AT THE RESORTS. The Commercial Travelers paraded he business section of the city last night, with Held's band, and made a ine showing. The paraders threw countless slender strips of colored paper called serpentine into the air as they marched and these made quite a spec-tacle. The Travelers are having a great time at Lagoon today, and their Ogden brethren are doing their level heat to help out the program,

ingly deranged. The interior of their home is filled with furniture of the etrangent character, and the walks are covered with fac simile reproductions of the "coat of arms" adopted by Drouin and his wife. For some time he had poa-ed as "King of the World." and his wife as "Empress of the Universe." With an energy almost inconceivable Mra. Drouin spent hours of each day writing letters to prominent people in this city, warning them of attempts upon their lives, and asserting the ta hind of people were threatening the extermina-tion of the populace by turning on the "electric fluid."

Their spartments were found to con-tain vasi quantities of mineral and medic-inal waters, designed to destroy the ef-forts of the people with the electric fluid.

#### Three Killed in Coal Mine.

SAMUEL HALLET DEAD.

### End Cemes in Eighty-fifth Year at the County Infirmary.

. It was known that Samuel Hallet, the aged man who was picked up by the police a few days ago, was not long for this world at that time. Friends took him from the station to the county infirmary where he remained one week, growing gradually worse until this morning when the sands of life finished their course. The closing of his career is remindful of the fact that he was not always as unfortunately situated as re-

cently. He came to Utah in 1863 and went into the Twentieth ward to reside. Later he removed to Plain City where his wife died less than two years ago. Then he came to Balt Lake City and made his home, this time — the Twen-ty-first ward. From the chapel of that ward he will be buried tomorrow, the services beginning at 2 o'clock. Friends man are respectfully requested to be present.

R mainel Under Water Too Long. The wonderful diving horse at Salt-

alr is still unconquered in his downward plunge, despite the fact that W. E. Dallman of Provo made a splendid effort to ride him yesterday. The failure was only technical, but it bars Dallman from setting the money. He rode the horse all right to the water, which was considered the impossible part of the program, but he lost out in the depths below. According to his state-ment, the horse and he did not agree as to the time an animal ought to stay under the water, and away from the air. For that reason he had to separate from him and come to the surface, where breathing was better, and the horse followed a little later. From the point of view of the spec

tators the exhibition was successful, however, as the young man entered the water with the horse, but came up in a different place. He was roundly applauded for his work,

LAKE BREEZE SCHOOL.

Question of Location is Discussed -Changes in the Washington.

The committee on buildings and grounds of the board of education held a meeting in the office of the clerk of the oard today and discussed the location of school at Lake Breeze. Several proposilions to rent and sell property for chool were received by the board, but n

school were received by the board, but no definite action was taken and the matter will be referred back to the board for fur-ther instructions. It was decided to recommend that eer-tain interior alterations be made in the Bonneville school and also to remove the water closets from the Washington school to the exterior of the building.

NOTED SURGEON'S WORK.

#### Dr. Brown Performs Difficult Operations At St. Mark's Hospital.

Dr. G. V. I. Brown, the noted specialist, held a clinic at St. Mark's hospital this morning, and performed three preliminary operations for the rectification of cleft palate and have lip. The loctor does not attempt to make any complete operation at once, and it is stated that it is in this respect that no

a few surgeons make a mistake, in trying to do too much at once. The idea is to do at one sitting just enough without tiring the patient or running any risk of inflammation or disarranging the npervous system from too rapid work. So Dr. Brown, this morning, merely took the preliminary steps in the cases presented, and will resume work on them a little later.

The cases are those of a four-days-old baby named Shepherd of this city, a five-year-old boy from American Fork, and a four-months old baby named Neshiti if Pioche. Oother cases are be-ing treated this afternoon. In one case ing treated this afternoon. In one case the medium mavillary process was bent back into the natural position, in closing up the unnatural aperture.
