Judge O. W. Powers, the party's nomince for Congress, and Hon, James M. National Committeeman D. H. Peery called the meeting to order and introduced the chairman of the evening. Hon. John T. ## MR. BRINSON TALKS.

Mr. Brinson was then introduced and, in a 20-minute speech, declaimed strong-ly against the Republican administration and greatly pleased the audience with the stories related to illustrate his arguments. In opening he paid a high tribute to Judge Powers and Hon, B. H. Roberts, and said that he feit highly honored that he should be in-vited to speak from the same platform as such eloquent orators as they. In referring to the tariff he said that resident Roosevelt was a rank free inder 10 years ago and denounced the ariff as a robbery, and hence the Republicans could not talk about incon-sistency. The relations of the trusts and tariff with the Republican party, he said, reminded him of an experience he had at his former home in North Carolina when a boy. He went out fishing and caught a large shark. After calling some assistance he succeeded in landing it, but he was then puzzled about what to do with it, until some one suggested that he cut it up. He took an axe and cut off a piece of the tail, then a piece of the head, and then asseral other sections, after which he turned to put the axe away. When he looked around again he discovered When to his amazement that the head had

The Republican administration, he declared, had gone out gunning after the trusts but it had taken particular pains to aim high so as not to hit them for the simple reason that it did not want to hit them, and its efforts in that concurrent user all burnerities. The that respect were all hypocritical. The Republican nominee for Congress from Utah he said imagined that he was the largest thing in the state. He was re-minded of a fable which he thought fit the case pretty well. A young frog had seen an ox in the road and he told his grandpa frog that he had seen someirandpa frog then blew himself up and the fact that he was larger than the as. the people, certainly entitled to the support of all the Democrats of the state of Utah. (Cheers.) DEMOCRATIC ACHIEVEMENTS

"As you know, the Republicans are claiming at the present time that these candidates have no chance of election. They are the greatest people on earth to claim things. They claim the earth and all the fullness thereof. And they claim that the Democratic party has never done anything for the people and that all that has been accomplished for this great republic has been accom-plished by this Republican administra-tion, and they defaulty say at times that there is nothing that could be claimed by the Democrats that was ever of any benefit to the people of this country. They must think that the people of the United States have short people of the United Birtes have short memories, for the servants of the Dem-ocratic party have done their full share in the upbuilding of this republic. If you were to wipe from the history of the past all that has been done by the Dem-ocrats, you would wipe out one-half of the history scintillate with the illustrious achievements and the useful services of the Demogratic party. Take the hisof the Democratic party. Take the his tory of the Spanish war, of which the talk so much. They remind me of the boasting old man who killed bruin. When the story was told in fact, it ap-peared that the old man, when the bear came stalking into the house, ran un-der the bed while his wife took an axe and split the bear's head open, and then he went down town and claimed that he killed the bear. When our victor ious fleet entered Manila bay, its rival at the bottom of the sea, that fleet was

commanded by a great Democratic ad-miral, Admiral Dewey; and my recol-lection is that when the news came of that other victory in Santiago, that the officer that commanded that victorious fleet was Admiral Schley, a Democrat also, and when our troops landed victorious on Porto Rico they were com-manded by that great Democratic gen-eral, Gen. Miles. In all the wars we have had, the Democratic soldier has marched shoulder to shoulder with the Republican soldier. Democracy han done its full part for the people of this country.

GAVE US LOUISIANA PURCHASE.

"I stood not very long ago upon the banks of the Mississippi river, where are displayed the wonders of the world, and contemplated the fact that that world's fair is in commemoration of the acquisition of the great Louisiana purchase, comprising so large a part of our continent and nation's development, acquired to this country by a Democratic administration, a Democratic president,

d) but the Republicans did not expend a dollar of that money, thing towards carrying the idea into actual service. Cleveland went into office and during the first two years of his term nothing was done; but in 1836.7, was established the first rural delivery route, in one of the counties of North Carolina, and from that on until it increased to \$4 routes, and from that grew the system now established in this country. It was put into ac-tion upon the motion of a Democratic congressman, and carried into effect by a postmaster general under a Democratic administration.

THE IRRIGATION LAW.

"They talk so much too about the Republicans giving us the irrigation law, but I want to call your attention to the fact that they have no more right o claim that law than they have to claim credit for giving us the free de-livery system. I want to say, however, that neither party ought to claim the credit for that law, There is such a thing as fairness in politics. There such a thing as conceding something to those whom you are opposed to in polltics. In 1900 our representatives de-clared in favor of some kind of a law for the arid lands of the west, and at that time both parties incorporated it into their platform. President McKin-ley, however, said nothing about it in his message to Congress, and in January, 1901, there was introduced in the house of representatives the bill that afterwards became the irrigation law. That bill was introduced by Congressman Newlands of Nevada. That bill was wrought out in a Democratic mind,

was the result of Democratic fort. More than that, when it was introduced in the house of representa-tives, it was advocated by all the Dem-ocrats. Among those who spoke in its behalf was our distinguished and bril-liant representative, William H. King. It did not then pass, but it was opposed by such men as Attorney-General Emmett, then a member of Congress, by Mr. Hopkins, by Joe Cannon, the speaker of the house of representatives, and lately the president of the Repub-lican national convention, and by others besides. The next fall, Mr. Roosevelt was president, and In his message he advocated the passage of an irrigation aw, but he advocated nothing new. He had the good sense to advocate the Democratic measure, and Mr. Newlands re-introduced it, and it was finally 59 Republicans voted in favor of the law; 42 Republicans and 13 Democrats voted against the law, so that more Re-publicans voted against the law than Democrats. It passed the hous of rep. resentatives, went to the senate, passed with virtual unanimity, went to the president and he signed it.

After a protracted declamation against the present tariff schedule Judge Powers said: 'So if I go to the Congress of the United States, and I have an opportunity to vote for tariff reform I shall vote in the interests of the people of our own land; and I shall insist, too, that it is possible to secur some benefits of this blessed tariff to the people of Utah, if there are any benefits that the people of Utah shall

To say the least it appears very poor taste to introduce a one sided view of any disputed subject in our public schools. The public pays for the schools, pays the officers, and pays for all concerned, and it certainly has the right to demand that no one-sided teachings either in religion, politics or edicine be allowed.
