schoolchildren, and to say that it was appreciated would not express it strongly enough. After listening to the lecture accompanied with the rich and numerous views, together with the moving pictures, the listener is filled with but one thought, "I never before realized its beauties."

A FABLE.

Once upon a time there lived in the valley of Salt Lake a little community of Tailors. But the younger generation did not take kindly to the steady habits of their ancestors. They, therefore betook themselves to other vocations, which brought them into contact with the world, and caused them to become interested in athletic sports, especially that of basketball. They grew and waxed strong (in their minds) in this manly sport, until they became lifted up in the pride of their own strength. A challenge was sent out to all comers in all the country round about, which was quickly accepted by the boys from Salt Lake, Fire and Smoke. Upon two occasions arrangements were made for a mortal combat, but alas! for the Tailors, they either did not appear, or came clad in their coats of dikes and their current of St. George, and Zedek K. Judd of Kanab. These four, with Pres. George F. Whitehead, Bishop Jas. Andrus and John E. Pace of the West ward, were the spectators.

BLACKFOOT, IDAHO.

POWER PLANT INJURED

By Fire Which Broke Out Friday Afternoon.

Special Correspondence. Blackfoot, Idaho, October 19.—The electric powerhouse at Blackfoot took fire at 5:30 p. m. today and before the fire department could arrive, the fire had spread to the machinery. The local fire department was soon on the ground, after the alarm was given, and no particular damage was done to the building. The citizens will be compelled to go back to the use of lamps until the damage can be repaired.

It has only been a few months since the powerhouse here was completely destroyed by fire and the company was only in temporary quarters at this time.

ENGLISH RIFLES TESTED.

According to a writer in a London weekly, every rifle made at the British government works is tested before it goes into service, as regards its accuracy. Each must put five consecutive shots within a rectangle of 1 inch by 14 inches at a distance of 100 feet. Otherwise, however, it is a "wide" shot, the bullet striking one-half inch out, though it is certain that the variations in the powder were quite insufficient to account for so large an error. Another curious point is that the accuracy and regularity of the rifle at 100 feet is in no way proportional to its accuracy at 500 or 1,000 yards.

A PINLESS PEOPLE.

A member of the Chinese legation, clad in splendid, pale-mud silks, stood before the Casino at Newport. "Pins," he said, "cause untidy habits. We have no pins in China."

"The right way to fasten things is with buttons and buttons, or with loops and frogs. To fasten things with pins is to make use of an untidy makeshift. To employ pins is to become lazy and slovenly."

"We have no pins in China. Certain foreign manufacturers shipped millions of them to us in the past, but we sent them back. We had no use for them. We were too neat."

SOME BUSINESS Men Are Too "Conservative."

If a farmer concluded not to plant seed, but to "conserve" it, because crops sometimes fail, he would be as wise as the merchant who "conserves" the money which should be invested in publicity, because he has it in bank, and because he fears that publicity may not be completely profitable.
