

Business closed on the mining exchange today with the sale of 16,705 ing company met today and declared a shares for \$9,996.15. The sales for the dividend of \$45,000, or 30 cents per share. five business days of the week amount payable on the 15th inst. The books to \$3,730 shares, representing a seiling value of \$67,830.82. The principal stocks traded in were Con, Mercur, Daly-West, Lower Mammoth, May Day, Sunshine, Grand Central and Star Con. A good the year. Last year the company paid deal of activity was shown by the above \$487,500, with an extra dividend of stocks at good prices. Con. Mercur has \$37,500, but at the above rate it will partially recovered from its recent distribute \$520,000 this year. The inshrinkage. On Monday last it stood crease in the dividend was not unexaround \$3.08, but the stock has since pected, as the matter has been inforbeen traded in as high as \$3.50 per share. Sunshine has changed materialshare. ly owing to prospects of a sale being made. On Monday it was offered at 20 with 11 bid, but it has since jumped to 41. It was a little weaker today, rang-ing from 38% on the opening sale to and from seen on the opening one to 34½ at the close. A material increase is recorded in the price of Lower Mann-moth this week. It opened at \$1,45%, and after fluctuating, it has touched the \$2 mark. It was held at that figure to-day with \$1,47 bid. Grand Central has been emity action at lower figures. The been quite active at lower figures. The stock was traded in as low as \$6.20 on Monday, but a stiffening up has since occurred and sales were recorded today as high as \$6.50. It weakened to \$6.44 on the closing sale. A strinkage is seen in Max Day this wask. On Monday the left the mine in May Day this week. On Monday the stock sold at 421₂, but it opened today at 38<u>1</u>₂, and declined to 371₂ on the closing sale. Eagle and Elue Bell has shown some activity this week at im-proved prices. Sales have been made as high as \$2%, though no change is expected at the mine. Star Con, has not changed materially, but Daty-West is guite strong today with \$27,75 bid and \$28 asked. One sale was reported this week as high as \$28. Mammoth was a little firmer today as was Ajax, for which 53½ was bid. Northern Light moved up several points this week. On Monday it was held at 3, but sales have since been made as high as 4%. Martha Washington has also gained about 1 cent per share during the week. The closing quotations were as fol-tows:

close on the 19th. The above dividend represents an in crease of \$7,509 per month, which will doubtless be adhered to throughout mally discussed for several weeks past At the meeting today the proposition to sink another shaft was discussed, but on the recommendation of Superintendent Kirby, who was present, the management will increase the station tenders and so augment the output for the time being. "It will only be a short, time, however," said Manager Bam-berger today, "before another shaft will be in use." Mr. Kirby reports the winze be in use." Mr. Kirby reports the winze down 60 feet below the 1,490 the bottom of which is in very nice ore. Samples of line looking oxidized are were brought down by McKirby, from a change which occurred just before he tori the weight

SUNSHINE SALE.

Requires the Payment of the Sum of \$300,000 Approximately.

A few particulars regarding the proposed sale of the Sunshine are given out, which show the purchase price to be around \$300,000. The exact figure has not been announced, the "News" learned today, but the above figure is said to be near the mark. Enough was learned today to show that the proposition will be very favorable for the shareholders if carried out as proosed. Of course, everything depends in the district court at Tooele granting a decree of sale, but no trouble is anticipated in that or any other way. The contract, it is learned from abso-lutely reliable sources, provides that the new owners shall take charge of the report, the property as soon as permission granted by the court, and employ n sranted by the court, and employ not less than ten men constantly. Within four months from the time the prop-erty is turned over to Davis D. Hoag, of Kansas City, a mill having a daily ca. pacity of 200 tons per day, must be built and operated, the proceeds to be paid to the shareholders. It is antici-pated that the purchasers will avail themselves of a discount of 10 per cent to be allowed if the purchase price is paid before six months. In case the quantity of ore milled runs below 200 tons per day, the purchasers loss their

ountries showing an increase In 1960 the United States took the lead g the gold-producing countries, \$78,658,755; Australasia ranking d, with \$75,283,215. The large prowith duction of the Klondike has put Canada in the third place, with a total output of \$26,000,600, while Russia was fourth, with \$23,090,802. These four countries produced over \$0 per cent, of the gold of the world. The total amount of lividends paid 210 companies ailled with the mineral industries of the United States in 1900 was \$120,954,000. This large disbursement places mining among the most profitable of the coun-try's industries. The metal mines paid \$51,502,000, or \$9.3 per cent of the jotal, and the industrial and the industrial company \$79,439,000. r 60.7 per cent. Among the leading payers were the copper companies, the gold and silver mines, \$13,907,000, and

the petroleum companies with \$48,816,000. Last Chance Option,

The Bingham Bulletin says that Siuart Croasdale, manager for the Chicago arties who recently secured an option on the Last Chance group of mines and mill, is expected to return to camp to day to inspect work in progress and remain here for the present. A force has been operating in British tunnel since the 20th of December, under terms of the option to drive 250 feet. At pres. ent tunnel face there is a nice showing of ore, and Manager Croasdhle will no

tons per day, the purchasers lose their right to the 10 per cent discount and New developments are being planned subject themselves to forfeiture of all for the Shawmut, and the management is cheered by the prospect that there

Men's Minds Were Prepared for Marvely - Paradise for Professionals -Price Movement Very Wild.

New York, Jan. 5 .- Trading on the New York stock exchange this morning started off at a pace never before equaled and for the first hour the volume of business transacted eclipsed all records, Buying orders came in from every quarter and the facilities of the stock exchange were wholly unequal to the performance of all the business demanded of it,

The atmosphere in the neighborhood of the exchange was charged with an excited spirit and men's minds were prepared for marvels and were open to almost any exaggeration in the way of prophecy for the future. It was apparent from the frothy effervescenc of prices at the opening that heavy or ders had been placed in various stocks to buy at the market, without any reservation as to the price. Such a market offered a paradise to the pro-fessional manipulator and enabled him to make opening prices at an impossi-ble level. Many professional operators to make opening prices at an impossi-ble level. Many professional operators who had been unlimited buyers in yes-terday's upward surge of prices, came down town this morning with an easy sense that they had been reckless. But the opening changed their minis and they unloaded at handsome profits. The price movement was very wild, some of the railroad stocks which are usually most stable, shooting upwards like rockets, only to fall back. Rail-roads in which the capitallists, credited with the St. Paul deal, have any in-

with the St. Paul deal, have any in-terest or connection, were especially erratic, in the prevalent belief that fur-ther enormous consolidations of railroad interests are contemplated. This would take in important railroads amongst the coalers, truth lines and Pacifics. Accordingly there was vio-lent speculation in the Readings, Erle, St. Paul, Northern Pacific and the Gratgers, Missouri Pacific and other stocks. Opening gains among these ran from 2 to over 5 points.

ing the sale

81.50.

These bulges at the opening were no more astonishing than the headlong rush to sell stocks at the high level, in which variations of half to one point between which variations of half to one point In which variations of half to one point between sules quickly followed each other to the extent of several points. This represented the eager efforts of the purely speculative element to skim the cream off the seductive profits repre-sented by the volatile rise of yesterday and this morning. The consequence was some quick reactions, running from two to nearly five points, the latter in wo to nearly five points, the latter in ie Readings.

The evidence of the instability of the market and the reckless character of the speculation did not have an imme-diate effect but by the second hour, the market had quieted down considerably and was much less erratic; Sugar, Tennessee Coal and the Rubber stocks were weak and affected the general list. Some of the railroad stocks, including St. Paul, lost all their gains. There were renewed advances in the Read-ings. Eries and some other stocks, with

the purpose of sustaining the market, but realizing continued heavy and

orices fell again lower than before. The disposition to take profits in-reased during the second hour, ow-ng to the feeling of insecurity caused y the instability of prices. The eager-ess to sell became almost as marked ness to sell became almost as marked as the urgent buying demand at first and prices very generally forced below last, night. The violent fluctuations in prices were accompanied by great ex-citement. The day's business was a record-breaker for Saturday, 1.167,000 shares having changed hands. Only once before in the history of the ex-change have the solar for Saturday. Eine Good Heavy Socks, worth

shares. Sales of the Reading stock, were 94,000 shares of the first preferred

John A. Kirby Speaks of His Visit to the Lower Mammoth.

Superintendent John A. Kirby of the Daly-West returned last evening from a visit to the Lower Mammoth, with 6.44 yard. which he was agreeably surprised. In Mr. Kirby's opinion there is very indi-cation of a big ore body of good ship-ping quality. If it extends another 20 314 feet, Mr, Kirby believes, the stock is good for \$4 per share. As it is, it is said to be better worth \$2 today than it was worth 50 cents two months ago. No doubt is expressed by Mr, Kirby re-garding the value of the ore. $2.00 \\ 2.16$ 37%

Returns were received last evening from three samples selected by J. D. Wood, who was at the mine on J. F. Wednesday. The three assays showed 124 123 and 444 outfices silver per ton respectively.

95% WORLD'S METAL PRODUCTION.

The Engineering and Mining Journal Gives a Summary for 1900.

New York, Jan. 5 .- The Engineering and Mining Journal today gives a summary of the mineral and metal produc-tion of the United States for the year 1900. This summary has been compiled from advanced figures furnished by pro-ducers and from official sources, and gives a complete statement of the gold production of the world for the year production of the world for the year just closed. The total value of the met-als produced in the United States in 1900 was \$509,800,992, as compared with \$946,057,320 in 1899. The value of the Argent mill running smoothly again. autput of non-metallie substances was

\$755,680,991, as against \$645,754,305 in in 1899. The total value for the two years, after allowing for duplications, was, respectively, \$1,157,162,182, and \$1,-049,230,594. The more important items of this production in metals were gold, valued at \$78,655,766; sliver, valued at \$37,685,248; 615,756,802 pounds of copper, valued at \$22,005,645, 231,781 tens of lead, valued at \$20,05,655,122,850 tens of lead, valued at \$10,786,230, and least, but not least,13,914,505 tens of pin from reference in the tens of the second least,13,914,505 tons of pig fron, valued at \$238,078,787. Of the non-metallic products by far

the most important was coal, of which the United States produced no less than 274,847,779 tons: the greatest quantity ever produced in one year by this or any other country. In 1899 the United States was the largest producer of coal in the world, and this pre-eminence was reased in 1900.

Other important products of this class included cement, of which 187,728,698 barrels were made: salt copper sulphate, mineral paints, phosphate rock and slate, while the minor mineral prod-

icts included a variety too numerous to The total gold production of the world in 1900 amounted to \$256 462,438, which compares with \$313.611.734 in 1899, the de. crease being entirely owing to the stop. page of gold production in the Transvaal by the war, nearly all other pro-10@12c
