The As the traveler through solitary wilds only difference between them is in eligibility to the offices of President to gaze backward over the scenes his and Vice-President of the United feet have traversed, or to peer forward States. accident of birth." The attempt is made very often to draw this invidious distinction between "Mormon" citizens and others. A professed preacher of Christianity in this city who has recently assailed the "Mormon" people in a vile and cowardly manner, voices this untruthful sentiment by using the term "Americans" to designate anti-"Mormons," as though the "Mormons" were none of them Americans. He has charged that the leaders of the "Mormon" Church are "foreigners." Of course it does not matter much what Rev. (?) R. G. McNiece says on this instrument which sundered forever the or any other question. But in this case he repeats what others say, and the while their op onents only are Americans. This implication is, like most of the things advanced in opposition to "Mormonism," entirely false and unsupported by any facts that would make it plausible. The founders of the "Mormon" system, under Divine Providence, were born Americans and of New England stock. They were descendants of the Pilgrim Fathers. They inherited a love of freedom and had the greatest veneration for the principles of constitutional liberty. The leading minds in this great work have been nearly all of American birth and chiefly of New England genealogy. At the present time, of the First Presidency, Twelve Apostles and their Counselors, First Presidents of Seventies, Patriarch and Presiding Bishopric, forming the General Church Authorities, numbering twenty-eight, all but four were born in the United States, and one of the four was born in Canada and came into the United States with his parents when five years not hang together, we shall hang old. Eighteen of them are of New separately," was a laconic yet signifi-England birth or descent. Only three are of English birth, and one of the three has been in the United States for fifty years, one forty, and the other thirty-three years. They are all and have long been American citizens. Of the Presidents of the twenty-seven Stakes of Zion which are the grand divisions of the Church in this region, twenty are of American birth and a large majority of New England parentage, one is a Canadian, two are Scotch, two English, and two Scandinavian. We do not give these figures to disparage any nationality, or to claim any special excellence for one particular lineage, but simply to show the fallacy of the claim that the leading men mong the "Mormons" are foreigners-The census shows too that the proportion of native-born people in the popu-lation of Utah is largely in encess of hat in many other parts of the Union. It is the policy of the "Mormon" peoole and system to identify its foreigaborn members with American institu-tions as quickly as possible. As a rule they avail themselves of the provisions of the naturalization laws as soon as the law permits. They become fami-liar with the principles that underlie ne famithe Government of the United States and enter into its Constitution, through frequent instruction and constant refce in the schools, the lecture room and the place of public worship. Their religion teaches them that God inspired the founders of this free government, and that submission is required to every constitutional law of the land. They thus become Americanized in thought, feeling, politics and material interest and impregnated with the genius of republicanism. One of the genius of republicanism. One of the fundamental requirements of the Church is that all things in it shall be done "by common consent," and the volce of the people is necessary to the acceptance and confirmation of any appointment or measure, even if rom the voice of God. "Mormonism" is American in its birthplace, the mativity of its foun-ders, the sphere of its prin-cipal operations, the locality of its gathering place, its connection with political interests, its democratic tendencies, its liberal spirit, its aim expectations and grand object. Its Zion is to be in America. Its central Treasts, from which its power is to

WALT LAKE CITY, April 25th, 1884. GENTLEMEN.-With great pleasure I recommend the Miller Wrought Iron Range, as by far the Best Cooking Range that I know of, and as an Economizer of Fuel, its Boiler Attachment and Heater nce of forty-five years) I have never found anything HENRY GROW, Ninetcenth Ward, Salt Lake City. Yours truly,

SALT LAKE CITY, May 8th, 1884.

GENTLEMEN.-I take great pleasure in recommending the Miller Wrought Iron Range, as being decidedly the Best Range in the Market; it requires very little fuel; a person can work around it without solling or scorehing the dress, the heat seems concentra-ted within, so that the kitchen is not over-heated, even during the warmest weather, the dampers are arranged to perfection, so that the heat may be regulated as desired; the Water-back is so protec-ted that it does not wear out as in other Ranges, at the same time it heats the water wonderfully, and we are never without plenty of water in the bath room; the Oven bakes perfectly and is very large. In the opinion of my housekeeper (who is a very competent woman of twenty years experience) this Range is unequalled and should be called the "Kitchen Treasure."

MRS. DR. WHITE 13 42

SALT LAKE CITY, April 21st, 1884

GENTLEMEN.—Replying to yours of 19th inst., will say that I take great pleasure in saying a word in favor of the Miller Wrought Iron Range. I have had one in constant use for one year, and it has proved satisfactory in every particular. Its general Cooking and Baking qualities are all that can be desired, and as an Economizer of Fuel I believe it has no equal; since using it we have had, ever ready, a constant supply of Hot Water in all parts of the house. I would not exchange it for any Range I have ever examined.
