and the second state of the second state of the WALL'S STARLESS GROUP.

Tunnel Has Advanced Into Porphyry - Över Forty Feet.

Col, Wall's Starless bananza grows Col. Wall's Starless bonance grows bigger with every foot of development, says the Bulletin of Bingham. The Amanda tunnel has now been ad-vanced into the perhyry for a distance of over 80 feet and at this point the pock shows richer than any that has been some through, and is fully equal to the best grade found in the Utah Copper company's ground. The tunnel is being pushed ahead as rapidly as possible with three hifts. The Bulletin hest week published a

The Bulletin hast week published a few figures, merely to indicate the importance of the Starless developments It was stated that the Starless porphyry contained 55,000,000 tons of rock above the level of the Copper Belt track, and at \$1.50 per ton profit this meant a total profit of over \$80,000,000, Of course the operation of the inne will not cease with the extraction of the ore above this level, although at ' tons a day that would require 150 years. And it is known that the owner years. And it is known that the owner of the property will not be satisfied with a profit of \$1.50 per ton, but is likely to make it close to \$2.50. Fig-ured from a basis of 500 feet below the level of the guich, the inine will yield 110,000,000 tons of ore, or 10,000 tons daily for over 30 years. And at tons daily for over 20 years. And at \$2,50 per ton, the profit would be \$175,-000,000. All of which goes to show that figures are simply inadequate to express the wealth producing possi-

bilities of the Bingham porphyry belt. Another good strike is reported by

BINGHAM CENTRAE.

The Whitley Tunnel is Now in a Distance of 200 Feet.

Advices from Bingham state that at the Bingham Central, the Whitley tun-nel, now in 200 feet, is opening up some interesting ground. This tunnel is be-ing driven for the Red Elephant vein. interesting ground. This tunnel is be-ing driven for the Red Elephant vein, which is still 900 feet ahead, but some fine bunches of sliver-lead ore have al-ready been encountered, all the lime apparently being impregnated with mineral. The face of the tunnel is changing with every shot. The Jeff Davis tunnel is now in 550 feet and stringers of ore are cut every few feet. It is believed that the vein is not more than 59 to 75 feet ahead. The Bingham Central owns an im-

The Bingham Central owns an immense tract in the heart of the mineralized zone, and as the company is composed of some of the heaviest op-erators, with abundant means at their command, the ground will be most horoughly explored.

What it Costs in Bullfrog.

The Bullfrog Miner gives its readers he following list of prices prevailing In that Novada camp: Lumber \$130 per 1,000, wood \$30 per cord, coal \$80 per ton, hay \$00 per ton, flour \$7,50 per cwt, eggs 600 per dozen. bacon 25c, ham 25c, good steak 30c per pound, potatoes %c per pound, butter 40c per pound, sugar eight pounds for \$1, tea per pound 60c, coffee per pound \$1, tea per pound 60c, coller night, beer 40c, meals 75c, beds \$1 per night, beer 40c, meals 75c, whisky or beer per drink per bottle 75c, whisky or beer per drink 15c, saddle horse per day \$4, shave 25c, hair cut 50c, freight per bound from railroad 3 to 4 cents per pound.
