Mammoth Higher-May Day Softer-Ben Butter Sags-Yankee Con-Was Firm.

Business was quite brisk on the Exchange today. Trading was freely participated in and the prices of yesterday's weakening stocks were on the up grade again today. This was especially true of Ajax and Star Consolidated, both of which did a good business at better figures. The former opened at 76 and climbed steadily to 79% at the close, while the latter started out at 74 and reached 78 on the closing sale. Anchor was in demand around \$2.30, while Consolidated Mercur redeased 100 shares at \$3.23. A marked decline was noticed in Lower Mammoth today owing, it is said to the feeling that the next shipment will not run quite as high as the previous ones. From \$3.00, the price at which 200 shares changed hands at the outset, the stock weakened to \$2.83 on the closing sale. May Day opened at 42 and declined to 41%, while Mammoth was active from \$2,081/2 to \$2.101/2. Ontario sold at \$7.20. Petro dropped 300 at 14. Rocco-Homestake was active at \$1.02, while Silver Shield sold at 23%. South Swansea fell away to 95, while Valeo was active at 40. Butler Shipment-Blackbird Company's Mines. The addition of another new smelter n Salt Lake valley is already bearing good fruit for the ore producers of the State, judging by the contract which was signed today between the Mammoth Mining company and the representatives of the Guggenheim Interests. By this contract the Mammoth com-pany has tied up its ores with the Smelting company for a period of three years beginning from the first of the

Although the contract was onth. nade with the Guggenhelm representatives it really means the American Smelting company. The consolidation will not be formally ratified until Saturday next, when the shareholders are scheduled to meet in New York, but the consolidation is just as much a fact now as it will be then. The pres-ent arrangement insures lower treatment charges and a higher price for copper. The details were not made known, but it was learned that at the present rate of shipping the company will save between \$4,000 and \$5,000 per month under the new contract. The month under the new contract. The Bingham Copper and Gold company was figuring with the company, and it is probable that this fact went far to-wards securing such a good contract.

MAMMOTH NO. 2.

Consolidation of Various Interests Being Discussed-Good Ore Found.

Preparations are being made to consolidate the interests in the Mammoth No. 2, which lies between the Mammoth and Ajax properties at Tintic. In speaking of the property today a well known expert said that Mr. Samuel Mc-Intyre owns 200 feet of the No. 2 claim, while, through the recent purchase of R. D. Grant's interest, the McIntyre brothers practically own the remaining 400 feet of the claim. The claim alto-gether is 600 feet by 200 feet and as soon as matters can be arranged a consoli-dation of the whole claim will be made. Several cars of fine copper ore have been extracted from the claim through the Mammoth workings. One of the leasers is also said to be approaching the No. 2 on the upper levels, and it appears quite probable that some big ore bodies will be found on the claim. It is already evident that the old theory that the fault cut off the ore south of the Mammoth is wrong. The ore evi-dently occurred after the big dyke was formed. Enough work has now been done to show that this is true and interesting developments may be looked for in this claim in the near future.

R. C. Templeman, manager of Alaska Exploration company, is at the Knutsford registered from Ketchikan,

Alaska. Wm. E. Johnson and Robt. S. Billings of Denver, are guests at the Knutsford. Mr. Johnson was the constructor and former president of the Florence and Cripple Creek railroad, and is now vice president of the Rocky Mountain melting & Refining company. Mr. Billings is the general purchasing agent for the latter company. The gentlemen are in Salt Lake on pleasure and some business.

A. S. Anderson, manager for the American Line of Steamships between Philadelphia and Liverpool, was in Salt Lake yesterday. The American Line is owned by the International Navigation company, which also owns the Red Star lines from New York and Philadelphia to Antwerp and the American Line from New York to Queensland. Mr. Anderson said last evening Knutsford that his company is building six new vessels, two of which will be added to the American Line from Philadelphia. In speaking of the ship subsidy bill, Mr. Anderson said. "I think it is a patriotic measure. It would stimulate not only the ship-building industry, but our foreign commerce would increase enormously, Germany in places where they now dermany in places where they new have an absolute monopoly. We are now like the merchant who, starting out with the same stock as two others was minus a delivery wagon and had to depend on his competitors to deliver his goods. ' He had a good chance to be goods. cheated—so have we without our own carrying ships. To qualify as an American vessel, a certain number of its officers and seamen must be Americans: American seamen are scarce consequently come high, and make it almost impossible to compete with England and Germany as things now ате.'
