

Wednesday, April 12, 1871.

PRICE OF GOLD.
Bullion, \$100.00; Gold, \$100.00.
SALT LAKE CITY, April 12, 1871.
Closing at 10:00, Selling at \$1.00.

LOCAL AND OTHER MATTERS.

THEATRICAL.—The performance last evening deserved a better house than was given. "The French Spy" and "The Artful Dodger" were played in excellent style.

Light.—Miss Maffetta Ravel will appear in a role in which she has the reputation of being second to none. She will personate a variety of characters in "Jasmine, or the Pride of the Fourteenth," a piece which was written expressly for her. John de Bonay, Esq., in which she introduced her wonderful acrobatic drill, will be supported by Messrs. George W. Walcott, P. Margatta, W. H. Power, A. Thorne and other members of the company.

The bill should draw a good house. It consists of a four act drama full of startling effects, tableaux, and is entirely novel, never having been introduced here before.

TRADE.—The Spring trade has now fairly opened, and there is an unusual amount of freight arriving per the U. C. R. R. Our principal stores are doing a very good business, and there is an appearance of business activity in our streets. The weather is not so favorable as it was some months ago. The old and well established firms in the city will, without doubt, do a good business. It is a possibility of some others, who have started into business with the idea that they would be the world by the week, being disappointed.

MURDER AT LAKE.—Late Cheyenne, named Bayne, who was recently convicted by the District Court in that city and sentenced to be hung on the 21st inst., recently escaped from his place of confinement at Fort Russell. It appears that he was properly secured, and guarded by soldiers, and he had been in the hands of the guard since his escape. At last accounts his recapture had not been effected, and he was said to have started in pursuit but returned without success.

FRUIT.—Owners of orchards containing apricot trees have felt some apprehensions about the fruit during the cold weather. They have had a part of the time since Spring opened, but, however, we believe the fruit is not injured to any extent, and though the weather is still cool, yet it is probable that the fruit will escape frost. This cold weather is an advantage to the fruit. A backward Spring is generally followed, in this country, by a fruitful Summer, especially in the case of orchards.

PAVEMENT.—The work being done on the sidewalk of East Temple St. makes it rather unpleasant for pedestrians in that vicinity, as they stumble along over the torn up pavement and uneven ground where the workmen are engaged, but if we exercise a little patience now, we will feel the better in a short time when the sidewalks are again covered with the smooth granite walks. It is a good work, the gravel will soon become packed and the work will be done, which we suppose will be done.

MUSICIANS.—Do not forget the meeting of the Philharmonic Society to-morrow, Thursday evening, in the City Hall at 7:30 p. m., when claims will be commenced.

AN EXCELLENT PLAN.—Some of the Co-operative stores throughout the Territory are adopting a very judicious method of increasing their capital stock. When stock is taken and a dividend declared, instead of paying out the whole amount to stockholders a certain percentage is retained in the funds of the institution and applied to increase the value of the shares. This is an excellent mode of increasing the capital stock of branch associations, especially in places where it is scarcely increased by the sale of additional shares.

It is thought best by some to place a limit upon the amount of capital stock issued. This policy might be healthy were it according to the genius of co-operation, as understood by the Latter-day Saints, to confine its operations to the purchase and sale of merchandise. This, however, is not the case, as the principle is designed, ultimately, to reach every branch of trade and industry. There are hundreds, and we might say thousands, of directions in which the surplus stock of branch mercantile associations could be profitably applied. Each branch institution in the settlements, when successfully carried on, becomes the parent of many other associations to be wisely policy, which that will be the means of not only increasing the immediate stockholders but the future people in those places, by producing various sources of employment. There is one place, at least, in one of our western colonies, where this is being demonstrated. It appears to be no legitimate reason why the surplus stock of branch mercantile associations should not be used in the purchase of thrashing machines, the erection of sawmills, far more, in establishing building societies and in many other ways that would tend to build up and develop the country and make the people comfortable and happy. We think, therefore, that proper steps should be taken to increase the capital stock of the branch associations to be wisely policy.

Co-operative building societies have been proved, in various parts of the world, to be productive of more benefit to those who engage in them. By their means hundreds of working men in Edinburgh, Scotland, where they were first inaugurated, have become the proprietors of their own homes, who could never have become so by any other means. The improvement of their homes is a most important item for the consideration of the people. We know of no truer settlement in the Territory where societies on a small scale, are being successfully carried on, and will doubtless be productive of much good. In the place where the societies are formed in the following manner nine persons have been organized in a good substantial house in three years. This is each year, it being decided by ballot, or in any other way that may be agreed upon, who shall have the honor of being the first to build, and the means of doing so. In this building together, the means of doing so is but little aid and by the universal application of the principle all the log cabins in the Territory might be supplied by substantial and comfortable dwellings.

Operation can only be said to be in its infancy yet, but generally the people will be in it. They will learn that unity is strength and power, and that there is no other way that can be accomplished by a people who are co-operatively bound together.

DEBATING.—We expected that when this community would be brought into immediate contact with the world, many of the false ideas and prejudices imbibed abroad concerning this people would be dispelled, and our expectations are being even more than realized. The mines of this Territory are drawing large numbers of strangers here, and placing them in contact with every day expressing surprise that the world should be so ignorant concerning the "Mormons," and pleasure in finding, unexpectedly, such a well ordered state of society as exists here. Those persons who they leave here will take with them their false impressions, and thus the leaves of truth concerning a people who have been almost universally misnamed and lied about, will spread. Evidence in this Territory gives evidence here, and most persons admit that the Latter-day Saints are a people of peace, and that they are in the world yet, it is surprising to know that prejudice is disappearing, the truth concerning them becoming known.

Special Notices.

Will sell—An imported thoroughbred STALLION, for other stock.

WANTED—A few men, to cut and slide timber. Apply to J. J. Thayer, 1st Ward.

NEW YORK TRADE

PEOPLE'S VERDICT

Over Half a Million sold and
in use!

4,000 made and sold per week

SINGER'S

New Improved Silent
FAMILY SEWING MACHINES

The Best in the World,
Because all of them are in constant use, while
a very large proportion of other makes are not
used, owing to their being partially or utterly
impracticable.

It is simple, compact, durable, beautiful, quiet,
right-throwing, and capable of performing a
range and variety of work never before at-
tempted upon a single machine; using either
Singer's Sewing Machine, or from iron plates to
sew with equal facility the very finest and
most elaborate patterns, or anything between the
two extremes, in the most beautiful and sub-
stantial manner.

The New Improved Attachments for Hem-
ming, (any width) Binding, Knitbinding,
Machine Sewing, Gathering and sewing on (at
the same time) Self-Sewing, Cording, Tacking,
Quilting, Felling, Trimming, Binding, etc., are
novel and practical, and have been invented
and adjusted especially for this Machine.

Folding Tops and Cabinet Cases.
New designs of the unique, useful and popular
Folding Tops and Cabinet Cases, peculiar to
the Singer Machine, are in every variety of
Wood, such as black Walnut, Mahogany, Rose-
wood, Teakwood, and from iron plates to the
most elaborate patterns and finish. The Ma-
chines themselves are plain or highly orna-
mented with pearl and gold to correspond
with their tables or cabinets.

In the Singer work is fed or passed
through the machine, permitting the work to
be in a natural and healthy position. In many
other Machines the work passes from right to
left, or the reverse, compelling the operator to
strain his arms and shoulders, and thus causing
weakness of the back, etc.

The Singer uses a "HORIZONTAL
NEEDLE," which is not liable to break or miss
the stitches. Many other Machines use a long
grooved needle, which is liable to break and
to miss the stitches.

On the Singer, the Tension on both the upper
and lower threads is absolutely under the
ready control of the operator, thus rendering
the Machine always available for sewing
which is not the case with any other. Many
so-called cheap Machines are really worthless,
and so are many of their new purchases and
apparent advantages.

The SINGER is the
Oldest Practical Sewing Machine,
Being about twenty years in the market.
Having been constantly improved by the em-
ployment of the most skilled ingenuity of the
age and unlimited capital, it is now divided
of all unnecessary parts and possesses All the
Very Latest Inventions and Improvements.
It is so simple and practical, and will do all
its parts are practical and will do all that
is claimed for them. Some other Machines are
directly complicated, to do useless and silly
things, and thus are rendered liable to Com-
plaints and injury to the health of the operator.
Never gives trouble, and is readily and easily
managed by those who utterly fail on other
Machines.

WE make a specialty of Rubber and
Hiding Goods, and are prepared to supply
all classes of goods in our line for that trade.
