ALTA COPPER COMPANY.

N. A. Just Here on Business Connected With Enterprise.

In the city today is N. A. Just, president of the Shelly Banking company at Shelly, Idaho, who is here on a brief business trip in connection with the

business trip in connection with the Alta Copper company, in which he is an extensive shareholder. The Alta company was organized here several weeks ago to develop and operate an attractive group of mining-property in Cain canyon, near the base of Mt. Hindman, which is located in Custer county, about 45 miles from Mackey and 18 miles from Ketchum. Mr. Just says that in addition to fiv-quartz claims, the company owns eight placers, and all of them contain some excellent showings. A seven foot ledge hase been opened by a 150-foot tunnel in what is known as the American claim, and the values run from \$30 to \$60 in gold, silver and copper. Sev-eral open cuts have been run in other parts of the property exposing what is known as the Excelsion ledge. The company has recently located a power site, and the claims are cov-ered with an abundance of timber.

UNCLE JESSE COMPANY.

Special Correspondence.

Special Correspondence. Provo, June 17.—Articles of incor-poration of the Uncle Jesse Mining & Milling company were filed with the county elerk Monday. The capital stock is divided into 1.000,000 shares of the par value of 5 cents each. The officers are P. C. Adamson, president; J. C. Adamson, vice president; J. C. Bennett. secretary and treasurer. These, with Robert Anderson and Ben-jamin Eennett, form the directorate. The ground of the company is locat-ed in the North Tintic district.

Company Well Fixed Financially-Walker on Mason Valley.

Utth Copper is understood to be earn. Utth Copper is understood to be earn-ing \$125,000 monthly now, says George L. Walker In the Boston Commercial, and to have approximately \$1,000,000 of eash in bank. Its operating costs are being kept down to about \$2.09 per ton of ore. Whereas its recovery at the concentrator was 24 to 26 pounds a short time ago, it has recently in-creased, thus further reducing the cost of its copper.

A large stockholder says that within to fits copper. A large stockholder says that within 10 years Utah Copper stock, or its equivalent in some other company with which it may consolidate, will sell for \$150 per share. He declares that the company will have no problems except that the fluctuations in the price of cop-per will from time to time increase and that the fluctuations in the price of cop-per will from time to time increase and diminish its net earnings. It is also claimed that when its production amounts to one-half that of the Calu-met & Hecla, as it will very soon, it will be empoying only one-fifth as many men as the big Michigan company just named. It will be the small number of men and the large amount of mechani-cal power employed which will enable the Utah Copper company to make its product at such a very low cost. In referring to Mason Valley Copper, Mr. Walker says: "Mason Valley di-rectors have voted to issue 70,000 shares of treasury stock to stockholders at \$1 per share. As the company now has 700,000 shares outstanding subscription rights will aggregate 10 shares for each 100 shares held. The issue has been underwritten, This company's stock has been traded in recently around \$1,35 on the Salt Lake market. "The company owns a large property at Yerington. I visited it last August. Three tunnels have been driven to de-velop its ore bodies, which occur in a per will from time to time increase and

at Yerington. I visited it last August. Three tunnels have been driven to de-velop its ore bodies, which occur in a contact vein and as big replacement deposits in limestone. A considerable tonnage of low grade carbonate and sulphide ores have been developed, and deposits in limestone. A considerable tonnage of low grade carbonate and sulphide orese has been developed, and deposits which promise to make very large resources of 5½ to 6½ per cent sulphide ores have been entered. There is about 10,000 tons of this ore on the dump at the mine, and between 20,000 and 30,000 tons additional blocked out. It is probable that the high grade smelting ore would amount to several

smelting ore would amount to several hundred thousand tons if all the bodies so far encountered were fully developed

"For instance, one new crosscut was at last reports 12 feet in 6½ per cent ore without reaching the opposite wall. This ore body has been developed 150

steel galena. Mr. Auerbach explained that some extensive bodies of low grade ore have been developed in the Bear Top, which is equipped with a milling plant capable of treating 75 tons per day. The con-centrating ores carry about 15½ per cent copper.
