MINING, BUSINESS AND STOCKS

MAJESTIC COMPANY SENDS CIRCULAR

Secv. Blossom Gives Encourage ment to Stockholders from Information by Mr. Newhouse.

SUCCESS NOW SEEMS ASSURED.

Have Been Developed, Debts Have Been Paid, and Finances Arranged for Further Work.

The Majestic Copper company with mines and smelter about Milford in Beaver county, has released a circular to its stockholders from its eastern office through its secretary, F. H. Blossom, which will be read with interest. The main points of information follow:

"We take particular gratification," says the circular, "In announcing that an arrangement has been made with Samuel Newhouse of Utah, by which he became, on Feb. 1, managing director became, on Feb. 1, managing director of the Majestic company. He converted the Utah Consolidated, which he took as a doubtful gold mine in 1898, into one of the leading copper properties of the country, and its stock is today selling on the Boston stock exchange for more than \$12,000,000. The Boston Consolidated is another of his companies, with a selling price of \$3,500,000 in the open market.

"In addition to arranging for competent handling of the mines and smelter,

tent handling of the mines and smelter, your directors have sold to Armstrong, Schirmer & Co., members of the Boston and New York stock exchanges, \$200,000 of bonds for cash. Mr. Schirmer has become a director of the company, "We give the following extracts from a communication sent by Mr. New-house addressed to the president and

directors of the Majestic company, dat-ed Feb. 23, 1905; "'During the past week I have been

engaged in the examination of the O.K., Harrington-Hickory and Old Hick-K., Harrington-Hickory and Old Hick-ory mines, belonging to your company. The examination has been very com-plete and thorough, and I have been assisted in it by M. M. Johnson, min-ing engineer, under whom the proper-ties of the Boston Consolidated Mining company and of the Newhouse Mines and Smelters have been developed. Mr. Johnson's experience in copper mining in Beaver county, and particularly in in Beaver county, and particularly in the direct management and opening up of the vast ore bodies of the Cactus mines, renders him especially well adapted to the investigation of copper

adapted to the investigation of copper properties in that county.

"W. C. Thomas and Gerald Street of the engineering department of my office, and Victor Carlson, mine foreman of the Cactus mine, assisted in the taking of samples and in the measurement of the ore bodies found in these mines. You may be assured that the work was carefully, systematically and thoroughly done. The results are reliable, and the conclusions that we have drawn from our examinations, sampling and assays are correct."

sampling and assays are correct.'
"Since work was resumed, July 15,
1904, much has been accomplished in
blocking out the ore bodies and get-1994, much has been accomplished in blocking out the ore bodies and getting the mines ready to furnish a steady production. According to surveys, sufficient copper ore is blocked out in the O. K. and Old Hickory mines to warrant the blowing in of the copper furnace at once. Mr. Newhouse, however, advises further systematic development for a short time to facilitate the more economical handling of the ore bodies. Our present board of directors assumed office in August, 1994, when your company was in the hands of a receiver, with an indebtedness of about \$300,000, and having neither stock nor credit. It is gratifying to state that all this indebtedness has been discharged or is in process of payment, and the company is now in possession of ample funds to push all necessary developments. The Majestic Copper company now controls approximately 90 per cent of the stock of the Majestic Copper Mining and Smelting Majestic Copper Mining and Smelting

"All stockholders are reminded that the first interest coupons on bonds will be due April 1, 1905, and are payable at the office of the company in Hartford. Holders of bonds are requested to de-tach said coupons and present them on or as soon after the 1st of April as possible, in order that the same may be paid. Collections may also be made through local banks."

ON MINING EXCHANGE.

Sales and Prices Were Moderate and Void of Features.

Today's dealings in the Mining Stock Exchange were of a moderate nature both in quantity and in prices. The sales aggregated 17,600 shares for which \$3,814.87 was paid. These transactions covered ten different stocks, with prices differing but little from those at the close last week: The closing quotations and sales were

RECAPITULATION.

A. S. CAMPBELL. Stock Broker, 216 D. F. Walker Block

PROSPEROUS TINTIC. Increased Activity Noticed In All Portions of the Camp.

Special Correspondence. Eureka, Utah, March 17.—The prospects of the great Tintic district are growing brighter daily, and business men are looking forward for increased prosperity from now on. At the old reliable Centennial Eureka mine, work is being pushed, and the force has been increased to about 300 men, with a prospect of a further increase. In or-order to handle the increased tonnage another shift has been employed on the tramway which is used to convey the ores to the two railroads. New ore bodies are being opened up in the properties on the lower levels, and it is the intention to sink the 2,100 shaft to a

greater depth.

The Mammoth mine is showing up in splendid shape, and the force of min-ers is being gradually increased. Reports from the north end of the

Reports from the north end of the district are very encouraging and a large amount of development work is being done by the Wasa, Sweetwater and Victoria Mining companies.

West Tintic is also showing up in fine shape, and ere snow dies next fall there will no doubt be several mines added to the list of shippers from this end of Tintic. Several of the old properties at Silver City are being worked by leases who are doing well.

Considerable work is in contemplation for the east end of the district as soon as the snow is gone. A great

soon as the snow is gone. A great deal of work will also be done by par-ties owning claims on Godiva mountain, in the city for the past week looking over the ground.

At the property of the McKinley

Mining company, lying just southwest of the Centennial-Eureka mine, the tunnel is now in a distance of 116 feet and from the report of Supt. Erick Levin, it is expected that it will soon tap the vein towards which it is di-

The force at the Mammoth has been increased by about 20 men this week, and development work shows vast im-provements in the workings of the

Joseph Reese, Arnold Johnson and Peter Anderson, well known miners of Mammoth, left on Tuesday last for the goldfields of Nevada, making the en-

goldfields of Nevada, making the entire trip by team.

Surveyors of the Rio Grande Western railway have been busly engaged this week in surveying a spur to be built to the property of the Eagle & Blue Bell Mining company, running from the water tank southwest to the dump of the mine. It is the intention of the company to erect a large ore house, so as to handle the heavy output of the mine.

A special meeting of the Mountain

house, so as to handle the heavy output of the mine.

A special meeting of the Mountain View Mining company will be held in this city on April 6, at which time a board of directors will be elected, and the articles of incorporation amended, changing the principal place of business from Eureka to Sait Lake City.

West Tintic is to have a mill, so says C. W. Jones, superintendent of the Bonanza property in that section. He has secured an option on some good ground in the west end, and the mill will handle the product of the different properties. The mill will be of great advantage in handling the low grade ores of that country, of which there is an unlimited quantity, and which cannot be now made profitable owing to the long haul to the railroads.

An assessment of ½ cent per share has been levied on the Capital stock of the Lilly Mining company, whose property is located in Fest Timil. The

the Lilly Mining company, whose property is located in East Tintic. The delinquent stock will be sold on the

1st of June. H. E. Price and Jack Byerly, miners

H. E. Price and Jack Byerly, miners of Eureka, have taken a lease in the Mammoth mine.

The shaft at the property of the Victoria Mining company in North Tintic is to be sunk another hundred feet. Mr. R. S. Robertson, the superintendent, is making active preparations for extensive development, was at the price.

sive development work at the mine which is showing up in first-class shape.

The ore now being put through the Uncle Sam mill is all being taken from the mine and as soon as it is possible to operate on the dump ore the mill force will be increased to three shifts.

The ore shipments this week from Tintic have nearly doubled the output of previous weeks this year. The Centennial-Eureka sent out 91 carloads. The following mines produced the ore:

tennial-Eureka sent out 91 carloads. The following mines produced the ore: Centennial-Eureka, 91; Builion Beck, 6; Gemini, 15; Ajax, 3; Carisa, 1; Grand Central, 7; Mammoth, 13; Lower Mammoth, 1; Victor, 3; Marlow and Baxter, 1; May Day, 9; Yankee Con., 9; Uncle Sam Con., 3; Eagle & Blue Bell, 7; Swansea, 2. Total 171 carloads,

NEWHOUSE TUNNEL.

Doing Much to Develop Two Colorado

The cutting of the Saratoga vein by the Newhouse tunnel heralds a new era in mining in Gilpin and Clear Creek countles, says Denver Ore and Metals. The Saratoga has been one of the rich-The Saratoga has been one of the richest and wettest propositions in the west. But the expense of pumping ate up the profits and work was suspended. Then a contract was made to drive the Newhouse tunnel to cut it at a depth of 1,800 feet, and permanently drain the mine. Thus relieved of the expense of pumping, the mine may re-

sume and maintain steady shipments, at an enormous profit, and low grade as well as high grade ores may be sent to the reduction plants of the valley. A lower grade of ore may be mined than ever before in the history of Glippin county, as well because of recent reductions in smelting rates and in the reductions that will follow mining charges, now that the bore has cut the vein at such great depth.

The success of this procet will probably mean the completion of the tunnel

The success of this proect will probably mean the completion of the tunnel to the point originally projected—Quartz hill—where it will cut the Callfornia at a depth of nearly 2,700 feet, unwater one of the richest sections of Colorado, and permit the resumption of mining operations on the part of properties that have either been closed for years, or which have been operating by mining only the higher grades of ores.

Every deep mine in that extremely richest and oldest section of Colorado may be reached either by the main line of the tunnel, or a jateral and forever drained to the level of the bore. When that is done and the expense of pump-ing is obviated the ore mined will tax the capacity of every mill in the coun-try to handle it.

MR. BETTLES RETURNS.

Plant at Newhouse Responds With En-

couraging Results. A. J. Bettles, in charge of the large concentrator at Newhouse, which is just being put into commission, returned from that point yesterday morning. Mr. Bettles states that no discouraging features have presented themselves, and that everything about the mill is fully meeting expectations. The full capacity of the mill is being approached, and already the concentrates proached, and already the concentrates carry an excess of Iron over silver, a much desird condition.

Officials Arrive. Charles M. MacNeill and Spencer Penrose, two of the ruling spirits of the Utah Copper company at Bingham, will crive in Salt Lake from Colorado to-

Their advent at this time will have an important bearing on the enlarged work of the company in the future. The erection of a new plant, its capacity and location will be considered and definitely decided upon before their de-

The company's present plant just be-low the Bingham depot is reducing and cencentrating some 800 tons a day of the copper bearing porphyrys charac-teristic of that plant. That this amount will be greatly increased by a new mill is considered decidedly probable.

Copper Plant Rests

Kanab, Kane Co., March 13 .- The employes and managers of the Esmeralda Copper company are mostly in town owing to a temporary closing down for repairs and further improvement. They report that the tests recently made at the plant have proven entirely satisfac-tory, and that they will now proceed to readjust their equipment and install readjust their equipment and install such other as may be necessary to the more extensive operation of the new process. This is the company now operating in the field of the Coconin Copper company, located on the Buckskin mountains, southeast of here some 30 miles.

Will form Company.

Will form Company.

L. P. Kimball returned yesterday from a three months' stay in Nevada. Mr. Kimball has established and is operating a daily stage line between Gold. field and Tonopah. He has also secured a number of mining vialms in that region, a part of which will form the basis of a corporation which will be launched in a few days. He speaks well of prospects in those localities, and reports that Salt Lakers there generally are prospering. are prospering.

STOCKS WEAK AND UNCERTAIN.

London's Cheerful Tone Aided Them at Opening but They Soon Weakened.

EASTERN TRUNK LINES SOLD.

Jump in Atchison Helped Westerns -Rally Came but Demand Was Soon Satisfied.

New York, March 20 .- The cheerful tone of the London market helped the opening in the stock market here today and prices generaly advanced. But little support was forthcoming against an early drive and the leading stocks weakened materially. Sales were particularly large in terially. Sales were particularly large in the eastern trunk lines and coalers and Union Pacific. Losses ran to a point or more in a score of well known stocks, including Union Pacific, New York Central, D. & H., C. & O., Norfolk & Western, Ontario & Western, Brooklyn Transit, People's Gag, Tennessee Coal and General Electric. Consolidated Gas yielded 2. Considerable buying for both avacounts developed at the lower levels and the market railied strongly. A jump in Atchison to 30 helped the recovery in the western stocks, C. C. C. & St. Luils advanced 3, and St. Paul preferred. Smelting preferred and the Steel Foundries stocks 1. New York Central recovered to 162%. The demand gave out on the first raily and prices fell back, but support was again forthcoming. New York Central rose strongly 2% and Atchison and St. Paul got a fraction higher than before. Baltimore & Ohio, Wabbash preferred, Smelting and Locamotive gained 1 and Ann Arbor preferred 2, while New York Airbrake lost 3, and New York, New Haven & Hartford 2.

Bonds we wirregular at noon.

Railroad stocks ruled slightly below the best prices of the morning on a small volume of business, Much of the buying shifted into the railway equipment and the various iron and steel stocks. Federal Mining opened up 3½ at 15.

There was little demand for the profit taking sales that came out in New York Central after 1 o'clock and the reaction reported 1½ before being check. Union Pacific and St. Paul sold off nearly a point in sympathy and other stocks were weak Reading rose to 36 without stimulating the demand elsewhere. Federal Mining fell back 5 points from the top, but the preferred gained 1½.

Rumors of the proposed payment of accrued dividends of Republic Steel preferred brought that stock into prominence, carried up Tennessee Coal with it 3½ points. Colorado Fuel, Republic Steel and Lead rose 3 to 3½.

In the railroad list St. Paul. Union Pacific, Southern Pacific, Pennsylvania, Reading Erie, Chesapenke & Ohio, and Kansas & Texas preferred, got up 1 or more, an the eastern trunk lines and coalers and Union Pacific. Losses ran to a point or

In the District Court of the Third Judicial District of the State of Utah, County of Sait Lake. William E. Judd, Plaintift, vs The Horace Greety and Sacred Mining and Milling Company, a corporation, R. L. Booth, and Edmund H. Noyes and Harry M. Holbrooke, copartners doing business as Noyes and Holbrooke, and R. F. Smith, Defendants. The State of Utah, to the Said Defendant: You are hereby summoned to appear within twenty days after the service of this summons upon you, if served within the County in which this action is brought, otherwise within thirty days after service, and defend the above entitled action; and in case of your failure so to do, judgment will be rendered against you according to the demand of the complaint, which, within ten days after service of this summons upon you, will be filed with the clerk of said Court. FRANK HOFFMAN, Plaintiff's Attorney, Dated at Salt Lake City, Utah, March 7th, 1905.
