our present adversities that stern im-pression is no longer appreciable. I am still confident that the winter of the bureaucracy, which, like the Rus-sian, winter, condemned us to a long period of inactivity, is giving way be-fore the advent of spring, as I prophe-sied last year although no one then be sted last year, although no one then be-lieved me, and the Russian springtide season is marvelously quick in growth." A STATESMAN'S VIEWS.

St. Petersburg, Nov. 27 .- One of the most commanding figures and far-secing statesmen of the empire, whose opinion is of the highest value, but who has declined to permit the use of his name, in conversation with the As-sociated Press today expressed the distinct conviction that nothing in the nature of a radical change in the exist-ing order of things would result from the zemstvo congress. The statesman it can be stated, is a firm believer in the rinciple of autocracy as the best sys. tem of government, for the realization of the dreams of the Slav race, and what he believes to be the greatest des. tiny of the most populous nation and vastest empire in the world; but he has himself, in fact, favored a liberal pol-icy, and is now too practical-minded not to appreciate the factors which

threaten the present regime. Still, he does not believe that anything like a risis now confronts the government. In his opinion everything depends on the war. "The war," the statesman said, "is a big interrogation point for Russia, Her

future at home and abroad is involved in the issue. The internal situation is very complicated. The action of the constvo representatives is a symptom of the disease from which Russia suf-

fers, but these few men have not ne-cessarily made a correct diagnosis or offered the true remedy. Theirs is in no sense the verdict of the people, but only the opinion of a class. The real representatives of the Russian people; could they assemble, and could they argue, would probably enunciate a prograin quite as repugnant to the zemstvoist as to the supporters of the present program. The men who as-sembled here last week do not propose true representative government. They would really substitute a rule of class autocracy to imperial authority. The Russian peasant, who represents four-fifths of the population, with his inborn sense of devotion to the em-peror, would doubtless prefer the lat-ter to the former.

"Were I a minister, and working for the good of the country, I should pre-fer to obey the mandates of the emperor to those of a bogus parliament professing to speak by authority of the people. If zemstvo-elected representa-tives should sit in the council of the empire, they would be equally as spurious as representatives of the people. Neither the country nor the people are

prepared for true representative gov-ernment. Anarchy would take the place of government, and the empire would crumble to pieces. So far as the program of the zemstvoists is the program of the zematvoists is concerned. I am sure neither the em-peror nor the government believe in it; but that does not mean that liber-alism is to end. The policy represented by Von Plehve in my opinion can never return.
