

Ogden, April 10.—An important de-cision has been handed down by Judge Howell in the case of A. G. Fell, the Howell in the case of A. G. Fell, the well known sheep man, against the Union Pacific company, which will be of great interest to the livestock ship-pers of this western country. The suit was brought by Mr. Fell to recover damages from the railroad for shrink-age and loss to 4,000 lambs he was discribed to the eastern market in Augshipping to the eastern market in Aug-usi, 1904. When the lambs were deliv-ered to the railroad company they were, is alleged, in good condition, but the rollroad company failed to send them over the road with dispatch and care permitting them to remain in the cars without food or water for a period of

t 72 hours while in transit. the contract on which the lambs were shipped was a clause which pro-vided that the carrier was released from any liability for damage to the stock shipped, unless the shipper pre-sented his claim for the loss sustained before the stock was unloaded at its destination and mingled with othe stock. The court held, however, that

class and choir. The funeral services will be held at the Huntsville tabernacle Wednesday afternoon at 1 o'clock. Her remains will lie in state at the family residence, 2116 Jefferson avenue, this evening. The funeral cortege will start for Hunts-ville tomerrow morning at 9 o'clock. Critenton home. ANOTHER ESCAPE FROM SCHOOL

Needed a New Stamp. "Dear daughter: I place the stamp

city, and has a business which nets him an income four times as great as that of his father. The fourth son has been connected with the Fidelity Life Insur-ance company of Philadelphia for the post seven years, and has just been promoted to the position of assistant secretary at a salary of \$3,300 per an-num. Mr. Hodge's two daughters have been employed for years in one of the

biggest business concerns in Washing-ton, one as cashier, and the other as bookkeeper. This record would seem to indicate that there are still opportuni-ties for the children of poor men even

contend with in the matter of wages, food supplies and-so-forth. The idea of a direct subsidy bugbear. Ever since the days who the Poland committee unearthed s much chicanery in connection with the Pacific mail subsidy mail scheme some 30 years ago subsidy bills have been tabooed and the warmest friends of the subsidy plan of aiding American shipping interests have come to the conclusion that some other scheme is necessary. It is hardly likely now that any legislation of this character can be enacted during the present session of Congress but there is a growing belief that if anything is done towards aiding in the rehabilitation of the American Merchant Marine by Congress it will come in the form of con-cessions in the way of tariff reduction or else in the imposition of tonnage taxes upon foreign ships, from which American vessels will be free. THE PIERCE REPROT.

in Ogden canyon, and hopes by the time summer trade opens up to have its place greatly improved and beautified.

BRIEFS AND PERSONALS

Major Hirst of the Twenty-ninth U. S. infantry, paid Ogden a visit last evening to officially inspect the local company of the National Guard. The turn out of the boys was very good and the major was greatly pleased with the

and kind, encouraging word for every-body. She took an active part in Church work in the Huntsville ward. A license to wed was granted D. W. A neense to wed was granted D. W. W. Nortom, of Murray, Utah, and Miss Cora Ellers, of East Helena, Montana. The matinee at the Utabna Theater by the Wolf Stock company tomorrow afternoon will be for the benefit of the

of disapproval on your proposed marriage." "Dear dad: Stamp no good owing to

Roosevelt dam which will irrigate 250,000 acres of land, and he brings with him for distribution copies of the Tonto Dam and Irrigation number o the Evening Free Press of Mesa, A. T museum, whose duties require him to test every package of drugs purchased for the medical department of the army. This number is a credit to journalism It is profusely illustrated with hal tenes and descriptive matter of the agricultural resources of southern Ari-zona, including views of the dam site, reservoir site, the drawings of the complete dam, views of the country, His second son is the chief ethnologist of the bureau of ethnology, and there is no man more connectent for the po-sition in the world today. A third son is engaged as a master plumber in this

pictures of prominent men, etc. Mr. Pomeroy reports the condition of the Saints of Maricopa stake as of the Saints of Maricopa stake as pleasing and prosperous. The stake includes four wards, Mesa, Alma, Lehi and Pine. There are 1.355 "white" "Mormons" in these wards, and then there is an Indian ward called the Rapago ward including 200 Pimas, and a southern Indian mission with 300 Indians living thereon. The president of Maricopa stake is John T. Lesueur.

No skin disease can exist without an underlying cause, and in nearly every instance that cause is either a humor in the blood or an excess of fiery acids in this vital fluid. These SALT RHEUM. humors and acids find lodgement in the blood in various ways, the most usual of which is from a lack of energy on the part of the different members whose duty it is to keep the system free from all waste matter.

Skin diseases are always worse in warm weather, and those who are sufferers from Eczema, Tetter, Acne, Psoriasis, Salt Rheum, etc., look forward to the return of Spring with a feeling of dread. During the cold Winter months we shut ourselves in as much as possible, and take a great deal less exercise than is customary in warm weather; we also indulge our appetites by eating of the heavy, rich foods of the winter season, which do not digest as readily as the lighter foods of Summer.

This indoor life and lack of exercise cause all parts of the system to become inactive and listless, and as a result the channels of bodily waste do not properly carry off the refuse and waste matter, which is left from all food after the nutritive properties have been extracted. This refuse ferments and

I had a bad case of Eczema, it being especially severe on my right hand. I was hardly able to use my hand in my work. I tried a great many things in an effort to get relief but was unable to do so until I read of S. S. S. and determined to give it a trial. I used several bottles of this remedy and it cured the trouble entirely. S. S. S. put my blood in fine condition and left my entire skin soft and smooth, and though this was some time ago, there has been no return of the trouble. OHAS, J. WOLF, Jr. 904 S. 2nd Street. St. Louis, Mo.

sours and is absorbed into the blood to weaken and render this vital fluid sour and acrid.

The skin is one of Nature's avenues for removing foreign matter from the system, being provided with millions of little pores and glands through which the unhealthy matter is expelled. As these fiery acids are forced out through these pores and glands they burn and blister the skin, producing Eczema, Tetter, Acne, Psoriasis, Salt Rheum or some other itching, burning skin eruption.

Eczema commences usually with a slight redness of the skin, followed by the formation of pustules, which discharge a clear, sticky fluid. This dries in crusts, and the itching is so intense that often great areas of raw flesh are exposed by the scratching indulged in, in an effort to get relief. In Tetter, the skin becomes hard and dry, often cracking open and bleeding, and as in Eczema the pain and itching are severe. Acne comes on the face and neck, usually, and while not so uncomfortable as other skin troubles, is unsightly and embarrassing. Salt Rheum is very much like Eczema, except that the head is its favorite point of attack; sometimes becoming so severe as to produce baldness. Psoriasis is a dry, scaly form of skin disease and causes acute suffering by its continual burning and itching. These, and all skin eruptions, rashes, etc., are due to the same cause, and the treatment that does any permanent good must be constitutional. Salves, powders, lotions, etc., cannot reach the blood; the most they can do is to temporarily relieve the itching and keep the places clean.

S. S. S. is the best treatment for all skin diseases; it goes down into the blood and acts with a cleansing, healing effect, and by neutralizing the acids and humors and removing them from the circulation, it cures the trouble permanently. S. S. S. does not leave the least particle of the humor for future outbreaks, but entirely rids the blood of the cause. It cleanses and cools the blood so that the skin, instead of being burned

and blistered by the fiery fluids, is nourished by a supply of cooling, healthy blood. S. S. S. tones up the system and regulates the different organs of expulsion so that they will carry off the waste and refuse of the body instead of leaving it to be absorbed by the blood. It is purely vegetable, and not only a pleasant, effective remedy, but is the one medicine that can be taken with absolute safety by young or old, and besides being the king of blood purifiers, is Nature's greatest tonic. Special book on Skin Diseases and any medical advice desired furnished without charge to all who write.

THE SWIFT SPECIFIC COMPANY, ATLANTA, GA.

this trust ridden country. HAVE SMOKE NUISANCE.

For the past 10 years the commis-cioners of the District of Columbia have been trying to abate the smoke nulsance in the city of Washington to such an extent as to insure clean as well as pure air. They have succeed-ed to a marked degree but not to their entire satisfaction. Scarcely a week passes that the revenues are not inreased by the collections of fines of \$50 each from the proprietors of the partment stores, managers of the rirect railroads and various other busi-pess men who have heretofore found it impossible to prevent their smoke stack from belching black smoke to a greater period than the law allows. But on Wednesday of this week the district commissioners were invited to test a smoke consuming furnace which had just been installed in one of the power houses of one of the two elec-tric railways doing business in the Dis-trict of Columbia.

This new furnace is designed exact-y on the principle of a kerosene lamp. The inventor claims that he discov-ered that when a lamp chimney is taken from a burner the carbon in the oil and wick of a lamp escapes in the form of dense smoke; when, howver, the chimney is returned to the urner that smoke is all consumed. His furnace is built on the principle of a lamp chimney and the tests which have been conducted here seem to incleate that he has completely solved the problem of smoke consumption which has bothered every municipality in the country. It is claimed for this invention that in addition to a com-Invention that in addition to a com-plete consumption of all the carbon, even in coal slack, he very largely in-creases the heat producing qualities of even the dirtiest fuel. As a guar-antee of his good faith the loventor offers to establish free of charge the furnaces which his company manu-factures taking as his company manufactures, taking as his compensation a certain percentage of the annual saving in fuel for a period of years. Washington is without manufactur-ies, but if this invention will do what is claimed for it, Washington may yet is claimed for it, washington may yet become a manufacturing center of considerable importance especially for ordnance supplies and similar require-ments of the federal government.

SUBSIDY A BUGBEAR.

When Oliver H. P. Belmont was in Congress he introduced a bill which was designed to aid American ship-ping and at the same time to avoid a direct subsidy. Mr. Belmont's plan provided for a preferential tariff upon all goods imported in American bottoms. That is to say he proposed that a cargo arriving in the port of New York, for instance, in an American ship should be admitted at a lower rate of duty than a like cargo reaching port in a German, French, English or any other foreign vessel. Of course any other foreign vessel. Of course under such circumstances the foreign shipper would naturally select the American vessel raher than its com-petitor because his cargo would be admitted to American ports at a lower rate of duty. He could, therefore, not only afford to, but would be compelled, to now a bioben wate of scientific to to pay a higher rate of freight to the American ship owner than to the for-American sup owner than to the for-eigner. Mr. Belmont's bill was intro-duced during the last days of his congressional term. It attracted con-siderable amount of attention at the time but not enough to insure for it even perfunctory consideration by the committee to which it was referred. Now, however, a number of bills of similar import, some providing for lower duties on goods imported in American bottoms and others proposing certain concessions in the matter ing certain concessions in the matter of tonnage taxes for American ships, not given to foreign vessels are pend-ing in both houses. It is almost uni-versally conceded that something must be done to encourage American shipping and to overcome the disad-vantages which such shipping has to
