

to their duties, and energetic in the spreading of truth. Sister Scowcroft, of Ogden, will be a great help to the cause, for with her in charge of the musical exercises of the meetings they will become much more attractive. Brother Hyde, of Ogden, who has just graduated from the medical department of the University of California, is about to return home. He will be greatly missed by the Latter-day Saints here in their gatherings.

The Utah people at Stanford University are doing credit to themselves and their state by their energetic efforts, and the marked progress they are making in their several courses of study. John Swenson, of Pleasant Grove, who is taking the literary course, is now at the city and county hospital, having had a bone tumor removed from his knee. He has been confined about three weeks, but is now nearly well, and will soon resume his studies again. The Elders here invite correspondence of friends at home, and especially from such who have relatives and friends in these parts.

Respectfully,

ENUCH JORGENSEN.

SAN FRANCISCO, Cal., July 10, 1895.

WEATHER AND CROPS.

The temperature and precipitation during the past week has averaged below the normal, while the sunshine was above the normal, the weather being clear and sunny in all sections. Light frost occurred in elevated districts on the 6th and 7th, but no damage is reported to crops. Upon the whole the weather conditions during the week have been generally favorable to the growing crops.

Correspondents report that all crops are making rapid advancement, especially potatoes, which are fast recovering from the recent frost. Rye, wheat and barley are turning color and the harvesting of these crops will begin in a week or ten days. Haying continues with light yields in many sections owing to frost and cutworms. The sugarbeets are growing fast and there is every indication of a heavy yield. In the southern portion of the territory everything is looking well and the outlook for an average yield of all kinds of crops were never better.

Ranch—Grain looks well; lucern is in bloom; potatoes look splendid. Best prospects for a crop we ever had.

Spring City—Good growing weather. All crops that were damaged by the frost are fast recovering except those that were not entirely destroyed. Apricots and plums are a failure. Lucern only 2/3 of a crop compared with last year. New potatoes and green peas large enough for table use.

Monroe—Good week for gardens and field crops. Too much wind for haying hay; everybody busy haying.

Utah—Strawberries are all gone; raspberries are plentiful; potatoes and corn are looking fine. Winter wheat ready for harvest.

Croydon—Spring wheat coming in head; lucern in bloom; potatoes doing well. Generally all crops are doing well, but a good rain would be in order.

Yost—The week has been fine and warm. Gardens very backward. Lucern in bloom.

Heber—The weather the past week

favorable for crops. Lucern cutting in full operation; crop will be short on account of cold spring and frost. Small fruit is good. Apples, plums and cherries all about full from the trees.

Coalville—Frost in bottom land on the morning of the 5th. Wheat and lucern growing fast this week.

Holden—Fine growing weather during the past week. Lucern nearly all in seed; grain turning and potatoes are coming along all right. Everything looks favorable for a good yield.

Lake Shore—The weather has been fine and warm. All crops looking good; first crop of lucern nearly all baled; water getting scarce.

New Harmony—Very warm and dry. Crops doing well.

Payson—Weather fine; no rain; ground getting dry, water becoming scarce. All crops doing fine; early corn tasseled out; small fruits almost gone; early apples and peaches ripening.

Deweyville—The weather has been very warm the past week, more or less cloudy but no rain, a great deal of wind. Farmers are getting ready to harvest fall wheat. Considerable wheat will be ready to harvest the coming week. The ground is getting very dry and a good rain would be of great benefit to the growing crops.

Peterson—A great many potatoes will not recover from the severe frost. Lucern is being cut, but the crop will be light. Rye, barley and wheat heading out. All kinds of crops will not be very heavy. Light frost on 6th and 7th.

Harrisville—The week has been windy and disagreeable for farm work, also lodging heavy grain; dry land grain ready to cut. Prospects are good for abundant harvests.

Levan—A drying hot wind first part of the week; nights cold. Irrigation streams getting small. Haying still on. Rye turning. Cherries, currants and gooseberries in the market.

Scipio—Cloudy and windy the most of the week. Nights cool. Lucern harvest in full blast. Crops very light; cause, late frost and worms.

Gale—The past week has been very hot in the day and cool at night, especially the last three nights. Wheat is turning very fast; some rye has been cut. About all of the first crop of lucern is in and the second is ready to cut. Beets, corn and potatoes are doing well.

Vernon—First part of the week windy, retarding haying. Grain, potatoes and corn doing their best to make up for lost time. Many hills of corn and potatoes vacant through frost.

Peoa—The weather during the past week has been very favorable to crops; slight frost on the morning of the 7th which did but very little damage to tender plants. It is now estimated that the first crop of lucern will only average half of the usual amount in the first crop. Potatoes are coming out nicely.

Snowville—Cutting the first crop of lucern in full blast; crop will be light.

Pinto—Most of lucern cut and baled. Cutting of wild hay commenced, crop good. Grain of all kinds doing nicely and made good growth last week. Wheat is heading out.

Gunlock—The past week has been warm with drying winds. Crops growing well; small fruit harvested,

average crop. Plenty of water at present.

Lehi—The week has been good for growth, and for progress in the season's labor. Early grain cutting has commenced; beets growing fast, prospects good.

Layton—The wind makes it bad for haying. The nights are cool yet. Heading has commenced; strawberries are nearly all gone. No rain for a long time; sunshine abundant. Things are recovering from the frost.

Vernal—On the night of the 28th we had a good rainfall—22 of an inch. Weather was very warm and favorable for all crops. Grasshoppers, cut worms and caterpillars have done immense damage to all crops. Honey crop will be light on account of grasshoppers destroying the bloom of lucern. Some wheat heading out; corn and potatoes look fine; cherries and currants in the market.

Huntsville—Fine growing weather but water very scarce. Lucern is now being cut, it makes less than an average crop.

LOGAN ITEMS.

Following is from our Logan correspondent under date of July 11:

William Jardine, the young man whose spinal column was so badly hurt about two weeks since, is still alive, and has been brought from his home in Clarkston to Logan, where he is to be operated upon today by the Doctors Ormery, for the removal of the shattered portions of the vertebra. The lower portion of his body has been paralyzed since the accident, and he has had no use of his lower limbs.

As showing what may be done by a wide awake farmer, the following record as reported to the deputy stationer by a Hyde Park farmer, James Thurston Sr. is instructive:

No. of acres of land improved, 64.
No. of acres under cultivation in 1894, 35 5-16.

	Value.
10 acres of wheat, 164 bus. at 40c.	\$65 60
1 acre lucern seed, 700 lbs. at 6c.	42 00
1 1/2 acres corn, 30 bus. at 50c.	15 00
1-16 acre carrots, 80 bus. at 20c.	16 00
1/4 acre onions, 60 bus. at 50c.	30 00
3 acres potatoes, 700 bus. at 25c.	175 00
1 acre beets, 1,400 bus. at 20c.	280 00
2 acres squash, 9 tons at \$4 a ton	36 00
8 acres lucern hay, 32 tons at \$3...	96 00
8 acres hay, 32 tons at \$4 a ton	128 00
1/2 acre cabbage, 20 tons at 1c.	200 00
1/4 acre beans, 2,200 lbs. at 4c.	88 00
Choice apples, 75 bus. at \$1.....	75 00
Pears, 2 bus., at \$1 per bushel	2 00
Plums, 40 bus. at 40c. per bushel...	16 00
Small fruit, 30 bus. at \$2 per bus...	60 00
Grapes, 200 lbs. at 3c. per pound...	6 00
Vinegar, 40 gallons at 30c a gallon	12 00
Butter, 104 lbs. at 12 1/2c. per pound	13 00
100 pounds of cheese at 12 1/2c a lb.	12 50
160 pounds honey at 10 cts. a lb.	16 00
200 pounds dried apples at 4 cts.	8 00
800 pounds of wool at 8 cts a lb.	64 00
100 pounds dried plums at 5 cts.	5 00

Total.....\$ 1,459 10

EXPENSES.

Taxes	\$ 32 00
Sundries	132 95
Repairs	87 00

Total.....\$ 251 97

Leaving a balance\$1,207 25

The time of this gentleman is fully occupied, both summer and winter.
