ONE

A

Country, Which is a Wonderful Producer.

Mr. Hyrum S. Woolley, of Paris, Idaho, has just come down from the Cape Mr. Woolley today:

Don G. Gillis, a mining engineer, has one else, I had heard good and bad re-ports from Nome, but upon arrival 3 o'clock yesterday afternoon, and was for these.

3 o'clock yesterday afternoon, and was continuing his testimony today. His without any definite idea of what they information is of an expert nature, and were going to do or how they were go-is very much similar to that given by ing to do it. They went out to search is very much similar to that given by the to do it. They went out to search for gold, and because they didn't see it scattered around on top of the ground and the quantity and quality of ore in the different veins. quality of ore in the different veins. The length of time being consumed, and that is likely to elapse ere the case is concluded, is almost appalling to those interested. the length of time being consumed, and that is likely to elapse ere the case is concluded, is almost appalling to those interested. the length of time being consumed, and that is likely to elapse ere the case is concluded. Is almost appalling to those interested. the length of time being consumed, and the length of time being consumed and the length of neans to sustain themselves during the period of search for the precious metal.

and these were disappointed. "Now, I know the country is a good one, and I confidently assert that it is the most wonderful gold mining country Today was one of the biggest days exever discovered since the world beperienced on the mining exchange this year. Trading was very lively and the gan, bulls and bears consequently happy. "I For the amount of business done the I fir

I have reason to know this. When I first went to Seattle, I organized the Pacific Abstract Title and Trust company, with offices at Seattle and agen-cies in Alaska, having in special view the collation of information regarding Alaska mines and mining claims. So Alaska mines and mining claims. So thoroughly and rapidly was the busi-ness done that a complete history of every claim in the country to date is now in possession of the company. In the process of securing this informa-tion. I necessarily had to travel all over the country, and I want to say that the enormous quantities of gold being pro-duced were simply astonishing. And duced were simply astonishing. And the gold is not in one district or on one river or creek, but it is every-where, absolutely covering the entire country. Every river and tributary and every little creek has gold in it,

and if a man has pluck and energy and sufficient means to enable him to spend enough time in the search he cannot possibly fail.

"One old gentleman who was in Cali-fornia during the hight of the gold ex-citment there says that California, even 5.36 in its paimiest days, was not to be compared with the Nome country for gold 278 production "I know of plenty of men who have simply done enough work on their claims to hold them and in doing this-2.14 assessment work they have taken out from one to five thousand dollars in gold. Most of the miners come in from their claims to Nome for the winter 25% and I don't know of one that didn't bring with him gdld dust and nuggets 1% to the value of from one to ten thousand dollars. "During this year it is estimated that six million dollars in gold has been pro-duced in the Nome country. The banks have record of five millions and it is 4.07 calculated that another million has found its way out without record. I feel 42 371⁄2 confident that next year from ten to fifteen millions will be taken out, and that in the year after the amount will be anywhere from twenty-five to fifty 554

Election is over and Thankagiving will soon be here, then comes Christmas, something up all the time, but we are still putting up the old reliable Three Crown Baking Powder; also pure Nome country, after a summer's stay spices and fine flavoring extracts; they there, and signifies his intention to re- will save you money in price and give turn there next spring. surface the metallic glint of the native

Copper. The ore body exposed is eight feet wide, but there is yet no sign of walls, The same vein was uncovered sixteen The same vein was uncovered sixteen feet some time ago by the former own-ers, with no walls in 'gat. There is no windlass work about the Rambler, which is provided with engine, hoist and all the machinery necessary for rapid and efficient development. The camp, too, is complete with engine house, shaft house, bunk house, etc., so that do more with the with read as comthat the men will be wintered as com-fortable as they could be anywhere.

Elected Directors,

Provo, Nov. 24.—The stockholders of the Annie Mining company held their annual meeting in this city yesterday. The following directors were elected for the ensuing year: A. McCurtain. E. L. Jones, Jesse M. Smith, H. F. Thomas and Nessle Crouse. The expenditure of \$500 was authorized; this amount will be used to sink the shaft, which is now \$500 was authorized; this amount will be used to sink the shaft, which is now down 450 feet, 50 feet further. It was also decided to commence proceedings necessary to obtain a patent for the claims owned by the company consists of five mining claims situated in the of five mining claims situated in the Mercur district. Considerable develop-ment work has been done, and the stockholders believe they have a prop-

erty which will become valuable when more extensively developed. The directors organized with the fol-lowing officers: President, A. McCur-tain; vice president, E. L. Jones; secre-tary, Mrs. Etta Smith; treasurer, Mrs. Hannah A. Jones.

Peculiar Notice.

A claim notice in the Grand Encampment district is said to mead like this: "We found it, and we claim it by the right of founding it. It's our'n. It's 750 feet in every direction except south west and northeast, and there is 300 feet on each side of this writin'. It's called the Bay Horse, and we claim even the ber, which fell 1%, and the steel stocks. Some railroad stocks showed sharp spurs, and we don't want nobody jump-ing on this Bay Horse-that's what's these trees is around here for, and we've got the same piece of rope that gains while others which opened lower rallied quickly. Northern Pacific was conspicuous with an opening rise of 14 on buying of large blocks, but it fell we had down in old Missouri."

in Little Cottonwood, binding them-selves to pay \$36,000 for the property within eighteen months.

TTG NUTE STATES DESERET EVENING NEWS: SATURDAY, NOVEMBER 24, 1900.

> Jesse Knight contemplates closing down the Black Jack for the winter. Much money has been spent in devel-opment work, and Mr. Knight feels that a further outlay is unjustified.

A new vein is reported to have been or hew year is reported to have been struck on the 190-foot level of the Ophir mine at Stateline. The streak runs well in gold, but the extent of the ore body is as yet unknown.

Tintic Miner: A. Lochwitz came rown from Salt Lake Sunday to attend to the assessment work on his Maga-sine claim which lies northwest of the

St. George Falcon: Work at the Apex inine is being pushed as rapidly as cir-cumstances will permit. The ore is re-ported as becoming richer as the mine personal in derived is record sources are increases in depth. Several wagons are kept busy hauling ore.

St. George Falcon: T. W. Jennings stopped here on his return to Salt Lake City from the Grand Guleh mine. Work City from the Grand Guleh mine. Work in the mine is progressing rapidly, there being twenty-five men at work. The two hundred foot level has been reached and is being opened up. Besides sink-ing the shaft about 1,200 feet of tunnel-ing has been done, mainly at the 100-foot level. It is estimated that it will take two years to work out that level. Moab Times: A. M. Paul of Salt Lake City is in town this week to look over the copper prospects in this section with a view to locating an extracting plant operated on a process lately invented. He is associated with H. C. Edwards and others of Salt Lake City. He was here about a vear sec and shipped out here about a year ago and shipped out about 1,200 pounds of the copper ore from this section to use in experimentng with the process and finds it as well adapted to it.

adapted to it. San Francisco Post: Much excite-ment has been created lately in the French Gulch district. Shasia county, over a strike in the Shafter mine. From a twelve-inch vein in that property, ore is being taken which fairly glitters with gold. Some of it goes as high as \$1 a pound. The lowest assay yet received is \$250 a ton. Speci-men pieces from the ledge, as large as a wainut, show more gold than quartz. The fortunate lessees expect to realize at least \$75,000 from their find. at least \$75,000 from their find.

The Boston News Bureau says it seems to be thoroughly understood that the Guggenheims will receive \$35,000,000 of new smelter stock for their property, equally divided between preferred and common. It is likely that the capital-ization of the Smelting company will be made around \$100,000,000. This would itill leave in the treasury of the com-oany \$5,100,000 each of common and pre-ferred, yet to be issued. In proportion to capitalization, the net income from the Guggenheim properties will be larger than from the existing concerns belonging to the smelting company.

BUSINESS NOTES.

The organization of the railroad to Los Angeles during the week has had an excellent effect in business circles, and the general feeling among commercial men, now that Salt Lake's dream of years is about to be realized may be said to be best reflected by the word "jubilant". Added to this is the likelihood that the Burlington road will come in from the east before the new outlet to the west is completed. With two such factors there can be but little question regarding the imme-diate future of business in Salt Lake

and Utah generally. The local stock market shows new strength, the main move-ment being in Utah sugar which has advanced \$1.00 a share since last Saturday. Broker Cutler's circular issued yesterday says the rapid advance in the price of this stock is one of the surprising features of the week and that it looks as though the stock would New York, Nov. 24.—There was some pressure to sell at the opening of the stock market which was most marked Clark Eldredge all pay dividends next nth, which will have a stiffening ef fect on their quotations The following are the latest records:

Smelter Combine.

J. B. Grant, vice president of the Omaha and Grant Smelting and Refin-ing company of Denver, and also chair-man of the operating committee of the trust, speaking of the consolidation of the American Smelting and Refining company and the Guggenheims, says: "I know nothing of the details of the deal and any information relative to the terms of the consolidation on my part would be purely a matter of specu-

"It will be within the power of the company to increase the price of silver. It will have no effect on the run-ning of the Globe and Grant smelters. They will continue operations just as heretofore. I cannot say anything in re-gard to the election of officers. If the deal is based on a consolidation instead of a purchase, as I understand it is, the officers of the new corporation will probably be elected at the meeting held next month.

Dewey Consolidated.

Articles of incorporation of the Dewey Consolidated Copper & Gold Mining company were filed today with the sec-retary of State. The property belong-ing to the company is situated in Bing-The incorporators are Sig. Siham. mon, president: Evie Branting, secre-tary, M. N. Buck, I. E. Wilson, Matt. Collinson, Jr. Sam Dowse and A. L. Morris.

"Wages there are good, eight dollars a day and board being the amount usually paid, and in the outlying districts as high as fifteen dollars are paid.

"People need not fear that all the gold has been taken out, because the mining will be good for many years to come. I am perfectly satisfied with it and shall return there in the spring. It is just the country for a young man of

pluck and intelligence.

EXCITEMENT AT KEYSTONE.

Rich Copper Strike in Rambler Making a Stir in Wyoming.

A. T. Holmes of the Rambler mine, situated about fifty miles west of Lara-mie, Wyoming, has secured from Den-ver a pump which is being placed in the time. The excitement at Keystone following the strike last Thursday of 5200 copper ore, was very great, and in the succeeding twenty-four hours 102 claims were staked out, since increased to 120. The Rambler is about three miles further up Douglass creek than the Keystone, and a mile above the Albany. A couple of months ago the mine passed into the hands of the Rambler Copper company, composed of Dr. A. B. Hamil-ton, A. T. Holmes and Charles Kuster,

The shaft had at that time reached a depth of about sixty feet, says the Laramie Boomerang. The new owners took it up at a depth of forty feet and

took it up at a depth of forty feet and leaving the shaft at an incline sunk it to a total depth of about eighty feet. In sixty feet the number of ore changes was probably never equalled by any other property in Wyoming. The seventh variety of ore encountered was a carbonate rich in copper, after which it went into oxide and finally into me-table concer. The rest of the ores are to St. Louis. Manager Walter Filer is up from the Annie Laurie. The second payment has been made on the Concord mine, Sumpter, Oregon, ic copper. The rest of the ores are carbonates and Mr. Kuster says Park City has more snow now than at a similar time for a number of years. there is not one but what carries a good percentage of copper. Mr. Kuster, A mill and concentrating plant are to who has watched the progress of events at the mine very closely and made many assays, unhesitatingly says the ore they are now in will run \$200 to the ton. The only question is, "Will it hold out" and he believes, now that be erected in the Olinghouse district, Nevada.

D. H. Peery, Jr., has purchased 150 shares of Silver King stock at 170 per share they have got to the copper itself, it Wm H. Craigue, mining engineeer of olorado, has determined to make Salt

Godiva.

Lake his home.

For the last six weeks the company has been working from seventeen to twenty men, in three shifts, and prog-ress has been rapid. It is not necessary Frank R. McNamee, who has been here on business since yesterday morn-ing, left today for Carson City, Nev. to shoot this ore it is so soft it can be picked out and as easily crumbled be-tween one's fingers. No matter how often broken, there gleams from every W. F. Snyder and Harry Spence have secured an option on the Homestake Dyspepsia.

"Like Father, Like Child," Man is the sum of his ancestors." Eruptions. "An eruption all If parents wish healthy children, let them see that they themselves have "I had dyspepover my body pure, rich, strong blood. No taint of scrofula, no insidious malady, no sia in its wor caused a burning larking microbes or germs to be a curse to posterity. Purify the blood, form and tried sensation so I could Hood's Sarsaparilla is the guardian of infants yet unborn. Buy it today, but found no reuntil I took not sleep nights.
