

LOCAL AND OTHER MATTERS.

CORRESPONDENTS writing for publication are requested to write on one side of the paper only. No notice can be taken of anonymous communications. Correspondents' names must in every instance accompany their communications, not necessarily for publication, but as a guarantee of reliability.

THEATRICAL.—There was a good house last night to see "Camille." Miss Ince presented a very fine impersonation of the title role. The characters generally were very well played, though Mr. Hardie's acting would be much improved if he would be more easy, natural and less labored; but, in the main, he did very well in so long a part, with so little time for study. Tomorrow night Mr. Davenport and Miss Ince will appear together in Bulwer's great and ever popular drama of "Richelieu." Such an attraction, presenting two such eminent "stars" in so excellent a play, and supported by a full cast comprising Messrs. McKenzie, Lindsay, Graham, Margetta, Hardie, Miss Adams, Miss Alexander and others, ought to fill the house. The play is ever a favorite for its beautiful imagery, poetical language and pure and exalted sentiment; and its representation can be witnessed again and again with pleasure and profit, new beauties being discovered as different actors personate the leading characters. Mr. Davenport's fame and high rank in the profession are sufficient to insure a masterly portrait of the great Cardinal; and in the hands of such an actress as Miss Ince our public will be able to see how fine a character there is in Julie de Mortenar. We bespeak a good house for tomorrow night.

STAGE ROBBERY.—Yesterday evening, about seven o'clock, the eastern stage was robbed by four men about four miles west of La Ciede station, and the treasure box, with some \$40,000 in it, taken. When the coach left this city on Sunday night, there were not any passengers on it for any point east of Echo City; and it is not known where the robbery has been lifted by the way, so that it is possible there may have been no person on the coach but the driver at the time of the robbery. La Ciede is 274 miles east of this city. Wells, Fargo & Co. offer a reward of \$15,000 for the recovery of the treasure box and contents, or a proportionate amount for any part of it; and \$5,000 for the persons of the robbers "dead or alive," or a proportionate amount for any one or more of them.

THE IMMIGRATION.—We have been favored with the following telegram to President Young, received to-day:

Benton, Aug. 25, 1898.
President B. Young:
Elders Smith, Jensen and Walker have just arrived, and gone into camp. Gillespie's train started out yesterday. It waited for luggage.
A. C. FRYE.

CONSTRUCTION MATERIAL.—The C. P. R. R. requires an amount of material for construction and supplies for the army of laborers working on the line, which amounts to a daily average of one hundred car loads. The Company have twenty-one saw mills steadily at work in the Sierras, about Donner Lake and down the Truckee. The consumption of ties is 10,000 daily. So we gather from our exchanges.

PRESIDENT B. Young and company arrived in the City yesterday evening, about six o'clock. All well.

THUNDER SHOWER.—There was a nice thunder shower to-day, shortly after noon, which cooled vegetation, laid the dust, and acted as a refresher to baked and broiled humanity generally.

CHANGE OF TIME.—A. W. Street, Esq., Postmaster, informs us that on and after tomorrow, the eastern mail will leave at 6:30 a.m., instead of in the evening as at present.

MADAME SCHILLER.—By the Helena press, and from private sources, we learn that Madame Schiller's success in Montana is unexampled in that Territory. Her Pauline, in the "Lady of Lyons," was received with the most enthusiastic applause by the largest audience that ever assembled in the Helena theatre, and she was called out at the close of every act, after the first. Mr. Waldron played Claudio. The price of admission there, is two dollars in gold to every part of the house.

SOUTHERN UTAH ITEMS.—The Rio Virgen river, of the 12th inst., says the early peach season was over. It was noted for the great size and excellence of flavor of many of the early sorts, both seedlings and imported. They have for some time been eating grapes of different varieties.

FRUIT-GROWERS' convention is called for the 28th inst., to be held in St. George. The object is to adopt such measures as will best facilitate development, and encourage horticulture. Delegates from the various settlements in Southern Utah are invited to attend.

The weather had been very favorable for crops and fruits, showers falling once or twice a week.

COMBINATION.—We are pleased to announce that arrangements have been made by which Miss Ince and Mr. Davenport will appear together, in the pieces to be performed during the gentleman's brief engagement. This combination will be very gratifying to the patrons of the Theatre, many of whom had expressed a desire to see these two talented actors on the boards together. They appear to-morrow night in Richelieu.

EXPLORATION OF THE COLORADO.—The Mining and Scientific Press announces the proposed departure from the Mississippi frontier, of a scientific expedition, designed for the exploration of the Colorado. The party, which will be known as the Powell Scientific Expedition, consists of about twenty-five men, who represent different departments of science. The design is to cross the Rocky Mountains at Berthoud's Pass, and from that point reach, by the nearest route, the Grand River, and there build boats in which to descend that river to its junction with Green River, where it becomes the Colorado. Should grass be found in sufficient quantities for stock at this point, the expedition will winter there, and next Spring descend the Colorado to Callville, and thence return home. Should the expedition follow this proposed route of travel, a large and most interesting tract of country will be explored. The explorations already made on the Colorado, above the mouth of the Virgin, by Captain Henry W. Miller, J. W. Crosby, Esq., and others, have proved that the Colorado river up towards its source, and the country on either side, are of great interest to geologists. But the party, if successful, will have to explore the river and the country adjoining separately, for overhanging banks from a thousand to fifteen hundred feet high, are calculated to obstruct the vision of those who pass down the river in boats.
