SENATE.

Adjournment—Appropriation.

An amendment was introduced by Sumner, providing that no adjournment take place till after the passage of the supplementary civil rights bill. Trumbull moved to amend, by adding, not until the Senate shall have come to a vote on the house bill, to repeal the duty on coal.

Sumner asked Morton's reason for urging an adjournment resolution. Morton did not wish to discuss the question. He said he wished Sumner would not attempt to prevent final action on it, by interposing amendments of this kind.

He was in favor of Sumner's bill, but if it could not pass at all, he believed it could get through with the business by that date, if fixed as the time, and they worked up to it.

Sumner read from the Globe, of May 6th, 1870, to show that Morton then opposed three resolutions to adjourn sine die on the 11th of July, for the reason that justice could not be done to the tariff, the very subject now presented by Trumbull.

Sumner read from Morton's speech in the Globe until the morning hour expired.

Trumbull called up in regular order the appropriation bill.

Morton moved to suspend all other business, for the purpose of proceeding with the adjournment resolution, but Trumbull retained the floor and proceeded to address the Senate on the adjournment bill, reported by the judicial committee.

He said the States losing members by the bill are Vermont and New York, which each lose one.

Sherman thought the house bill was as near perfect as possible, and said the House should be left to regulate everything pertaining to its own organization. He favored the House bill also, because it let the old apportionment stand.

**HOUSE.**  
Legislative Appropriations—Chinese in Cuba.

The House went into committee of the whole, on the legislative appropriation. On motion of Maynard, the clause of the bill which provides that no claim against the Government be considered if paid unless followed within seven years from the date of claim was stricken out. Garfield offered amendment looking to the restriction on public printing. He said the last year the quantity of printing in the public office would, if put into books, have made a library of over 30,000 volumes, of 500 pages each. He exhibited Vol. three of the geological explorations in the 40th parallel, by Clarence King. He described it as a large quarto volume, printed on lined paper of the most expensive kind. There were five more volumes to come, filled with the most elegant engravings, and the whole would cost, at least, twenty-five dollars a volume, and it was understood that the total cost of the book would not be less than \$200,000.

Argument followed, in the same line of argument, and said that the drawings of machinery, mines, tunnels, &c., with the volumes were alike, were not used by Clarence King or any of his assistants, who had never visited the places, but were supplied by persons interested in the Sutro Tunnel, the Comstock Lode, &c. The amendment was agreed to, and the bill was laid aside, to be reported to the House. The total sum appropriated was about seventeen millions.

The committee then took up the pension appropriation bill, which appropriated \$30,480,000, and disposed of it. The committee then rose and reported both bills to the House.

The amendments made in committee were agreed to, and the bills passed.

Cox offered a resolution asking the President for information with regard to the reintroduction of Chinese in Cuba. Referred to the committee on commerce.

**EASTERN DISPATCHES.**  
F. C. Embassment—Shot for insulting a woman—Ocean Mail—National Labor Convention—Municipal Bribery—Syndicate.

WASHINGTON, 25.—The Cunard steamship line offered to carry the Wednesday mail free of charge and thus enable the Postmaster General to reduce the rate of postage to four cents.

The only confirmation by the Senate was James Segala, to the Governor of Washington Territory.

A. M. Puller, chairman of the executive committee of the National Labor Reform party, finds he has no right to postpone the meeting, therefore the convention will be held in February.

New York.—The Evening News says Richmond's store is in the hands of the sheriff.

CHICAGO.—A singular case of hydrophobia has occurred here. George

Ryder a prominent young man, was taken on Monday night last, and died last night in terrible agony, but had never been bitten by a dog, rabid or otherwise.

Jefferson Catlin, aged twenty, was yesterday found guilty of murder in the second degree sentenced to the penitentiary for life for shooting James Townsend in a quarrel over a game of billiards in a low saloon in this city on the 9th of December last.

The grand jury in the criminal court, which adjourned yesterday, found indictments for bribery against fifteen aldermen and ex-aldermen, and an indictment for swindling against Dominick Kleish, West Side tax collector.

WASHINGTON, 25.—The following is the statement of Jay Cooke to the ways and means committee regarding the transactions of the syndicate under the arrangement with the secretary of the treasury.—The syndicate are allowed money on deposit, until they have one per cent. provided by law. That is the entire compensation the government pays. There are no other considerations, advantages, such as are allowed under the sub-treasury law to national banks that become depositories of the government, and which arrangement is entirely in the interest of the bank and commerce of the country; nor if the whole amount which the government has sometimes to its credit was thrown into the sub-treasury, it would convulse the business of the world. I say the banks incidentally get an advantage through being thus designated depositories, while the government loses nothing, because the money would otherwise be idle in the sub-treasury and draw no interest.

Questioned by Mr. Kelly—"One-half per cent. and permission to retain money on deposit until required in payment of called bonds?"

Mr. Cooke—"That is all."

Mr. Kerr—"The banks however really have the advantage of three months' interest on the money; how much is that worth to the syndicate?"

Cooke—"I could not answer that question, because some would make more and some less on the use of the money. The arrangement is precisely what has been carried out with the national banks from the start."

Mr. Kerr—"I want now to ask whether it is practicable for the government of the United States to adopt a shorter period than ninety days within which to redeem its outstanding indebtedness?"

Mr. Cooke—"I do not think it would be right for the government to try to bondholders in any summary way by stopping interest at once. These bonds are held very largely in Germany and all over Europe, and it seems to me that ninety days' notice is as short a period as the secretary can fairly give. Of course the government of the United States can do anything it pleases, and if Congress so decides you can stop interest in sixty days or thirty days, or without any notice at all."

Mr. Kerr—"If you stop interest in thirty days would it not be practicable to reach most of the bondholders so as to enable them to return their bonds for cancellation within the time?"

Mr. Cooke—"I do not think it would, and the experience we have already shows that it would not. We have spent thousands of dollars ourselves in sending our circulars all over the country, notifying holders of the intention to redeem these bonds, and yet out of one hundred and thirty millions of dollars, there are many millions which had not come in on the 1st of January."

New York, 25.—U. S. commissioner Bates, to-day decided on sending a charge of embezzlement against Jos. S. Riley, assistant superintendent of the foreign letter office of the New York Postoffice, to the grand jury. Riley was admitted to bail.

Geo. W. Watson, hair dresser, was shot dead in his own shop to-day by Tennie Hyde, for insulting her.

It appears Amadeus finally refused to accept the resignation of the ministry, by Sagasta, and the decree dissolving the Cortes was issued in consequence of the people generally sympathizing with the deputies in the demand for the retirement of the present government.

The agitation is very great in this city. Disturbances are feared, and troops are under arms.

PARIS, 25.—All places of business will be closed on the 26th, being the anniversary of the capitulation of Paris.

Bonapartists agents are active in the army, distributing pamphlets arguing the restoration of the Emperor as the ending of all the troubles of France. Copies have been found in the barracks and seized by the police.

LONDON, 25.—The mail steamer from Rio Janeiro brings news of a terrible disaster to the steamer America, between Rio and Montevideo. In the latter part of the night of December 22nd, she took fire and was burned to the water's edge. A large number of passengers were on board, of whom eight were lost, being either burned to death, or drowned.

The Empress Dowager of Brazil has freed all her personal slaves.

LONDON, 25.—The Prince of Wales was out yesterday, and walked a quarter mile.

Gladstone and Disraeli have sent circulars to their supporters in Parliament, begging them to be present at the opening, on the 6th proximo, an important business connected with the election of Speaker demanded their attention.

Granville refused to see a deputation of Republicans, who wished to urge the British Government to assist by influence to procure the substitution of the civil for the military court, for the trial of Paris Communists.

Five persons were drowned at Black Road Colliery, yesterday.

Accidentally shot—Armed Occupation—the Mail-Greenbacks Appreciating—Arizona Mines.

SAN FRANCISCO, 25.—Three companies of infantry, for Arizona, left to-day. Two more companies will follow.

Soon after midnight two of the provost guard from the Presidio arrested a drunken soldier, who escaped from them, and was fired at by them, but missed. The bullet, however, passed through the face and neck of Alexander Anderson, a citizen, inflicting a dangerous wound.

A San Francisco company are about establishing an oil refinery at Unalak, Alaska Territory.

There are a number of lumber vessels outside, bound in.

A joint armed occupation of parts of the block between Fourth and Fifth, Townsend and King streets, in the south part of the city, is being made, the rival claimants being the Southern Pacific Road, J. Seligson and Camillo Martin.

B. Plummer sues the city for \$4,000 damages for the overflow of Lake McCaplin on his property. C. Lewis sues for the same cause, \$5,000.

The officers of the Fireman's Insurance Company have been re-elected.

The sales of the San Francisco Stock board last week were \$4,540,000.

The postmaster has no advice as to the coming through of any mails from the east, and he is of opinion that he will get any for a week to come, or even longer.

Unless the advice from the U. P. are more favorable, the departure of the Japanese Embassy, arranged for next week, will probably be postponed.

Brokers say that business men are now holding more greenbacks than ever before since they were issued, in the expectation of steady appreciation of specie payment.

A rock, fifty-three pounds in weight, from the great Boston ledge discovery, in old Weaver District, was sold to an assayer to-day for \$200. It is of a deep yellow color, and above no large mass of free gold. The owners will put a 25 stamp mill at work at once.

The remains of the woman who committed suicide by drowning are identified as those of Miss Rosa Stanton, who was sick in St. Mary's hospital, whence she escaped while delirious with fever. The Revenue Consolidated Silver Mining Co., to operate in Huaslapa District, Arizona, with \$2,500,000 capital, was incorporated to-day.

**SINGER SEWING MACHINES**  
WERE SOLD WITHIN THE PAST YEAR.—Scientific American, June 10, 1871.

**The Singer Manufacturing Company,**  
**AT THE WORLD'S FAIR**  
—Constituted by the homes of the people—  
Received the Great Award of the Highest Sales and have left all rivals far behind them, for they

**Sold in 1870 127,933 Machines!**

**SEWING MACHINE SALES FOR 1870.**  
The magnitude to which the manufacture of Sewing Machines has attained is shown by the "SWORN" returns (to which any one can have access) of the manufacturers for the year 1870 to the owners of the leading patents, on which they pay a royalty. According to these returns the number of machines sold by each manufacturer in 1870 is as follows:

Manufacturer	Sales	Manufacturer	Sales
The Singer	127,933	Florence	17,000
Wheeler & Wilson	52,236	Gold Medal	8,912
Howe	75,142	Rich	5,800
Grover & Baker	57,405	Empire	5,500
White	35,000	Wheeler	5,000
Wilcox & Gibbs	28,800	Palmers	1,700
American Sewing Machine	10,000	Wilson	600

And several other companies who sold a few machines.

It will be seen by this table that the popularity of the Singer Machine far exceeds that of all others, their sale being one-half greater than even that of the famous "Wheeler & Wilson" machine. This is owing to the fact that the Singer Company have lately commenced making, besides their old and well-established manufacturing machine, what is known as their "New Family Machine," which is selling at the rate of nine to one better than their old style. Their total sales for 1870 were 127,933 machines against the 127,933 of 1870, showing an increase of one-half in the latter year.—New York Sun.

One-half of our Gigantic Sales, now nearly:

**THREE-QUARTERS OF A MILLION**  
**Machines Sold,**  
AND ALL IN PRACTICAL USE, WERE MADE WITHIN THE PAST THREE YEARS.  
But the greatest increase of our sales over all other Machines, being within the past year. This is irrefragable proof that

**Our Machines are the Best in the World!**  
**The New Family Singer Sewing Machine,**  
With Attachments for All Kinds of Work,  
Is fast winning supreme favor in the household, as shown by the rapidly increasing sales, over all other machines.

This New Family Machine is now capable of a range and variety of work such as was only recently thought impossible to perform by machinery. We claim and can show that it is the cheapest, most beautiful, delicately arranged, nicely adjusted, easily operated, speedy and smoothly running of all the Family Sewing Machines. It is remarkable not only for its range and variety of its sewing, but also for the variety and different kinds of texture which it will sew with equal facility and perfection, using silk twist, linen or cotton thread, fine or coarse, making the interlocked elastic-stitch, all on both sides of the fabric sewn; or, the only stitch which is universally approved, or is at all adapted to dressmaking work. Fine, heavy cloth, or leather may be sewn with great strength and uniformity of stitch, and in a moment—this willing and never-wearying instrument may be adjusted to fine work—even by a child—which delicate fingers are best known to perform. Even the coarsest and thickest material has little or no trouble on this machine.

Send for Descriptive and Price Circulars.

We manufacture our own needles, silk and twist; furnish linen and cotton thread and all of our superior quality—but do not buy without you examine the SINGER.
