RICH LEDGE MATTER.

Mineral From the Dipper Mine Assaying $25,-000 to the Ton.

NOW RUNNING FOR THE MAIN ORE BODY

Fathers Light Reared in the Pit—Overland and Hercules—Republic Booming—Miscellaneous.

Tangible evidence of the mineral riches of the Cottonwoods has just come to light in the discovery in the Dipper mine of a piece of ledge matter running $25,000 in gold to the ton. As is generally known, the Dipper lies at the mouth of Little Cottonwood canyon and has been under process of development for something like three years past. Under trying circumstances its owners have delved into the matter with untiring zeal and energy, believing all the while that it was the making of a mine and that some day, sooner or later, this fact would be in indisputable evidence. Recently the ground was bonded to Mr. Davis, a Mercur mining man, since which time its development has been on a more systematic basis, and the discovery referred to above was made in following the ledge in the hopes of striking the body or body. If success is the meed of the industry Mr. Davis achieved in the property Mr. Davis will erect a mill for the reduction of the ore. The Dipper is owned by the Evans Brothers, City Treasurer Morris and other residents of Salt Lake.

NORTHERN LIGHT REARED.

It Was Not So Satisfactorily Handled in the Pit Today.

Developments in the pit today were not of a sensational nature, although a decided improvement over yesterday was generally expected was manifested in the set-back experienced by Northern Light which suffered to the extent of a stark end, without doing business, shrinked to 27 cents in the bidding, despite the great demand for it yesterday and many cents. At the close of today's call the paper was readily offered at 28½ cents, but at this figure no buyers materialized, and the stock contented itself with passing for a day at least without the record of a single transfer on the exchange.

Summed up, today's call was productive of a very fair amount of business, and generally good quotations. As on previous days Ajax stood stationary at 32 cents bid and 35 cents offered; $4.40, while Bullion-Beck whistled to the same old tune and refused to do business even with a bid of $4.30. Post Aces was also improved and stood in demand at 7½ cents a share, but holders were either quoth in their figures or refused to go under 8 cents a share, at which figure the stock was a close, lasting offering. Silver Shield held all its own as compared with the day before, the stock maintaining a firm position in the bidding and losing on it closed at best at 21.05 at 20½ cents better than the bid received. Galena was also firm but inactive, while Mammoth rallied a little and made sales at 12½, after which the stock fell back to its position of yesterday and remained so right up to the close. Overland looked better than before and was bid for at 24 cents with no offerings, while Sacramento, it was Ontario which ended still higher in the bidding and suddenly found itself wanted at 2.85, although none were offered at any figure. Sacramento improved slightly and did business at 45 cents, the demand for the stock at this figure remaining unsatisfied.

Good Central took the initiative in the sale of unlisted stocks and had its best bid at $1.60 as against offerings at $1. Chloride Point followed at improved figures and the stock was freely bid in all the way from 67 to 70 cents the latter figure being for future delivery. Others held its own in the bidding but did no business on the regular call, while Swansea was stationary and South Swansea sold at 2.25, around which figure it was in demand. Golden Eagle was an offering at 3 cents and Ophir Consolidated at 34 cents, neither participated in the trading, no bids making their appearance.

The closing figures were as follows:

LISTED STOCKS.

Stocks.	Bid.	Asked.
Anchor	50	
Alta	32	40
Bullion-Beck	3.90	4.50
Centennial-Eureka	22.00	26.00

TRANSFERS OF STOCKS.

Three hundred shares of Mammoth @ $1.80; 200 Bullion-Beck @ 4.00; 400 Mercur @ 8.50; 200 South Swansea @ $1.22½; 100 Chloride Point @ 67 cents, 600 @ 68; 1,000 Ophir @ 30 cents and 500 @ 34, buyer 60 days. Total shares sold, 3,800; selling value of stocks, $4,491.

REPUBLIC BOOMING.

Big Rush for the New Camp in the Northwest—The Republic Mine.

Spokane, Wash., April 1.—Mining men from from the north half of the Coeur d'Alene reservation last night report a daily rush to the new camp of Republic in Ferguson district. Four stages run daily and men are rushing in by the hundred—in wagons, on horseback and afoot. The mountain roads are in a frightful condition. Capitalists are coming in in large numbers and many locations are being made. Experts who have examined the Republic mine report that over $2,000,000 worth of gold ore has been blocked out. The townsite was put on the market two days ago and men stood in line for hours to buy lots. Mining men predict the town will have 10,000 population before next winter.

OVERLAND AND HERCULES.

Pushing the Shaft on the Former—Sample from the Latter.

Judge W. A. Sherman and Mr. Cyril E. Peyton came in from Mercur last evening after an inspection of the Overland, a property of great promise in Utah's celebrated gold camp.

The mine is being tapped by a double-compartment shaft, which has now reached a depth of 60 feet on its way to the 400-foot level. When the work is completed the new shaft will afford the company 1,000 feet of stoping ground, extending from the apex to the bottom thereof and the showing in the mine is highly encouraging, as much so as to warrant the work now being done, in the prosecution of which twenty-three men are employed. The company intends erecting a mill some time during the new year, so that the ore can be handled without any unnecessary inconvenience.

Mr. Peyton brought in a number of samples from the Hercules on Lion Hill, which property the gentleman made a personal inspection of. This mine adjoins the Chloride Point and has been guilty of very encouraging developments the past week or so. The samples brought in are from a new discovery and will be tested immediately for values.

Gold Bullion Receipts.

Gold bullion was deposited at the Denver branch mint by the mills and smelters during March to the amount of $1,607,895.97, which was $1085,009.85 more than the amount received from the same sources during March of 1897, when it was $512,856.12. The mint books, which were closed Wednesday for the month, show also that the amount of gold produced by the Colorado mines during this month was greater than the output for the entire first quarter of 1897. The aggregate deposits at the mint during January, February and March is $4,465,846.67. Last year the first quarter showed mint receipts of $1,936,284.57. The gain for 1898 is $2,-529,182.10.—Denver Post.

Gold Bearing Cement.

Capt. J. B. Meanell has returned from the Deep Creek mining district, where he has secured three tons of gold bearing cement which is to be shipped to New York City and Denver for the purpose of securing thorough test assays of its value. The ore was taken from shafts 25 and 32 feet deep on property owned and worked by the Buffalo Mining company. The ore was drawn on hand sleds to the rim of the adjacent gulch, a distance of five miles, then packed on pack animals three miles to the foot of the mountain, and then hauled to the railroad by team. If the ore shows the results expected the Bald Mountain district will become one of the greatest operations during the coming season.—Laramie Boomerang.

Coal Beds Near Collinston.

Robert Simpson, the owner of promising coal beds near Collinston, Utah, is in Ogden for the purpose of conferring with interest local capital therein. Mr. Simpson has 1,320 acres of coal ground, four miles from the railroad, developments on which have proved its great value. His men are at present working in a shale, though not in the vein which is the same being encountered in a 200-foot tunnel, and if the necessary capital can be raised, it is the gentleman's intention to push work with a vigor and soon put the coal on the market.

Quigley's Pumice Stone Deposits.

William Quigley, the main owner and operator of valuable pumice stone deposits at Black Rock, Utah, came up from the South this morning. The deposits are reported as looking well, there being a large and inexhaustible supply, from which the gentleman is constantly making shipments.

Paying Brick from Copper Slag.

The Mansfield Copper company, in Eisleben, Thuringa, has placed on the German market a paving brick made from copper slag. The slag is led directly from the smelting furnaces into iron moulds possessing a capacity of thirty-six bricks each. If it were poured into cold moulds and allowed to cool off in the air, it would become a useless glassy figure, to be well heated. If a good brick is to be obtained. Immediately after pouring, the moulds and their contents are thickly covered with sand and allowed to stand undisturbed for at least seventy-two hours. It is then time to make the bricks cool enough to be taken out of the mould with tongs, and they have then gone through a regular annealing process. After having fully cooled, each brick is tested by a strong blow with a hammer, and those resembling blowholes crack. These bricks are sold to be fully equal to granite, and possess the further advantage of regular shape and sharp edges so that they can be joined very closely.

Snake River Gold.

George Duncan was in town Thursday, bringing with him two ounces of Snake River gold. The two weighed six ounces and as the Snake River product goes about $19 per ounce, it figures up a handsome sum for three days work with two scrapers. The bank that Mr. Duncan is working is about twelve feet in depth and, so far as it has been prospected, the average is 50 cents per yard, and increases in value with depth. Bedrock has not been reached owing to the quantity of water interfering.—Caldwell, Ida., Record.

Dips and Spurs.

Silver 55½; lead $3.50.

After call today 500 shares of Dexter sold at a dollar per share.

The annual meeting of the South Swansea company will be held in this city April 5th.

Paymaster George Dern went out to Mercur this morning, to prepare for another distribution of monthly salaries.

The new Last Chance mill at Bingham is now reported in complete operation, the plant turning out 100 tons of concentrates daily.

Mr. L. H. Curtis, ex-manager of the Northern Light, is now fitting up a home for himself and family on the corner of Q and First streets.

L. H. Beason, who succeeded in closing the purchase of the Belcher group of mines near Baker City, Ore., for Salt Lake parties, is expected in to the city in a day or two.

Col. George W. R. Dorsey came in from Nebraska this morning, after a six weeks' absence from the city, during which time he has been looking into his farming operations.

With economy the watchword, the Northern Light company has moved its offices to room 16, McCornick building, an apartment formerly occupied by Messrs. W. C. B. Allen and C. H. Gallagher.

State Senator Ernest of Provo is an owner in the Silver King mine on Gold Mountain, from which returns of $250 per ton have been received. The mine is said to be possessed of a three-foot vein, which assays $250 in gold.

Butte Miner: Ed. Golden, who lost his right leg in the accident in the Alice mill last May, has been in California during the past five months visiting friends and recruiting his health. He returned Thursday looking and feeling better than for many years past. Ed is one of the oldest miners in Butte and will now take the position of sampler for the Alice company.

COMMERCIAL.

New York, April 1.—Business is almost at a standstill in Wall street, awaiting the publication of Spain's reply to the representations of the United States.

An underlying impression that Spain is prepared to yield if a suitable course of retreat can be found is what restrains the selling of stocks.

The market, therefore, fluctuating quickly but not widely, on a moderate volume of business.

Prices are below yesterday's level, but not below the opening level, as powerful support was brought to bear to rally the market.

The money and exchange markets are steady but the future of the money rate is dependent upon the political outcome.

Bonds were depressed but business was small and changes narrow.

NEW YORK MARKETS.

MONEY.

New York, April 1.— Money on call nominally at 2 per cent.

Prime mercantile paper 3@4½ per cent.

Sterling exchange weaker, with actual business in banking bills at 4.83@4.83.50 for demand and 4.80@4.81 for sixty days.

Posted rates 4.81@4.82 and 4.84@4.85.

Commercial bills 80.

Silver certificates 59½@59¾.

Bar silver 59¾.

Mexican dollars 48.

Government bonds weak, new fours registered, 122; ditto coupons, 122½; fours registered, 109; ditto coupons, 110; fives registered, 98; fives reg a year, 111½; ditto coupons, 111½; Pacific 6's of '95, 105.

CHICAGO MARKETS.

LIVE STOCK.

Chicago, April 1.

HOGS — Estimated receipts today, 18,000 head; left over 1,000; market active, 5@10c higher. Light, $3.85@3.90; mixed, $3.80@3.90; heavy, $3.75@3.85.

CATTLE — Receipts 2,500 head; steady. Horses, $3.60@3.85; cows and heifers, $2.25@4.00; Texas cattle, $3.75@4.75; stockers and feeders, $3.75@4.70.

SAN FRANCISCO.

PRODUCE.

San Francisco, April 1. — Wheat easy; December, 1.07½.

Barley — Weak; December, 71½.

JAMES TRUE GOES FREE.

Federal Court Jury Decides that He is Innocent and Renders a Verdict to that Effect.

The Federal court jury which has been hearing the evidence before Judge Marshall at Ogden, this week, in the case of James True, charged with the offense of robbing the Union Pacific train, returned its verdict at 10 o'clock last night. The verdict was one of not guilty and meets with very wide approval.

For the second time since his arrest and imprisonment True patiently and breathlessly awaited the result at the hands of a jury, on this occasion however, he is said to have been in great distress of mind, pending the jury's findings, notwithstanding his well known composure. He sat almost breathless waiting for the verdict. When it was announced and the court on motion of his attorney had ordered his discharge he made his way to the jury box and shaking hands with the jurors said repeatedly, "Gentlemen, you have made no mistake. I am an innocent man."

Budding Brigham City.

Regular Correspondence.

Brigham, March 31, 1898.—The first day of spring again—March goes out like a lamb and the mower has gone out today to resume the field work, the sprinkler is ready for the seed, and everything here at Brigham denotes that spring has come.

Speaking of the lamb-like manner in which March departs, reminds me that young Mr. Nichols was seen today herding, on one of the city lots, a small flock of sheep, which numbered twenty-seven ewes and thirty nice early spring lambs.

Messrs. McMaster and Frogreen are now starting the fine improvement on their business corner; the excavation for the foundation is being dug, and the work will be brisk from 7 a. m. to 6 p. m. on the ground. They contemplate moving their extensive lumber business into their present site.

Your agent, Mr. John Horsley, city recorder, went to Ogden to help defend Brigham City against the claims made by the Boise Ranch company to the land on which the Brigham City reservoir is situated.

John Anderson, the enterprising merchant of cheap-for-cash-goods fame, is keeping the lower floor of the massive Co-operative building warm with a twelve thousand dollar stock of well assorted goods, and is doing a good share of the business of the town.

Doctor James E. Talmage was here last Sunday, and addressed the Saints at the afternoon meeting, and in the evening he gave his lecture on Russia. The meetings were crowded to overflowing, and the speaker held the audience in close attention during the delivery of both address and lecture.

Doctor Carrington, looking in better health than formerly, passed through on his way to Logan today, in charge of Sheriff Fred Turner, where he goes to plead to an indictment charging him with prosecuting an abortion.

A new and very pleasing addition to Brigham is the free public library hall, twenty by thirty feet, erected by the Young People's Mutual Improvement associations, as a coat of paint. It stands just east of the Co-op. store and it is quite an ornament to the town, being nearly finished and well lighted. Three hundred and fifty volumes already adorn the shelves and it has only been in existence about seven weeks. The "Deseret News" was on its table, also other daily journals. The public telephone office is in the same building with the library, and Mr. John Reid is acting there in the dual capacity of operator and librarian.

The electric plant of Brigham City is now giving satisfactory lights and furnished as follows: First lights, sixty cents; second, forty-five cents; third, twenty-five cents—at $1.20 per month for three lights.

John D. Matthias of Brigham and Rudolph Korth of the North ward, out-going missionaries to Australia, were at the depot surrounded by their comrades who had come down to say good bye. The fathers of the young men were present also, and, Roman father-like, they watched their sons' actions. In one case the quivering of the chin of one of these same fathers, and the appearance of a handkerchief as the son turned away, showed a severe tension on the nerves of the parent. But the work still goes on, wives and families are left by men both brave and true—true to their homes—their dearest ties, and to their duty to mankind. A. J.

THE DROUGHT IN CALIFORNIA.

Salt Laker Talks of Migration of Cattle From the Coast.

The drought in California is a serious problem facing the cattle growers of that and neighboring states. The outlook, according to J. Keogh of Salt Lake City, includes the death of whole herds of cattle if some relief is not afforded.

Mr. Keogh shipped 1,100 head of mixed cattle from Idaho for sale at the Denver market, but was forced to arrive on Saturday. He is registered at the Albany.

"There has been a great scarcity of rain the winter in the country as there has been a scarcity of snow in the Western states," said the cattle dealer. "The feeding ground is thus rendered valueless and there will be no feed on which cattle in Arizona and California can subsist. Unless the railroad lines alter materially or the cattle get out they will perish. They are already talking of migrating to more favored localities, but the strict quarantine will have to be raised first. It is possible that the quarantine will be allowed to cut but little figure if the dry weather continues.

"This condition will not benefit the range cattle in Denver, however, will be busy with cattle this year. While it is a little early for shipments from the west, from the Idaho and Arizona are going to send large consignments to the local market. The drought in California, though, rather darkens the western prospects for a good year."—Denver Post.

Hog Millet.

Referring to the matter of the above-named grain, which has excited some interest among Utah farmers, and has been the subject of considerable correspondence through the columns of this paper, the "News" is now permitted to publish, for the information of those concerned, the following letter to Mr. Joseph Bond of this city, from Mr. Orville Hamilton of McCook, Nebraska, whose communication on the subject was the first that appeared:

McCook, Neb., 3-28-98.

Dear Sir:—Yours of the 24th June was received today, with thirty-three others asking for hog millet seed. I fed mine without threshing, and a good many others done the same, as there is no great headway to it. I expect it for you in 100 pound lots at two cents per pound. Send draft, or money order, and I will get it and put it on cars here for you. I usually cuts for sack to ship it in. If you want 200 pounds two sacks will hold it. They send thirty-five cents for the two sacks. I now twenty pounds to the acre. Send soon.

Yours truly,
WILLIAM COLEMAN.

Box 13, McCook, Nebraska.

PROVO.

PROVO, UTAH. APRIL 1, 1898.

Garden City Notes.

The American Fork City Council has raised the retail license from $3 to $10 per annum.

C. E. Jarvis et al have located the Iron Queen mine, situated in Santaquin mining district.

P. A. Jones of Clear Creek, will have a hearing on the charge of selling liquor without a license before Justice Booth tomorrow.

A social was given in the Second ward meeting house last evening in honor of the missionaries who have lately been called from the ward. A fine program was rendered.

A pleasant social was given at the Asylum last evening, in which a number of the patients contributed to the entertainment of other patients and invited guests.

There will be a sacred concert given in the Third ward meeting house in honor of Jasper Bird on Sunday evening. Elder Bird is about to leave on a mission. A contribution box will be at the door.

The surveying corps, which has been running the line between Provo and Ilwaka for the proposed electric power and light line between the two towns to be built by the Provo Electric Power Transmission company, has finished its work.

Jack Edwards a Rio Grande Western brakeman, had his foot crushed while coupling cars at American Fork yesterday. He was brought to Provo, where his foot was dressed by Dr. Allen. There is danger of a portion of the foot having to be amputated.

Members of John Rockhill's family of Spanish Fork, have applied for Thompson's Springs yesterday morning to bring home the body of their father, who died there Tuesday night. Mr. Rockhill was at Thompson's Springs looking after his sheep, the particulars of his death are not known.

In the case of Charles Biggs et al vs. Rudolph Bigler et al, defendants by their attorney, George Westervelt, have filed a demurrer to the complaint on the grounds: (1) That the court has no jurisdiction; (2) that the complaint does not state facts sufficient to constitute a cause of action; (3) that the complaint is ambiguous and uncertain; by reason of the description given of the property in dispute.

How to Prevent Pneumonia.

At this time of the year a cold is very easily contracted, and if left to run its course without the aid of some reliable cough medicine is liable to result in that dread disease, pneumonia. We know of no better remedy to cure a cold or cough than Chamberlain's Cough Remedy. We have used it quite extensively and it has always given entire satisfaction.—Ed. Ter. Chief.

This is the only remedy that is known to be a certain preventive of pneumonia. Among the many thousands who have used it for colds and la grippe, we have never yet learned of a single case having resulted in pneumonia. Persons who have weak lungs or have reason to fear an attack of pneumonia, should keep the remedy at hand. The 25 and 50 cent sizes for sale by Druggists.

Tempting Dishes

for the table are best made with

KINGSFORD'S OSWEGO

CORN STARCH

The best cooks claim it is unequaled in the preparation of delicious Puddings, Custards, Blanc Mange, etc. It costs no more than inferior brands, why not ask for it?

For sale by all first class grocers.

The lion-hunter needs steady nerves. If he misses the lion's eye, his life is surely lost. The lion-hunter is not the only man who needs steady nerves. The business man nowadays needs them. He must have them if he would bear the strain of business competition and be successful. A man with shaky nerves stands a mighty poor show in the business world of to-day, where he must hit the bull's-eye of fierce competition many times in a day. Steady nerves are dependent upon pure blood, and to have pure blood one must have a perfect digestion.

Dr. Pierre's Golden Medical Discovery goes to the seat of the trouble. It is not a sedative. It makes the nerves steady by furnishing them with proper nutriment. It corrects all disorders of the digestion. It invigorates the liver. It makes the blood rich and pure in nutriment. The nerves receive their proper nourishment from the blood and soon become strong and steady. Sunnyside, Ashe Co., N. C. "I take pleasure in writing you a few lines to let you know what your valuable 'Golden Medical Discovery' has done for me. I was entirely cured, and also suffered from bladder trouble, which was also cured by the 'Discovery.' I feel like a new man."

Dr. Pierre's Common Sense Medical Adviser is a book of 1,008 pages and over three hundred illustrations, some of them colored, all fully explained. This book is free. It has been selling for $1.50. Now you may have it in all its usefulness, and in strong paper covers, for 21 one-cent stamps, which pays the cost of mailing only, or in cloth binding for 31 stamps. Address, World's Dispensary Medical Association, Buffalo, N. Y.
