Australia and Mabama Offer Limited Quantity but Cars Can Not

Be Obtained. The Utah Fuel company's view of the oal situation is presented in a letter

from W. H. Myer of the company's offices at Oakland, The letter as printed in the Reno Evening Gazette, follows:

"Oakland, Cal., July 22, 1907. Mr. Edwin Bride, Sec. Nevada Com-

mercial League, Reno, Nevada: "Dear Sir-Your letter of the 16th nst. addressed to my company at Salt

inst. addressed to my company at Salt Lake City has been referred to me, as 1 have cnarge of the company's sales in Nevada and California. "Regarding the coal situation at present and the outlook for a supply during the coming fall and winter will say that the general situation through-out the western country is rather aiarming. At the present time the demand made upon us in Utah is far in excess of our output, which it is impossible to increase on account of the scarcity of miners. Notwithstand-ing, we could sell every pound of coal ing, we could sell every pound of coal we are able to mine, right in Utah, we allotted two cars per day for shipment to our old customers in Ne-vada during the spring and summer vada during the spring and summer months, providing we could get the necessary Harriman line cars. As it is we have not been furnished cars enough to even ship one per month to Nevada dealers and from present indications we will be unable to make any shipments to Nevada during the winter.

COAL BUT NO CARS.

winter.

"Realizing for some time the seri-ousness of the situation. I have been trying to secure coal from other sour-ces, but it seems impossible to secure a supply from anywhere. It can get coal in Alabama up to Sept. 1, but the railroads in that country will not release their cars to come west loaded with coal.

AUSTRALIAN FUEL COSTLY.

"One of the importers here has given me the right to sell a limited quantily of Australian coal to my Nevada cus-tomers, but reserves the right to withdraw the arrangement or increase the price at any time. This coal is known as "Burwood," and is mined in Australia near the Richmond mines. Being a coaking coal it is naturally a known as "Burwood," and is mined in Australia near the Richmond mines, Being a coaking coal it is naturally a high-grade fuel. I quoted Messrs, Lane and Drappo of your city the price on this coal, but they seemed to think it was too high for them to handle at a profit, as the public would think they were being robbed. For your infor-mation will say the price quoted was \$10,50 per ton of 2,000 pounds f. o. b. Oakland. The freight rate in Reno is \$5,30 per ton. I acknowledge this is a high price, as compared with what coal has been costing the Reno deal-ers, but let me say that unless the Nevada people get in a good supply of coal during the next sixty days, taking whatever kind they can get and paying the price, they will have to pay a much higher price with a probability of not being able to get it at al. "I wish it understood that I have no interest in the sale of this Burwood coal other than as a matter of accom-medation and protection to my Nevada customers with the hopes I may hold their trade until such time as we are able to supply Utah coal. "Trusting that the above informa-tion will be of some benefit to, your organization, I beg to remain, "Very truly yours." "W. H. MYER."
