

STREET CAR CREW SCARES ROBBERS

During Attempted Hold Up on
Ashton Avenue Line
Comes to Naught.

CARMEN USE THEIR GUNS.

Firing at the Masked Men When Com-
manded to Yield, the Highwaymen
Are Put to Hasty Flight.

A daring attempt to hold up a city-bound Ashton avenue car in Garfield avenue near Ninth East street shortly after midnight was foiled by the pluck of Conductor Frank Hogan and Motor-man G. W. Vowles, who stood off the masked highwaymen and put them to flight by emptying their revolvers at them. The car crew fired 12 shots, which were answered by one from the highwaymen, but none of the bullets was effective, and the robbers succeeded in making their escape.

The men attempted to board the car at Garfield avenue crossing. Conductor Hogan happened to be on the front platform at the time, and the first intimation of the attempted hold up was when he looked to see if the men had boarded the car. As he did so one of the men, leveling a gun at the motor-man, commanded "Hands up." At the same time the second robber pulled the trolley off the wire, throwing the car into darkness.

Instead of responding to the order of the highwayman, Motor-man Vowles drew his revolver and began shooting. The robber returned one shot and then ran into the shadows of the trees along the street, where he was joined by his companion. In the meantime Conductor Hogan had secured his revolver, too, and emptied it in the direction of the robbing robbers, who were then cutting across a vacant lot.

The crew brought the car into the city, and telephoned the police of the attempted hold up. Sergeant Beck and a squad of patrolmen made a search of the vicinity, but were unable to obtain any clue to the highwaymen, and with the meager description given by the conductor, is not likely that they can be apprehended.

There were only two passengers on the car at the time, a man and a boy, but neither knew of the attempted robbery until they heard the firing of the shots.

SHEPHERD COMMENDED.

Musical America Accords Him High Praise for His Compositions.

Musical America of New York for May 29, publishes a large portrait of Prof. Arthur Shepherd, on the first page, with this legend beneath: Arthur Shepherd—This American composer captured two prizes of \$500 each for his Sonata for piano in F minor and his song, "The Lost Child," offered in the contest of the National Federation of Musical Clubs, now in session in Grand Rapids. The fact that both compositions came before two different sets of judges makes his victory noteworthy.

The announcement is in connection with an account of the meeting of the sixth biennial convention of the National Federation of Musical Clubs at Grand Rapids, Mich. That part of the report which is of special interest in this city says: "The names of winners of the prize competition for American composers have been zealously guarded in secrecy by the American music committee, were announced by Mrs. Jason Walker, chairman of the committee, in the St. Cecilia auditorium, today. The results, in some ways very surprising, are as follows:

Prize in class of orchestra compositions, \$1,000, won by Henry K. Hadley, with "The Cyprian Play," rhapsody for orchestra, under the poem by Joseph Rodman Drake.

Prize in instrumental class, \$500, won by Arthur Shepherd, with a sonata for piano in F minor.

Prize in vocal class, \$500, also won by Arthur Shepherd, with a song, "The Lost Child," poem by James Russell Lowell.

The fact that two of the prizes were captured by one man, in two classes, under two different sets of judges, and that both winners have previously been winners of the Paderewski prize, lends a striking and sensational character to the present contest. Mr. Hadley's composition was the symphony "The Four Seasons" and Mr. Shepherd's "The Overture Joyeuse."

Mr. Shepherd was present during a demonstration in his honor, when the results of the competition were announced by Mrs. Jason Walker. He will play his sonata at a recital here on Thursday.

Arthur Shepherd is a native of Idaho, has for a number of years been a musical star of the first magnitude in Salt Lake City, and has made his name for the last year in Newton Center, Mass.

One hundred and fourteen compositions were submitted in all, 25 orchestral, 21 vocal, and 68 instrumental. All bore private marks, and were judged without a knowledge of the names of their composers. Mr. Shepherd, remembering Zénon's fable, marked his with a tortoise, with obvious and even-tempered appropriateness.

Four of the clubs in the federation contributed sums as large as \$100 toward the \$2,000 prize fund. The total amount contributed by the federated clubs is \$1,500. The remainder is made up from the treasury of the federation. Many compositions of dignity and quality were received, but the judges recognized a number of old scores which had been submitted in earlier competitions. There is a movement on foot to provide that only new scores shall be admitted in future contests, the aim being to bring forth new works.

MEAT ORDINANCE IS TO COME UP TONIGHT

City Council Will Probably Pass It—
Some Amendments Proposed—
Dinlany Opinion Due.

The meat ordinance will come up again this evening at a meeting of the city council and will probably be passed in a short time. It is expected that several of the sections, but the "American" party councilmen have practically agreed on the ordinance as it now stands and will attempt to rush it through.

Although the administration gave orders of retrenchment some time ago, the patrolmen will make another effort to get an increase in their salary. Their proposed increase of \$5 to \$15 a month according to service would increase the payroll about \$14,000 a year. The city has no money, however, and it is likely that the proposition will be turned down.

Several contracts for public improvements will be up for approval including J. J. Moran's contract for resurfacing Main street. It is also expected that H. J. Dinlany will deliver one of his celebrated opinions, as to whether the city has any right to allow J. J. Moran to close up Gale street and use it privately.

OF INTEREST TO FARMERS AND MECHANICS.

Farmers and mechanics frequently meet with slight accidents and injuries which cause them much loss of time and money. A cut or bruise may be cured in about a third the time usually required by applying Chamberlain's Liniment as soon as the injury is received. This liniment is also valuable for sprains, sore throat, rheumatism, rheumatic pains. There is no danger of blood poisoning resulting from an injury treated with Chamberlain's Liniment, as before the parts become inflamed and swollen. For sale by all druggists.

UNIVERSITY NEWS.

Professor Milton Bennion, chairman of the discipline committee of the university, has issued a statement through the Chronicle, in regard to the suspension of four boys for participating in a disturbance at a Logan hotel at the recent track meet in that city. It has been said by some of the students that the Chronicle's report is untrue, and that the suspension was a mistake. The decision of the discipline committee in the above expulsion. This Prof. Bennion denies in his statement, which is quite a lengthy exposition of the policy of the committee.

UNIVERSITY NEWS.

An elaborate program has been arranged for the commencement week of the University. This afternoon between 4 and 6 o'clock, President and Mrs. Kingsbury will receive at their home at 226 south Twelfth East. The guests will be the members of the board of regents, the faculty, alumni, graduating classes and former friends and students.

On Wednesday the 14, annual commencement will be held. A band concert will be given at the opening of the program and the graduating classes will march across the campus to the gymnasium, where the exercises will be held. The program begins at 10:30. The valedictory of the senior class will be given by Richard W. Young, Jr., George C. C. Engstrom will present an essay for the normal class. Governor William Spry will deliver a short address to the graduates and President Kingsbury will make his annual report.

The alumni banquet will be held in the gymnasium on the evening of the graduation and preparations are being made for 400 persons. W. W. Ray will act as toast master and Frank B. Stephens, W. R. Wallace, Mrs. Frank B. Kimball, Charlotte Stewart and Professor L. E. Young will respond. After the banquet a reception will take place at which the graduates will be entertained by the other members of the alumni.

Growing Interest Shown In Free Public Library

The annual report of Miss J. N. Sprague, city librarian, was presented this afternoon to the board of directors. She called attention to the interesting fact that the library has had an encouraging year, with circulation steadily growing, and the increase over last year in the number of books given out, being especially noticeable. The children's department has kept pace with the main library in circulation and general interest. Miss Ward has made the story hour, held every Saturday morning through the school year, so popular that with the beginning of the series next year it seems advisable to divide the children, and have two sets of stories told, one especially to the younger children. The general plan of the stories has been along the line of ancient Greek history and mythology, with fairy tales for the younger children, and the withdrawal from her work as librarian of this department, due to ill health, has been a source of great regret. Her special training and enthusiasm for the work has made our library a place to be proud of, and we hope to keep it up to its present high standard.

The work in the schools is so intimately connected with the children's department, as to be almost a part of it. We have now a collection of 50 books each in seven schools, our funds not having permitted additions to the collections this year, without slipping the equipment of the children's room in the library. The librarian of the children's room visited each of these schools at least once, explaining the charging system and telling the children of the different grades. The interest in this work has been gratifying.

The new feature of our work this year has been the opening of a reading room for the blind, in connection with the auxiliary of the reading room for the blind, of which Mrs. A. S. Rowan is president. The room is furnished by the library, and readers are supplied by the auxiliary. The reading began Sept. 10, since which time they have continued three times a week, with attendance varying from 6 to 10. Books for the blind have been purchased by the auxiliary and put in circulation and two typewriters have been contributed, one making the characters for the blind, and the other being an ordinary Underwood. Instruction in the use of these aids in the reading of the raised type is given every Saturday morning, the teacher, Miss Hansen, herself being blind. Such a class was particularly needed as there is no provision at the state blind asylum for teaching adults. Sixty other public libraries are reported as engaged in this work.

A beginning has been made during the summer months in the department of the blind, much needed ever since the library has occupied the new building.

YOUNG ENGINEERS ARE HOME AGAIN

University Mining Seniors Return
From Enjoyable and
Profitable Trip.

THEY TRAVELED 3,000 MILES

Going as Far as Old Mexico, Their Inspection Was Wide and Complete—
—First Trip of Its Kind.

After a delightful and instructive trip of about 3,000 miles, the senior mining engineers of the Utah university returned to the city yesterday in time for commencement exercises. They were away four weeks, during which they visited mining camps in six states, and also took a run into northern Mexico. Everywhere they were accorded the best of treatment, one mining company even going so far as to pay the expenses of a 50-mile trip to its property.

The young engineers were accompanied by Prof. R. H. Bradford of the metallurgical department and Prof. A. Overstrom of the department of mining and ore dressing. They left in a special car having sleeping apartments, a kitchen and dining room. Going direct to Denver they visited the Globe plant of the American Smelting and Refining company. They also visited the Colorado College at Golden, and the United States mine. Two days were spent at Colorado Springs where they studied cyaniding and chlorination processes. They visited there the United States cyaniding mill, also the Golden Cycle and the Princeton mills. From there they were taken to the Cripple Creek and Victor mining districts, where they saw several of the best mines. Going to Pueblo they spent a whole day at the mammoth plant of the Colorado Fuel & Iron company, watching the various operations in the conversion of crude iron ore into steel rails and other commodities. They also visited the famous Leadville mine, the manufacture of pigments at the Empire Zinc plant. At Trinidad, Colo., the coal mines were visited and the process of coke making was studied.

INSPECT TEXAS PLANTS.

From Trinidad the party was taken to El Paso, Tex., where the large A. S. & R. smelter was visited. A side trip was provided for those who cared to see a bull fight at Juarez, Mexico. Returning to El Paso the party went to Arizona, where they inspected some of the big mines, including the Shannon Copper company, the Arizona Copper company's mill at Clifton and the mines at Morenci and the Detroit Copper company's mines and smelters. The class also visited the Old Dominion at Globe and the great Copper Queen mine at Bisbee. The students were then taken into Mexico, where they visited a number of mines in and around the Montezuma district.

From Mexico the party was taken to Los Angeles, where the boys spent two days sightseeing, before returning home via the Salt Lake Route. As this is the first trip of the kind ever undertaken by the university, its successful conclusion is cause for congratulation. The professors are no less enthusiastic about its value than the students, and it is probable that such a trip will be made every year to give the finishing touch to the graduates in the mining and engineering course.

Those making the trip were: Prof. G. A. Overstrom, Prof. R. H. Bradford, L. Mulr, A. B. Parsons, R. E. Gardner, F. W. Shannon, H. D. Moyle, G. Bywater, J. Barlow, Fred Monahan, E. L. Jones, W. Cannon, W. Woodbury, R. L. Dobbs, W. Bruns, P. B. Boland, T. L. Holt and F. W. Snow.

The popularity of fiction continues, with 326 books added from it to the regular shelves and from the surplus proceeds 356 children's books and several sets of the Underwood stereoscopic views for the children's room, have been bought. The lecture hall was in use 23 times during the year, in addition to the semi-monthly meeting of the County Medical society. There have not been enough lectures of importance to justify keeping it for such use, if it can be fitted up for regular literary purposes. Our need for additional book room becomes more urgent each month, and as to the books within a short time, either the lecture hall must be fitted up, or a room furnished off in the basement, where book stacks can be placed.

There were 3,393 volumes acquired during the year; lost during year, 1,457; being worn out and condemned; destroyed by the health department, 112; missing at inventory, 512 vols.; in library June 1, 1909, 33,492; unbound pamphlets, 301; total pamphlets, 1,455; periodicals, 222; maps, 21; membership, June 1, 1908, 14,865; same 1909, 19,160; total visitors, 344,256; days open, 352.

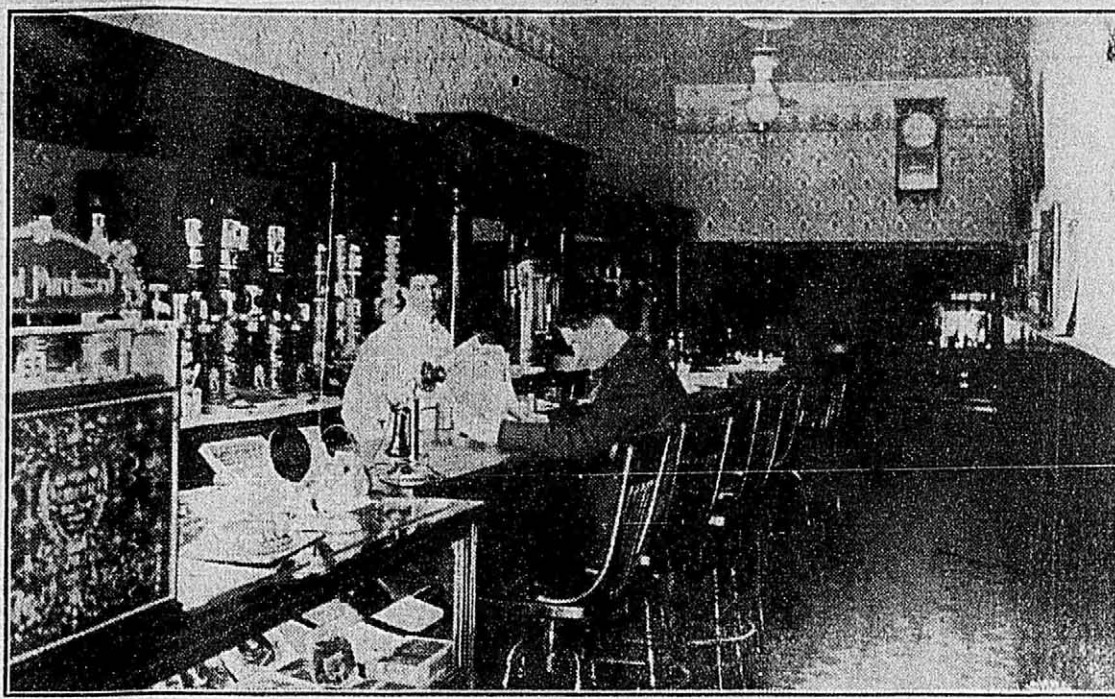

Balance of moneys on hand, June 1, 1908, \$8,257.98; taxes collected since June 1, 1908, \$16,067.52; fines, \$98.87. Total disbursements, \$15,082.17; balance on hand June 1, 1909, \$8,231.68. Of the disbursements \$6,637.35 went for salaries.

A Pretty Down-Town Cafe.

Interior View Skyscraper Cafe. - - 372 South Main

Immediately upon the occupation of the Newhouse skyscrapers by hosts of business men, a pretty appointed cafe opened its doors just across the street from the two massive structures. The furnishings are all in solid oak, a huge mirror back bar reflects the tempting viands served to the army of hungry office men; and dainty rooms in the rear invite the patronage of the fairer sex. The cuisine is the best; the service prompt; the "call again" idea very conspicuous in all the details of this cosy cafe. The proprietors are Messrs. J. H. Horner and P. H. Harman.

SCHOOL TEACHERS RECEIVE SCHEDULES

Salary Increase Will Amount to
\$40,000—Will be Paid in Ten
Installments.

The teachers in the public schools received their salary schedule yesterday which was adopted last week by the board of education. The increase in the yearly salary amounts to \$40,000. Of this amount the high school teachers will receive an increase of \$6,000 and the principals \$1,500. The remainder, \$32,500 will be distributed among the teachers of the grades.

The schedule is fixed on a graduating basis according to merit. The increase in some classes amount to 10 per cent. The minimum salary under the new schedule is \$500 and the maximum, \$875.
