PRELIMINARIES COMPLETED.

Mr. Lorenzo Hansen, chairman of the local committee in charge of sugar factory affairs, informs sour correspondent that all necessary subscriptions hav been received by the committee for the purchase of the factory site and partial payment thereon has been made. Deeds and abstracts to the tract are now being made out, and the committee hopes to present the title to the factory promoters not later than Tuesday or Wednes. day next. When Mr. Eccles was here recently he said that a rallway spur to the factory site would be built at once, so that material for the building might e delivered without delay and work hereon begun.

In Priesthood meeting yesterday Pres-ident M. W. Merrill urged upon every owner and tiller of land to plant every acre possible to beets. Too many can-not be raised, and if every man who had signed for five acres could make it ten, so much the better. There is no doubt but sufficient acreage will be planted to insure the factory a good

Of these claims all, except the Merwin are virgin ground. The first owners of the Merwin mined to a depth of about 35 feet from the surface, and extracted ore of the value of over one hundred thousand dollars. They expended the money as they made it, and when the ere body pinched out had no means with which to continue work. The next owners ran a tunnel distance of 650 feet, and reached a poin about 350 feet below the surface, and

inding no ore discontinued work. The present company is sinking a winza from the tunnel at a point where two contacts are inclining toward each other. This winze is now down about 50 feet vertically. It is believed and predicted by mining experts that these contacts will come together at a depth of about 150 feet, and that there a large are body will be found. The present company is also running an upraise from the tunnel toward the old ore deposit about 250 feet above. In this optains at a point about 30 feet above the funnel level streaks or rich galena are have been found, and about a carload of ore extracted. It is believed from the indications that these ore streaks will soon widen into a substantial ere body.

For the purpose of obtaining funds to continue work and pay the purchase money, the stockholders have contribatived 40,000 shares of stock to be sold at er. This winze is now down about 50 feet vertically. It is believed and predicted

In order to induce immediate subscriptions the company offers the fol-lowing extraordinarily favorable terms

Each subscriber for one thousand shares will at the time of his subscrip-tion pay fifty dollars and receive a certificate full paid for two hundred shares. He will be given a permit to examine the mine and allowed five days in which to determine whether he will retain his subscription, or relinquish it and have his money returned. If he elects to retain it he will be allowed until March first , 1901, to pay another fifty dollars, and receive two hundred shares more, and will then be allowed until April 1st, 1901, when, if he elects to pay one hundred and fifty dollars more he will receive the remaining 600

shares.

If a large ore body should be struck at any time, the price of all treasury stock not subscribed for will be raised vithout notice, or it will be withdrawn Subscription list now open at the office of the company, room 42 Hooper Building, 23 east, First South St. No stock reserved.
