

NEWS OF THE WEST.

J. Youth seriously injured by an elevator at Colorado Springs.

Raising of a "beer blockade."

A Penitentiary Herds Wounded White Beagles a Small Peculiar Officer Dies.

The Salmon City (Idaho) Recorder says the strawberry crop in that vicinity is simply enormous, the vines being loaded down with fruit.

"There is a four hundred, not a mile of great gullies to be had in the country here or there," Mr. Justice the Salmon City (Idaho) Recorder.

Phil Shatto has passed his float mill to the Union Mill Co. of Colorado City for a period of five years. The machinery will be full train process will be put in use in time for the fall crop—Salmon City (Idaho) Recorder.

The six-year-old son of Deputy Sheriff Johnson, of the Canyon City (Ore.) penitentiary, shot himself Wednesday through the right foot while shooting a game pistol. The wound is not thought to be serious.

A crew of eight men made a mile of green wire to lay the south Africa mill from the Buffalo mine at Idaho City, and although the gold is not yet melted, it is believed the yield is \$50 per ton.

Fifteen tons more will be brought down during next week and another.

Salmon City (Idaho) Recorder.

The town is now set to trim the other side of the river, and there is about 4,000 pounds piled up on the platform were awaiting shipment yet. W. D. Evans has the largest consignment on the platform, his ship amounting to about 1,000 pounds.

The Salmon City (Idaho) Recorder says the town of De Laveau is in the process of a city. At the present time there are in the neighborhood of thirty wooden frame buildings situated in a cluster of construction, and probably twice that number of tents and shacks.

Allie Davis, Arizona, on Wednesday night, a 14-year-old boy named Bert Gouinon was thrown from his horse and lost both arms. The right arm was what surprised term a bone fracture, a combination of dislocation and fracture of the bone.

The boy was taken about two hours above the mine.

The beer blockade has been thoroughly tested and proved that it is passing through the city, says the Larimer County Journal. There was no kicking about the probable success of the blockade, as in 1888, but in this instance, about a month ago, that portion of the town which was under the road remained above the water.

The Denver News says that at the state land board meeting on Wednesday, H. F. Schellhardt was elected to the board for the purpose of acting for all. The lease runs for twenty years, and when the bill is found a royalty of 5 per centum to the state. A lease was granted to a lessee for ten cents per acre, H. T. McGraw on a section near Mason.

The county commissioners of Johnson, Wyo., have refused to cap the judgment against them secured by Judges Davison and Hallard, because the law very now is to the effect that they are not required to serve as jurors in the case against the invaders, the services being rendered principally in Larimer, where the invaders were taken for a hearing.

George McKay, an employee of the Colorado Fuel & Iron Co., a million dollar company, was severely injured yesterday night by being caught in the elevator. He was in the basement and jumped out the baggage part of the elevator. He got his body stuck half in and half out when the car started up. McKay was between the wall and the floor of the elevator. His legs were broken and he fell hard. The baggage floor broke and that saved him from instant death.

All day long the families of miners and their wives, who have been evicted by the miners' strike, have been walking up and down the streets of the city for the purpose of finding lodgings. The house rents for twenty years, and when the bill is found a royalty of 5 per centum to the state. A lease was granted to a lessee for ten cents per acre, H. T. McGraw on a section near Mason.

It is stated by the Parsons (Calif.) Progress that a young man who has no talent for anything but living near Santa Anna has been captured by the miners, who by whom he has exacted the oil from orange peels rapidly and at small cost. He has succeeded in getting from ten pounds of orange peel in the proportion of fifty pounds to one pound of good orange oil in a single minute, according to the Progress. It costs \$7 a pound. As soon as will yield to the value of \$500, the profits of such an industry will doubtless prove satisfactory to the founder. In this connection it may be mentioned that the oil is a valuable product. From oil of orange blossoms in the natural state can be profitably utilized in other ways.

Gold mining in Australia.

One of the great features of the gold-mining industry in New South Wales, at the present time, is the increasing use of galvanizing apparatus of various kinds. At the different mining districts there are many "waste" hills left behind by the work of the miners. These hills have been extracted. Hence these heaps of mine refuse have been allowed to remain neglected, except by Chinese miners, who have extracted gold in considerable quantities from these hills and gold dust, with the use of certain apparatus, the output of gold can be greatly increased, by sifting the auriferous particles which were formerly allowed to run to waste. In the northern coastal districts large quantities of fine gold are obtained by this method, and we believe, especially after a storm, and it is expected that by substituting machines for hand labor, the gains of the crowds of gold hunters will become considerably augmented.
