Eleven Per Cent of Tartrate of Lime Discovered in Price's Baking Powder.

Analysis of Price's Baking Powder, of Chicago, shows:

LIME..... 3.53 per ct.

AMMONIA..... 1.05 per ct.

Starch..... 19.00 per ct.

Prof. Habirshaw, of New York, found the following in Price's Powder:

TARTRATE OF LIME..... 11.85 per ct.

Aside from the inferiority of a powder containing a useless substance equaling about one eighth of its entire weight (and which is the cause of the great lack of strength of Price's Baking Powder, as shown by the tests of the Government Chemists), there is to be considered the serious consequences that may arise from taking this large amount of lime into the system.

Lime cannot be decomposed by heat, and is not eliminated in mixing or baking, and therefore all of this enormous proportion, as found in Price's Baking Powder, remains in the bread, biscuit, or cake with which it is mixed, and is taken into the stomach.

By the application of heat to lime carbonic acid gas is driven off, and there is left quick lime, a caustic so powerful that it is used by tanners to eat the hair from hides of animals, and in dissecting rooms to quickly rot the flesh from the bones of dead subjects.

Lime mixed with starch (and both are found in Price's Powder) will produce a ferment. The process is not quick, and does not take place until the food in which the baking powder is used has been some time in the stomach. Indigestion, dyspepsia, and more serious disorders result.

The cause of this large amount of Lime in Price's Baking Powder is the use of cheap and impure materials.

Prof. C. B. Gibson, Chemist of the College of Physicians and Surgeons, Chicago, had in view these impure powders containing lime, like Price's, when, after having made an examination of many of them, he volunteered the following testimony that Royal Baking Powder is the best and purest in the market:

THE ROYAL ABSOLUTELY PURE.

"ROYAL BAKING POWDER Co.: I recently procured a sample of your (Royal) baking powder from the kitchen of a private family in this city, and subjected it to an examination. I found it so different from many of the baking powders advertised as 'strictly' and 'absolutely pure,' and so far superior that I thought you would be pleased to know it, and might find use for the certificate.

"In view of the vast difference and stupendous frauds that are offered to the most 'gullible' people on the face of the earth, it pleases me occasionally to strike an 'honest article.'

"Respectfully,

C. B. GIBSON."

Z. C. M. I. SALT LAKE CITY, May 15th, 1884.

H. S. Eldredge, Esq., Supt. Z. C. M. I.,

DEAR SIR.—I am the owner of a Miller Wrought Iron Range, No. 18, with elevated oven shelf, which I purchased from you and consider it just capital. I believe it consumes less fuel than the ordinary No. 7 Stove; it is roomy, and large enough for a family of thirty persons; it bakes well and has the best attachments for hot water I ever saw, requiring no extra fuel to keep forty gallons at boiling heat, it takes up but little room, is plain, and consequently easily kept clean, in fact it is homelike and comfortable.

When in Cincinnati in January last, I learned from one of Mr. Miller's salesmen, they had just taken in exchange for a larger one, the first Range they ever made, which, after being in constant use for over sixteen years, was apparently as good as new.

I only know of three defects with it, it has to be set in place, it has to be cleaned occasionally, and you have to buy Coal or Wood for it; if you can find something that obviates these inconveniences, do so, if you cannot, then buy a Miller, and you will always find your wife happy, and your food well cooked.

Yours truly,

E. H. PARSONS,
547 Second South Street E.

Z. C. M. I.,

SALT LAKE CITY, May 19th, 1884.

GENTLEMEN.—The Miller Wrought Iron Range I purchased from you, gives the greatest satisfaction as regards its Baking and Cooking qualities and also its Water Heating Apparatus; I do not believe its equal can be found, and as an economizer of fuel I can cheerfully recommend it.

Yours very truly,

JOHN H. GROESBECK.

Z. C. M. I.,

SALT LAKE CITY, April 25th, 1884.

GENTS.—The Miller Wrought Iron Range I purchased from you nine years ago, is still in use and giving entire satisfaction; I would not sell it at any reasonable price if I could not get another of the same kind. I would recommend all wishing to get a First Class Range, to buy the Miller.

Yours truly,

WILLIAM NAYLOR,
Thirteenth Ward, Salt Lake City.

Z. C. M. I.,

SALT LAKE CITY, April 20th, 1884.

GENTLEMEN.—I cheerfully recommend the Miller Wrought Iron Range as by far the Best Cooking Range that we have ever used, our experience embracing several kinds. As an Economizer of Fuel it is apparently perfect, and as a Boiler Attachment Heater, I know of none so good.

Very truly yours,

BENJAMIN HAMPTON,
Twelfth Ward, Salt Lake City.

GENTLEMEN.—I take great pleasure in endorsing Mr. Hampton's Testimonial, from a grateful experience during the past year.

Yours respectfully,

GEO. T. ODELL,
Twelfth Ward, Salt Lake City,
of Grant, Odell & Co.
