from Ray D. Harris, the former Salt Lake newspaper man who is now engaged in mining in the Seven Troughs mining district, conveys the information that a sensational strike of gold ore has been made on the property of the Seven Trough Therin ground, and makes the statement that selected samples of rock have been found which have a valuation of $9 a pound. The find was made within 50 feet of the main street of the town of Seven Troughs, which, Mr. Harris says, coupled with recent startling developments in the Kindergarten mine and Regan lease on Mazuma hill, has caused a perfect furore of excitement throughout the district.

The strike on the Therein is accounted one of the richest surface discoveries ever made in the district.

The uncovering of the pay vein, disclosing two feet of quartz literally alive with free gold, drew several hundred people to the scene within an hour.

Crowds scrambled all day for casual pieces of specimen rock thrown out with wasty, and carried hundreds of these away. A ton of incredibly rich ore was sacked within six hours from a three foot hole.

The strike settles a long-standing question by carrying the great Mazuma Hills Bonanza lode across the guich to the south. Four leasing companies are operating on the trend of this famous ore as soon as it crosses Therein ground, running south and preparing to take advantage of the discovery. An assay from the high-grade streak showed a value of $17,320 in gold, and nearly 500 ounces in silver. On the 225-foot level in the Kindergarten mine the first big body of picture rock has been encountered, much of it being worth $100,000 a ton, and a two-foot streak in the five-foot vein will average well into the thousands. A shipment of the richest ore will be sent to Lovelock in a few days. In the winze in the Reagan lease, on the 85foot level, ore is being sacked with great rapidity that averages $1,445 per ton. A shipment of this will be ready in a few days.

The Mazuma Hills and Seven Troughs mines are each sending out about 20 tons of excessively rich ore today.

ON MINING EXCHANGE.

Colorado and Seven Troughs Feature In Today's Trading.

The forenoon sales of the mining exchange footed up to over $21,000 today and the heaviest contributors to this was Colorado and Seven Troughs. The former closed weak, while the latter displayed a tendency to move upward despite the fact that the stock was being offered in big bunches. Crown Point held its own around 26 cents, while Mountain Lake was taken all the way from 50 up to 52 cents. Sioux Consolidated was on the alert and sold as high as 19 cents. There was no trading in the unlisted stocks. The closing quotations and sales were:

PLENTY OF ORE.

Rather Satisfactory Condition Found At Nevada Douglas Mine.

In the drifts from the 500 level of the Ludwig mine of the Nevada Douglas Copper company, says the Yerington Times, there is nothing but ore, some, of course, richer than others, but ore no matter where you turn. Take your pick and sink it into the floor of any drift and it encounters ore. It was on the 550-foot level where the large body of calcocite was broken into carrying values up to 30 per cent copper. This body might be termed a block of ore running into the earth. It is 30 feet wide and ledged with it is native copper. It has been shown up on the 650 level, as have all the ore bodies which occur on the upper levels. The Ludwig is, therefore, in all reality, one of the greatest copper mines in the known world.

There are evidences beneath the surface in the Ludwig which show that some men are too easily discouraged in the great game of mining. On the 500, for instance, a fault occurred. Instead of passing through it, the former owners gave up the ghost and diverted their attention to another locality. Mr. Arentz, of the Douglas company, went through the fault and broke into as fine a body of sulphide ore as one would want to see. This was in the south drift. The last named gentleman also sent a drift to the west. After passing through the fault here, another ore body was encountered; in fact there were two, one in sulphide and the other a carbonate. This drift is particularly impressive; on one side of the drift the wall glistens diamond-like with the sulphides, while the other is beautifully resplendent with its carbonates.

But it is not necessary for one to go underground in the Ludwig to realize that it is a great mine. Stand at the office building and you can see nothing but ore being raised to the surface. It is a fact that the waste dump is small compared with the dumps of ore. In the three bins there are tons of ore that will average better than 30 per cent. There is what is called the sulphide dump, where the sulphide ores are placed, and another one where nothing but carbonates repose, awaiting treatment.

There is nothing lost at the Ludwig. The very water is used. Into the liquid tin is placed, and the result is that the tin is eaten and almost pure copper remains. It is without question or argument, one of the greatest mines in the world, and Yerington is justified in claiming for itself a property that alone has more ore in sight than any other mine in the state, with the possible exception of the Bluestone, another Yerington property.

CAPT. MACVICHIE HOME.

Says Ohio Copper-Bingham Con. Merger is Being Worked Out.

Capt. Duncan MacVichie came in from the east yesterday after an absence of several months in the financial storm centers, and brings assuring news concerning the probable amalgamation of the Bingham Consolidated and Ohio Copper companies. "There will likely be something to give out to the public in a few days, but just at this time," declared the captain, "I do not feel at liberty to go into details. I feel, however, that things will come out all right, and that the plan agreed on will work to the benefit of shareholders of both corporations. There has been some little opposition to the proposition as outlined, from a few Ohio shareholders, but those who have become better informed as to conditions in the Bingham Consolidated mines have fallen into line. Shareholders will receive a circular letter in a few days giving all the details in connection wth the transacton."

Capt. MacVichie insisted that he had nothing to give out relative to the proposed smelter, but intimated that some of the Boston interests in the enterprise will be coming out this way during the next few weeks. Capt. MacVichie believes it will be some little time before the metal markets get back to normal conditions again; that there is an enormous surplus of lead on hand, and which will take some time to use up; but he is more cheerful about the copper situation. He would not discuss the personal affairs of F. Augustus Heinze.

A. S. CAMPBELL, Stock Broker, 215 D. F. Walker Block

RAILROAD TO THE AJO DISTRICT

A Letter from George Tinsman Gives Details About the New Enterprise.

LOCATION IN ARIZONA.

Ajo Mines Discovered Many Years Ago—Ores Shipped Were to San Francisco.

Boston contractors are organizing a company to have a capitalization of $3,000,000 for the purpose of building a railroad from Theba, Ariz., on the Southern Pacific into the Ajo mining district of that state. A letter from George Tinsman, an old Salt Laker, now with the Rendell Reduction company of Gila Bend, Ariz., brings the details to Salt Lake. Owing to the wonderful wealth of the Ajo district and its enchanting history the announcement that it is to be brought into communication with the outside world is of widespread interest.

The Ajo district was the first mining country worked to any extent in Arizona. Its ores were discovered many years ago. In the early days it was worked almost solely for silver and gold and no attention was paid to the copper ores. The silver and gold ore found was shipped to the old San Francisco smelter and thence to Swansea, Wales, for refining.

Even at the present day the lack of transportation facilities that are within reasonable cost has been a big factor in retarding the development of the properties there on an extensive scale.

Many experts have visited the region and have reported that copper in great quantities is to be found there. They have reported that the surface showing are the most remarkable ever seen and have found from the numerous prospect holes in those mountains that the hills are almost solid copper ore and it has been proven with the sinking of shafts that the values continue.

ONTARIO TUNNEL.

Much Satisfaction Expressed in Park City Over Conditions There.

If conditions at the Ontario drain tunnel were encouraging a month or a week ago, says the Park City Record, they are manifold so now. With the water going down in the shaft at the rate of four feet per day, workmen going on shift via No. 2 shaft, No. 3 shaft practically dry at the 1,200 level station, the management certainly has reason to feel elated, and it seems but a matter of a few weeks at least until the task of years shall have been successfully accomplished. Trips of inspection have been made down both shafts this week and are in excellent shape considering their long disuse, and in No. 3 the water is now more than 40 feet below the 1,200, and is going down, as stated at the rate of four feet in 24 hours. A perfect realization is felt, however, of the great amount of careful work yet to be done before the tunnel is permanently opened and the mine clear of water, and the management is proceeding with every precaution to guard against the danger of caving and other difficulties very likely to be encountered. Manager Bamberger visited the mine yesterday and took a look at conditions underground. The opening of the tunnel has long been the main topic of discussion in this camp and now that the crucial point is being reached the interest manifested is greater than ever. It is generally considered that the tunnel is the keynote to the situation in Park City and its opening will no doubt change the aspect of things very materially.

SAN FRANCISCO MARKET.

CONCENTRATES.

The Daly Judge mill at Park City is being operated one shift a day.

Edward R. Zalinski, the mining engineer, has gone to southern Nevada on professional business.

The Ontario boarding house at Park City has been placed in service again. It had been closed for several years.

About 30 miners left Park City a few days ago for Butte, Mont., where they went to seek employment in the mines.

The ore shipments from the Park City district last week amounted to 1,671,810 pounds, the contributing mines and amounts being: Daly Judge, 508,000; Silver King, 864,100; Daly West, 299,710.

The Utah Pioneer Oil company, formed recently by Tonopah capitalists, has started active drilling operations in the Uintah field in eastern Utah. Frank Hastings is in charge of the work.

The annual meeting of shareholders of the Mason Valley Mining company was scheduled to take place in Portland, Me., yesterday. It was not anticipated that anything outside of the election of a board of directors would come up for consideration.

Lawrence Townsend has announced that he will retire from the service of Samuel Newhouse soon after the return of the latter from New York and will return east again to make his home. Mr. Townsend has had charge of the real estate enterprise of Mr. Newhouse and has had general supervision over the construction of the new skyscrapers on south Main street.

The electric haulage system installed in the Daly Judge mine at Park City is said to be giving splendid satisfaction. It seems strange to a good many people that other mines in the Park City district have not long ago discarded the mule in the movement of ore trains. Now that the Daly Judge company has adopted this modern method, probably other Park City companies will speedily fall into line.

GIVEN UP TO DIE

B. Spiegel, 1204 N. Virginia St., Evansville, Ind., writes: "For over five years I was troubled with kidney and bladder affections which caused me much pain and worry. I lost flesh and was all run down, and a year ago had to abandon work entirely. I had three of the best physicians who did no good and I was practically given up to die. Foley's Kidney Cure was recommended and the first bottle gave me great relief, and after taking the second bottle I was entirely cured." Why not let it help you? F. J. Hill Drug Co., "The Never Substitutors.

SOME HESITATION SHOWN IN ADVANCE

Stocks Climb Upward Reluctantly, Great Northern Preferred Leading.

New York, March 10.—The opening movement of prices of stocks today showed some hesitation but was mainly upwards. Changes were small throughout and gains reached a large fraction only in Great Northern preferred, Southern Railway, Erie second preferred and Republic Steel preferred and a point in United Railways & Investment. General Electric declined 1¼ and New York Central ¾. While the movement was narrow the dealing were quite active and widely distributed.

The realizing of the professionals and the distribution of the buying orders at points caused alternate upward and downward movements within a narrow range. A decline after the opening was checked when Union Pacific and Reading were bought heavily and lifted a point above their low prices. Considerable strength was also shown by other less active stocks, Pressed Steel Car preferred rising 4½. Denver & Rio Grande preferred and Consolidated Gas 2, Norfolk & Western 1⅜ and New York Central, Southern Railway, American Smelting and American Car preferred 1. The market weakened before 11 o'clock and the level of prices fell a fraction below last night. Pennsylvania and Illinois Central preferred fell a point. Trading became dull at the decline.

Profit taking was renewed with some activity and declines extended so that several of the active stocks, including Union Pacific, St. Paul, Northern Pacific, Missouri Pacific, Baltimore & Ohio and International Paper preferred fell 1, and Delaware & Hudson, American Sugar and International Pump 1¼. Colorado & Southern second preferred and United States Rubber first preferred rose 1 and Kansas & Texas preferred 2½. Westinghouse Electric first preferred sold 10 below the preceding sale. There were fractional falles before noon.

Bonds were firm.

A rally set in after 12 o'clock which increased in force gradually until the majority of stocks had recovered the decline.

A re-action occurred again which, however, did not hurt prices much and the ground was later recovered. Business was fitful, the market showing short periods of activity and then intervals of dullness. United States Rubber second preferred gained 5 points and International Mercantile Marine preferred 2. Chicago Great Western debentures yielded 3.

LIVESTOCK.

CHICAGO.

Chicago, March 10.—Cattle—Receipts about 4,000. Market steady. Beeves 4.25@6.30; cows and heifers 2.00@5.25; Texans 4.00@4.85; calves 5.00@6.75; westerns 4.00@5.00; stockers and feeders 3.00@3.90.

Hogs—Receipts about 22,000. Market steady. Lights 4.40@4.65; mixed 4.40@4.75; heavy 4.45@4.75; rough 4.45@4.60; pigs 3.75@4.40; bulk of sales 4.60@4.70.

Sheep—Receipts about 11,000. Market strong. Natives 3.65@6.00; westerns 3.75@6.00; yearlings 5.50@6.25; lambs 5.60@7.10; western 5.75@7.15.

St. Louis, March 10.—Wool steady. Territory and western mediums 20@22; fine medium 18@20; fine 15@17c.

PRODUCE.

CHICAGO.

Chicago, March 10.—Trading was heavy at the opening of the wheat market today and prices were weak. The government report of yesterday on the amount of farmers' reserves and lower prices at Liverpool were the chief depressing influences. Commission houses and pit traders were heavy sellers. May wheat opened ⅛ lower to ⅝c higher at 95⅝ to 96⅛ and sold at 95⅞.

The corn market was strong, shorts covering actively because of yesterday's government report. May corn opened ⅜@½c to ⅝@¾c higher at 64½ to 64⅝ and sold up to 65.

September oats were in good demand but the remainder of the market was dull. The tone of the market was firm. May opened ¼c higher at 53⅝ and sold up to 53¾c.

The provisions market was quiet and easy. Live hogs were 5 to 10 cents lower. May pork was a shade higher at 12.15 and sold down to 12.07½.

Lard was 2½c lower at 7.92½ and sold at 7.87½c.

Ribs were 2½c lower at 6.80 and sold at 6.77½.

The wheat market rallied somewhat because of the strength of corn but later became weak. May declining to 93⅜. The close was weak with May 2⅝c@2¾c lower at 93⅝@93½c.

Corn prices ruled strong all day. The high point for May was 65¾. The close was firm with May ⅝ higher at 65@65½c.

Close—Wheat—May 93⅜@93¾; July 89½; Sept. 86¾.

Corn—May 66@ ; July 62½ Sept. 61¼.

Oats—May (old) 93⅜; May 51½; July (old) 44½; July 43⅜; Sept. 37½@37¾c.

Pork—May 12.07½; July 12.45 to 12.47½.

Lard—May 7.80 to 7.80@7.82½; July 8.02½@8.05; Sept. 8.22½.

Ribs—May 6.75; July 7.05.

Rye—Cash 82@83.

Barley—Cash 75@82.

Timothy—March 4.75.

Clover—March 20.00

UNIVERSITY NOTES.

Prof. Wm. M. Stewart returned yesterday from Washington, where he has been attending the session of the superintendent's section of the National Educational association. Prof. Stewart addressed the gathering on the subject of training teachers in normal schools and agriculaural colleges.

A fact that the officials at the University of Utah are very studiously suppressing is that Janitor DeBry discovered a dead man in the chemistry lecture room this morning. When the functionary went in to sweep the room on the third floor he was shocked to find a dead body propped in one of the chairs with a hat marked "07" lying beside him. Alarm was immediately sent to the medical department and upon investigation it was found to be one of the embalmed bodies from the medical school which had been conveyed there during the night dressed and placed in one of the students' seats The janitor found an ambulance corps and conveyed the codaver back to its proper place.
