NEW STATE LAWS **GO INTO EFFECT**

Tuesday the Date for Many Changes in the Utah Statutes.

DAMPENS ARDOR OF DIVORCEE

Adventures in Matrimony Are Now Fraught With Many Conditions-Nine New Commissioners.

With more than a thousand acts, amendments, regulations, penalties, commissions and appropriations, which the last legislature passed, becoming effective tomorrow, the Compiled Laws of Utah will look like Joseph's coatof many patches and colors. In the office of the district attorney, the county attorney, and courts, these laws are being classified and the slips pasted in the legal volumes making them look like fat scrap books. This work is tremendous in its scope-from gas to Lawyers are studying the mass of new measures and so are the

mass of new measures and so are the state, city and county officials who are affected by the legislation.

In the volume of amendments there are many changes in the affairs of the state, county and city. Many of the loopholes in the statutes have been closed. But the lawyers are disecting their parts, examining the construction—like an expert trying to pick a lock—to see where a client can jump through and then snicker at the law. There are many measures, which were introduced, which are conspicuous by their absence. From the fly leaf to the their absence. From the fly leaf to the index, there is not a word on prohibition. The Des Molnes bill is missing as well as the ripper bill and several other bills. Even if these are missed there are acts and amendments which there are acts and amendments when say you shall not do this and you shall not do that to to the small boy and girl as well as to the men and women, which covers the ground fairly well.

NEW DIVORCE LAW. If all the contemptible, cruel and disagreeable persons have not already been divorced in the mad scramble during the last two months, they will have ing the last two months, they will have to wait a year now for an interlocutory decree. This amendment of the divorce laws of the state is considered one of the best measures enacted.

In the first place it abolishes the referee, who hears the testimony in the referee, who hears the testimony in the street, at the home, or not at all for that matter, and then makes his recommendations to the court. This spoils the slyness with which the young solety matron was wont to secure a decree of divorce and have the case suppressed from the newspaper reports. The competition for refereeship had assumed an aspect where they were cutting the price to get the cases. This law provides that the judge shall take the testimony in court and that the court shall make and file its findings and decree upon the testimony.

and decree upon the testimony.

The new law says that an interlocutory decree shall become absolute after the expiration of six months from the entry of the decree. It is unlawful under this act for either party to a under this act for either party to a divorce proceeding whose marriage is dissolved by the final decree to marry again within six months, which is the period allowed for an appeal from the final judgment to reopen the case.

Under this law the adventurer or adventuress, who comes here to live a year, then files a suit for divorce, secures the decree the next day and marries again the same day if there is a chance, is put to flight. In onea chance, is put to flight. In one-fourth of the divorces which have been granted within the last few months, the parties have contracted their marriages in different states and come to Utah to take advantage of

come to Utah to take advantage of the quick and casy divorce law. Within a year after the divorce is granted, the defendant in the case has a right to open it up and introduce testimony and bring a counterclaim and show the conduct of the plaintin if there is any ground. But for the convenience of all concerned, if a man and his wife get a divorce and later decide that they have made a mistake and effect a reconciliation they can marry grain within the limited time. again within the limited time. GROWTH OF THE COLONY.

The court records show that within the last two months the local divorce colony grew rapidly. There were 104 suits for divorce filed in the Third district court and 113 decrees were granted in the same period. This new law is meant to induce persons to think twice before they turn into the the they same before they jump into the "high seas

of matrimony."

If one is not careful under the new law he will be arrested for carrying concealed weapons. Before he can buckie on his revolver, hunting knife or put a sling-shot or brass knuckles in his pocket he must get a written permit from a peace officer. It was enacted to cover the foreigners in Bingham canyon, Snaketown, Bergertown, and Murray, where they get out and shoot up the town. The officers can confiscate a weapon and

out and shoot up the town. The officers can confiscate a weapon and
hold it as prima faci evidence.

An amendment of the vagrancy law
was passed which will make the undesirables leave town on a moment's
notice. It was drawn to rid the city
of women who walk the streets' and
who are immoral. A common drunkard is a vagrant under this law even
if he is a millionaire. If a person
gets locked out some night and is
caught sleeping in the barn or the
coal shed he is a vagrant and can
be punished. A person, if he has
property, and can be proved to be
lewd and dissolute, can' be punished
under the amended law.

HITS PAWNSHOPS.

HITS PAWNSHOPS. The pawnshops are arraigned under strict regulations in the new law. The proprietors are required to report all property bought and sold at the end of each day's business to the sheriff of the county as well as the police of the cities. Second-hand dealers are included in this as well. The act is severe on the purchasing of property from minors.

Under another law the employment

scener on the purchasing of property from minors.

Under another law the employment agencies are compelled to take out permits, and must have contracts to supply laborers. If any false information is given out in regard to employment, the proprietors, may be punished. The agents are required to keep a register of the persons who apply for work and it is to be kept open for inspection.

The county road commissioner and the state insurance commissioner, which were created by the last legislature are important. Col. George B. Squires has been appointed insurance commissioner and the scope of his work is far-reaching. The law was enacted to protect the policyholders from fradulent corporations. The measure requires reports on the capital stock, the surplus, the nature of the investments to protect the insured.

Willard Snow has been appointed road commissioner and he will have charge of all the street improvements in the county. He will be assisted by deputies and will serve poil tax notices. The county treasurer will coliect the money. He will also have the power to make special assessments for road improvements. Irrigalion districts are provided for dis-

trict elections the manner of giving notices and making assessments and describes the method, of issuing and discharging bonds.

Nine new commissioners were authorized by the legislature. The most important is probably the capitol building commission, which is now actively engaged in sending out notices of the special election on June 8 for an additional one milli levy to be used in building a state house. The increase in the tax levy is authorized for fifteen successive years.

The amended law on special improvements is regarded as too severe by many who claim that it will work hardship on the poorer classes who own property. It provides that when a special assessment is made on any property that when one payment becomes delinquent that the entire assessment becomes due and is a lien upon the property bearing interest.

The hack drivers are crying 'classiegislation' on account of the new law in regard to automobiles. The law requires a state registration. The state obtains the fee of \$2 for each machine and the city recorder issues the number for \$1. Under the law, however, the city cannot tax an automobile for hire or regular passenger automobiles. The hack drivers claim that there are as many automobiles that do a passenger business as there are hacks. The hack drivers claim that there are as many automobiles that do a passenger business as there are hacks. The city has heretofore licensed the automobiles engaged in business for hire, but this law repeals the section which covers it. The chauffeurs are required to register under the new act and are given a number. The city will loose about \$1,000 a year revenue from this law. The insurance agents who have heretofore been licensed by the city, contributing about \$4,000 a year to the revenues, are now under the jurisdiction of the insurance commissioner. On account of the loss of the revenue from the amendment of a number of laws, the city administration has come to much grief.

The West Side stockade can be closed under the new law without any trouble. After

keep about any premises a person known to be lewd. The violation of this law is punishable by a fine of not less than \$1,000 or more than \$10,000.

MANY CLAIMS FILED

Amount Set Aside for Payment is Greatly Exceeded by Total of Those Presented.

In the pouch of the claims committee of the city council, there are now eight claims for damages which resulted from the condition of the streets and the changing of the grades of streets and sidewalks. These claims aggregate \$28,500 while the fund allowed to cover \$25,500 while the fund allowed to cover such damages is only \$25,000. All these claims have been presented within the last month so and the prospects are that a dozen more will be made within a short time. It is estimated that the claims which will be made on account of the condition of the streets last winter will reach \$50,000 or \$60,000. The ter will reach \$50,000 or \$60,000. The city has about twenty cases in court already which are to be disposed of during this term of the district court. In the budget \$2,000 has been set aside In the budget \$2,000 has been set aside to cover the court expenses, such as witnesses and affidavits and documents. The claims which have recently been made as the result of the alleged negligence of Jake T. Raleigh, street supervisor, and City Engineer L. C. Kelsey. The list of claims are as follows:

Mrs. Eliza Langue, who fell in a hole on the north side of First South street between West Temple and First West street, asks for \$10,500 for her injuries which consisted of a broken leg and a bruised body.

Mrs. Annie Latimer asks for \$2,500 damages. The grade was changed in front of her property on Third avenue, between Canyon road and A street.

George C. Clark wants \$500 damages for personal injuries. He fell into an excavation in the steet at Fifth South and Sixth East streets, breaking his

and Sixth East streets, breaking his teeth and injuring his shoulder. L. Holbrook demands \$3,000 for dam-

ages to his property. He lives on B street. Between First and Second avenues, where the grade was changed. Mrs. Mary E. R. Webb asks for \$3,000 damages. Her property on Second avenue was injured by the change of the grade of the street.

avenue was injured by the change of the grade of the street.

Mrs. Ida E. Walsh has applied for \$3,000 for the depreciation in value of her property on Third avenue on ac-count of the change of the grade.

The Old Homestead company wants \$3,000 for damages to its property on

B street on account of the change of

B street on account of the change of the grade.

D. W. Jones, who lives on Third avenue, has asked for a settlement of a claim of \$3,000 for damages to his property on account of the grade.

On nearly every street where improvements were made last year, the property has been injured. In some places the grade has been raised leaving the houses far below the level of the street. Then again on the same street deep cuts have been made, leaving the houses on hills. Defective sidewalks and streets have caused no end of trouble.

end of trouble.

The residents in the southeastern part of the city are complaining about the grades and several claims for damages will be made to the city council.

ages will be made to the city council. The work is being carried out under the city engineer's office. Here is the way one resident sums up the situation:

"The people out here want me to tell you about that bugaboo railroad grade. On Harrison avenue and other streets out this way near Thirteenth street east, the sidewalk is so steep a goat couldn't use it, excepting in summer, and it goes nearly straight up like the side of a roof. A city engineer who knew as much as those in San Fran-

NOT DRUGS.

Food Did It.

After using laxative and cothartic medicines from childhood a case of chronic and apparently incurable constipation yielded to the scientific food, Grape-Nuts, in a few days.

"From early childhood I suffered with such terrible constipation that I had to use laxatives, continuously going from one drug to another and suffering more or less all the time.

"A prominent physician whom I consulted told me the muscles of the di-

"A prominent physician whom I consulted told me the muscles of the disgestive organs were partially paralyzed and could not perform their work without help of some kind, so I have tried at different times about every laxative and cathartic known, but found no help that was at all permanent. I had finally become discouraged and had given my case up as hopeless when I given my case up as hopeless when I began to use the pre-digested food,

Grape-Nuts. "Although I had not expected this food to help my trouble, to my great surprise Grape-Nuts digested immediately from the first and in a few days I was convinced that this was just

was convinced that this was just what my system needed.

"The bowels performed their functions regularly and I am now completely and permanently cured of this awful trouble.

"Truly the power of scientific food must be unlimited." "There's a reason."

walks-with steps, but Duder can't learn

PONDS ON SIDEWALK.

"When the sidewalk gets to Eleventh East street the grade is set down about three feet below the surroundings and it always fills up with water, like the corner of Main and North Temple streets. They did the same thing there and every summer shower covers the walks with mud and water.

"On other streets out here, where we had wooden sidewalks, instead of putting the cement in the same place, where every one of the property owners would be pleased, the city has insisted on changing the grade just enough to kill our trees, as has been done on the south side of Kensington avenue, where it looks as though a

avenue, where it looks as though a pestilence or a cyclone had swept through. Duder says he wants straight through. Duder says he wants straight lines. So do we, but we would rather see a little curve in a sidewalk that is well shaded by good trees, than see all the straight lines run by killing all the trees in front of our lots. We own the ground and we will live out here when this job is done."

For a mild, easy action of the bowels, a single dose of Doan's Regulets is enough. Treatment cures habitual constipation. 25 cents a box. Ask your druggist for them.

FAIR TO BE MADE AN EMPIRE EXPOSITION

President McDonald and Secretary Ensign Are Making Great Preparations for This Season.

According to the announcement made yesterday by Mr. J. G. McDonald, president of the Utah State Fair association, the fair this year will assume the proportions of an exposition and will be by far the biggest affair of the kind ever attempted by any one state. The remarkable development in Utah in the past few years in mining, farming, manufacturing and other industrial lines has been so rapid and substantial that the fair officials decided to have an exposition that would call the ac-tention of the entire country to Utah and the achievements of her people. President McDonald conceived the idea President McDonald conceived the ideat of an "Inland Empire Exposition," to be conducted by the fair association and he and Horace S. Ensign, secretary of the fair, have been at work for some time laying plans to make the event one long to be remembered. Gov. Spry is now making up the list of extra committees to assist in the

of extra committees to assist in the undertaking and it is also the intention to enlarge the present committee in order to insure success. With the organization of the committees completed ve work will be begun and no effort or expense will be spared to make the inland empire exposition an event of such magnitude and importance that Utah and her industrial development vill be brought to the attention whole country in an effective and bene-

for such an event is the opinion of all who have been approached on the matter and the entire population of the state is expected to join in the move-ment and make it a grand success.

entready announced for the fair arrangements have been made for some innovations of an appropriate nature. Historical features will be made prominent and every effort made to make the exposition live up to the very appropriate title given it. Many changes will be made necessary in the buildings and grounds and the plans for these are already under way. Literature announcing the special features and giving the details of the plans is now being prepared and will be ready for distribution within a few weeks. It is the intention to have every section and

the intention to have every section and every industry in the state represented in a fitting manner and arrangements are now under way to interest representative men in every county and in every line of industrial activity.

Assurances of support and co-operation have already been received and everything points to one of the biggest and most important events in the history of the state. The name salecel is appropriate and significant and if the people of the state work together and make it the success it should be the good that will come to the state can hardly be estimated.

The officials are now hard at work on the details and the progress of their work will be announced as fast as it is ready for publication. A publicity bureau has been organized in connection with the exposition and the public

tion with the exposition and the public will be kept posted on the new features as they are developed. With the oras they are developed. With the organization perfected every official will work to make the Inland Empire exposition one that will fully accomplish the work intended.

THE REV. SHELDON JACKSON.

His Death Occurred Last Week in North Carolina.

The Rev. Dr. Shelden Jackson, a well known Presbyterian minister, missionary and teacher, died at Asheville, N. last week, aged 75. He was no stranger in Salt Lake, as he was the founder of Sheldon Jackson college, subsequently changed to Westminster college. He was sometimes called the Alaskan Pathfinder and Reindeer Jackson, because he introduced the reindeer from Lapland into Alaska, which proved a wonderful benefit to the natives. He was a native of Montgomery county, N. Y., graduating from Union college in 1855, and the Princeton Theological seminary in 1858. Dr. Jackson then went into the missionary field. In 1877 he went to Alaska, where he was subsequently made superintendent of missions by the Presbyterian church and the government made him its edu-cational agent. Through his influence civil government was established in
