All over this country are hundreds of people who are suffering from catarrh of the stomach who are wasting precious time, and enduring needless suffering. The remedies they try only temporarily palliate the distress, but never effect a cure. Remedies for dyspepsia have multiplied so rapidly that they are becoming as numerous as the leaves of the forest, and yet dyspepsia continues to flourish in splie of them all. This is due to the fact that the cause of dyspepsia is not recognized as catarrh. If there is a remedy in the whole

range of medicinal preparations that is in every particular adapted to dyspepsia, that remedy is Peruna. This remedy is well nigh invincible in these cases. Dr. Hartman, President of The Hartman Sanitarium, Columbus, O., says: "In my large practice and correspondence I have yet to learn of a single case of atonic dyspepsia which has not either been greatly benefited or cured by Peruna."

WITH PLACE IN CABINET.

Passes Resolution Against Listing Undeveloped Mines or Prospects-Radical Changes in Laws Suggested.

Boise, Idaho, July 24 .- At this morning's session of the International Mining congress the committee on credentials reported and the report was accepted.

The congress adopted the following resolution offered by President Prince: "Resolved, That the magnitude and mportance of the mining industry, which has now reached over a billion of dellars of annual product, calls for the establishment of a national department of mining, the chief officer of which shall be a member of the President's cabinet.

"Resolved, That the Congress of the United States be respectfully requested to provide by law for the locating and working of mines of the reserved min-erals-gold, silver and quicksilver-on Spanish and Mexican land grants." Another resolution adopted provides:

"Resolved. That in the opinion of this International Mining congress it s not to the best interests of mining that undeveloped mines or prospects be placed on the 'boards' or 'lists' of mining exchanges and offered for sale to the general public, but only mines which have been so fully exploited as to be well-established propositions should be offered on the boards."

The session today was enlivened by an animated discussion aroused by the reading of a paper, by Judge W. B. Heyburn, on "Amendment to the Min-ing Laws." The judge said, in speaking of the conflicts arising over locations because of the uncertainty of the strike of the vein: "I propose solution-that all end lines shall be parallel. When the first locator goes the recorder's office to file on his claims he should give notification that he has discovered a new ledge. Then let the nearest deputy mineral survey-or go to that vein, determine its exact ourse and then compel all locators to make their end lines parallel with the first claim."

The discussion covered the entire field of controversy. Some wanted the law let alone and others had different remedies to suggest. Mr. Fitzmaurice-of Colorado upheld Judge Heyburn. "If we can compel parallel end lines we will eliminate many of our greatest ills," said he. But he did not approve the "square claim" idea. "I believe in absolute title to mining claims."

C. J. Moore of Colorado followed. He concluded that Judge Heyburn's deductions were fallacious. He said it would be impossible to ascertain the trend of a vein until first a great deal Leavenworth, Kan., July 24.-Michael Kelly, an insane man, today at the ofof development had been done and all the ledges of a district sufficiently ex-

ATTEMPT TO KIDNAP.

Edward Dunning of Telluride Has Strange Experience in Butte.

Butte, Mont., July 24 .- One of th most mysterious and daring attempts to kidnap a man and take him out of the town was recorded here this afternoon. Edward Dunning, formerly of Telluride, Colo., who has been here a few days employed at the saucer blcycle track, was this afternoon approached on the street by two men who represented themselves as deputy sheriff and asked to go to the courthouse with them. They said he was Pat Hickey, a horse thief. Dunning refused to go and they left him. Later he went to the courthouse to

see if there was anything wanted of him. As he got in front of the building a hack with closed blinds drew up, and the two men who had previously accosted him sprang out and seized Dunning, attempting to force him into the hack. Dunning resisted and was alded by a crowd which quickly gathered. After a severe fight the would-be kidnappers, seeing the odds were too much mped into th lack and were quickly driven away. AN OILY HABIT.

There are people who become unconciously addicted to the butter habit that is to say, they like butter and gradually eat a little more as the months go by, until they find they have consumed, each meal, quite a quantity of fat, that they have not vitality

enough to properly digest. This indigested substance causes nore or less catarrh of the stomach and trouble with the bowels.

The remedy, of course, is to largely cut down the allowance of butter, and cut down the allowance of butter, and for two or three nights, sup nearly a quart of very hot water, just before go-ing to bed. This washes out the stom-ach and howels and gives them re-newed vitality. Then the person should, for a few mornings at least, rely on good rich cream, with Grape-Nuts, for breakfast, letting out the butter alto-gether. The cream gives all the fat needed. needed.

fice of the Robert Garrett Lumber company, in the business district, shot six people, killing one, probably fatally wounding another and more or less seriously wounding four others. He was himself finally killed by officers who tried to overpower him.

DEAD.

John R. Garrett, aged 40 years, junior member of the Robert Garrett Lumber company, died at hospital. Michael Kelly, aged 50, died after being taken to police station.

WOUNDED.

Dr. Charles McGee, aged 30, shot in in back and probably fatally wounded. Police Sergt. W. A. Dodge, shot in neck, wound serious. Joseph Falthager, policeman, shot in

hand, slight. Michael McDonald, detective, shot in wound slight.

Ike Healer, laborer at lumber yards, shot in hand, wound slight. Kelly had lived in Leavenworth for years and at different times had en-gaged in minor business enterprises. He was eccentric and during the presi-dential campaign in 1896 lost, his mind

entirely. At that time he was arrested for creating disturbances, and later threatened to kill Garrett. He was arrested and adjudged insane, Garrett and four others testifying against him.

After a year in the Topeka asylum Kelly was released. He had been acting queerly again

and had declared that he would kill the five men who had sent him to the asylum. Daily for two weeks past he has been practising shooting with a revolver at the Fort Leavenworth range. Today, shortly after 12 o'clock, he ap-peared at Garrett's office and, without warning shot him as he sat at his desk Garrett fell from his chair and into the doorway, when Kelly deliberately fired four shots more into the prostrate form. Leaving his victim for dead, Kelly ran fifty yards to the rear of the company's lumber yard and began reloading his revolver.

Presently he returned to the office to find Dr. McGee, who had been attracted by the shots, bending over Garrett. Leveling his revolver on the window sill, Kelly took deliberate aim at the physician from the sidewalk and fired The bullett struck McGee in the back at the spine and he toppled over near

here Garrett lay. Then followed an exciting street fight between the madman and officers who

came upon the scene. Kelly, flourish-ing his revolver, dashed through the lumber yard. He met Ike Healer, a la-borer, and shot him through the hand. A few yards further on he encountered Sergt. Dodge. The two exchanged shots as they ran. One bullet from Kelly's revolver struck Dodge in the neck, but not before he had shot him in the Kelly kept on running and was soon
