COQUETTISH MILLINERY STYLES.

The first glance at millinery of the fall leads one to believe that there are hats only for young faces. So coquettish in outline and style of trimming are many of the hats, that one wonders where mature women are to find their headgear. It is, however, a painful truth that Dame Fashion takes little account of maturity. So many of the round saucer shaped hats are being shown, and this style is so essentially favored that it will be a weary round for one in search of a demure style. Velvet hats are the chief favorite. It is no longer a case of covering hats plainly with velvet, but they are made of pleated, shirred and tucked velvet as well. An effective model is one of the round saucer shaped hats made entirely of shirred puffs of velvet combined with silk folds. These silk folds outline the edge of the brim, pass once around between the edge and the crown and encircle the round crown midway between the top and base. This makes up a hat which is sufficiently ornate to require little or no trimming, save, perhaps, some tips of ostrich which are placed on the back brim.

Keith-O'Brien Co.

SUIT IN REDINGOTE STYLE.

One of the most modish ideas in long coats for cloth suits is the redingote. Almost perfect reproductions of the old-fashioned redingote are brought forth now as the newest fancy. This is simply a bold assertion of the masculine source from which many of the feminine fashions are turned. A typical model suit is developed in dark brown and broadcloth. The front of the coat is shaped almost exactly like a double breasted vest of a man's evening dress. It has the same outline and the flat collar and reverse facing. Southe and fancy braid and silk covered buttons form the trimming which is put on in suspender fashion back and front from shoulder to waist line. To this body is attached the skirt of the redingote which is trimmed all around with a similar design in braid. There is a pretty embroidered vest of green velvet, the embroidered pattern being done in shades of green. The sleeves are full length with a small cuff showing some of the embroidered velvet. At the elbow is a gauntlet cuff trimming which simulates the short sleeve. With this coat is a circular skirt showing the braid trimming in panel design down the front and around the skirt, apparently heading a flounce.
