WE have, on former occasions, made reference in this paper to the wondrous Great Pyramid of Egypt, and the theories concerning its symbolical charaster advanced by Taylor, Plazzi Smyth, Seise and others who recognize in that immense mass of stones, piled up with so peculiar an architectural constructivouchsafed in any age of the tion, the "altar and pillar" which ancient prophets declared should nations are attracted by the developments which have attended the latest researches and investigations into the meaning of the peculiar internal construction of the Pyramid of Gizeh, with the significant measurements and embodiment of scientific principles which mark this wonderful structure.

It will be interesting to such of our readers as have paid any attention to this matter, to learn that Elder Orson Pratt, while reflecting upon it recently, made as he considers a very important discovery connecting the symbolic references of the Pyramid with the great work of the latter days, the ushering in of "the dispensation of the fulness of times."

It will be remembered that the principle of historic and prophetic measurement alleged to enter into the construction of the great building is one pyramid inch to a year,

The letter substantially says: That thinking it best to have some distinct understanding as to the policy of the party on the present issues between the Executive and Congress, the signors deem it important to have the judgment of the northern dem-

ocrats in the matter and are willing to follow their advice. The letter is signed by a number of southern members, mostly from the border states. It indicates a desire in the

southern men to make the northern democrate responsible in public for whatever policy may be adopted. There is reason to believe this movement does not include all of the southern representatives, and that whatever may come of it, it will not bind those southern democrats who have determined that the ap-propriations for the army shall be made, that an early adjournment shall be brought about.
