cial Correspondence. Proyo, Utah Co., Nov. 21 .- The Procter Academy teachers' pupils and friends enjoyed a very pleasant cele-bration of the opening of the school in 1883 yesterday. The school has made wonderful progress from the time it commenced with one teacher and very few pupils. Today there are ten teachers including the principal, Rev. S. H. Goodwin, and over two hundred pupils, some of them from other towns, and the school enjoys a high reputation, of which the teachers and its friends may well feel proud. The following is the aniversary program carried though yes-

#### GARDEN CITY NOTES.

Hi Henry's minstrels will appear at the opera house Thanksgiving evening,

Harry L. Jones, who engaged in a fradulent collection scheme for "the widow of a switchman" last week, was entenced to fifty days in the county jail by Justice Booth yesterday, the justice finding he had jurisdiction in the case, on account of the amount of money obtained being less than \$50, and that therefore there was no necessity for holding Jones to the district court.

Jones pleaded guilty. County treasurer Glazin has changed the date after which no taxes will be two meetings for the coming week. Marine, the little 2-year-old daughter of C. E. and Ann Petersen, died in con-vulsions Saturday evening, and the fureceived from Nov. 27th to November 25th, Next Monday is therefore the last day for paying taxes previous to being advertised as delinquent. The Preston, Mink Creek, and River-dale Canal company has a large force of men at work grading, and improving the canal. Last season they had foun irrigating streams but they were not sufficient. The improvements made this fail will enable them to carry ten streams through the canal next sum-mer. The stock has risen from ten cents

to fifty cents on the dollar, and ere long it will be above par. The village fathers are laying down a heavy plank walk from Main street to the depot, this is a much needed improvement.

#### SCIENTIFIC MISCELLANY Amphibolin, a natural earth existing

near Baden, is recommended as more suitable than any other earth knows for rendering textiles waterproof and non-inflammable. When once mixed with water and dried, it will not again mix with water. A mixture of 34 parts of amphibolin, 9 of size, 2 of chrome alum, 2 of sulphate of am-monia and 53 of water is advised for reducet purpose and this is claimed ordinary purposes, and this is claimed to have no tendency to crack, peel of or fall out as dust. One or several coats may be applied with a brush or otherwise, the fabric being exposed to light after each coat.

The mystery of life is made even more mysterious by the long continu ance of the dormant condition of seeds dried in infusoria, etc. Three condiions of protoplasm are noted by Dr. Joseph Le Conte, viz: living, a condition in which life is actual; potentially living, in which the necessary molecu lar constitution or vital constitution is present, and dead, in which the vital constitution is wanting. Chemical composition does not explain the dif-ference, for in this there is no change with death.
