OGDEN, UTAH, - AUG. 11, 1904.

## MISS NANNIE TOUT VISITS OLD HOME.

Arrangements Under Way for Utah People to Hear Famous Musical Artist.

## AFFAIRS OF WEBER COUNTY.

Working for Branch Horticultural Experimental Station—Police Rounding up Hobos—News Briefs.

Mrs. Child, wife of Arvil Child of Riverside, lies at the general hospital in a most critical condition as a result of an operation performed for some internal trouble a few days ago. Mrs. Child is the daughter of Justin Grover of Roy and has been a resident of Weber county all her life. She has a family of seven children. Although her condition is quite serious, strong hopes are entertained for her recovery.

### MISS NANNIE TOUT HOME.

Yesterday afternoon Miss Nannie Tout, accompanied by her father, E. F. Tout, arrived in Ogden. The people of her home town are overjoyed at Nannie's return and regret that she will be here but a short time. In an interview with Miss Tout and her father it was learned that she was expected back to the Royal College of Music in London next November at the grand concert given in her honor. After November she is booked for engagements in the leading cities of England till May of 1905.

Detailed arrangements have not been completed for her appearance while she is visiting here with us. Arrangements will be made public later, and Utah will be given a chance to hear her famous musical artist.

While in London Miss Tout sang before the queen, who was very much pleased with her work, unaffected manner and charming with her exquisite voice. Mr. Tout reports having a very pleasant journey to Utah.

Mr. Tout brought a beautiful collection of birds from England. There are possibly six or eight different kinds, all famed as English songsters.

### ROUNDING UP HOBOS.

Judge Howell's court was crowded yesterday with vagrants rounded up by the police from the "jungle." Four of them were given 30 days on the municipal rock pile, and two were given three orders to leave the city, with a promise of 60 days breaking rock if they appeared in court again.

Freddie Woods, a small boy of Boise, Ida., is held at the police station awaiting orders from his mother.

### WEBER COUNTY AFFAIRS.

The board of county commissioners held regular session yesterday. A petition from Wilson, signed by about 50 taxpayers, was received asking that said precinct be detached from school district No. 1, and attached to district No. 2. The clerk was instructed to forward a communication to the Southern Pacific company asking it to put in a crossing near the new station at West Weber.

Commissioner Stanford presented a report covering matters pertaining to the county infirmary, the canyon road, the West Weber petition, the visit to a meeting of the Horticultural society of Salt Lake county to consider the location of a branch experimental station of the Agricultural college.

The survey of the canyon road is about finished. About three more days will complete the copying of field notes. The full report is expected.

Weber, Boxelder, Davis, Utah and Juab counties are to be urged by the Horticultural society to apply to the next state Legislature to have established in Salt Lake county one of the above named counties a sub-station of the Agricultural college so that better results may be obtained in the improving and handling of fruit and farm products.

The county attorney asks for further time to report on the West Weber petition.

### BRIEFS AND PERSONALS.

John Albert Patterson, aged 38 years of Nevada, was given naturalization papers in the Second district court yesterday.

The infant son of Mr. and Mrs. J. A. Schlin, 2519 Grant avenue, died yesterday of whooping cough. The funeral was held today at 2 p. m. from the residence.

Charles F. Watkins met with quite a painful accident a few days ago. Mr. Watkins was leaning out of the open window and as he tried to get back in

the window sash fell, striking him on the top of the head, inflicting a painful wound. He is feeling better today.

### WAS WASTING AWAY.

"I had been troubled with kidney disease for the last five years," writes Robert H. Watts, of Salem, Mo. "I lost flesh and never felt in good health. I consulted leading physicians and tried all remedies suggested without relief. Finally I tried Foley's Kidney Cure and less than two bottles completely cured me and I am now sound and well." During the summer kidney irregularities are often caused by excessive drinking or being overheated. Attend to the kidneys at once by using Foley's Kidney Cure. F. J. Hill Drug Co.

The savings department of the Pingree National bank will remain open Saturday's until 8 p. m. for the purpose of accommodating the thousands of making savings deposits.

### PROVO.

The Daily News is delivered by carrier in Provo every evening (Sundays excepted) on the same terms as in Salt Lake—15 cents per month. All complaints, requests for changes of address and payments of accounts should be made to R. J. Dugdale, 372 West 4th North St. Provo. Deliverments and orders for church works also received.

### MORE WATER LITIGATION.

Divorce Case from Pleasant View—Death of Mrs. Mary Boulton.

Special Correspondence.  
Provo, Utah, Aug. 11.—Judge Booth is hearing the divorce suit of Daniel Monnet vs. Louise Monnet on the grounds of desertion. Defendant has a cross complaint in which she asks for a decree on the ground of failure to provide. The parties are from Pleasant View.

### SUIT AGAINST THE CITY.

James A. Bean has commenced suit against Provo City, asking that the city be restrained from interfering with plaintiff's use of water from Provo river to irrigate 50 acres of land, which water, plaintiff alleges, was appropriated by his predecessors in interest in the defendant's land. Plaintiff alleges, the defendant has not regulated or controlled this water, when it is alleged, the watermaster turned the water from plaintiff's land, and threatens to continue to interfere with plaintiff's use of said water unless restrained by an order of the court. The city has been cited to show cause, on Aug. 29, why it should not be restrained from interfering with plaintiff's use of the water.

### DEATH OF MRS. MARY BOULTON.

Mrs. Mary Boulton died Tuesday at 10:30 a. m. at her home, Mrs. J. W. Brown, of Pleasant View, at the age of 81 years, from dropsy and general debility. The deceased was a native of England and has been a resident of Provo for many years, enjoying the respect of a large circle of friends. The funeral was held today from the Pleasant View home.

### CROOKSTON-MCCANDLESS WEDDING.

Arthur D. McCandless of Lehi, 19, and Tena Crookston, 18, of American Fork, were married here yesterday by Judge Booth.

### GARDEN CITY NOTES.

The second ward will have an outing at the lake resort on Tuesday, the 16th.

George S. Taylor, accompanied by his daughter, Miss Hazel, and Miss Birdie Clark, left today for an extended visit to New York. Mr. Taylor goes principally on business, but the parties will take in the St. Louis exposition and other points of interest before they return.

### SPRINGVILLE.

Demise of Thomas Tew.

Pioneer and Veteran of 71 Answers Final Summons.

Special Correspondence.  
Springville, Utah, Aug. 10.—Tuesday, funeral services were held over the remains of Thomas Tew, who departed this life at 12 o'clock the night previous. The deceased was born June 23, 1833, in Birmingham, Warwickshire, England, and emigrated to the Gospel Oct. 21, 1849, and left his home Dec. 30, 1850, to come to Zion, and arrived in Salt Lake City Aug. 30, 1851, being eight months on the trip. After passing the winter in Salt Lake City he left for Sanpete the following spring, but on reaching Springville he was so delighted with the place that he decided to remain. Jan. 22, 1854, he was married to Rebecca Bird. Nine children were born to them, seven of whom survive the father, two sons and five daughters. In April, 1855, he and his small family moved to Paris, Ida., living there until the fall of 1858, when they went to Richmond, Utah. He returned to Springville in 1872 and has lived here ever since.

The speakers at the funeral were Elders Thomas Child, C. D. Evans, Francis Beardsall, and B. T. Blanchard. A large concourse of people turned out to pay their tribute of respect to the departed brother.

### IDAHO.

Weekly Crop Bulletin and Weather Report.

United States Department of Agriculture, Idaho Section Climate and Crop Service, Weather Bureau. Weekly crop bulletin for the week ending Monday, Aug. 8.

Oppressively high temperatures were experienced during the daytime throughout the week, but practically the entire state, though in elevated districts the nights were cool; no rain of consequence occurred in any portion of the state, and in some northern localities the drouth is becoming serious;

water in streams is rapidly falling, but the season is so far advanced, it is thought that in most sections the supply will be sufficient; absence of rain and wind, together with general freedom from cloudiness contributed to make an ideal week for harvest and haying.

### CROPS.

Fruit—Fruit crops made rapid progress during the week; while in some localities the quantity of the yield will be under average owing to late frosts, the quality will be good; there is some complaint of damage by green aphid and pear slugs, and in some orchards the codling moth has been very destructive, but in most well cared for orchards insect pests are not as destructive as in previous years. Markets are well supplied with peaches, peach plums, apples, etc., of excellent quality.

Grain—Harvest progressed without interruption, and in numerous favored localities is nearing completion; reports are somewhat conflicting, as is always the case, but generally indicate an average crop of grain of good quality, "dry farm" grain in eastern counties appears to be above average. Very little threshing has been done.

Grass—Under extremely favorable conditions, haying has made rapid progress; hay is being secured in excellent condition, and yields are generally satisfactory; there is some fear that in portions of Cassia county there will not be sufficient water to mature the second crop of alfalfa, but in most sections the crop, where not already harvested, promises good yields; some of the second crop will be saved for seed. Range grass is drying rapidly, but there is very little shortage of feed, and range is being shipped in prime condition.

Vegetables and Melons—Sugar beets have made excellent growth and promise good returns; most of the later garden vegetables are abundant; potatoes are generally doing well; watermelons and cantaloupes are being marketed in considerable quantities, and are of the usual good quality.

### What is Life?

In the last analysis nobody knows, but we do know that it is under strict law. Abuse that law even slightly, pain results. Irregular living means derangement of the organs, resulting in Consumption, Headache or Liver trouble. Dr. King's New Life Pills quickly readjust this. It's gentle, yet thorough. Only 25c at Z. C. M. L. Drug Store.

### COWLEY, WYO.

BIG HORN BEET EXPERIMENTS.

Fair Success Reported—Grain Looking Well—Home Building.

Special Correspondence.  
Cowley, Big Horn Co., Wyo., Aug. 4.—On Sunday George Austin, expert agriculturist for the Utah Sugar company, addressed the people of Cowley. Mr. Austin is here to investigate the development of the beet crop. Although those who planted beets were not very successful in getting a full stand, Mr. Austin reports that those which are growing are in excellent condition. He believes our main difficulty lies in getting the seed to germinate. According to instructions the planters did not irrigate the seed, as is the custom with most all seed in this new soil. But where water accidentally reached the seeds or where some did irrigate later, the beets are doing fine. It is the intention of the Utah Sugar company to continue the experiment next year.

Grain is looking fine; binders are now in motion.

Several stone houses are in course of construction, a fine quality of building stone being accessible. Mr. W. N. Eyre has erected a lime kiln near Cowley, which will reduce the present price of lime.

### Fearful Odds Against Him.

Bedridden, alone and destitute. Such, in brief was the condition of an old soldier by name of J. J. Havens, Versailles, O. For years he was troubled with kidney disease and neither doctors nor medicines gave him relief. At length he tried Electric Bitters. It put him on his feet in short order and now he testifies: "I'm on the road to complete recovery." Best on earth for Liver and Kidney troubles and all forms of Stomach and Bowel Complaints. Only 50c. Guaranteed by Z. C. M. L. Drug Store.

### BRYAN, IDAHO.

SERIOUS FIRE AT RIVERSIDE.

Creamery and Residence of Mrs. O. W. Rose Burned—Loss \$4,500.

Special Correspondence.  
Bryan, Bingham Co., Idaho, Aug. 9.—The creamery, situated just inside the border line of Riverside, and which Mrs. Martha Rose, wife of the late O. W. Rose, was the principal owner and manager, was burned to the ground last Saturday, leaving her practically destitute and homeless.

The creamery was built some three years ago, and was known as the Rose Creamery Co., and was operated by O. W. Rose, who came west with his family from Hyrum. He was taken to Hyrum some two or three months since and operated upon, from which he did not recover, leaving Mrs. Rose a widow with four small children.

Prior to his death, Mr. Rose had invested all his savings in the creamery, and while his health permitted him to do so, was making that institution a success. When through failing health he was unable to perform that task, his wife was looking after the business with the assistance of her brother, Orson Wray. On Saturday morning, as was his custom, he lighted a fire for the purpose of getting up steam for the day's run, and then went in the garden to turn some water, and before returning to his post, observed the building was on fire, and ran to put it out, but too late. A spark from the smoke stack had ignited some inflammable material at the end of the building, and on the opposite side from the residence part. All efforts to save the building were futile, and a vast amount of material, together with the machinery and several hundred pounds of butter and cheese.

The loss on the building, machinery and goods amounts to some \$4,500, and was insured for \$1,500.

As above stated, Mrs. Rose owned the majority of the stock in the Wray, Orson Wray and O. Benlap are the other losers in the fire.

### ANOTHER GUN ACCIDENT.

While out on a hunting trip with Fred Furnis, Geo. McBride, a lad of some 15 years, was accidentally shot in the foot with a 22 rifle.

### EDUCATION FOR THE FARMER.

D. A. Dickson, in writing to the New York Tribune Farmer on the most important need of the farmer, says that the paramount need of the farmer is a better education. No man, in whatever profession he may be engaged, need look for success in these days of unburied intellectual vigor unless he is the possessor of a good education. The farmer is in need of a thorough education as much as any other individual; he may be able to escape the clutches of shrewd business men, to turn coolly and calmly, and to pursue a course of study, but he should have a good practical education, and especially in that phase of agriculture which is the most profitable and the most varied and skilled in beef production. But every man who makes agriculture

his profession, no matter whether on a large or a small scale, requires a suitable education, which, with good judgment, will produce the best of results. A practical knowledge of natural philosophy and crop producing is as essential to the farmer as it is to a lawyer, and he who studies his profession with attention to the bar. The man who is to become a doctor or a lawyer must prepare himself for that position by a thorough education. The successful business man of the city is he who has given a long and careful study to his profession, and who should not the farmer have at least a practical knowledge of agriculture in addition to his book learning and worldly experience? Agriculture is a science. Many weighty problems are yet to be solved by the tiller of the soil, but it is a successful study to his profession, and who should not the farmer have at least a practical knowledge of agriculture in addition to his book learning and worldly experience? Agriculture is a science. Many weighty problems are yet to be solved by the tiller of the soil, but it is a successful study to his profession, and who should not the farmer have at least a practical knowledge of agriculture in addition to his book learning and worldly experience? Agriculture is a science.
