

JOSEPH WESSMAN WINS ROAD RACE

With Handicap of 5 Min. 13 Secs. He Crosses Tape First at Farmington.

MCCARTHY GETS TIME PRIZE

Scratch Man Rides Over Course in 47 Min. 11 Secs. and Finishes Seventh—Ideal Fast Course.

Joseph Wessman, a 5 minute, 13 seconds handicap rider, crossed the tape first at Farmington this afternoon winner of one of the fastest road races run over the Memorial day course. The time prize went to Fred R. McCarthy, a scratch man who finished seventh neck and neck with J. T. Bowen, in the good time of 47 minutes, 11 seconds.

After some delay the first of the riders got away at the pistol shot at 1:50 a. m. and from that time on they left in bunches until the scratch men started. Then followed a big stampede for the observation train on the Salt Lake & Ogden tracks. There were about 4,000 people at the starting point on Fifth North and Third West and a big percentage boarded the train for Farmington, and viewed the race at intervals until the tape was reached when there was a lively scramble for a post of vantage. Hardly had the crowd left the cars before there was a cry "Here they come" and Wessman swung into view coming strong. From that time on there were some exciting finishes and the majority rode the 15 miles without mishap.

The day was ideal and had there not been a slight headwind even better time would have been made by the riders. The only drawback to the event was the action of several enthusiasts on motor-cycles who kicked up so much dust that the riders at times rode blindly trusting to luck to deliver them from ruts, rocks of sheep and other obstacles usually encountered on the county road.

The first 10 men to cross the tape at Farmington were:

	Time.	Handicap.
1—Joseph Wessman	45:13	5:00
2—Gilbert Wilcox	48:12	5:00
3—E. M. Colvin	51:38	5:00
4—Ned Young	52:07	5:00
5—Elmer Earl	53:40	5:00
6—J. T. Bowen	47:11	4:30
7—Fred R. McCarthy	47:11	Scratch
8—Dan Armstrong	52:49	5:30
9—Gus Anderson	53:31	5:00
10—Clarence Patterson	54:22	7:00

FUNERAL OF EMMA CLOUGH.

Funeral services were held at 2 o'clock yesterday afternoon at the home of C. E. Plandor, 365 G street, for Mrs. Emma Clough, one of the pioneers of Kansas and Colorado. The services were simple and huge banks of flowers covered the casket. The funeral was given by Rev. Peter A. Simplic, pastor of the Phillips' Congregational church. Rev. Charles E. Perkins, pastor of St. Paul's church, read the episcopal service. The music for the occasion was given by Mrs. Frank C. Browning. The pallbearers were all old friends of the family and were Dwight M. Newton, L. L. Lewis, Major Anderson, C. C. Kutewsky, W. C. Staines and S. D. Keller. The little home where the service was held was crowded with many friends of the dead. Mrs. Clough is survived by eight children, nearly all of whom are residents of Salt Lake City. The body was laid beside that of Mr. Clough at Mt. Olivet cemetery. Mr. Clough died seven years ago.

GREEK LABORER MANGLED.

John Litsolis, a Greek laborer, working on an extra gang at Garfield Junction yesterday, was run down and cut to pieces by a work train at about 4 p. m. He fell off the cars and under the wheels, three cars running over him before the train was stopped. He was taken up unbreathed. The mutilated body is at Evans' morgue awaiting disposition.

CORONATION AT ST. MARY'S.

Little Rose Duffy and Her Brother Take Part in Pretty Service.

In one of the prettiest functions of the Catholic church, Miss Rose Duffy, daughter of Mr. and Mrs. James Duffy, crowned the Blessed Virgin at the annual coronation services in St. Mary's cathedral last evening. Her brother, James Duffy, was crown bearer, and she was assisted by 120 boys and girls who paid their devotion to the Virgin Mary.

The procession of children formed at the residence of Bishop Lawrence Scanlan and marched to the cathedral following the little queen of the ceremony. The services opened with a hymn of St. Cecilia chorus. Rev. Father Andrew Ryan sang the rosary and the litany and responses were made in chorus by the children. Little Katherine Homer said the act of consecration to the Sacred Heart, which was followed by Loretto Fischer, who sang "Come Father, at the Altar."

The processional hymn, "Hail Mary," was sung by Margarette Locke, a talented little singer. They were all accompanied by the chorals of John Krouse and Carl Springman, two boys of the choir. The service was closed by the benediction of Rev. Andrew Ryan following the sermon of the Rev. W. K. Ryan.

DEATH OF F. W. HEDGELAND.

Genius Who Rebuilt Tabernacle Organ Succumbs to Consumption.

The friends and admirers in this city of Frederick W. Hedgeland, the noted organ building expert, were much shocked today on learning of

his sudden death yesterday at Canton, Ohio. The cause of his death was consumption and it is believed that he had so weakened him that he finally fell a prey to the "white death."

Mr. Hedgeland was expert for the Kimball organ company, which the house was given the contract for rebuilding the Salt Lake tabernacle organ in 1901, and the expeditious and intelligent manner in which he did his work was a matter of much commendatory comment among Salt Lake musicians. Prof. McClellan was particularly pleased with the expert work of Mr. Hedgeland, who was one of the greatest organ builders in the world. There are 28 of Mr. Hedgeland's inventions now in use on the tabernacle organ, and he had in preparation plans for further remodeling and enlargement of the instrument that if carried out will make it the finest in the world. The scheme includes a second console, or organ desk, to be set up in the rear gallery, where the performer can judge much better of effects than where he sits at present, close to the body of the instrument; also, a widening out of the organ at the sides, with a remodeling of the entire front.

Mr. Hedgeland was a natural mechanic and inventive genius. He devised a mechanism, while in the employ of the Kimball for which he was paid \$20,000, and just before his death he was arranging for the marketing of the instrument for automobiles, which it is claimed would have alone made the inventor independently rich. Mr. Hedgeland's death is a distinct loss to both the musical and mechanical world. His heart was in his work; he was of that combination of genius and practical intelligence, richly leavened with an untiring and unbounded enthusiasm that would have given him international reputation, in fact, eventually have made for him a prominent niche in the hall of fame that includes the world's most marked and valuable geniuses. The deceased is survived by Mrs. Hedgeland and hundreds of warm friends throughout the country who mourn his untimely death. The zeal and earnestness in the labors that knew no rest burned out the candle of life far too quickly.

DAUGHTER SEEKS FATHER.

Mrs. E. G. Weeks of Enwood, Ill., writes to Police.

This morning the chief of police received a letter from Mrs. E. G. Weeks, Enwood, Ill., which throws some light upon the mysterious telegram received by the chief of police a few days ago. Mrs. Weeks enclosed a photograph and inquires for her father who has not been heard of for many years.

A. G. Radabaugh, contractor, residing at 150 North Main street, received a letter from Mrs. E. G. Weeks, Enwood, Ill., dated April 1. Among the deceased's effects was a notebook containing the address of Mrs. E. G. Weeks. This letter brought response from Mrs. Weeks who enclosed a photograph of her missing father. Radabaugh declares that it is not a portrait of the mysterious man who died in the hospital.

FOLLOWER OF HORSES FOUND DEAD IN STALL

William Nelson, Who Has Been Suffering With Tuberculosis, Dies Alone.

William Nelson, a colored follower of the racing stables and aged about 27 years, was found dead in one of the box stalls at race track this forenoon. Nelson, who is without relatives or friends so far as is known, came to Salt Lake from the horse track in California. He was a victim of tuberculosis, and since his arrival here was in such a weakened condition from the disease that he could only do odd jobs. He was seen only do odd jobs. He was seen only do odd jobs. He was seen only do odd jobs.

BRINGS SUITS ON NOTES.

W. S. McCormick, doing business as McCormick & Co., bankers, filed suit Saturday against Frank Y. Taylor, E. Y. Taylor, and A. E. Hyde to recover \$4,256.12 on two promissory notes. The notes were both issued on Feb. 1, 1907, and bore interest at 8 per cent.

DISTRICT COURT NOTES.

Judge C. W. Morse modified the temporary restraining order Saturday, issued in the case of Charles W. Lewis et al. against Frank Y. Taylor, E. Y. Taylor, and A. E. Hyde to recover \$4,256.12 on two promissory notes. The notes were both issued on Feb. 1, 1907, and bore interest at 8 per cent.

HELD FOR HORSE STEALING.

Edward Miller, a Newcomer and High Life Devotee, Is Under Arrest.

Edward Miller, a recent arrival in Salt Lake, was arrested last night by Detectives Burt and Chase upon information from the sheriff at Green River, Wyo., which charged Miller with the theft of several horses, which he disposed of at Rawlins, then coming to Salt Lake where he has led a life of gaiety. He is being held here awaiting the arrival of the Wyoming officers, but protests his innocence of the charge made against him.

NO ARRESTS TODAY.

As a precautionary measure and in order to better protect the residence and persons of the city while the homes would be occupied during the day, the patrolmen are doing extra duty today, the first relief working three hours extra and the others two hours extra. This provides a force of 45 men during the afternoon.

Special attention is being given to the suburbs and outlying home districts, where the horse thieves are likely to be busy, and a number of men, some on bicycles and others on foot, were sent out to patrol these districts early this morning. Patrolmen were also detailed to the cemeteries, and the various resorts where the crowds are likely to gather.

THE "SUB" AT THE BUNGALOW.

Arrangements have been completed by Manager John D. Spencer for the production of "Sub," the clever little play by Miss Margaret Whitney, at the Bungalow theater on Saturday, June 5. There will be matinee and evening performances on this date, and judging from the reception the play has received in this city and at Logan, the Bungalow will be crowded on both occasions. Edward P. Kimball will have charge of the orchestra.

WANT TOO GOOD A MAN.

Seey, Perkes of the Real Estate association is in receipt of what a downcast letter would call "a beam and a lot of request." It is from the president of the Lynchburg, Va., Chamber of Commerce, asking Mr. Perkes to recommend him some one for secretary. The requirements for admission are an all-around and multifarious, and call for such exceptional abilities, that, as Mr. Perkes remarks, such a man would easily command in other lines a salary four times to pay. The city has 25,000 inhabitants.

ARE COMING TO UTAH.

(Special to the "News.")
New York, May 31.—Prof. William H. Burr of Columbia university, will be one of a party of eastern men who will leave New York tomorrow to inspect the property of the Utah Gold & Copper Mines company. Every one of the party already is a large stockholder. Prof. Burr is consulting engineer to New York city and to the Panama canal commission.

KLINE CHARGES FRAUD IN DEAL

Says in Drawing Agreement Vital Portions Were Omitted Unknown to Him.

WANTS CONTRACT RESCINDED

Restraining Order is Asked in Suit Filed in the Third District Court To Untangle the Affair.

H. R. Kline filed suit Saturday in the Third district court against A. C. Austin to rescind a contract for the purchase of mining stock, which he declares he was induced to enter through fraud and misrepresentation. Kline was the owner of 14,036 shares of stock in the Yaxtila company and 5,000 shares of stock in the Guerrero Lumber, Mining & Milling company, both Utah corporations, doing business in Mexico. His complaint alleges, on Nov. 7, 1906, he purchased from Austin 9,375 shares of Yaxtila for \$150,000. He gave four notes for the shares bearing 8 per cent interest and delivered his whole stock as security for payment, the stock to be held by the Mexico City Banking company. Thereafter, Kline refused to pay the notes and on April 14, 1909, a compromise contract was made whereby Kline was to pay \$5,000 pesos and receive credit on the notes at the Mexican bank of \$3,750 pesos or \$1,894.95, the amount remitted being interest due. Kline now says that Austin fraudulently caused the contract to be so made to omit vital portions and that he signed it without knowing its contents.

Kline says that Austin further owes him \$15,000 pesos. From September 1, 1903, for money paid out for organization purposes. He asks for judgment for this amount and an order restraining Austin from disposing of the stock, or from paying back the balance due on the notes and take the stock.

IN THE NARUM ESTATE.

The Utah Savings & Trust Co. has been appointed administrator of the estate of Yasuka Narumi, a Japanese, who committed suicide by hanging himself in Judge Lewis' court. His assets were shown to be \$13,275.27 and his liabilities something over \$15,000. The administrator was authorized to reopen his place of business at 26 Richard street and dispose of the stock of goods.

SETTLED BY STIPULATION.

The case of Charles La Fever and Alexander Furness, who were brought suit against the Union Pacific Railroad company to recover \$2,840.98 damages for alleged delay in the shipping of goods, was settled by stipulation in September, 1907, was settled in Judge Ritchie's court by stipulation Saturday. The plaintiffs received \$600 and the case was dismissed.

BRINGS SUITS ON NOTES.

W. S. McCormick, doing business as McCormick & Co., bankers, filed suit Saturday against Frank Y. Taylor, E. Y. Taylor, and A. E. Hyde to recover \$4,256.12 on two promissory notes. The notes were both issued on Feb. 1, 1907, and bore interest at 8 per cent.

In a similar action, McCormick & Co., bankers, brought suit against John Y. Rich to recover \$2,500 on a promissory note. It was executed on July 2, 1902, and made payable on demand.

DISTRICT COURT NOTES.

Judge C. W. Morse modified the temporary restraining order Saturday, issued in the case of Charles W. Lewis et al. against Frank Y. Taylor, E. Y. Taylor, and A. E. Hyde to recover \$4,256.12 on two promissory notes. The notes were both issued on Feb. 1, 1907, and bore interest at 8 per cent.

Edith F. Evans' suit against the Denver & Rio Grande Western Railroad company was dismissed Saturday on the motion of the plaintiff's attorneys. The suit was to recover \$25,000 for personal injuries in a collision near Crescent Sept. 15, 1905. It is understood that the case was settled out of court.

J. Shepard pleaded guilty to burglary in the second degree before Judge Lewis Saturday afternoon and was sentenced to eighteen months in the state prison. Shepard entered the house of J. McQueen at 137 south First West street and was arrested while climbing out of the window.

WIRELESS TELEGRAPH CAUSES STEAMERS' RESCUE

Guaymas, Mexico, May 31.—Through the use of wireless telegraph the American steamer Precursor, rendered helpless by a broken propeller, was rescued from a dangerous position and towed into this port yesterday. The Precursor had drifted aimlessly for three days, when a wireless communication with the ship of the United States sent out and brought the steamer to port. Some of the passengers had become uncontrollable from fear and had to be locked in their state rooms.

TENNESSEE PASS TUNNEL REOPENED

Leadville, Colo., May 1.—The Denver & Rio Grande railway, which Tennessee Pass, which was blocked by a cave-in of loose dirt and snow two weeks ago, was reopened for traffic this morning. The bore has been entirely cleared of debris.

LEHI-TINTIC SENDS SHIPMENT TO SMELTER

Will Discontinue Concentration—West Tintic Looking Good—Strike Made at Depth.

(Special Correspondence.)

Enreka, May 31.—Another shipper was added to the list of Tintic producers last week, when the Lehi-Tintic sent a five-ton shipment to the Tintic smelter. The shipment consisted of concentrates and crude ore which was hauled by team from the property in North Tintic. It was a trial shipment but it is stated by the management that the property will in all probability be a regular shipper in the near future. The concentrates are from the jiggling plant which was put in operation there a week ago, and the crude ore represented a lot of material which was taken out and will run good values in gold and silver. The company will ship all of its crude ore in the future, as it is impossible to make anything like a decent saving of the silver value in concentration. The Lehi-Tintic ore, of which there is about 1,000 tons opened up at this time in the mine, carries around 50 per cent, 25 ounces silver and some gold. The ore is also valuable as a fluxing product on account of the iron which it contains. Consequently the smelters are willing to pay a premium for it. Where the ore has been opened up to best advantage in the Lehi-Tintic is in the tunnel about 300 feet below the surface. Should shipments from this property continue cars will be loaded at Honanza, where the silver value is lost. The Grande railway is distant from the property about two miles. The Lehi-Tintic (formerly the old Gold Blossom) which produced some very rich ore in the early days, has been considered a good mining proposition, and its true worth is apparently known to a few people at the present time.

B. F. Fleiner has been working in the West Tintic mining district and in a conversation stated that conditions in that part of the district are improving wonderfully and the prospects for a good year are bright. Mr. Fleiner is known in the Blain property, and he brought in some samples of lead ore taken from a four-foot vein running through this property, encountered in the shaft at a depth of 2,260 feet. The ore carries between 50 and 60 per cent lead, eight ounces in silver and some values in gold. Some trouble has been encountered with water here and will drain the workings about 150 feet below where the ore has been encountered and opened up. He says that there are a few localities at present working in the deep workings of the Centennial-Eureka mine. Upon the 1,600 level of this old time bonanza the strike was made, but the nature of which is not known. The shaft which is being cut out in the shaft at a depth of 2,260 feet is nearing completion and at an early date drifting will no doubt commence upon this level. No difficulty is experienced in keeping the output of the mine up to 10,000 tons a month and the record for this year will at least equal that made last year which was a little better than 11,000 tons.

The East Tintic Development will soon take its place among the ships of the district, according to Manager Ralph Kellogg, who was in town Friday evening. Hoisting of ore commenced Thursday. The ore is being mined and piled in the company's ore house and as soon as there accumulates enough for a shipment it will be sent forward. The ore is coming from the 230-foot level, where the strike was made, and is about the nicest looking lead rock that has ever been opened up in the district.

RAISE FIFTEEN TONS.

Fifteen tons of ore were raised from the new ore body at the East Tintic Development yesterday and within a short time a shipment will be ready for the smelter. Ralph Kellogg, manager of the property, was in Eureka today. He asserted that a fine large sample of the ore was shipped to Salt Lake City today, consigned to Badger Brothers, and will be on exhibition. According to Mr. Kellogg, the ore has opened out in a 5-foot face that runs from 60 to 70 per cent lead. It was about 30 feet from the shaft in the north in the 230-foot level. Although it is contended that no assay has been made of the ore, it is understood that the values in silver are small.

The shaft is now about 40 feet below the 230-foot level and two shifts, with power drills, are now sending the shaft 50 feet further than this point, where a station will be cut and a drift sent to the top of the ore body. On the level above, Manager Kellogg believes that by July the lower level will be in ore and a large tonnage can then be taken out.

Work has been suspended temporarily at the Bullock, but it is understood that it is on account of plans that the company are making for the sinking of the main working shaft deeper. The work which has been done of late leads the management to believe that the main part of the ore body lies below the present depth of the workings.

NEBO CENTRAL LETS CONTRACT ON TUNNEL

(Special to the "News.")
Mr. Pleasant, May 31.—James D. Simpson, president of the Nebo Central Mining company, declares that the company has just let a contract for the extension of the tunnel 100 feet. This is another company that will be active in the Nebo mining district within a short time. Several other companies in the camp are beginning to show considerable life and before the middle of summer, there should be some shipping. Mr. Simpson has just returned from looking over the company's property. He asserts that there is enough timber on the ground for fuel and mine work to last for many years to come. The company has a good bunk and boarding house, blacksmith shop, tools and other equipment.

Three veins cross the claims of the company for from 5,000 to 9,000 feet and values in lead and silver have been taken from the surface showings that run from \$3.50 to \$25 a ton. A tunnel has been sent in for 458 feet and a shaft has been sunk with ore cars and trucks. A 45 foot drift has been run in on a stringer of ore and the company feels that on account of the highly mineralized condition in the drift some good values should shortly be found.

The cost of running the tunnel has been at the rate of \$6.45 per foot. The last contract will be somewhere near \$100,000. Since the company has been given six assessments have been levied and paid. At present the company is declared to be free from debt and in good financial condition. Albert Jost, manager of the Nebo Central, says that the company has a large force of men at work both in the mine and along the roadway. The road up to the mine, which lies two miles up the canyon will mean a new era in the property, in as much as all ore heretofore hauled out has been done by Burros. Work was discontinued last fall when snow prevented work being carried on at a profit. The company is now shipping out silver-lead ore that ran from \$20 to \$70 a ton.

CONCENTRATES.

The old Prince of Wales mine leased by Fred Schramm, who is an ore running 20 ounces of silver and 50 per cent lead. Owing to the great amount of snow it is tied up for the present.

Peter H. Cannon, one of the pioneers of Cherry Creek, Nevada, has returned home after spending several months in Salt Lake. Mr. Cannon is one of the heavy interests in the Biscuit mining company at Cherry Creek.

E. H. Meade of Reno, formerly a Salt Lake man is one of the lucky persons to secure a lease on valuable property in the northern part of Humboldt county, Nevada. Mr. Meade recently declared that he would not dispose of his lease for \$50,000 at the present time.

Reports from Gold Circle say that the Geyman mill is running at full capacity. The Rio-Ridged Leasing company recently shipped six tons of ore to the Glasgow & Western company Huntington mill. The ore sampled \$152 a ton. The place is showing the greatest activity in its history.

C. W. Hartley, one of the members of the governing board of the Utah Stock and Mining exchange, announced that the following purchased seats on the exchange last week: Del Roberts and James Morgan of Provo; John Beyer and C. Hicks of Provo; Byers Mining company, John Stringham and A. I. Gaumer of Salt Lake City.

Charles L. Drake, president of the Investors' Corporation & Trust company of Columbus, O., which has purchased the Rio-Ridged Leasing company, has been in the city for several days familiarizing himself with affairs of the company and conditions generally. He will be in the city for several days, and will go to camp and visit the property with A. Short within the next day or two.

The Maxfield mine, Big Cottonwood district, owned by Postmaster Thomas and leased by Wade Howell, is now shipping 25 tons of ore a month to the smelter at Pioche. This is hauled by team. The mine is a lead and silver proposition, yielding 70 per cent lead and 15 ounces of silver per ton. It has a capability of 60 tons a month. It could be secured. The lessee is sinking, drifting and stopping in several directions, thus securing a very fair monthly profit. A number of our Sugar County people are interested in this, among them being T. C. Davis, the druggist, and Dr. Clark, the druggist.

Through the holding of a special meeting Saturday of the Tintic Gold Mining company, this corporation was consolidated with that of the Snowflake Gold Mining and Power company. The companies are now absorbed in the Gold Spring Mining and Power company, which is now being organized. Through the efforts of C. A. Short, A. S. Martin and H. R. Elliott, the consolidated was perfected, the company incorporated for \$1,000,000 in convertible mortgage bonds issued and numerous improvements started. The company will erect a large electrical power plant at Modena, the mill and machinery at the mine, will all be run by electricity and a new era for the company has started.
