### EDITORIAL NOTES.

The sharpness of Brooklyn people is ascribed to the fact that Brooklyn is the only needle factory in the United States.

The annual value of the industrial products of the United States are about \$10,000,000,000, and exports \$730,000,000.

New York has forty hospitals, containing seven thousand beds. That these establishments are all kept running proves the existence of some charity and goodness in that wicked city.

Official returns show that the California Legislature will consist of 92 Democrats, 27 Republicans and one Independent, divided between the two houses as follows: Senate, 31 Democrats and 9 Republicans; Assembly, 61 Democrats, 18 Republicans and one Independent.

There are 7,000 one-legged or one-armed soldiers who are receiving pensions of from \$18 to \$24 per month. It is proposed to increase their pensions to \$40 per month. The Maimed Soldiers' Association is pushing the measure, which is pending in the Senate, and is likely to become a law.

The King of Siam has had a bicycle sent to him, and will probably enjoy hours of fun in learning to ride it. If the present is a piece of retribution on the part of somebody to whom the King has given one of his traditional white elephants, it is clear that His Majesty has been beaten at his own game.

The people of Cameron County, Texas, are profoundly concerned about a strange, rumbling noise on Red River, like the roar of a waterfall or of a railroad train. There is no railroad within fifteen miles and the people cannot account for it, though it recalls sounds preceding the great earthquake in Mexico in 1759.

Public sentiment is a very uncertain thing. It has not been many years since everybody clamored for the jingle of silver, and the "Dollar of our Daddies" was the keynote of the campaign. Now the shining coin is permitted to lie in the Treasury vaults, and the people cannot be coaxed to carry it off.

The Providence Star remarks: Robeson and Kiefer have appeared again together on the floor of Congress, but, alas! no more as master and man. An irreparable coolness seems to separate these two statesmen. Robeson has publicly said that Kiefer's speeches killed him. It is a hopeless case of *Et tu Brute*.

The number of failures in business in the United Kingdom reported to *Kemp's Mercantile Gazette* (London) during the week ending November 22 was 285, against 247 during the same week in 1881, and 205 in 1880. The totals for England and Wales were 206, against 229 in the week named in 1881 and 250 in 1880. Scotland had 22, against 11 last year and 9 in 1880. Ireland reported 7, against the same number in the corresponding week in 1881 and 6 in 1880.

"Hydraulic Mining in California," an illustrated article by Talcott Evans, in the forthcoming January Century, is said to be an excellent popular description of the methods of mining by water—a form of extracting ore which, while wonderfully effective, has destroyed a large percentage of the farming lands in the river valleys of California. The efforts now making by the sufferers from this industry to put a legal end to it will give added interest to this paper on the Pacific slope.

The Chicago *Drivers' Journal* says that it has been suggested that "one of the great disadvantages which the railroads would labor under, if the live stock trade should be largely superseded by that in dressed beef, would be the difficulty in securing return freight." This is denied. While the refrigerator cars can not be used to carry coal, iron, or other freight west, it is asserted that, so far as canned goods, fruit, oysters, and other varieties of fine freight are concerned, this class of cars is excellently adapted for the purpose.

In fourteen out of twenty-three counties in Maryland, absolute prohibition of the sale of alcohol obtains. This is not all; prohibition is an effective, substantive fact. The county authorities enforce the law as State authority never did. The result is the contraction of dockets and costs of criminal courts, and a further result is that the city of Annapolis having now approved the "local option" act by 500 majority, the American thinks that the seat of government must be transferred to Baltimore. Is whiskey, then, absolutely necessary for the successful conduct of a State Legislature?

The loss by the London conflagration that broke out on the night of the 7th inst., is said to be the greatest in the history of the city, with one exception. The *Toddy Street* fire, referred to in the dispatches, occurred in 1861, and destroyed several wharves near Tooley Street, containing oil, which continued burning for a month, but the loss was less than that of Thursday night's fire, being estimated at £2,000,000. The great fire of 1666 is the only disaster recorded in the history of London which was more destructive of property than the recent conflagration.

## THE SEAT IN THE PRESENT CONGRESS.

According to dispatches from Washington, a new legal question is involved in the application of Hon. John T. Caine for a seat as Delegate from Utah in the present session of the Forty-seventh Congress. It is true that there was no proclamation of the Governor for the election at which Mr. Caine was chosen for that position, because the Governor was such a strong stickler for law that he would not act upon implied authority, but required specific statutory powers in order to act in the premises. But the election was regularly called and conducted as the law provides. No provision was violated, no technicality neglected. The returns were properly made, but they were not canvassed by the Board specially appointed to canvass and certify to the returns of the election of Delegates to the Forty-Eighth Congress, and it is not decided what the votes for Delegate to the Forty-seventh Congress were duly cast, or that the count made by the Judges of Election was incorrect; neither is there any other candidate claiming to be entitled to the seat.

The only nice legal point involved is, had the people, from whom all power is supposed to emanate, the right to express at the polls at a regular election, their will on an important matter connected with the main object of the election but not essentially involved therein, and shall the House of Representatives, which is the sole judge of the election as well as qualifications of its members, take cognizance of the will of the people when there is no doubt as to its expression at the ballot box.

The refusal of the Governor to issue a proclamation for the election of Delegates to fill the unexpired term, would have looked more consistent if he had not acted upon assumed implied authority in the case of the former Delegate. In this case he would have done no harm to any one, and the law would not have been violated; in the other he did an intended wrong to the injury of the Delegate-elect, and contrary to his own official oath as well as in neglect to perform a duty positively required of him. When an officer pretends to be such a stickler for positive authority in one case he ought to be equally particular in another. When it suited him to countenance extreme authority, when it did not suit him he could ignore implied authority. However we hope to see Mr. Caine seated, for Utah is clearly entitled to the representation of which she has been deprived.

### AN UNLAWFUL ACT CONDEMNED.

The Philadelphia *American*, in an article commenting on the Louisiana certificate case, makes the annexed remarks: "The Constitution of the United States says that each House of Congress shall be the judge of the qualifications of its own members. Two years ago the Governor of Utah thought he would be a better judge than the House, so he gave the certificate to Mr. Campbell and refused it to Mr. Cannon, who had the majority of votes. A Territorial delegate is not a member of the House, yet it was voted that the Governor of Utah had trespassed on the House's prerogatives."

The American is correct. The action of the House of Representatives, as well as the reports of the majority and the minority of the Committee on Elections, was as heavy a condemnation of the course of the Governor of Utah as could be expressed. The refusal to admit the Delegate from this Territory was grounded on the polygamy objection and on that alone. The certificate given to the Governor was treated as a fraudulent document and of no force or value in law or equity. The assumption of the Governor in presuming to sit upon the qualifications of a Delegate-elect was placed at its proper value, and the statement set forth in the certificate that Allen G. Campbell was a native born citizen of the United States, who had the greatest number of votes, was proven to be a falsehood.

Not only was the position taken by the Governor shown to be a false one, a position that he had no right whatever to assume, but Mr. Cannon was declared to be a citizen of the United States and to have received 18,568 votes against Mr. Campbell's 1,327, so that the certificate was false in language as well as in intent, and was a vain and foolish fraud in every respect.

The apologists for the Governor, who try to palliate his crime by pretending that he did a service to his country by giving a pretext to the House of Representatives to exclude Mr. Cannon on account of his marital relations, cannot cover up the fact that the certificate was a falsehood and the action of the Governor was an assumption of authority for which he had no shadow of justification in the law. The American is right in its charges against the Governor and they cannot be disproved. And that the offending official is still occupying the position for which he proved himself unfit, is not the fault of Congress, but of the Administration. If the gentleman's friends do not want the unpleasant facts to be alluded to they had better not seek to make them subjects of remark by eulogizing his act, directly or indirectly, for that will only provoke explanations of the truth, which are deeply damaging to all his professions of "loyalty" and other similar humbug.

### LATEST NEWS BY TELEGRAPH.

CHICAGO, 15.—At 10:30 a.m. the fire in the city of Chicago, which has been burning since the morning of the 4th inst., and which has been the most destructive of property than the recent conflagration.

## Motion for a new trial will be entered by Trude.

St. Louis, Mo., 15.—Fire yesterday destroyed the block of business part of town. Loss \$100,000, insurance \$40,000.

Big Fire in Toledo. TOLEDO, 15.—The Hall block, corner St. Clair and Jefferson Streets, the finest business block in the city, was burned this morning. The fire was discovered shortly after 8 a.m. There were numerous jolting houses below and on the upper floor, law insurance offices. The officers of the Wabash and Ohio Central R. Co. and galleries were there. The block cost near a quarter of a million. The Hartford Mutual life owned it when destroyed. The total loss will probably exceed \$500,000 with a fair proportion of insurance.

The losses by fire are very heavy and fall principally upon a few wholesale houses. Taylor, Rodgers & Co., wholesale boot and shoe and rubber houses, had a stock of \$20,000, upon which the loss will be \$200,000, insured for \$200,000. L. S. Baumgardner, wholesale fancy meat house; stock \$75,000; saved \$100,000, insured for \$100,000. Folger & McKim, wholesale grocers, lost their entire stock, valued at between \$100,000 and \$200,000, insured for \$200,000. The Chicago Central general office, and Wabash local offices were entirely destroyed; loss estimated at \$15,000, \$3,000 insurance. Loss of attorneys, architects and other occupations, \$35,000; half insured. The building was insured for \$110,000; the total loss is \$550,000; total insurance about \$500,000, divided among nearly all the prominent companies that have agencies in the city, policies ranging from \$20,000 down.

\$50,000 fire. YOUNGSTOWN, Ohio, 15.—The mill of Arms, Ball & Co. was partly insured last night. Loss \$50,000, insured.

Failures. NEW YORK, 15.—The business failures of the last seven days reported by R. G. Dun & Co., are 208, compared with 199 last week. Of these the Eastern failures were 100, the total loss is \$550,000; total insurance about \$500,000, divided among nearly all the prominent companies that have agencies in the city, policies ranging from \$20,000 down.

Exchanges. NEW YORK, 15.—The Public's statement of exchanges for the week ending the 14th shows the following:—GAINS: New York 1-3, Boston 3-3, Philadelphia 10-3, Chicago 17-5, New Orleans 2-7, Pittsburgh 32-3, Louisville 8-3, Kansas City 24-4, Providence 8-10, Cleveland 10-10, St. Louis 42-1, Hartford 38-7, Columbus 1-3, Peoria 4, Springfield 9-9, Worcester 17, Syracuse 16-3, Lowell 3-3. LOSSES: Cincinnati 7, Milwaukee 4, Indianapolis 5-1, New Haven 2-3. From these figures it is concluded that the larger business must have been done in August and September payable December 1st, than was done in that July last year, and the gain of such business must be greater than in the current or cash transactions at this time. The fact that the failures of last week were more numerous than in any other week of the year, both indicate the probability that there was a large expansion of the credit business last summer and fall, an expansion which subsequent events have not in all cases justified. Payments outside of New York amounted to \$322,698, 89% for the week, an amount which has never been equalled in any other than the first week of a month and only a few times in all. The Public also notes the fact that the failures of last week were more numerous than in any other week of the year, both indicate the probability that there was a large expansion of the credit business last summer and fall, an expansion which subsequent events have not in all cases justified. Payments outside of New York amounted to \$322,698, 89% for the week, an amount which has never been equalled in any other than the first week of a month and only a few times in all. The Public also notes the fact that the failures of last week were more numerous than in any other week of the year, both indicate the probability that there was a large expansion of the credit business last summer and fall, an expansion which subsequent events have not in all cases justified.
