

# ORGANIZATION OF NAVY DEPARTMENT

President Does Not Believe That It is Such as to Bring the Best Results.

HE APPOINTS A COMMISSION.

Headed by Paul Morton—Instructed Specifically as to What is Wanted—Newberry Explains His Plan.

Washington, Jan. 27.—President Roosevelt believes the organization of the navy department is not such as to bring the best results, and today he appointed a commission to "consider certain needs of the navy." His action was somewhat of a surprise in view of the fact that the members of the commission appointed today two weeks ago met at Washington and endorsed Secretary Newberry's plan of reorganization, and in view also of the authorization by the senate of an inquiry into naval expenditures and the need, if any, of legislation to improve the administration of the navy department.

Announcement of the president's action was entirely unexpected at the navy department. Secretary Newberry appeared to be the most surprised of all. The president has sent identical letters to each of the eight members of the commission, which is headed by Paul Morton, former secretary of the navy, the other members being Justice Moody, also a former secretary of the navy; Judge A. C. Dayton, formerly chairman of the house naval affairs committee, and Rear Admirals S. B. Luce, A. T. Mahan, William H. Forster, Robley D. Evans and William S. Cowley, all of whom are on the retired list. The letter follows:

**PRESIDENT'S LETTER.**  
"My Dear Sir: I have appointed you as a member of a commission to consider certain needs of the navy. The organization of the department is now not such as to bring the best results, and there is failure to co-operate the work of bureaus and to make the department serve the one end for which it was created, that is, the development and handling of a first-class fighting fleet. With this proposition I will ask you to consider:

"First—All defects in the law under which the navy department is now organized, including the authority of the bureau is made in certain respects practically equal to that of the secretary or the president.  
"Second—The division of responsibility and consequent lack of co-ordination in the preparation for war and conduct of war.  
"Third—The functions of certain bureaus, as to whether it is not possible to consolidate them.  
"Fourth—The necessity of providing the secretary of the navy with military advisers, who are responsible to him for co-ordinating the work of the bureaus and for preparation for war.  
"Fifth—The necessity for economical allotment and disbursement of appropriations and for a system which will insure strict accountability.  
"Sixth—Finally, I want your views as to how best to recognize and emphasize the strictly military character of the navy, so that preparation for war shall be controlled under the secretary by the military branch of the navy, which bears the responsibility for the successful conduct of war operations."

I wish to have the above subjects considered under two general heads:

"First—As to the fundamental principles of an organization that will insure an efficient preparation for war in time of peace.  
"Second—Specific recommendations as to the changes in the present organization that will accomplish this result.  
"In addition to the above reports, I desire your recommendations as to the number, location and general facilities of the navy yards which are required by strategic considerations in time of war, and for maintaining the fleet in constant readiness for war in time of peace."

Sincerely yours,  
THEODORE ROOSEVELT.

Preceding by several hours the president's announcement was the issuance of a general order by Secretary Newberry, which had been approved by the president, designed to carry into effect the secretary's naval reorganization plans so far as they may pertain to the navy yards and naval stations. Its general purpose is to consolidate the manufacturing force at navy yards, and its effect will be to make the commandant, while, as heretofore, paramount, resemble in his connection with the yard work, the president of a large industrial plant; the principal technical assistant becoming under the commandant, the general manager.

**NEWBERRY'S PLAN.**

Washington, Jan. 27.—Secretary Newberry today made public an elaborate explanation of his plan for reorganization of the navy department which recently received the unanimous approval of a

# AFTER FOUR YEARS OF MISERY

Cured by Lydia E. Pinkham's Vegetable Compound

Baltimore, Md.—"For four years my life was a misery to me. I suffered from irregularities, terrible dragging sensations, extreme nervousness, and that all gone feeling in my stomach. I had given up hope of ever being well when I began to take Lydia E. Pinkham's Vegetable Compound. Then I felt as though new life had been given me, and I am recommending it to all my friends."—Mrs. W. S. Evans, 1935 Lansdowne St., Baltimore, Md.

The most successful remedy in this country for the cure of all forms of female complaints is Lydia E. Pinkham's Vegetable Compound. It has stood the test of years and today is more widely and successfully used than any other female remedy. It has cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion and nervous prostration, after all other means had failed.

If you are suffering from any of these ailments, don't give up hope until you have given Lydia E. Pinkham's Vegetable Compound a trial.

If you would like special advice write to Mrs. Pinkham, Lynn, Mass., for it. She has guided thousands to health, free of charge.

conference of men who have been prominent in naval affairs, called together at the direction of the president. As has already been stated the essential features contemplate the abolishment of the bureau system at the navy yards to end that unnecessary work may be avoided and simpler methods of administration prevail, the enlargement of the general board of the navy and the reorganization of the board on construction so that there may be more complete co-ordination in the work of the navy department and more general representation on these important boards.

To develop the usefulness and activities of the general board by rearranging its membership is desirable. Mr. Newberry says, "I propose that it consist of the admirals of the navy, the chief of the bureau of navigation, the president of the naval war college, chief intelligence officer, one member of the board of inspection and survey, naval aide to the assistant secretary and three of the most efficient line officers of the widest experience afloat. The members should be in practically daily consultation on all matters affecting the greater interests of the navy and personnel."

Reorganization of the board of construction contemplates a membership of seven line officers and one staff officer, the chief naval constructor. It is to be charged with the supervision of the design, construction and repair of all vessels and is designed to be the effective co-ordinating branch of the manufacture of material service.

The board consists of the following board: Steam engineering, equipment and construction, which will be reorganized so that the detail drafting and manufacturing of the naval service will be done by the bureau of construction. The bureau of ordnance is to retain control and management of the gun factory, the torpedo station, the proving grounds and magazines.

Ultimately the plan of reorganization contemplates the abolishment specifically of the branches of equipment, engineering and yards and docks, their duties to be absorbed gradually by other bureaus. Steam engineering is to become a division of the bureau of navigation with a line officer at its head. This bureau having lost its manufacturing features, will be charged with the determination of the type, location, etc., of propelling machinery and its inspection.

The secretary believes that in order to prove the efficiency of our ordnance work and steam and electrical engineering a certain number of officers should be given an opportunity yearly to specialize in these classes by one or more years' postgraduate work at some suitable institution.

Part of the plan, which the secretary outlines, he says, has been in effect since June 1 and up to the present time there has not been received one word of criticism, suggestion or protest. It appears to be working for the better military efficiency and proper business administration of the department.

**MEXICAN SMELTER WAR.**

Mexico City, Jan. 27.—It was reported today that the International Smelting company of New York has purchased the smelter of the Compañia Metalur-

gica de Torreon, for \$6,000,000. The purchase is said to be the first step in a great plan between the American Smelting & Refining company and the International. The latter company intends to purchase a chain of smelters in this republic, according to reports in mining circles.

**TROUBLE AT GLOBE, ARIZ.**

Gov. Page Issues Orders to National Guard to be Ready.

Phoenix, Ariz., Jan. 27.—Acting Gov. J. C. Page has issued orders to officers of the various companies of the national guard of Arizona to hold their commands in readiness for orders to go to Globe at short notice, in execution of possible trouble between miners and mine operators there about the question of organizing a union among the men.

Capt. Wheeler of the Arizona ranger force has gone to Globe at the suggestion of Acting Gov. Page, to investigate the situation. It is said tonight that there is slight likelihood of any serious disturbances, as the men have shown no disposition to cause trouble or do damage to property.

Some days ago, upon learning that an attempt was being made to organize the 1,000 men employed in the Old Dominion Copper company's mines, the owners of the property posted notices discharging the men indefinitely. It is said that they have sent word that they are willing to treat with the men, but have refused to meet agents of the union.

# CORONER'S JURY VERDICT IN HANCOCK MURDER CASE

Helena, Mont., Jan. 27.—The coroner's inquest in the John Hancock murder case was concluded tonight shortly before midnight. But little has been learned regarding the brutal murder of the man who was lured to his death by a decoy note, which stated that a friend was ill in St. John's hospital, and wanted Hancock to come to him. The verdict of the jury follows:

"We, the jury, duly impaneled by the coroner of Lewis and Clark county, state of Montana, to hold an inquest over the body of John Hancock, find that said John Hancock died from the effects of wounds on his head caused by some blunt instrument causing a fracture of the skull, at the hands of some person or persons to this jury unknown, on Friday, Jan. 15."

# RANCHMAN TRIES TO KILL WIFE AND STEPSON

Cheyenne, Wyo., Jan. 26.—A message from Sundance, Wyo., a town in the northeast corner of the state, says that M. Paxton, a ranchman, has been brought to jail there after attempting to kill his wife and little stepson, and then attempting to shoot himself. Paxton was shot in the groin and will probably die. Mrs. Paxton was shot in the face, but the wound is not necessarily serious. Paxton shot himself in the head, but the wound is not fatal. Paxton was overpowered by Will Davis, another stepson, otherwise he probably would have succeeded in killing his wife and boy. Paxton is believed to be insane.

# A RELIGIOUS AUTHOR'S STATEMENT.

For several years I was afflicted with kidney trouble and last winter I was suddenly stricken with a severe pain in my kidneys and was confined to bed eight days unable to get up without assistance. My urine contained a thick white sediment and I passed a thick frequently day and night. I commenced taking Foley's Kidney Remedy, and the pain gradually abated and finally ceased. My urine became normal. I cheerfully recommend Foley's Kidney Remedy. F. J. Hill Drug Co., ("The Never Substitutors.")

# COLLEGE WOMEN.

Pres. Eliot of Harvard Thinks Too Few of Them Marry.

New York, Jan. 27.—In the opinion of Dr. Charles W. Eliot, retiring president of Harvard university, too few college women marry. He expressed this view in an address today at the annual luncheon of the alumnae association of the Brearley school for young women in this city.

If you will take Foley's Orino Laxative until the bowels become regular you will not have to take purgatives constantly, as Foley's Orino Laxative positively cures chronic constipation and sluggish liver. Pleasant to take. F. J. Hill Drug Co., ("The Never Substitutors.")

# HARD COLDS.

People whose blood is pure are not nearly so likely to take hard colds as are others. Physiology goes into the reason. Hood's Sarsaparilla makes the blood pure, causing healthy action of the mucous membrane and giving strength and tone to all the organs and functions. This great medicine recovers the system after a cold, as no other does.

# CELEBRATION OF KAISER WILHELM'S BIRTHDAY

Berlin, Jan. 27.—The fiftieth anniversary of the birth of Emperor Wilhelm was celebrated today in an unusual manner. All the crowned heads of the German states, except the aged Leopold, regent of Bavaria, came to Berlin to present their congratulations. The city is decorated with flags and preparations have been made for an illumination this evening on an uncommon scale.

According to the old Prussian tradition, the day was ushered in at 8 o'clock by the intoning of a chorus from the tower of the castle by a corps of trumpeters. At 8 o'clock the castle guard, headed by a military band, marched the length of Unter den Linden to the Brandenburg gate and back. The streets were lined by crowds of people, and a large assemblage cheered the emperor when he appeared at one of the castle windows.

Ambassador Hill, in congratulating his majesty, announced that Adolphus Busch will increase his subscription for the erection of the German museum at Harvard university from \$50,000 to \$100,000. The emperor expressed his interest in the museum and his gratification at Mr. Busch's generosity.

# W. A. CLARK GOING TO MANUFACTURE EXPLOSIVES

Corey, Pa., Jan. 27.—Former Senator W. A. Clark, of Montana is reported to be in control of a company that will erect a large plant here for the manufacture of dynamite. A new export on which Mr. Clark is said to own the American patents. A tract of 25 acres has been obtained and machinery valued at \$100,000 is said to be on the way from Germany to put into the new plant.

Adopt Resolution Recommending Modification of Court Proceedings Where Labor Involved.

SHOULD NOTIFY EMPLOYEES.

Emphatically Protest Against Sentences of Gompers, Mitchell and Morrison.

Indianapolis, Jan. 27.—After hours of discussion, the United Mine Workers' convention adopted late today a resolution recommending modification of court procedure in regard to injunctions and labor disputes.

The convention declared no injunction should be issued until the employees were notified, and that contempt charges should be heard by a jury before another judge. The resolution says in part:

"The United Mine Workers of America most emphatically and unreservedly protest against the sentences and threatened imprisonment of Samuel Gompers, John Mitchell and Frank Morrison, officers of the American Federation of Labor."

"The action of Justice Wright in these cases can never be accepted with any degree of justification by the mine workers of America. We maintain that there was a violation of the law by our fellow-workmen."

"We further protest against the uncalculated and extreme bitterness of the arraignment of the defendants by Justice Wright, as unparalleled in judicial proceedings."

"We denounce government by injunction as sought to be enforced by some courts as un-American, unconstitutional and void. We deny the right of courts to issue injunctions against officers or members of labor organizations while contending for their rights for alleged offenses not committed in the presence of the court, without notice to the parties concerned. In seeking to bring about a change in the injunction laws, as interpreted by the courts, we have no desire to attack property rights. They must be safeguarded, but there are other rights that should be guarded—the rights of man."

"We concede the right of judges to punish for contempt offenses committed in the presence of the court, but we most emphatically deny the right of any court to punish for offenses committed not in the presence or hearing of the court, unless the accused is afforded a trial by jury of his peers."

"We demand of Congress a speedy enactment of a law commanding federal courts to change their procedure in contempt and injunction cases so that notice shall be served on defendants in labor disputes and a jury trial afforded before punishment is inflicted."

"We also demand that all cases of contempt shall be heard and determined by a judge other than the one issuing the writ, except when committed in the presence or hearing of the court."

# SIMPLE REMEDY FOR LA GRIPPE

Racking la grippe coughs that may develop into pneumonia over night are quickly cured by the use of the Honey and Tar. The sore and inflamed lungs are healed and strengthened, and a dangerous condition is quickly averted. Take only Foley's Honey and Tar in the reliable package. F. J. Hill Drug Co., ("The Never Substitutors.")

# INQUIRY INTO METHODS OF THE SECRET SERVICE

Washington, Jan. 27.—What is described as one of the most thrilling hearings of this session took place this afternoon in the rooms of the house committee on appropriations when the sub-committee in charge of the drafting of the sundry civil appropriation bill had Chief Wilkie, of the secret service, on the witness stand. He was asked for information concerning the conduct of his office, being questioned by the members whose names have figured in the secret service controversy with the president.

For more than three hours Mr. Wilkie was pitted with questions in regard to the secret service.

The fact was brought out that, al-

# PATENTS

We desire to announce that we have established in connection with our paper, a Patent Bureau, and invite the co-operation of Inventors, Mechanical Engineers, Draftsmen, Machinists, Superintendents and Foremen of Shops and Mills. Skilled Mechanicians in all trades, Farmers and all others, building up a patent system that will give honest advice to inventors, protect their interests by good patents and strong contracts; assist inventors in perfecting their inventions, and in selling their patents; then obtained; and in all matters to render careful service and give full value for money paid.

We have associated with us at Washington, D. C., an attorney who has been in continuous practice for the past twenty years, and we are in position to guarantee that any patent matters placed in our hands will receive prompt and careful attention, and that the charges will always be moderate.

We also, in addition to securing of patents, obtain Trade-Marks, Copyrights, Labels, Design Patents, and in fact transact business of all character in this line.

All patents secured through our Bureau will be advertised for sale at our expense, and will thus be brought to the attention of the thousands of readers and materially assist the inventors in disposing of their patents.

If you have made an invention, send us a rough sketch and description with \$5, and we will have our attorney make a thorough search of the records of the United States Patent Office, and advise you as to the securing of patent, the cost and the manner of proceeding.

Patent Bureau, The Deseret News, Salt Lake City.
