## SAYS ASSISTANT IS NOT TO BLAME

City Engineer Takes Exceptions To Board of Public Works' Unwarranted Strictures.

## WHERE RESPONSIBILITY LIES.

Matter Under Investigation This Afterneen-Other Business Before Council.

The communication from Chairman Wall of the board of public works to parents and the friends present: p. J. Moran, ordering work stopped on the east South Temple street paving. which was published in last evening's "News," was submitted to the city council last evening by City Engineer Riter, who takes exceptions to the action of the board in stopping the work and in criticizing his assistant, Mu. Zulick, for changing the plans. Engipeer Riter's letter follows in full;

To the Honorable President and Mens. bers of the City Council, Salt Lake bers of the City Council, Sait Lake City, Utah.—Gentiemen: I beg leave to transmit to your honorable body a copy of a letter addressed by the chairman of the board of public works to Mr. P. I. Moran, contractor, and received at this office late this afternoon. The plan for paving Brigham street on a level higher than the south sidewalk and lower than the north sidewalk made it necessary to get down to the streets running southerly and up to the streets running northerly. For A, B, C and D streets there were two alternatives; either to make lengthened approaches to those streets, or else to cut down this streets in the middle so that pedestrians on the north side of South Temple street would have to go down through a valley at each of these streets and then make an ascent in order to get up on the sidewalk again. The objectionable features of both these plans were pointed out to the councit very pialnly before the present plan for paving the street was authorized. My predecessor, Mr. Snow, chose the lengthened approaches, as being the least objectionable of the two alternatives, and as yet I have seen no good reason for reversing his decision.

I call attention to that portion of the chalrman's letter which contains an unwarranted personal attack upon my assistant, Mr. Zulick, for the reason that this is not the first time that such up-City, Utah .- Gentlemen: I beg leave so

warranted personal attack upon my assistant. Mr. Zulick, for the reason that this is not the first time that such upwarrantable attacks have been made upon him publicly and in communications addressed by the board of public works to the city council, but which up to this time have been allowed by ma to pass unnoticed. Mr. Zulick has had no more to do with this particular plantan has neasony other employe of the deno more to do with this particular planthan has any other employe of the department; moreover, the city engineer assumes full responsibility for the conduct of his office. Inasmuch as the chairman of the board of public works has seen fit to order a discontinuance of the work named, the matter is respectfully submitted to the city council for such action as it may choose to take. Very respectfully,

GEORGE W. RITER.

City Engineer.

TO BE INVESTIGATED.

After it was read it was referred to After it was read it was referred to the engineering and streets committees for consideration. Those committees, with the engineer and board of public works, are scheduled to meet on South Temple street at 3 o'clock this after-noon and investigate the matter.

PETITION GRANTED.

The First Methodist church petitioned The First Methodist church petitioned the council to be allowed to fence in 30 feet of Second East and half of the sidewalk on Second South street on the southeast corner of the intersection of those two streets where the new church will be built. The petition was granted.

DEPARTMENT PAYROLLS. Auditor Felt submitted the depart-nent payrolls of the city for the last alf of May, amounting in all to \$11,-They were referred to the fl-committee and the chairman of the other committees associated for ap-

#### U. OF U. YEAR BOOK.

Handsome Volume Issued by and for Benefit of Students.

An interesting publication was yesterday put out at the University, in the shape of the first extensively edited year-book produced by undergraduates. The book is a beautiful affair, edited by John Jensen, chairman of the board of editors of the University Chronicle, and athletic manager of the University for next year. Jensen has spent a great deal of time on the year book for the past three months, and as completed it is a striking and beautiful summary of the year's effort at the university at almost every line. The binding is in red and white, with a beautiful cover design of the University flag surmounting a decorative sketch. The typography and haif tones, of which there are a great many, are excellently done and give a finished appearance to the book. The text gives a record of the year in class organizations, in athletics, in debating, and in all other student intersests, together with pictures of the graduates of the normal and college courses. The increased student body makes it probable that the book will be a financial success, as well as an artistic one, and that this will be the first of a series of such books which will be published annually by some one of the college classes. red and white, with a beautiful cover

#### DEMAND FACTS About What You Eat.

When it comes to food, demand to know the facts about what goes into your stomach.
Not only that it is pure but that you

preakfast foods that have thus far alled, are now being advertised in close imitation of the Grape-Nuts advertis-ing thinking in that way to finally make a success of the failure.

But false statements of the merits, or human food will never on earth build up a business. These flaked foods are not pre-digested. They are not fully cooked and the starch in them is starch still and has not been turned to sugar as claimed.

as claimed.

Chemical analysis tells the truth and the analysis of the famous chemist of the world show Grape-Nuts the only prepared breakfast food in which the starch part of the wheat and barley has been transformed into sugar and therebeen transformed into sugar and there-fore ready for immediate digestion. Why is this true? All the thin rolled flake foods are made by soaking the grains of wheat or oats in water, then rolling, drying and packing. These op-erations do not cook or pre-digest the starch.

Contrasted with this pretense, ob-serve the care, method and skill in

serve the care, method and skill in making Grape-Nuts.

The barley is soaked about one hundred hours, then it is slowly warmed for some days and sprouted, the diastase being developed and part of the starch turned to sugar, (and later on all of it), then the grains are baked and the sprouts stripped off. Then comes grinding slifting and mixing with the creamy colored flour made from comes grinding, sifting and mixing with the creamy colored flour made from white and maccaroni wheat. This mixture must be skilfully made in right proportions. This blended flour con-tains just the ingredients demanded by nature to rebuild the soft gray sub-stance in the nerve centers and brain,

but how to make the food easy to di-gest, that was the question.

It certainly would not do to mix in drugs, for there is a certain failure sure drugs, for there is a certain failure sure to come to the person depending on drugs to digest fed. They may do for a temporary expedient, but pure food and digestible food is the only final resort and safe way. So to change the remaining starch part and prepare the other elements in this blended flour it is made up into massive loaves like bread, the liside being dark cream color and quite sticky to the touch. These loaves are sliced and again go through long cooking at certain temperatures. Then the rock-hard slices are each one carefully inspected and ground ready for packing and use, ground ready for packing and use, having gone through 10 or 12 hours in

the different operations.

When finished, each little granule will show a sparkling substance on its surface. A magnifying glass will bring it out clearer and develop little pieces of pure dextrose sugar, not put on "or poured over" (as the head of a large Sanftarium once stated in his paper, thus exposing his appalling ignorance of food processes) but this sugar exudes from the interior of each as the starch is slowly turned to sugar in the process of manufacture. This kind of sugar is exactly like what is found in the human intestines, provided the sugar is exactly like what is found in the human intestines, provided the starch of the grains, potatoes, bread, rice, cake, etc., etc., has been perfectly digested. But many are weak in that form of digestion and yet need the starches, so Grape-Nuts supplies them pre-digested and ready to go quickly

into the blood.

Visitors are shown freely through the works and can follow the steps of making Grape-Nuts from the grain to the finishing product. The proportions of different kinds of flour, and the temperatures are not disclosed and it seems impossible for others to steal these secrets of the makers. But purity, cleanliness and skill are shown in every corner of the immense pure food for cleanliness and skill are shown in every corner of the immense pure food factories. People who care for results from choicely selected food, those who want the food to rebuild the soft gray substance in brain and nerves that give the go, the vigor, the life, will understand why the imitators who try to copy the announcements about Grape-Nuts have failed in the past.

There's a reason for Grape-Nuts and a profound one,
