

EDITORIAL NOTES.

Judge H. H. Emerson has been confirmed by the Senate as Associate Justice of Utah. The Judge's numerous friends will be pleased to know that his honor has been re-appointed.

Cases of tetanus, of which lockjaw is a variety, is said to have been successfully treated by merely applying to the nape of the neck and along the spine of the patient, large pieces of flannel dipped in hot water of a temperature just bearable to the hand.

The laws of Wyoming prohibit the carrying of any weapon within the limits of any town, either openly or concealed. All persons caught violating the law in this respect are to be instantly arrested and dealt with. Wonder if the law will really be enforced?

Gilmore & Co., of 629 F. Street, Washington, will commence in May the publication of an eight page paper called *America*. Its motto will be "free thought, free speech, free labor" and it will be "devoted to the interests of the people." An immense edition will be issued and the paper will be first class in every way. It is to have a national circulation, and will prove a valuable addition to the current journalistic literature of the day.

A remedy for cuts is often asked for. Here are two, either of which is said by those who claim to know, to be thoroughly effective. Make a smooth circular hole in the center of the ant-bill by driving a spike an inch thick or more to the depth of about eighteen inches, and then withdrawing it. Or bury a bottle in the ground so that the top of the neck will be level with the surface. The ants will fall into the hole of the bottle and be unable to crawl back again.

The first rough calculations of the population of the various provinces of the British Indian Empire, founded on the recent census, are being gradually published. According to these numbers for the North-West Provinces are 32,000,000, and for Oude 11,200,000. The increase since 1872 has been about five per cent, but varies much in different districts. The grand total for the Punjab is 23,640,468, of whom nearly 19,000,000 are British subjects, and the remainder subjects of the native States. The increase since 1883 is about 64 per cent.

That was a peculiar and rather uncomfortable position in which a New York officer found himself a week or two ago. He was executing a prisoner to jail, to which a city judge had recently sentenced him. The clerk of the court in making out the commitment had by mistake inserted the name of the prisoner, and answering to the name at the prison, the officer was held notwithstanding his protestation. Fortunately the officials were smart enough to hold the other man also and when the mistake was discovered the officer was released and the right man put in his place.

The *Seranton Republican* of May 4th, has the following, which alludes to the close, to a gentleman well known and respected in this Territory: "During the recent pugilism on Ex-Governor Bigler in the State Senate, Mr. Smiley of Perry, mentioned the birth of five distinguished Pennsylvanians in one room of what is known as the old Gibson mansion on Stierwieser's Creek, Perry County, less than fifty miles from the State capital. The men were: John Banister Gibson, the distinguished Chief Justice of the Supreme Court of Pennsylvania; his brother, George Gibson, for many years prior to the rebellion, the Commissioner General of the United States Army; William Bigler, the late Governor of Pennsylvania; and John M. Bernhisel, who adopted the Mormon faith and afterward represented Utah in the National Congress."

FATAL COSMETICS.

Titus use of cosmetics, we are sorry to say, seems to be increasing. It is lamentable how women will follow fashion no matter how foolish or dangerous to health it is. A young lady died in Buffalo on the 6th inst., from the toxicose use of powder containing white lead. Dr. Hammond, a skillful physician pronounced this as the cause of her decease. That physician declared that most of the cosmetics in common use contain white lead, and that a great many more cases of lead-poisoning occur through the prevailing fashion than the public have any idea of. This poison is used in the manufacture of eye powders, washes and hair dyes. Minute particles enter the skin and are taken up by the blood and communicated to the system. It produces various effects; paralysis, colic, prostration of the nervous system, and insanity, are among the most frequent results of its introduction into the system.

The above named doctor related to a reporter the particulars of several cases which had come under his own notice, of the fatal results of the use of these applications. One was the wife of the Governor of a western State, who used a hair dye containing white lead; she became hopelessly insane, and death ensued. A young lady who frequently applied a nostrum called "Bloom of Youth," was seized with paralysis and subsequently died from its effects.

If ladies only knew how ridiculous and really shameful the practice of powdering and painting appears to discerning and reflecting men, we think many of them would quit the senseless and disgusting practice. Better show the face which nature has formed, clean and free from dabbling, if sallow or freckled, than appear before the world in a mask which everybody with eyes can see through, and which brings the lady and the demi-monde, in that one respect at least, on a level.

CAR-SICKNESS AND SEA-SICKNESS.

A new remedy has been discovered for what is commonly known as car-sickness. Many persons cannot travel by rail for any great distance without suffering nausea somewhat similar to that experienced at sea, especially if they ride with the back toward the engine. A simple preventive has been tried with alleged perfect results. It is merely to place over the chest, next to the skin, a sheet of common writing paper. On what principle this acts upon the system, we are not prepared to say, but persons who have tried it pronounce it singularly efficacious. Here is an instance:

A lady, who never travels by rail without suffering as severely as though tossed upon the billows of the angry ocean, while riding in a Pullman in the East, was told of this remedy by the conductor, who said he had never known it to fail, although he had recommended it to hundreds of persons. The hint was accepted. For the return trip, a sheet of common writing note paper was fastened inside the clothing, as directed. The result was a perfectly comfortable journey, without a hint of the old sickness that had for ten years made travel by rail a terror. It was so like a superstition, or a happy accident, however, that the lady would not accept it as real until subjected to a more severe test.

This came in a day's journey to New York, and that latest trial of all-night trip in an "alleged" sleeping car. Both were taken in triumph. The "pharm" worked, and the lady writes: "The day journey was a perpetual wonder and delight to me. I could sit up and read, and look at the landscape through which we whirled, and act as other people do. As still I didn't feel ready to confess to a cure until I had tried the sleeping car, which has always been a horror to me. But even here the 'spell' worked. I ate a hearty supper in the dining car—and kept it! Slept soundly all night, got up as comfortably, and dressed with as level a head and as steady a hand as though I had been in my own room. Read until breakfast time—a thing I have never before done on the cars—and hungry for my morning meal. It is really almost too good to be real. For the first time in my life I have experienced the pleasure of traveling." It does not matter whether any scientific explanation can be given or not, so long as the alleged remedy has the desired effect. And if it works well on a railroad why may it not work equally well on ship-board. A preventive of sea sickness would be a priceless boon to thousands.

STINGING, BUT TRUE.

This *Wasp*, a stinging illustrated comic paper, something after the *Puck* order, published in San Francisco, has had some vulgar and ridiculous things about the "Mormons." But a writer in a recent number of that paper takes up the subject in a different mood, and we give the following extracts from the article. Here is a vigorous dart at the anti-Mormon fanatics: "I heartily wish that every 'Mormon-hater' were given the clear-eyed intelligence to see himself and his holy-conferences as the mirror of history shows them to be. I have always been a student of the 'Mormon' revelation; he ought, in some sense, to be a fair-minded student. In the *New American*, a paper of 'Utah and its People.' The article is dignified, gentlemanly and temperate. It is truthful, logical and graceful. Its periods are fluent, its sentences well balanced, its phrases, generally, pleasing and right."

This sharp thrust is straight to the point: "I have no religious convictions. I do not care a copper for the Mormons. But I care a good deal for truth, reason and fair play; and whenever I have the opportunity to do so, I will speak and vote against it. I don't think Dawes will. I don't know any other eastern senators who would be likely to oppose it. I shall have the support of the entire west in the House."

Miller will of course carry the bill through the Senate. Now, when you put it through Congress will it be vetoed? No, sir, (very emphatically), Garfield will approve the bill. We know that. He is with us in this matter, we are greatly encouraged by what he said in his letter of acceptance. It strengthened us very much on the Pacific Coast in the campaign. We shall have it on the statute book and may be enacted before many weeks after the first Monday of December.

Woman's Work. The *Woman's Silk Culture Association* which held its first meeting in Philadelphia, recently, is one of the few national and patriotic efforts made by a woman to help the condition of other women. Their idea is to induce farmers' wives and daughters to add silk culture to their other industries, and as the manufacturers decline to buy the raw silk in such small portions as are furnished by individual growers, the association acts as a middleman, buying the cocoons, and forwarding them in gross. In addition to their other efforts, they have opened a school of instruction in silk culture. The association has just offered prizes amounting to five hundred dollars, for the best silkworms and cocoons in the United States. The prizes are to be given to the best silkworms and cocoons in the United States. The prizes are to be given to the best silkworms and cocoons in the United States.

BY TELEGRAPH.

AMERICAN. A Private Difficulty. St. Louis, 11.—A Republican of the *St. Louis Post-Dispatch*, special says: Major Tule, of the 10th Cavalry, has been sent down from Missouri on Saturday night and started today for Governor Overton's headquarters at Springfield, Mo., to confer with Governor Overton. The *Post-Dispatch* says that Governor Overton is holding a conference to-morrow with Governor Overton, for the investigation of the charges against Dr. Saunders, which have been made by the *St. Louis Post-Dispatch* and the *Chicago News*. The feeling against

Saunders is very bitter and he (Tule) will be joined at Cedar Mills by a squad of United States troops to protect them. Unknown parties are reported to have fired into Dr. Saunders' house Saturday in his absence, nearly killing his wife and other members of his family.

A Happy Caucus. New York, 11.—The *Tribune's* Washington special says: The caucus of yesterday was chiefly remarkable, said a senator in conversation with a correspondent, last evening, for the good temper exhibited on all hands. It was a real family gathering to talk over family trouble, and the good purposes of all its members were manifested in everything that the speakers said. A general desire was expressed that none of the details of discussion should get to the press. It can only say in general terms that the long speech made by Conkling was one to which Garfield could have taken no exception. It was calm and temperate in tone, and it brought no accusation of bad faith against the President. It covered a great deal of ground, but it was not done to do it by any mere outline of what it contained. While a variety of views was expressed, all the speakers were mild and conciliatory in tone, and everybody manifested the strongest disposition to do everything possible to compose the difficulty.

The Royal Marriage. A Vienna dispatch says: The marriage of the Crown Prince Rudolph of Austria and Princess Stephanie of Belgium, was most imposingly solemnized at the church of St. Augustine to-day. An immense multitude collected in the streets through which the royal personages drove to the church. An hour before the commencement of the ceremony the church was densely crowded by a brilliant and striking assembly. A fanfare of trumpets signalled the arrival of the cortege at the church door, where it was received by Cardinal Von Schwarzenberg, at the head of his clergy, and their majesties took seats under a canopy over a throne. The bride and groom proceeded to their places before the sanctuary rails, where they offered a short prayer. After a brief address from the Cardinal, the marriage ceremony was proceeded with. At the moment the rings were exchanged, peals broke forth from the bells of the city, and salutes of artillery were fired. At the conclusion of the ceremony, the Prince and Princess, accompanied by the Cardinal, returned to the city palace of Hofburg.

Shufeldt's Mission. CHICAGO, 11.—The *Inter-Ocean's* Washington says: Commodore Shufeldt leaves to-morrow night for China. He takes instructions from the State Department, as attaché of the legation in China, and ostensibly goes to carry back the ratified Chinese treaty. What he really goes for and what he is expected to accomplish eventually is the opening of the ports of Corea to the world. The Commodore is the only foreigner who ever succeeded in getting a letter to the King, and having an answer. He was there at the time of the bombardment some years ago but his last visit was a white one on his eyes and he is now blind. He thinks in the course of six months or a year he can accomplish the object of his mission and have Corea accessible to the world of commerce. He does not think it very important however for the purposes of trade, because the country is so small and the people are producing nothing but rice and a little gold. He regards it important, though, that a treaty of friendship and amity should be negotiated, for our vessels in the Indian seas are frequently stranded, there, and savages are liable to put the shipwrecked sailors to death. To accomplish this an arrangement will be made for the first time, leaving the matter of trade for future consideration. Although of small account now, the Commodore thinks that the opening of the country will grow after communication with the outside world is established.

Page Sanguine of Chinese Legislation. BOSTON, 11.—The *Herald's* Washington special has the following report with Representative Page in the Chinese treaties: "Are you preparing legislation such as I will meet the views of your people?" "Yes, I am drafting a bill which will, I think cover it; of course I can't complete it until the terms of the treaty are proclaimed, but in the meantime I have had ample assistance of Commissioner Swift, who aided in the negotiation of the treaty. He has already given me several important suggestions derived from his knowledge of the circumstances under which the treaty was concluded. It will be practically the same as the fifteen passenger bill vetoed by Hayes. I believe more than 15 or 20 men will vote against the bill in the House, and I do not believe it will meet much opposition in the Senate. Having visited the locality, they found that Mr. Cast had done some work, evidently with the intention to benefit himself as well as the city, and while unauthorized by the city, they believed that he had done the work in good faith, and therefore recommended an appropriation of \$25 as compensation in full for all work done by him for the benefit of the city. Report adopted and amount allowed. Adjourned for one week."

FLIES & MOSQUITOES. A 15c. box of "Rough on Flies" will keep a house free from flies, mosquitoes, and other pests, after the entire season. Drugists.

Better Get It Now. It saves life and doctors' bills. We mean Brown's *BLACKBERRY AND GINGER*, the most successful remedy ever introduced into the South and West for the cure of Dysentery, Cholera, and Cholera. For sale by Z. C. M. L. Godbe, Pitts & Co., and Moore, Allen & Co., Salt Lake.

MALARIAL FEVER. Malarial Fever, constipation, torpidity of the liver and kidneys, general debility, nervousness and neuralgia, yield readily to this great disease conqueror, *Hop Bitters*. It repairs the ravages of disease by converting the food into rich blood, and it gives new life and vigor to the aged and infirm always. See "Proverbs" in another column.

Conkling's speech yesterday turned the tide in his favor. This is doubtful, although the republicans expressed friendly feelings in the caucus. One supporter of Conkling told a western press reporter the caucus was very closely divided. He believed the Robertson case will be laid over till December. Another said Conkling will fight splendidly to the bitter end, and expects to succeed, as he is gaining strength. A friend of Conkling, but against him in this case, believes Robertson will be promptly confirmed like other nominees. Another said Conkling had made a mistake of construing the friendship of the Senators on promises of the President. The unbiased judgment is that Robertson will be confirmed. Conkling men on both sides are working hard to-day but it is reported if Conkling carries the caucus some senators refuse to be bound by it and will stand by the President. Foster (of Ohio) is here working for Maladewa and says he will be confirmed. The Treasury will extend the date for the continuance of sizes at 32 per cent until all the 20th of May. Mrs. Garfield is still seriously ill. She was a martyr to position, her husband's honor to her husband's friends being beyond her physical endurance. The Senate went into executive session and after the doors were reopened adjourned.

CITY COUNCIL.

Proceedings at the City Council on Tuesday evening, May 10th, 1893, Mayor Little presiding: A communication from R. A. Margrets was submitted, calling attention to the fact that his application for a title to a certain sandstone ledge, situated on the mountain north of the city, was still pending. Messrs. Elias Morris & Co., petitioner was told, had laid claim to the same ground, and considered themselves entitled to it from the large sum expended thereon. The petitioner set forth that the ground he claimed and wanted to purchase was city property, while Morris & Co.'s claim was a part of G. B. Jones' land, and all the improvements claimed to have been made by Morris & Co. were on said land, and the granting of the deed to petitioner would ground asked for by him would in no wise interfere with the rights of any other man. Referred to the committee on public grounds.

Alderman Dinwoodey, chairman of the committee on fire department, stated that the arrangements in regard to telephone made by the Council, which allowed but one telephone for the police station and fire department, were unsatisfactory and asked that communication with the telephone made in Fireman's Hall instead of at the Vassett or Twentieth Ward engine house, which latter was authorized by the Council. On motion the former action was reconsidered and one instrument ordered to be put in at Fireman's Hall, as requested, and the other in the police room as before.

The committee on construction of the Jordan and Salt Lake City Canal reported for the month of April, an expenditure on various accounts connected with the construction of said canal of the sum of \$15,192.00. Referred to the committee on finance.

U. S. DEPOSITORY. DESERT NATIONAL BANK, SALT LAKE CITY. PAID UP CAPITAL, \$200,000. SURPLUS, \$100,000.

RECEIVES DEPOSITS PAYABLE ON DEMAND. Buys and sells exchange on New York, San Francisco, Chicago, St. Louis, Omaha, London, and principal continental cities.
