DESERET EVENING NEWS FRIDAY JANUARY 3 1908

INDUSTRIAL DEPARTM'T. WANT TO BUY 1,000 UNION PORTLAND CEMENT COMMON trust. Such an enterprise could not be launched by many men, singly and alone. Senator Clark, whose net monthy ly income is said to be \$1,800,000, would be abundantly able to swing the gr-gantic enterprise. A point of secondary importance is the location of the Clark smelter. There is some talk of it being located in Reno. If Clark builds the plant, however, it is safe to say that Reno will not be ae-lected as the site, as this location would practically cut the Clark sys-tem of railroads out of the tonnage, which is naturally the propelling mo-tive of the enterprise. Reports have been persistent that the smelter would be located at Beatty, but, much as the Builfrog would like to see the plant built in this district, it is very doubtful if this is done. Without absolutely knowing, the Miner predicts that the Clark smelter, if built, will be located at Las Vegas. This prediction is made after reading between the lines of Senator Clark s speeches and talks, and after contem-plating the advantages from the Clark standpoint that Las Vegas offers. The sillclous ores of Builfrog and the whole southern Nevada country and the fux-WANT TO SELL SAN VIN-CENTE LUMBER STOCK. Copy of Letter Mailed Last Night by United States Company. The Colorado Mining company and all other customers of the United States smelter were in receipt of the following communication today, which is self-ex-(Pollock Special Wire.) 'As the decree enjoining the smelting As the decree enjoining the smelling company from operating in this valley has been affirmed, it will be necessary for this company to prepare to shut down its smelter. We therefore advise you that we decline to receive any ship-ments of ore made after Jan. 3, 1908." THE INDEPENDENT SMELTER. Thomas Kearns Says Money is Sub-scribed and Site Purchased. The launching of the independent smelter enterprise has made a hit with Utah producers and at this time there seems to be no doubt that the project will be carried out and work of construction begun within a short time.

Former Senator Thomas Kearns is one of the leading spirits in the un-dertaking and from him it was learn-ed today that practically all the ne-cessary capital had been subscribed; also that the location of the proposed works had been selected, but he deem-ef it unvise to give out any definite works had been selected, but he deem, eff it unwise to give out any definite information on that subject until cer-tain details had been attended to, "However," said he, "this independent smelter is a sure go, and it will be built far enough away from the farm-ing sections that there need never be a repetition of the difficulties experi-enced in the Salt Lake valley during late years."

late years." It seems to be generally conceded that F. Augustus Heinze figures in the undertaking and it is probable that the site purchased by the latter out in Tooele couny will be utilized. It was learned today, however, that some of the local subscribers are in favor of the local subscribers are in favor of going further away from Salt Lake than that. Nevada was mentioned; but Tooele county is likely to capture the

prize. It is said \$1,500,000 will be raised for the enterprise; that the smelter will probably cost around \$1,100,000 with the balance to go into a fund for the purchase of ore. The plant is to be equipped to treat gold, silver, lead and copper ores and the initial capacity will be from 1,500 to 2,000 tons daily.

PRODUCTION OF GOLD.

Dierctor of Mint Reports a Decrease During Year 1907.

Washington, Jan. 2.—The production of gold in the United States fell off \$4,758.401 in 1907, as against 1906, whereas the amount of silver produced was increased by over 1,000,000 fine ounces. Alaska's gold production fell off a little

ity. These remarks are based upon many recent reports and developments, recent visit or senator Clark to southand talk of a smeller at Beatty; ern Nevada; Lie speech made by him to the banqueters in Golaneid, and the statements made by the senator to the statements made by the senator to a reporter for the Builfrog Miner, Many other things go to snow that the Montana millionaire intends to build a smelter plant, independent of the trust. Such an enterprise could not be launched by many men, singly and alone. Senator Clark, whose net monthe by income is sold to be \$1500.000. Would

standpoint that has vegas oners. The silicious ores of Bullfrog and the whole southern Nevada country and the flux-ing ores of Pioche and other camps in that section would be within easy reach of Las Vegas. But the most im-portant item to Senator Clark is the fact that his railroad would practically wet all the tonnage from these sections get all the tonnage from these sections to Las Vegas.

SAN FRANCISCO MARKET.

San Francisco, Jan. 3.-Today's quo-tations on Nevada mining stocks on the San Francisco exchange are as follows: COMSTOCK,

BOSTON CLOSE.

who left the city several days ago to begin work.

Good news has come from the Benc ict property at Reveille, Nev. 1 dict property at Reveille, Nev. A sampling of a 5-foot streak in a 40-foot ledge returned values of from 66 to 76 ounces silver, 40 cents in gold to the ton.

At a meeting of the directors of the Imlay Mining company held yester-day afternoon a stock dividend of 100.-000 shares was declared. The Imlay company operates the Morrison mine in Humboldt county, Nev., in which there were some important develop-ments recently.

HANDCLAPPING AND CHEERS. SALT LAKE CITY - - - - UTAH. Union at Oxford is Colder Than the

House of Commons.

Union at Oxford is Colder Than the Honse of Commons. Lord Wolmer, writing in a 'varsity magazine, complains that the Union at Oxford is almost too critical a house, and that several M. P's have said it is more difficult to address than the house of commons. And the reason? Lord Wolmer offers one, that is at least suggestive, in the London Chroniela. He would abolish clapping and intro-duce in its place the house of commons cheer. "A cheer is a much more na-tural noise than a clap, and comes far more readily," says Lord Selborne's son, whose hands, let us imagine, are still smarting from the reception giv-en to Mr. John Redmond by young Oxford the other day. Did he, one won-ders, think on that great occasion that it was "desirable to make the Union less stony and more enthusiastic?" If clapping comes to be abolished at the Union, it will perhaps vanish also from the London theater and the con-cert room. This form of handiwork needs an effort; and the trend of man is toward indolence. The stalls have already forgotten how to clap, and so have the boxes, although not the royal box when the queen is in it. Here is something more than the silent little pats into which either gloved hands are galvanized—you hear the impact. The house of commons cheer is not music except to the ears of the young debater nouse of commons cheer is not musi-

nouse of commons cheer is not music except to the ears of the young debater on his legs: but even though, like the sermon of the day, it is "too weird for words," it is at least preferable to the harsh percussions of handelapping.

OWNERS OF FAMOUS NECKLACES

OWNERS OF FAMOUS NECKLACES The most costly necklace in the world belongs to the Countess Henckel, a lady well known in London and Paris society, the value of which is said to be £50,000. It is really composed of three necklaces each of historic interest. One was the property of the ex-Queen of Naples, sis-ter of the late Austrian Empress; the sec-ond, once the property of a Spanish gran-dee; while the third was formerly owned by the Empress Eugenie. Not long ago a necklace composed of 412 pearls, in eight rows, the property of the late Duchess of Montrose, was sold for £11,820. The Em-press Frederick of Germany is said to have possessed a necklace of thirty-two pearls, worth at least £40,000; while Lady Ichester's necklace of black pearls is valued at about £25,000,—Tit Bits.

F. R. Snow & Co., Stock Brokers. 22 Commercial Bik. Both 'Phones1973.

A. S. CAMPBELL, Stock Broker, 215 D. F. Walker Block. A. F. Holden is quoted in one of them as saying that the United States com-pany will ratire from the Utah field altogether and establish new works at some central point in Nevada. An-other story is to the effect that Mr. Henden and his associates have sold enough of their stock to give a con-trolling interest to the so-called "smelt-er trust," pointing to the late absence of competition in the local smelting field as the proof of it; that there is no such thing as competition between Salt Lake smelters any more. Others declare that a coalition of the inter-ests of the two concerns has been ac-complished; but that the United States company is simply playing a waiting game and when the time comes will come up with a trump card; that a showing will be made in court to the effect that the farmers have discrim-inated in favor of the American Smelt-ing and Refining comoany and con-tending that if the American smelt-ing the sing play and without injurious effects, there is no reason why it too should not be permitted to continue in ate its Murray plant without injurious effects, there is no reason why it too should not be nermitted to continue in business at Bingham Junction, Another claim set forth is that the United States company has gone to great ex-pense in the installation of bag houses and providing other equipment; that the problem of eliminating the polson-ous solids contained in the fumes has been accomplished in both the lead and conper plants, and that officials are ready to establish the correctness of this statement. this statement.

CAN KEEP WITHIN LAW.

CAN KEEP WITHIN LAW. A party who is held in the highest esteem by Metallurgical Director Pros-ser has made the assertion that the average sulphur content of the charges put through the furnaces during the month of December was under 7 per cent, which is considerably under the limit prescribed for in the decree of Judge Marshall, and is undoubtedly the foundation for the report circulated some days ago to the effect that the company would continue to operate its plants fully prepared to show that it could keep well within the law; but if this plan were adopted, the company would be compelled to make good on the several unfavorable contracts which the management has had an unsatilified desire to abrogate for some time.

time. With the closing of the United States similar, the mines of Tintic are prac-tically shut out of the local market. The low metal market and the alleged exorbitant exactions of the smelters of late has caused many of the Tintic producers to close down entirely; others have curtailed their output; but the shut down of the smelter takes nearly all the rest. As to the Centen-nial Eureka mine, the ores from that source for the time being will probably be sent to the Mammoth plant in Call-fornia.

MONTANA'S OUTPUT.

fornia.

Official Gives Estimate on Metal Production Last Year.

Helena, Jan. 3.—Montana produced precious metals to the amount of near-ly \$80,000,000, according to the estimate of Thomas B. Miller in charge of the United States assay office in this city, From the best available data, Mr. Miller has computed the production as follows:

Copper, 225,000,000 pounds at an av-prase of 20 cents, \$45,000,000; silver, \$5,-00.000; gold, \$2,250,000; lead, \$2,500,000; total, \$57,750,000.

Montana leads all states in silver pro-uction and mining men are loath to duction and mining men are loath to believe that Arizona has surpassed this more than 3,000,000, according to the preliminary report of the director of

the mint, issued yesterday. Colorado is shown to have led all of the states in 1907 in the production of gold, as it did in 1905, the amount, 23,000,000 in 1906 to nearly 21,000,000 in 1907. Montana leads the list in the production of silver, with 12,118,000 fine ounces, with Colorado and Utah only

a few thousand ounces behind. The following table shows the value in dollars of the production of the prin-cipal gold and sliver states for the year 1907:

Gold. Silver. Alaska\$18,251,610 \$ 98,081 1,972,272 Arizona 2,539,516 California 17,394,863 1.535,281 'olorado 20,888,833 7,687,769 4,605,293 Idaho 1,087,655 ********* Michigan 236,233 4.206,345 Montana 7,997,880 Nevad 14,704,658 New Mexico 235,224 5.126,556 284,622 1.179,888 Oregon 54,953 South Dakota 61,387 Texas 202.979 7,757,390 46.666 Wyoming

Totals\$89,620,399 \$37,571,580

603

Alabama, Georgia, Missouri, North Calorilna, Porto Rico, Philippine Is-lands, South Carolina, Tennessee and Virginia produced small quantities of gold and silver, which are included in the totals.

The commercial value of the fine sil-ver in 1906 averaged about 68 cents per ounce, and in 1907 about 66 cents per

The production of fine silver in 1906 amounted to 58,517,990 ounces.

CLAIM DISCRIMINATION.

Nevada Producers Enter Protest Against Smelter Trust.

The operators of Goldfield, Bull-og and other camps of Nevada are live to the fact that they have been

The operators of Counterly, but of frog and other camps of Nevada are alive to the fact that they have been and are being imposed upon by the smelter trust, and they are taking visorous steps to correct the abuses from which they are suffering, says the Bullfrog Mitner. Strong appeals will be made to Congress, and the arm of the federal law will be invoked to prevent the trust from discriminating against Nevada. Whicher or not the appeal for con-gressional help will be effective, it is hard to say. If we were to venture a guess, however, it would be that no re-lief that one could notice would come from this source. Congressman Bari-let is going to make a fight in Con-gressional help will be effective, it is shard to say. If we were to venture a guess, however, it would be that no re-lief that one could notice would come from this source. Congressman Bari-lett is going to make a fight in Con-gressional help will be affected in his efforts, but the battle, even with the chief executive on the side of the pso-ple, will be a hard one and long-drawn-out, and immemdiate relief may not be looked for from this source. Though it is proper that Congress should call the smelter trust to account and so legislate as to make the simelt-ers begislate as to make the simelt-ers treat people fairly in the future, the quickast road to relief for the time being is in the construction of inde-pendent smelters. That an independ-ent amelter for the treatment of Nev wada ores will be built in the near fu-ture is more than a probability. That

ture is more than a probability. That Senator W. A. Clark will build the smelter is also more than a probabili-
