#### MINING, BUSINESS AND STOCKS

## **BROKERS WILL** HAVE HOLIDAY.

At Close of This Afternoon's Calls A Recess Will be Taken Until Monday.

YORK CLIMBS ACAIN.

Stock Touches at 75 Cents a Share-May Day Active - The Closing Quotations and Sales.

When this afternoon's call of the Mining Exchange closes, there will be no more trading done in the pit until Tomorrow being Arbor day all sessions will be suspended and all brokers who are interested in forestry will have an opportunity to plant trees.

During today's forenoon calls, New York Bonanza reached 75% cents in the sales. May Day opened with a sale at 27% cents and closed a shade lower. Daly was called out at \$2.40, 50 shares going at the price. A board lot of Yankee Con, went at 35 cents. Daly-West was offered at \$15, but none sold. Silver Shield was active on the open board.

The closing quotations and sales were

GREEN RIVER PLACERS.

Gravel from Jensen's Ferry to be Tested For Platinum. Special Correspondence.

Provo, April 14. Lycurgus Johnson the Vernal merchant, and Frank Roselle of this city, who has spent the winter in Vernal, both interested in the placer claims lately located \* car Jensen's ferry on Green river, have come in with 300 pounds of the gold-bearing sand. Mr. Johnson has gone to Ogden to have the sample run through the Michelsen gold-saving machine, recent-ly patented, as it is flour gold and hard to save. If the machine is successful in saving it, one or more will be put in

land will also be tested for platinum, of which there are indications, and if that metal is present in paying quantity the owners of the placer ground have an assured fortune.

A ditch is now under construction to convey water to the placers, and men have been working along the river all winter panning gold. They have made good wages, but the newly discovered bars are believed to be richer than any heretofore worked, and if a method of saving the gold can be found placer mining along Green river and capecially at the new district, will be a paying industry to which many men will be industry to which many men will be attracted.

CAMP OF ALTA.

Conditions at Columbus and So. Columbus Are Good.

Arthur E. Snow, secretary of the Columbus Consolidated and South Columbus Mining companies at Alta, returned from camp last night and reports things moving along very satisfactory at those properties. At the former the mill is running steadily and the con-centrate bins are filled to overflowing. The congestion, however, will be re-lleved, Mr. Snow says, within the next

few days. A force of men is at work on the canyon road and by Monday it is expected, wagons will be run into camp, At the South Columbus conditions are about as they were a week ago. The drills are still forging ahead in the hard rock formation. No steps have been taken as yet, towards the installation of the new equipment. installation of the new equipment.

THE FUME PROBLEM.

Mining and Scientific Press Comments On Local Difficulty.

The creation of sulphurous and arsenical fumes is an accompaniment of all smelting operations where the ores contain sulphide, antimonial, arsenical and other volatile compounds, says the Mining and Scientific Press. In some districts the damage from fumes has led to the introduction of various meth-ods for rendering them harmless. The most common practise is to make sul-phuric acid as a byproduct of the smelt-ing operations. This is based upon the ing operations. This is based upon the fact that water will, under proper conditions, absorb a large volume of sulphurous fumes. Fortunately, in many cases, the acid thus manufactured finds a ready market at a price which makes its manufacture profitable, or a portion of the acid may be employed in some other branch of the metallurgical establishment, as in leaching the oxidized ores from upper levels, or that which has been partially roasted.

It is not always convenient nor profitable for smelting concerns to engage

It is not always convenient nor protitable for smelting concerns to engage in the manufacture of acid, as it is sometimes impossible to find a market for the product. Within the past few months this problem has been prominently brought before smelting companies throughout the west, usually in the form of court injunctions with acthe form of court injunctions, with ac-companying suits for damages. In Colorado, near Durango; at Butte, Mont.; Keswick and Vallejo Junction, Cal., and in the Salt Lake valley, Utah. Cal. and in the Salt Lake valley, Utah, this has been the unpleasant experience. In each instance, excepting that at Keswick, Cal., where the complainant is the government, against the Mountain Copper Co., the plaintiffs have been the farmers who own property in the vicinity of the smelters. So serious has the matter become, and so evident is it that the complainants can cause the metallurgists much trouble, that it is not unlikely that some new that it is not unlikely that some new method of disposing of sulphurous and other damaging fumes, less expensive and less cumbersome than that of acid making, will be introduced. At Butte, Mont., the construction of a stack several hundred feet in height, connected eral hundred feet in height, connected with the dust chambers of the furnaces by a flue of great size, and half a mile in length, has accomplished something in the way of condensing some of the furnes, such as those of arsenic and antimony, which are sublimated in the chambers and flue and form a byproduct of value, but the sulchurous furnes are less easily controlled and do not condense so readily. The most destructive furnes are those resulting from heap roasting, a method of preparing sulphide ores for smelting, which has the advantage of economy, but as has the advantage of economy, but as the fumes rise in dense clouds directly from the ore heaps, and are not car-ried away by the winds from the tops of tall chimneys, and thus, to some extent, dissipated by the winds, the dam-age is greater than in the case of

#### stacks. Heap roasting is not now practised to a great extent at American smelters, though at one time an im-portant feature of metallurgical opera-tions at Keswick. ANNIE LAURIE EX.

Ledge Was Struck After Two Years of Hard Work.

Of the recent strike in the Annie Laurie Extension mine in the Gold Mountain district, the Richfield Reaper

"This vein was encountered at a tun-

"This vein was encountered at a tunnel distance of 60 feet and at a depth of 400 feet. It has been capped by a very hard formation of blue porphyry, through 200 feet of which progress has been very slow. At times but four to six inches headway per shift could be made, and at a cost of \$18 per foot. But steady and persistent efforts have at last been crowned with success, and henceforth the development of the projectly will be pushed with renewed vigor and interest.

"It is now two years since the company began its long bore into the shale ridge in quest of treasure. At times if has been uphill work to procure the necessary finances to push the work along, but obstacles have been overcome, confidence in the proposition has been extended, and today the company has money in its treasury. Insuring the continued development of the property. With the first prize now in hand, there will be no further difficulty in providing the sinews of war.

will be no further difficulty in providing the sinews of war.

"This is not the only ledge expected
to be encountered by this tunnel. Another extensive vein matter lead is anticipated about 300 feet further in. Afa distance of 2,000 feet, however, is experted the great wealth-producer of the
company's ground. Float has been
found at the base of the shale ridge
which went as high as seven ounces in
gold and 700 to 800 ounces in silver.
There are no surface croppings to indi-There are no surface croppings to indicate where this float came from, but the geology of the mountain gives assurance that the great mother lode lies hidden in the recesses of the ridge."

#### The N. Y. Bonanza,

A report from Park City, received during the day, conveyed the informa-tion that while the ore shoot encoun-tered by the cross-cut from the 800, not enough work has been done to really determine what it will amount to.

## RICHES OF LUCY L., CLIFTON DISTRICT

Supt. Clyde H. Wilson Returns With Some Rich Ore Samples.

ALL ORES WILL PAN COLD.

Vein Has Width of 14 Feet and is Getting Better-Something About Work in Progress.

Clyde H. Wilson, superintendent of the Lucy L. mine of the Clifton district in the Deep Creek country, arrived in the city from camp last night and brought in with him a fine looking asortment of ore. Some of the samples, according to Mr. Wilson, carry talues running well up into the hunireds, and even into the thousands of dollars to the ton. Such pieces, however, are picked and do not represent anywhere near an average. One thing is certain, however, if the Lucy L. was located near Tonopah or Goldfield there would be a mighty stir raised about it and claims for miles around would be

All the Lucy L. ore, Supt. Wilson says, will pan free gold and the metal is often closely associated with bismuth. The vein cut in the cross-cut from the bottom of the winze, which was encountered about two weeks ago, continues to look good and is opening up better and bigger as the work prog-resses. The vein is now about 14 feet wide at the point where the men are working on it. Work has been going on steadily for nearly seven months and in the meantime some very large bodies of milling one have been papered. bodies of milling ore have been opened Manager Frank Wilson says the com pany may conclude to put in a milituding the present year, however, nothing definite has been decided.

THE MOUNTAIN QUEEN. Strike Made in Property Located Near Town of Marysvale.

Word comes from Marysvale that important developments have been made in the Mountain Queen property; the

tunnel having encountered the vein to-wards which it has been directed.

The ore carries free gold and colors can be seen with the naked eye. The adit struck the vein at a depth of 237

Tho Scottish Chief.

Manager Will J. Lawrence is antici-pating a change in the Scottish Chief. The cross-cut from the 800 level is ex-

within the next 20 feet.

Sustained Strength of Union Pacific, St. Paul and N. Y. Central Feature Of the Railroad List.

employed in their mine, and which have permanently disabled him. He has spent the past two years in a hospital, will be crippled for life, and sues the company for \$50,000 damages. New York, April 1t.-Yesterday's conspicuous features held their place in the opening trading in the stock market this A dispatch from Ely announces the arrival in that camp of a corps of surveyors, under instructions to survey a smelter site for the Nevada Con. Copper company. After completing this survey the enginears will turn their attention to the building of the railroad between Ely and Toano. Active work on the grade will begin before the first of June, and the road will in all probability be completed within the next morning. Reading rose an extreme % on running sales of 12,000 shares and Union Pacific, as much on running sales 2% in Woolen and of 1% in Eric second preferred. The early advance was but indifferently maintained and thora were indications of growing pressure against Hilnois Central, Locomotive, Smerting and Amalgamated Copper. There was an excellent distribution of speculative interest and transactions were large in a number of usually neglected stocks. Near II o'clock, when New York Central, which has been a laggard of late moved to 10-5s, the tendency became generally upwards again. Union Pacific rose to 155s, and leading to 93 The more notable advances were Woolen 4, the preferred 23. Philadelphia Rapid Transit and American Chemical 22s, Lead preferred 2 and Car, United States Pipe, Distillers' Securities, Linseed, Smelting, Twin City Rapid Transit, General Electric and B. & G. 1 to 15. The sustained strength of Union Pacific, St. Paul and New York Central, was the feature of the railread list, which moved narrowly otherwise. They movement among industrials and specialities showed great variety. Union Pacific touched 136%. New York Central 161 and St. Paul 181. The more notable gains among specialities were Hocking Valley, Car, Pressed Steel Car, Pipe, Beet Sugar and Linseed preferred 2 to 3. Philadephia, Rapid Transit 4 and American Express 3. Lead, Locomotive, tee preferred. Federad Mining preferred and Pacific Mail lost a point and fractional declines were made in some prominent stocks.

Bonds were irregular at noon, Some new advances kept up the variety of the market but realization made an impression on the leaders, carrying Union Pacific back to point. Amalgamated Copper rose 1 on large buying and Hilmos Central and Smelting made headway and rose 4½ over yesterday, Press Steel Car rose 44, in all, Tennessee Coal 2, and some minor stocks a point. The movement in Northern Securities on the curb with a rise of 5½ kept pace with the transcontinental stocks on the exchange, St. Paul railied to 183%, before 2 o'clock An excited buying movement broke out in St. Paul after 12 o'clock and on purchases of many thousand of shares its price touched 1835, or almost 4 points. Illinois Central, Locomotive, Saw.ting and Amalgamated Copper. There was an exability be completed within the next But the surprising thing is you can talk to nearly everybody you care to over the Independent now. Look in the
