The total number of ounces produced is given as 170,443,674. These figures show a gain over the output of 1902 of \$29,637,600 in gold and 9,109.331 ounces in Eliver.

The commercial value of the silver autput is \$6,532,400 greater than in 1902 at the average price of 54 cents per ounce, compared with 53 cents in the previous year. The most important gains in gold

were \$28,974,400 in Africa and \$7,631,300 in Australia and the most serious loss was in the United States. The most important change in silver produced was in Mexico which reports an in-crease of 10,323,5338 fine ounces. Australia shows a gain of 1,656,928 ounces.

WEEK ON 'CHANGE.

Some Brokers Feel That Rusiness is Going to Pick Up.

There were many evidences of im-Apex) that are rapidly increasing their outputs and report says will soon be in provement in local mining stock market conditions during the past week. Al-though the aggregate business amounted to only a little more than \$4,000 per day; a good many brokers believe they signs of an awakening, and are looking forward to a good fall and wh ter trade. Interest has been largely centered upon the Tintic stocks, and May Day was manifestly the star actor in the week's proceedings. It has made some rapid advances, selling up to id cents a share. The management has made good headway with development work with the result that the mino shows more inviting physical conditions than it has for some time. Uncle Sam Consolidated has been active and some, fearing the loss sustained by the company in the distruction of its holsting plant by fire would result in a decided drop in the price of the stock, have offered their holdings for sale. While it did affect it somewhat yet the de-cline was not serious and the week ended with the stock really in good form. The company will have the hoist, now being installed, in operation within the next three weeks. The mill will be kept running on are from the dumps, and while the revenue will be somewhat lighter than it would have been otherwise. The demand for Mammoth amounted to practically nothing. The stock has held up to firm figures. The milit will be running with its full com-plement of 60 stamps next week. Some trading has been done in Park City stocks, Daly West going for \$14 a share, and better. Consolidated Mercur has been stronger, but few saler of the stock were recorded, oldfield Bonan-

bookles; How To Make Good Ica.

Take a little more care

In every package of Schilling's Best Tes is a

upon at the smelter company's head-quarters in New York, where Captain Stern arrived early this week from his recent trip to Bingham. The smelter is making a highly successful run, hav. ing showed down but once in a month, and the character of its work is report-ed to be very gratifying.-Bingham Bulletin. Con. Mercar Tonnage. Manager G. H. Dern of the Con. Mer.

cur said today that the ore handled during the month of September at the mill would average at least, 700 tons a day. He says the company will have a good profit left after deducting the operating expenses for the month.

work on the property going all winter A new pump was installed on the 1,300-foot level of the Gemini mine this week, taking the place of a somewhat smaller one which was hardly large enough to take care of the flow of wa-ter. The new pump is capable of handling 250 gallons per minute and will be able to take care of the flow of water for a long time to come. pacity of the old pump was 125 gallons

Charlie Balch, John Horkin and George McKay, well-known Tintic min-ing men, left Tuesday overland for lng men, left Tu Goldfield, Nevada.

Goldfield, Nevada. The 160 men who were laid off at the Centennial Eureka mine about two weeks ago on account of the over pro-duction of ore at the amelters, will go back to work the forepart of next week

The recent fire at the Uncle Sam Con lidated will not interfere in any way with the operations of the mill, as force of men has been put to work on the various dumps. Until the shaft house is completed, ores from the dumps will be utilized to keep the concentrating plant in operation. As soon as the mine begins operations it will furnish about one-third of the ore for the mul.

CRIPPLE CREEK OUTPUT.

Gold Production Exceeded \$2,000,000 In September.

Cripple Creek, Colo., Oct. 1.-The gold roduction of this district for Septem-er amounts to \$2,041,000. This is the

first time since the miners' strike was inaugurated in August, 1903, that the monthly production has reached \$2,000,-

SEVIER CON. MINE.

Test Run of Mill Proved to be Quite

Satisfactory. Capt. H. C. Lawrence, who was in Richfield last week, has given the Richfield Reaper some interesting information concerning the latest developments

at the Sevier mine. The mill was started up Tuesday o last week for the test run, and she be-haved nicely. A new Erie engine has been installed for the operation of the nill and it furnished all the power necessary and 75 horse-power to spare The engine can slip every belt in the

Manager Orem of the Utah-Apex, ac-One of the most gratifying pieces of companied by a party of seven English capitalists interested in that property, ork finished lately is the completion the upraise from No. 3 to No. 2 tunand some of them understood to be Highland Boy and Boston Con. stock-The lines did not miss the con-

ction over a foot. The more the property is developed the more astonishing becomes the vast extent of its body of ore. The vein all the way between the two lower tunnels is at least 100 feet in width at any place, "the largest vein I have seen my forty years of mining life." below the denot have made about ten tons of good looking concentrates. Mr. Lawrence, Much of this ore will go from \$75 to \$80 per ton, while some of it will run up into thousands. arload was shipped some time ago that went \$120 to the ton.

One of the most important under takings for the development of the mine has been inaugurated. The tunnel has been started 1,500 feet below the mill. This will give a depth of ledge matter, as now determined, of over 1,200 feet and running back into the mountain under Tip Top at least a mile. When this is opened up it will be one of the big-gest propositions known. Already, at uary bring the capacity up to 600 tons daily-the present average being 200 a distance of 186 feet in the new tuna distance of 186 feet in the come nel, ore matter is becoming to come in fissures paralleling the veins. The last taken out was filled with rich-looking quartz.

Captain Lawrence is satisfied, from the latest development on the property, that the big ore bodies lie to the east of the present workings, and crosscutting to the east from the pres-ent tunnels has been begun to ascertain the extent of the ore zone in this

"If nothing further is revealed than what we already have in sight, the Se-vier is the greatest mining proposi-tion I was ever acquainted with, but I have every reason to believe that still

investment circles towards mining enterprises and that he looks to see a general picking up all along the line

from now on. There is more inquiry for good min-ing stocks, and the outlook for a brisk trade in that line within the next few months looks very encouraging.

Independent Smelter Shipments.

The shipments of copper bullion from the independent copper plants of the Salt Lake valley during the month of September, aggregated 2,689,336 pounds, as follows: Bingham Con., 1,086,700: Utat Con., 1,540,896: United States, 1,-061,740. The American sent out close to 1,000,000 pounds.

CONCENTRATES.

Sam M. Levy departed this morning for the Buckhorn mine near Ophir.

Captain H. C. Lawrence of the Sevier Consolidated mine is in the city again. George H. Dern, manager of the

Consolidated Mercur, will return to camp tomorrow morning.

P. W. Madsen, manager of the Cen tury mine, departed for that Park Valley property last night.

John W. Weeks, one of the founders of the Bingham Consolidated. ing for Congress on the Democratte ticket in Massachusetts.

R. W. Brady, secretary of the Pioche Nevada Consolidated, will leave next Monday evening on a trip to the property of that company at Ploche, Nev.

Manager Crowther of the Con, Alta conferred with machinery salesmen during the day. The contracts for the power plant, aerial tramway and other

equipment will be let soon. B. L. Cutler, superintendent of the St. George Copper company's property in the Deep Creek country, departant for camp today, to push development

work. E. H. Hackett, manager of the New-port-Neveda mine at Fay, Nev., is in the city, and the deal pending for the

of the Horseshoe mine may eb closed up before his return to camp. Arrangements have been made be

tween the management of the Buck-horn and Ophir-Hill mines at Ophir, whereby the latter is to mill a certain tonnage of ores from the property of the former. The Buckhorn is to receive power for its air drills from the Inter.

At a recent meeting of the directors of the Copper Butte Mining company William Johnston was elected a director to fill the vacancy caused by the resignation of J. M. Billingsley. Not-withstanding an assessment was re-cently levied to prosecute work on the property, nothing further will be done until after the first meeting in January. Conditions at the claim are encouraging and it is confidently believed that the Copper Butte is to become one of the ders in a showing next year .-- Richfield Reaper.
