"Chicago, Aug. 26.—My Dear Gov. Cummins: In a carefully prepared address delivered before the reciprocity convention at Chicago, which the papers say you read. "lest you might be misreported," you used this language. The secretary of the freasury, in a speech recently delivered in Despute the control of him the justice to believe that he never read the treaty, for otherwise he has

detayed writing that I might ascertain where I was reported to have made such a statement. I knew I did not say it, or anything that could be so interpreted, but I was not so sure about the report. The occasion was an informal luncheon and the speech was impromptu, though not extemporaneous. I find that both of the Des Moines Republican daily papers represented at the luncheon reported me esented at the luncheon reported in

The French contract gave her an advantage in entering the American market over every other country on 10 articles, in consideration of which she agreed to apply her minimum tariff to our exports to France, except as to 10 articles, including horses, butter, eggs, cheese, leather goods, machines (machine tools), dynamos, etc. That is, if we would treat France better than we did any other rountry, France would treat as she did any

less than \$290,000,000.

While the report is not verbatim it is substantially correct. Whether I read the treaty before making the statement is relatively of little importance, but if the treaty as negotiated did not give France a reduction from our regular tariff rates on substantially 70 articles (to be exact, 69 articles, counting every variety manufactured as one article), then it may be conceded that I had not read it, and if it did not exampt 20 American articles from the provisions of the French minimum rate of duty, as follows: Horses, butter, lucerne and clover seed, fodder, east from, skins and hides prepared, boots and shoes and parts of same; belts and cords and other leather articles manufactured for machinery; dynamos, machine tools, dynamo ery: dynamos, machine tools, dynamo conductors and parts; arc lamps, known as regulators, sugar, chickory roots, green or dry; eggs, cheese, honey, porcetain, cardboard in sheets, then it y be conceded that I violated the perties of debate, though an in-mal talk at a luncheon is several

Attorneys usually, and lawyers always, exercise great care lest they incorrectly state the position of their professional adversaries. Certainly friends and adherents of the same political party will

AGRARIAN AGITATION.

It is Increasing in Russia. Especially in the Caucasus.

Washington, Aug. 71.-The census speech recently delivered in Des Moines, is reported as saying that the explanation of the refusal of the senate to consider the French treaty is that it gives everything to France and nothing to the United States. "The proportion of teachers in the Unite's States is smaller than in England and Wales, but greater than in Germany, France, Italy, Canada, Mexico or Cuba, and in the following states the proportion is greater than in England and Wales: Maine, New Hampshire, Vermont, Massachusetts, Connectical, District of Columbia, Ohio, Minnesota, Iowa, North Dakota, South Dakota, Nebraska, Kansas, Colorado, Nevada, Washington, Oregon and California. During recent years the proportion of teachers increased in this country to a greater extent than in England, Franca, Germany or Canada,

"The proportion of teachers in cities having at least 25,000 inhabitants is greater than in small cities or country districts.
