England Boos Not Like Mahan's Interpretation of Munroe Boctrine-Americans in Caracas Protest.

New York, Feb. 2 .- The Daily Mail says, according to the London correspondent of the Tribune, that the more the British nation struggles to escape from the German alliance and the Venezuelan imbrogilo, the more irretrievably and inextricably is it involved, that there are obvious reasons why Germany should seek to protract the quarrel to the utmost possible limit, and that she now so controls British policy that all the remonstrances of the

English press appear to be futile. In English press appear to be funct. In some quarters serious complications are feared as a result of the rejection of Mr. Bowen's scheme. It is curious that while Lord Cranborne's speech has been roundlycondemned in this country it has given immense satisfaction at Berlin as given immense satisfaction at Berlin as showing the friendliness of the British government. The British press, it is ald, may write against Germany and presponsible politicians may make long as the government is friendly it does not much matter. The German press ignores altogether public opinion in England. speeches, but so

AGAINST MAHAN'S VIEWS.

New York, Feb. 2.-England does not like Capt. Mahan's definition of the Monroe doctrine, says the Tribune's orrespondent in London. Capt. Ma-nan distinctly says that the United States will not and does not accept the States will not and does not accept the where States will not and does not accept the burden of American responsibility and it is taken for granted that Capt. Ma-han speaks for both political parties in the United States: that his utterance is more or less official, and that it is not size in the world except office a not given to the world except after a fail verification. The article, consequently, caused a little uneasiness, es-pecially in view of its bearing on what Lord Cranborne calls "the Venezuelan mess," England, however, has cordially accepted the broad principle of the Monroe doctrine, and there is little dan-ger of a quarrel between the two great inglo-Saxon peoples over its exact interpretation.

"THE TOOL OF GERMANY."

New York, Feb. 2.-The members of the American, French and Spanish colonies have held a meeting, says a Herald dispatch from Caracas, and ad-dressed protests to their legations sgainst the outrageous proposals of the blockading powers that "the United States should be the tool of Germany," The French colony declared that The French coiony nectated that "France cannot agree that, in the bank-rupty of Venezuela, Germany should receive special treatment on a loan which is comparable only to the Mime. Another very important consideration in this connection is the introduc-tion of American-made machinery and aplements both in the factory and in the field. When our people first began to make beet sugar, the farmers who raised the beets found it back-breaking business, but our inventors, who are always ready to selze an opporunity to lighten labor and multiply the results, saw that it was up to then the results, saw that it was by to train to to furnishe proper implements and ma-chinery. The old factories are discarding their German and French machinery and are as much substituting American machinery for it. We are now able to entirely equip office ext a factory with American-made ma-chinery, which is less cumbersome and ture for nore economical. It will get more juice out of the beets with less fuel and less was 15 attention, and the manufacturers are gringing out every spring new and heaper contrivances for seeding, culti ating and harvesting, so as to econ mize in horsepower and human labo and cheapen the cost of production.
