

AMONG THE MINERS.

Silver Mine Will Come up With a Railway There.

DEMONSTRATION AT EUREKA.

The Federated Trades After Marshal Brigham's Stamp-Raising Notice.

Regarding the miners in the St. Peter country, Jim W. H. Beemiller says they are going to amount to something of importance so soon as railway transportation facilities are afforded. At present they can only be worked by a packtrain, and this condition will remain until the U. S. W. or some other railway builds a line there that section.

"Then miners will change," says Mr. Beemiller. "This is the Brandon mine, which is a magnificent property. There is an immense body of ore in sight, and we believe that as soon as it can be properly worked it will be second to nothing in the West."

The Holly Bag and Weasel is also taking out its ore, and is working regularly. It is the easiest mine. They have a mill there, and get along better than most of the others. Then there are the Grangeville copper, and several others which are places of great value, etc. Transportation facility is the great need at present for their development. When these are provided the miners down there will be expected probably to increase successively."

Demonstration of Miners.

Wanted the Miners' Union of Eureka project to have a public demonstration in the interests of the miners against the entry of the United States Marshals into several San Lakes parties have been sending delegations to go down to Eureka and make some speeches.

After the Marshals.

The Federated Trades now demand the removal of U. S. Marshal Benton. He has a prisoner named Rouse to the penitentiary. This individual had served as a "trusty" and as the expressman for the miners in the trials of the miners. He was arrested 315 before his trial, and, when he received his liberty stated in the miners' trial that he was anxious to get work so that he might pay the sheriff. So this, the miners say, is the reason they apply at the railroad-depot office and recommended him as a reliable man.

For this reason the Federated Trades have decided that Marshal Benton is unfit for his official position. All their members are asked to do what they may to remove him.

Whereas, The United States Marshal is unauthorisedly appointed by the Presidential United States for the purpose of preserving the peace in the Territory of Utah.

Whereas, The miners present a certain disagreement between the Miners' Union of Eureka and the miners of the Bingham, Bear and Champion mines, and,

Whereas, United States Marshal Benton sent an ex-miner to send miners out of the mines, and the miners, comprising himself, an employee agent for said mine owners, and by his action causing a rupture of the peace of said mines.

Resolved, That said United States Marshal L. A. Benton has overstepped the limit of his authority in thus commanding miners to leave the mines, and to send them to prison; to said Bingham-Bear and Champion Mining company, urging the right of an emigrant office and miners to remain in the mines in the month of October, therefore be it further,

Resolved, That a copy of these resolutions be sent to the President of the United States, and be published each of the daily newspapers a copy, and before the Utah Federated Trades and Labor Council receive approval of the miners' union of the state of United States Marshal Benton.

The Bullion.

The Bullion mining at Stockton, which is being worked under license of Foster Brothers and Company, is reported as doing remarkably well. About a score of men were in the shaft at 200 feet in depth. Since that time a drift has been run in the shaft about 100 feet, and in the drift a vein of quartz 25 feet wide. At the bottom of the veins the vein is 5 feet wide. The drift and veins are all in ore, which need carelessness, carrying about 100 tons of quartz in the ton. Fifteen men are employed and placed in the veins. The last shipment of ore from the property sold for about \$25 per ton.

NOTES.

Colonel James Hutchinson, of Salt Lake, has purchased the Millie Mountain mine at Cripple Creek, Colo., for \$30,000. The main shaft is down 1500 feet, and a four foot vein of ore which runs true to four ounces of gold per ton has been discovered.

Haley (Idaho) Times. A lot of miners fine the U. S. company, who have been here for some time, and are now gone, and come to town. The roads are so soft that it is impossible to get a horse over them, and the men were compelled to walk, sinking to their knees in water and mud at every step. They have been compelled to wait on rounding home. These men were held off because the traps and pitfalls were choked with wrecks so that cannot be hauled until the roads dry.

A Helena (Montana) correspondent, writing from Livingston, dated April 10, says that Dan Mack and Charles Lonsdale struck a lead vein in the hills of Carbon county, a few days ago, about one mile west, that obtained estimate will run 1000 feet to the gold. The gold is all coarse, ranging from No. 8 to No. 12, and the miners think, in the same vein, there are many more. Their lead is 1500 feet long, and A. C. L. has taken more than his share of gold. Several other discoveries are reported to have assay'd nearly as well.

It is reported that C. F. Biggs has again started for his mining property in the south to where he made a trip last fall, thus agreeing the Eastern Advertiser. He has sent a telegram to his return some fine specimens from his copper mines some of which he has shipped in pairs to San Lake City to whom he is trying to sell his

claim. A party from the Alpine claims Biggs has started south to examine his property and find out what they are. They are as yet, however, not in a position to do so, and if they are to do so, they will be delayed for a week or ten days.

A suit has been filed in the United States Circuit Court in Colorado by Taylor & Lewis on behalf of the Colorado Mining Association against the miners of the Colorado River valley, John V. Kimball, Edward F. Clark, Horatio Shockey, Michael W. McCoy and John H. Hodges to recover the sum of \$100,000, which they claim is due to the miners of the Colorado River valley.
