MINING, BUSINESS AND STOCKS.

STOCKS WERE IN GOOD TONE

Lower Mammoth Came Forward With a Sensation.

DID RAPID CLIMBING ACT.

Advanced 21 Cents During This Forenoon's Call—Manipulation Said to Be the Cause—Quotations.

Notwithstanding the fact that the day opened with the white metal quoted down; mining stocks were in somewhat better tone on the exchange this forenoon. Lower Mammoth created some more excitement for the talent, and again took a decided turn upward. The advance during the morning call was so marked that, of the closing price were to be maintained, it would make a difference of over $30,000 in the value of this Tintic mine. The rise is attributed purely to manipulation. The stock began selling at 1.34 and on the open board as much as 1.55 per share was paid for it. Daly-Judge was in slightly better tone. Daly-West opened firm, but the [illegible] of the market in the east, the news of which reached the pit before the stock was passed, had a tendency to depress. Star Con., was started off at yesterday's closing figures and gained strength as the call progressed. Con. Mercur continues unchanged. Martha Washington closed higher, while May Day remained steady.

The quotations and sales posted were as follows:

JACKLING IS HERE.

Negotiations Re-opened With Col Wall for Bingham Ground.

Negotiations have been opened again with Col. E. A. Wall for the purchase of his interest in the De Lamar-Wall group at Bingham. The colonel admitted this much to a representative of the "News" today. Shortly afterward he was closeted with D. C. Jackling, the Colorado manager of the United States Smelting & Reduction Co., who arrived in the city this forenoon.

Mr. Jackling was instructed to come here, it is learned, to present a proposition to Col. Wall, and if agreeable terms are reached to close up the bargain. In this there is every indication he will succeed and it is not improbable that a final understanding will be reached during the day.

The Colorado syndicate has already bargained for the one-fourth interest held by Capt. DeLamar. This was accomplished in New York after a long series of conferences with the captain, who is now nearing the shores of France, if he has not already arrived here.

To-day's Metals:

SILVER, Bar, 53 cents

LEAD, $3.75.

CASTING COPPER, 14 cents a lb.

UNCLE SAM ANNUAL MEET

Board of Directors Will be Chosen Next Monday.

MATTER OF MILL BUILDING

Sufficient Supply of Water Must be Secured Before Work Can Commence—Negotiations Pending.

The stockholders of the Uncle Sam Mining Co. will meet in annual session next Monday afternoon at 4 o'clock, at which time a new board of directors will be chosen.

The matter of the construction of the proposed new mill will probably be presented to those present.

The construction of this plant was decided upon at a recent meeting of the directors. But there is a matter of vital importance which must be attended to before any active steps can be taken and that is the securing of a sufficient supply of water. It was thought at one time that there would be no trouble about this. And there may not be, but a certain amount of red tape must be gone through with. Negotiations are pending, with the Bullion-Beck and Champion.

When the water problem is once settled the mill will be built.

The Uncle Sam company is in condition financially to go ahead with it, having in its treasury about $12,000 in cash.

LA REINE STOCKHOLDERS.

Are Scheduled to Hold a Meeting This Afternoon.

The stockholders of the La Reine Mining company are scheduled to hold a special meeting at 4 o'clock this afternoon at which time a new board of directors will be elected. The matter of resuming development work at that Tintic property will also come up for consideration. It is quite probable that something will be done to place the La Reine among the list of active mines again.

MUNSEY CREEK MINES.

Nevada Property Soon to be the Scene of Much Activity.

Ricketts & Banks of New York made their second payment last week through their Salt Lake associates, W. E. Edwards and Goslen, on the Munsey creek group at Munsey creek, Nev., last week, says the Cherry Creek Miner. The total purchase price was $100,000 on the 34 properties. The former owners were M. E. Bassett, N. C. Noe and Mrs. C. Cameron. On the return of Supt. McCaffery from New York, building will be comenced for the development of the mines.

AT THE YAMPA SMELTER.

Connections Made With Upper and Lower Mine Workings.

Supt. W. J. Craig telephoned in from Bingham yesterday that he had made connection with the upper and lower workings of the Yampa mine. This is a most important bit of work, for it exposes an unbroken ore body from the surface along the dip of the vein down to the Craig tunnel level, a distance of 1,789 feet. The connection was made at a point about 3,000 feet from the mouth of the tunnel, in which ore is exposed almost the entire distance. The vein is about 14 feet wide on an average and officers of the company say that it will run close to 6 per cent copper.

HOLDEN GOES EAST.

Four of the Furnaces at Smelter in Commission Again.

Managing Director A. F. Holden of the United States Mining company, departed for the east last night. Before leaving four out of the battery of five furnaces were in operation at the company's smelter at Bingham Junction. Supt. C. E. Allen had also sent orders to Tintic to put the men back to work in the Centennial-Eureka mine, where work had been suspended pending the throwing out of the automatic feeders at the smelter which, after a thorough trial given them, have proven unsatisfactory.

The mechanism of the United States plant has not been entirely satisfactory from the very beginning much to the disappointment of those in charge. There is always more or less trouble experienced with new plants of this kind, but the United States folks have had their share of it which also extended to the new aerial tramway. But the management has made strenuous efforts to overcome these difficulties. It is believed that it has at last succeeded and that things will move along more smoothly in the future. It certainly is to be hoped so.

FROM SPRUCE MOUNTAIN.

Robert Hartley of Monarch Mine, Speaks of Nevada Camp.

Robert Hartley, owner of the Monarch mine of Spruce Mountain district, Nev., has arrived in the city and expects to remain for a week or more. The Monarch mine is a silver-lead producer, and is a frequent shipper to the Salt Lake markets. A contract has been entered into with the American Smelting and Refining company, which does not expire until 1905. The ores of the monarch are of a good grade, and the kind that has been coming to the valley plants lately carries values ranging from 30 to 40 per cent lead and from 40 to 75 ounces silver.

The visitor states that the Spruce Mountain district is steadily on the improve. As an evidence of the increased prosperity in that region the freighters have tacked on an additional $1 per 1,000 pounds for all traffic handled by them. The new tariff applies not only to supplies of all sorts, but to ores as well. Mr. Hartley, however, has not felt disposed to meet these rates and pending a satisfactory adjustment, has closed down operations for the present at his property.

Preparations are going ahead, Mr. Hartley states, for the blowing in of the smelter erected last year by C. M. Spence and others. The plant is equipped to handle an average of 25 tons of ore daily.

The Latham mine, of which George L. Moats, of this city is manager, he states, is the scene of considerable activity. A good force of men is at work in the mine. The machinery for the new mill to be erected there is expected to arrive almost any day.

COLUMBIA'S NEW MILLING PLANT

Good Progress Being Made With The Plans.

TO BE THOROUGHLY MODERN

Equipment Will be the Very Best—Provision Made for Future Enlargement.

Good progress is being made with the plans for the concentrating plant to be erected shortly at the Bingham property of the Columbia Copper Mining company, of which Frank B. Cook is manager.

This work will be completed within the next two or three weeks, when the manager will call for bids to furnish the lumber, machinery, etc.

The proposed plant, as was stated in the "News" some time ago, will have a capacity for handling no less than 60 tons of ore daily and the arrangement will be such that additions may be made at any time without serious difficulty or any unnecessary expense. The power plant to be installed will be sufficiently strong to drive the machinery of a concentrator much larger, than the initial one will be. This provision is made with the expectation that some time, probably in the near future, the development of the mine will justify a mill of more generous proportions. The plant will be thoroughly up to date and will be equipped with all that is necessary to make it first class in every respect.

The ores of the Columbia are a chalcopyrite accompanied by some chalcocite, the principal values being copper.

MINING CONCENTRATES.

Colonel Dorsey will send out two or three loads of mining supplies this morning to Pearl and will begin work on the Blue Bucket property tomorrow.—Boise Statesman.

Fred Butler, former superintendent of the Chainman mine at Ely, Nev., has accepted a similar position with the Utah & Eastern Copper Co., near St. George.

The new pumping plant at the J. I. C. mine, Park City, went into commission last Monday.

S. W. Mosby has been installed as manager of the Sheldon Mining Co., which has acquired the old Chicago mine at Bingham.

It is announced that the Daly-Judge mill at Park City will probably be ready for commission again about June 10.

H. V. Croll, of the Allis-Chalmers Co. is in Montana on business.

The bids for the construction of the new Kearns-Keith mill at Park City, will be opened next Friday. Contracts will be awarded immediately thereafter. The plant will require about 85 tons of machinery. It will have capacity for the treatment of 100 tons per day.

George H. Dern returned yesterday from a trip to Lincoln county, Nev., where he has been looking for another bonanza.

M. M. Johnson of the Newhouse mines, is expected home from New York next week.

The E. & F. Mining Co. is surveying some of its claims at Pioche, for patent.

The Atlantic & Pacific Oil company operating in Uintah county, Wyoming, is reported to have struck a large flow of oil at a depth of 870 feet. It is thought to be the best well yet encountered in that section.

Drilling for oil will soon commence on the Uintah Oil company's property. The new rig will be ready for operation by Sunday or Monday next.

Warren C. Bogue has returned from a trip to Colorado.

Ben T. Lloyd, manager of the Copper Mountain mine of Beaver county, is in Duluth.

Manager Toney Jacobson of the Columbus Con. mine of Alta is at that property. He is expected back to the city tonight.

John Hays Hammond arrived in Colorado Springs yesterday from Mexico quite seriously ill. He had been expert ing a property for the Guggenheims upon which the latter hold an option for $18,000,000.

George H. Robinson, manager of the Tintic Mining and Development company is expected home from British Columbia next Saturday.

Anthony Godbe, who has been looking over mining interests in Idaho has returned.

A car load of ore is being loaded for market at the Martha Washington mine in Tintic.

The ore and bullion settlements made late yesterday afternoon amounted to 150,000, as follows: Ores, $25,200; base bullion, $24,700; gold cyanides, $1,000.

Manager H. T. Soppington of the Park City Superior mine left for that property this morning.

There will be no call of the stock exchange until next Monday.

Senator F. J. Cannon, of Utah, one of the principal owners of the Old Imperial Mining company's rich properties in Cherry Creek camp, returned here last week from Ogden. The senator says that Utah capitalists are becoming much interested in reports of the fine properties of this camp.—Cherry Creek Miner.

W. A. Rose returned last week from Granite Mountain district, where he has been looking over copper properties and obtaining options on some of them. He brought in several rich specimens of ore from the district, as well as those recently opened up in Spruce Mountain district, north of Cherry Creek.—Cherry Creek Miner.

The shaft at the Pilot Knob copper mine at Ely, Nev., is being sunk from the 500 to the 600.

A large and commodious bunk house is being erected at the Siegel mine at Siegel, Nav. Salt Lake people are identified with this property.

Work will commence at once on the construction of a mill for the Wide West property at Cherry Creek, Nev.

A RENEWAL OF LIQUIDATION

Evidence of the Same Caused Fractional Declines.

LONDON MARKET WAS WEAK

It Increased Selling Pressure in New York—Bears Were Encouraged To Attack Prices.

New York, May 28.—There was evidence of a renewal of liquidation in the opening dealings in stocks, causing fractional declines throughout the list, the weakness of the London market increasing the selling pressure here. Rock Island was poured out on a descending price scale until it reached 34¾, a loss of 1⅝. The liquidation was apparently checked and it steadied around 35.

The character of the selling in evidence encouraged bear traders to attack prices with the purpose of dislodging vulnerable accounts. On the decline there were indications of heavy unloading by long standing pools and prices broke rapidly. Amalgamated Copper ran off 3½ points under a continuous stream of offerings and its subsidiary stock, Anaconda Mining broke 7½. Rock Island was under severe pressure and was forced down 2¾. Canadian Pacific slumped 2½, Union Pacific ran off 1⅝, Northwestern 2 and the active list generally 1 to 1½. There was a drop of 2 in Sloss-Sheffield, 2¼ in United Railway Investment preferred and 3 in United States Rubber preferred. Short covering rallied Amalgamated 1⅝, Canadian Pacific 1 and Anaconda 2. Missouri Pacific made a good recovery, but the rally generally was feverish and led to dull trading at once. Rock Island bonds were weak and the bond market generally irregular at noon.

LIVE STOCK.

CHICAGO.

Chicago, May 28.—Cattle—Receipts, 8,000. Steady. Good to prime steers, 4.95@5.40; poor to medium, 4.00@4.80; stockers and feeders, 3.00@4.75; cows, 1.50@4.60; heifers, 2.25@4.50; canners, 1.50@2.75; bulls, 2.25@3.20; calves, 2.25@6.00; Texas fed steers, 4.00@4.50.

Coffee—Quiet; No. 7 Rio, 5⅞.

CHICAGO WHEAT.

Chicago, May 28.—July wheat opened unchanged to a shade higher at 73⅝@74, and sold off to 73¼, after touching 74⅛.

The close was easier, with July ¼ lower at 73⅝@73⅜.

WOOL

ST. LOUIS.

St. Louis, May 28.—Wool—Steady and unchanged. Territory and western mediums, 16@17½; fine mediums, 14@15; fine, 13@15.

COPPER SALES WEAK.

Boston, May 28.—A pronounced weakness in copper shares was a feature of the Boston stock exchange today. The weak spot was Amalgamated Copper, some 7,000 shares of which were sold here up to noon. The stock opened at 61 and steadily declined to 58.

Tamarack declined 5 points. Copper Range 2½, Utah Mining 1¼ and other coppers were also lower in sympathy.

Large Projection on Mars.

Cambridge, Mass., May 28.—A telegram has been received at the Harvard college observatory from Prof. Percival Lowell, at Flagstaff, Ariz., stating that a large projection on Mars was found by Slipper, May 26, at 15h, 35m, Greenwich mean time. The position angle was 200 degrees, and the projection lasted 35 minutes.

BAD BLOOD

"I had trouble with my bowels which made my blood impure. My face was covered with pimples which no external remedy could remove. I tried your Cascarets and great was my joy when the pimples disappeared after a month's steady use. I have recommended them to all my friends and quite a few have found relief."
C. J. Pusch, 56 Park Ave., New York City, N. Y.

without saying something about soda water. The weather hasn't been soda water kind but the trade is pretty good, and the goods are excellent.

SCHRAMM'S

...Where the cars stop....

Constipation Will Undermine Your Health.

Mull's Grape Tonic Cures Constipation.

When the sewer of a city becomes stopped up, the refuse backs into the streets where it decays and rots, spreading disease-creating germs throughout the entire city. An epidemic of sickness follows. It is the same way when the bowels fail to work. The undigested food backs into the system and there it rots and decays. From this festering mass the blood saps up all the disease germs, and at every heart beat carries them to every tissue, just as the water works of a city forces impure water into every house. The only way to cure a condition like this is to cure the constipation. Pills and the ordinary cathartics will do no good.

MULL'S GRAPE TONIC
is a crushed fruit tonic-laxative
which permanently cures the affliction. The tonic properties contained in the grape go into every afflicted tissue and creates strength and health. It will quickly restore lost flesh and make rich, red blood. As a laxative its action is immediate and positive, gentle and natural. Mull's Grape Tonic is guaranteed or money back.

ONE PRICE. J. P. GARDNER. 136-138 Main St.

W. A. COOK, M. D.

I CURE VARICOCELE

in one week without the knife or radical surgical operation, without pain or detention from business, and there are thousands of people who know from actual experience that the statements I make are true. I also treat

Blood Poison, Stricture, Hydrocele, Piles, Fistula and Reflex Disorders,

under a legal written guarantee to cure perfectly and permanently or refund every cent paid for treatment. Delays are dangerous, and if you need treatment at all you should accept none but the most reliable and trustworthy. I can furnish bank or personal references, as desired, and will take pleasure in doing so. Consultation at office or by letter is free and solicited whether you want treatment or not, and if you want treatment the terms will be entirely satisfactory to you. Address

COOK MEDICAL CO.,
116 South Main St. - - - Salt Lake City.
