Church Over Respected

Musician.

Richard Hays of West Weber Arrested For Interfering With Officer-Junction City News Briefs.

. The last sad rites over the mortal remains of Mrs. John T. Rushmer who died so suddenly Saturday morning. were performed yesterday afternoon and her mortal remains were laid to rest in the family burlal ground in the Mountain View cometery. A large cortege followed the remains to the place. of burlal. Very impressive funeral serices were held yesterday afternoon at 2:30 o'clock at the Methodist church. some sweet funeral music was furnished by the church coir, Rev. Mr. Blair officiated. He preached a very touching and impressive culogy of the life and metuliness of the deceased, especially referring to her untiring efforts in the nusical work of the church services, at the pipe organ which she played.

Many beautiful floral offerings were laid on her bier by sympathizing friends, bespeaking the high esteem in which she was held in the community.

SALOONS MAKE MORE TROUBLE.

Richard Hayes of West Weber was arrested last evening by Officer Smyth on the charge of interfering with an officer and currying concealed weapons. officer Smyth saw some young men enter the Diamond salcon who looked to be under age, he followed them in and inquired as to their age, to which they repiled that they were 19 years id and the officer ordered them out,

Voting for king and queen of the carival had been going on at Halley, fellevus and Carey and Halley secured he queen in the person of Miss Mabel Mallory, while Carey got ahead for the sing in the choosing of Mr. Edward rthur One of the fruit wagons seen on the A Good Brand reciareet during the festival, had a supply of fruit on the outside, but inside was pe and a short onewith a positive blind har, where liquor was dismoney back guarensed to side entrance patrons. The onstable found it out and Mr. John we was arrested, fined \$100 and costs.

SCIENTIFIC MISCELLANY.

Electric light baths are reported to be quite common in German hospitals, An English physician, Dr. J. S. Hooker, states that he has found them much more effective in rheumatism and like diseases than drug treatment, and, as they fill the skin with blood, he sugdded 300 gests that they should be of great im-portance in bringing out the suppotassium. potasslum pressed rash of fevers, such as scarlet fever and smallpox. The use of X-rays luted with in serious blood diseases has given sur-prising results to Prof. Bozzoli, of Turin. He has succeeded in curing a bath. It is hot, the m difficult case of leuchaemia, a disease pounds of which arises from increase in the a depth of white corpuscles and may endure from that it can six months to ten years. with the still can A strange medicine of the east is siladit," long reputed to cure most Phryop are produced by Welsback by fusing one or more of the rare earth metals-lanthanum, cerium, etc.,- with about diseases. Mr. David Hooper finds that the name is given to an aluminum sulphate exuding from the rocks in certain parts of the Himalayas; to a black 0 per cent of fron, nickle or cobalt when such an alloy is rubbed with a file, it emits brilliant sparks that are substance-probably true sllajit-said to form an exudation on rocks in Nepal, nd consisting mainly of alkalies comcapable of lighting a mixture of air bined with an organic acid; and to a third, or white silujit, that seems to and gas.

same age-periods. It is not an infeclous disease, is not transmissible from ancer cell can reacquire powers of celf-propagation. Cancer is not on the increase, and radium has not been been shown to have any curative effect.

The diamond is curiously affected by adium. Sir William Crookes' experidarkened and tends to change to the graphite form of carbon, suggesting that our jewelry may suffer if radium becomes common. On the other hand, radium may prove a desirable means if coloring the diamond, giving comiercial importance to this observation.

The novel theory of Dr. Volgt. a German astronomer, is that the greater part of the moon's craters represent vork of coral insects in long-vanished was. He finds that if the earth's tropical ocean were suddenly dried up the bed would much resemble the face of the moon, the coral formations ap cearing exactly like the craters of exinct volcances.

From the known set of the currents the Arctic Ocean and from obser ations of the tides, Mr. R. A. Harris oncludes that there may be a tract of and hear the north pole, extending from near the northwest corner of Hanks Laud or from Prince Patrick island, to a point north of New Siberla.

The idea of regulating the height of balloons by means of collapsible air-bags seems to be as old as modern ballooning. It is said to have been suggested by Gen. Meusnier in 1783 n the day before the first ascent of hydrogen balloon, but it was for otten until 1884, when Renard used air-reservoirs for maintaining the shape of captive balloons. The frist real trial of the air-bag regulator-or ballonet, as it is called - seems to have been in two balloons construct seems to ed last year. The ballonet is placed around the lower part of the balloon, with means for inflating and a valve or emptying, and the gas envelop is closed and provided with a sefery-valve to ensure against too great presure. In two trips described by Henry te la Vaux the tendency of the bal on to shoot upward on emerging from cloud into bright sunshine was counteracted by filling the air-bag, a low level being thus maintained in spite of great changes in moisture and temperature.

Protective mimicry has a curious illustration in an insect of British East Africa described by Prof. Gregory. Some individuals of each sex are bright pink and others are bright green, and as they sit motionless for hours sucking sap, the pink ones col-lect on the lower part of the stem, where they look like drooping flowers while the green ones take a place further out and are mistaken for follage.

The world's greatest geyser seems to be that of Rotorua, in New Zea-land. A recent visitor, J. A. Warnock, states tha it plays about 22 times each month, the "shots" often reach-ing a height of 900 to 1,200 feet, and the basin covers about 2½ acres. One theory is that loose stones fall into the neck of a tunnel filled with hot ater, closing the passage until the rising steam pressure forcibly ejects

ESCALANTE.

CONTINUOUS RAIN

layed by Storms. Special Correspondence.

Escularts, Garfield Co., Sept. 2.-Yes-terday is the first day without rain duce about the 25th of July, but today

we are having rain again. On Satur-iay, Aug. 27, a flood washed out the am at the head of our town ditch ad men have been hard at work ever

dince putting in a new dam. On Wed-useday, Aug. 31, there was another flood n the creek and while it did not wash ut what work had been done on the dam, it cut another large hole around it so that the work will be prolonged in

ompleting the dam. A goodly number of our people have gone to Punguitch to attend the stake E. A. Griffin has just returned from Sait Lake City where he went to at-tend the late Republican convention.

A Cold Settled in His Kidneys. A. J. Jennesse, 9201 Butler St., Chicago, A. J. Jennesse, 200 Butter St., Chicago, writes: "I am a switchman and am out in all kinds of weather. I took a cold which settled in my kidneys and I was in bad shape. I tried several advertised remedies with no benefit, until I was rec-ommended to try Foley's Kidney Cure. Two-thirds of a bottle cured me." For sale by F. J. Hill Drug Co.

ng an inquest. Mr. John Logan was out horseback

when Hayes interfered and abused the officer who stepped out of the saloon layes following continuing his abuse le was then placed under arrest and taken to the jail where he refused to se searched, but Officers Smyth and Eggleston went through his pockets and found a pistol fully loaded. He redsted being put in the cell and had to be dealt a heavy blow before he would quiet down.

BRIEFS AND PERSONALS.

Miss Josephine Chambers had her socketbook containing \$12, taken at the Union depot yesterday.

Several hundred officers and workers in the Mutual Improvement cause of the Weber stake went to Brigham City esterday to take part in the day's feswitles at that city. They all thoroughr enjoyed the outing

Mr. and Mrs. Ed Wertheimer left Ogden yesterday for their home in the ast, after a pleasant visit in Ogden with relatives.

The Pastime theater which has been losed during the summer months, pened again last night with a good erformance, which was witnessed by menze crowda

A man named Faust was arrested yesterday afternoon on the charge of stealing a railroad man's value from the the Union depot.

TWO BURGLARIES.

The home of A. D. Canfield at 2419 Monroe avenue was last night entered by burgiars, who broke in the back door while the family was absent. They secured a ladies' gold watch and fob shain, a pair of gold cuff buttons and one dollar in silver. The house was turned topsy turvy in which condition the family found it on their return. There is no clue to the perpetrators. The home of Porter Woodmansee was also burglarized last night, the thief getting away with a kit of carpenter's tools. The burglar, however, was captured as he was trying to dispose of the tools to an Ogden second hand dealer. This morning he confessed to the burglary and will probably be arraigned tomorrow.

GRAND LARCENY CHARGED.

Harry Hill, Thomas Admire and Charles Ashton were arraigned hefore Judge Howell this morning, charged with grand larceny, the theft of gloves and caps from the store of Fred M. Nye. The hearing was set for Thursday at 10 o'clock and their bail fixed at \$500 each, which they were muable to furnial

Fred Frost, who stole two grips from the Union depot yesterday, was this morning found guilty and sentenced to 60 days on the rock pile.

TENDER TO PROF. COOP.

Prof. Squire Coop has received a communication from the board of re-gents of the University of Utab, tendering him the position of musical director at the institution. The profes-sor is now in Idaho and it is not known whether he will accept the place or not.

BOY NEARLY STARVED.

Harry Wilson, a 15-year-old lad from Philadelphia, but who has been in Calirola for some time past, was taken from the sandbox of a passenger coach last night in an unconscious condition. The boy, it appears, had assumed this position at Reno, Nev., and had remained there for 13 hours without food |

Hachins A woman of our acquaintance who has A woman of our acquaintance who has considerable experience in running incu-bators and growing chicks for the early markets, gave us these pointers the other day: Light Brahmas are the most rap-idly-growing fowls and the best for quick returns when the eggs are halched under hens but the birds seem too delleate and of too quick growth to do well when handled by modern incubator and broodsr methods. The chicks hatch out before they have fully absorbed the entire yolk of the eggs and are therefore weakly and unfit to raise either with a brooder or hen 2,0001,000orgo Ball 1,000 G. E. Ellerbeck 1.000Stenhouse M. Stenh Maycock of the eggs and are therefore weakly and unfit to raise either with a brooder or hen mother. The White Leghorn comes much the same way and many high bred fowls have this failing. Barred Plymouth rocks are most hardy and seem to hatch best in an incubator and to most easily grow under conditions existing in this arld ell-mate. Incubator chicks are as good as any if they hatch good and strong but if weakly they are no good. Culmer Higham Williams Geo A. Hili Geo A. Hili A. J. Culmer J. W. Squires W. Boyd G.
